penter shop, 2 persons; 3rd story, wire shade frame store, no occupancy; 4th story, dwelling, 4 persons. EXITS: An interior wooden stairway, extending from the 1st story to top story (with fixed iron ladder to scuttle in roof); enclosed in wood lath and plaster partitions with wooden doors at openings; a fire escape on the front wall of the building, having fireproof openings along the course thereof, extending from the top story balcony to the 2nd story balcony; with EGRESS from the termination of the fire escape by means of counterbalanced stair to street. ROOFS of adjoining buildings to east 3 ft. lower, to west 10 ft. lower; and

WHEREAS, petitioner contends, in view of the light occupancy, that the existing means of egress are adequate.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, on condition that a fixed double-rung 45 degree iron ladder shall be provided from the top story to a (counterbalanced) scuttle in the roof, and granted as long as conditions as to use and occupancy remain substantially unchanged.

918-25-S.

PETITIONER—Frederick Mathesius, for Estate of B. Fischer, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—30-32 East 21st street, Manhattan.

APPEARANCES—

For Petitioner: Frank R. Hann.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(918-25-S)

WHEREAS, Frederick Mathesius, for Estate of B. Fischer, owner, filed, September 9, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 30-32 East 21st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 11, 1924, reads (Order No. 60723-LD):

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law \* \* \*. SEE NOTE:

"Among the defects noted on this fire escape are the following: No steps from floor to sill of openings leading to fire escape. No fireproof passageway leading to street from the termination."

and

WHEREAS, the building is fireproof, eight stories in height, 50 ft. by 110 ft. in area at 1st story and 50 ft. by 110 ft. in area above. OCCUPIED: 1st story, store; upper stories, salesrooms and tenant factories, 90 persons above 1st story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: An interior fireproof stairway, extending from the 1st story to roof; enclosed in fireproof partitions with kalameined doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the 2nd story balcony; with EGRESS from the termination of the fire escape by means of an iron platform connecting the 2nd story balcony with the 2nd story balcony of the building adjoining to the rear of the building with egress from this balcony by means of a stair to

# MINUTES

then by means of a fireproof passageway (in adjoining building) to street; ROOFS of adjoining buildings are approximately 50 ft. lower than roof of building in question; and

WHEREAS, petitioner contends that an additional means of egress from the termination of the fire escape has been provided by means of an iron stairway leading from the 2nd story balcony to the extension roof the premises to the rear.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the fire escape on the rear, on condition that the balcony shall be continued at the 2nd story level to the premises to the east, No. 34, terminating in the yard of the premises to the east, with egress therefrom through plain glass door and passageway direct to street; and that exits otherwise comply with the labor law in all respects.

1287-25-S.

PETITIONER—John J. Lattemann Sons, Inc., owner.  
SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—74 St. Edwards street, Brooklyn.

APPEARANCES—

For Petitioner: George Niebling, Jr.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(1287-25-S)

WHEREAS, John J. Lattemann Sons, Inc., owner, filed, December 4, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 74 St. Edwards street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 1, 1925 (Order No. 80042-LD), reads

"1. Remove the substandard fire escapes on the north, south and west sides of the building, or reconstruct same as per Sec. 274 of the Labor Law and Rule 3, Board of Standards and Appeals, adopted May 9th, 1924. Among the defects noted are the following:

"(1) Windows on course not fireproof, self-closing.  
"(a) No drop ladder in guides from lowest balcony to ground.";

WHEREAS, the building is non-fireproof, six stories in height, having a frontage of 98 ft. 8 in. on St. Edwards street and a frontage of 129 ft. on Sycamore street; OCCUPIED as a factory for the manufacture of shoes; 1st story, 25 persons; 2nd story, 25 persons; 3rd story, 25 persons; 4th story, 30 persons; 5th story, 60 persons; 6th story, 35 persons; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Three interior fireproof stairways, two extending from the 1st to top story and northwesterly stairway extending from the 1st story to roof; enclosed in fireproof partitions with fire doors at openings; three substandard fire escapes on, respectively, the north, south and west walls of the building, having unprovided openings along the course thereof, extending from top story to the 2nd story balcony with drop ladders to ground; ROOFS of adjoining buildings are two stories high; and

WHEREAS, petitioner contends that, without including the fire escapes, the building is amply provided with exits; that

the fire escapes are maintained structurally safe, and that they would be an advantage in an emergency; and

WHEREAS, the building is intended for single tenancy throughout for shoe manufacturing; and

WHEREAS, there are more than the required primary means of egress.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the fire escapes shall be maintained structurally safe and shall be provided with drop ladders in guides from the lowest balcony; and provided that a sprinkler system shall be so installed that the distribution of water from the nearest sprinkler head shall reach the window openings on the course of the fire escapes.

THE RESOLUTION:

(1712-21-S)

WHEREAS, A. F. Supeau, part owner, filed, December 30, 1921, a petition, with the board of standards and appeals, for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 80 West Houston street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, No. 29035-LD, dated December 10, 1921, reads:

"1. Arrange the fire escape on the rear of building and the openings leading thereto \* \* \*.

"Note:—Among the defects noted on this fire escape are

"No 60 degree connecting stairway between balconies. No stairway from top balcony to roof. No stairway from lowest balcony to ground. No passageway from termination of fire escape to street. No hand-rails on balcony openings. Windows on course not fireproof, not self-closing.

"2. Extend the interior stairway at the east side of building to the roof, as per Section 271 of the Labor Law.

"3. Provide an unobstructed passageway around hoistway leading from the foot of the stairway at east side of building to the street, said passageway to have a width of not less than the width of the stairway, as per Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, five stories in height, 21 ft. by 68 ft. in area in the 1st story and 21 ft. by 65 ft. in area above. OCCUPIED: Macaroni manufacture, cellar and 1st story, 4 persons; 2nd story, macaroni factory, 5 persons; 3rd, 4th and 5th stories, macaroni drying rooms; the means of egress consisting of an interior stairway extending from the 1st story to the 5th story, with double-rung ladder leading to scuttle in the roof, enclosed in wood partitions with wood and glass doors at the openings and a fire escape on the rear of the building, with balconies connected by 70 degree stairs,

# MINUTES

with egress across roof of adjoining extension in the 2nd story and balcony and a drop ladder to yard at the cellar level, with egress from this yard through cellar or 1st story; and

WHEREAS, this petition was granted by the board at its meeting on February 1, 1922, on certain conditions, among which was that the occupancy be limited to five persons above and including the 2nd story, and petitioner has since this time enclosed the interior stairway with fire-retarding partitions and has extended the interior stairway to the roof and fireproofed the windows on the course of the fire escape and has obtained permission from the owner of the adjoining property to use the extension roof of his building as a means of egress from the termination of the fire escape, on which roof he will place a drop ladder, and has complied with other conditions of resolution as to iron steps and gooseneck ladder to roof, and petitioner now requests that an increase of occupancy above the 1st story be permitted.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1, on condition that a fire escape with 60 degree connecting stairs be provided on the rear with gooseneck ladder from the top balcony to roof; that the skylight of 1st story extension be glazed with wire glass; that a portable hooked iron ladder of sufficient length to reach sidewalk shall be provided at the parapet wall on the roof of the adjoining one-story building on West Broadway; and that the occupancy shall not exceed 25 persons above the 2nd story; and denied as to Items 2 and 3.

1351-17-S.

PETITIONER—Samuel Rosenblum, for G. Seidenberg & Company, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—113-121 Prince street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Absent: Commissioner Guilfoyle.

THE RESOLUTION:

(1351-17-S)

WHEREAS, Wilfred C. Reid, architect, filed, September 6, 1917, a petition for variation from the requirements of section 79-b, labor law, to accept existing exit facilities as adequate; premises 113-121 Prince street, Borough of Manhattan; and

WHEREAS, said petition was dismissed May 23, 1918, and petitioner appeared, June 27, 1918, before the board of standards and appeals and requested that the case be reopened, which request was granted by vote of the board; and

WHEREAS, this petition was granted by a resolution of the board, June 27, 1918, on condition that the conditions set forth remain substantially unchanged; reopened, May 11, 1926, by vote of the board; and

WHEREAS, it appears that the premises consist of three non-fireproof buildings, six stories in height, with a frontage of 33 ft. 4 in. each and a depth of 95 ft. in 1st story and 80 ft. above; that there is an interior stairway in each building, extending from 1st story to roof, enclosed in stud, wire, lath and cement partitions, with fire doors at the openings; this stairway starts at 1st story front of building and at 3rd story is only 15 ft. from front fire escape; that

there is a party wall fire escape on the rear of No. 115-12 and one on rear of No. 111 and 113, consisting of balconies at each story above the 1st, connected by stairs at an angle of 60 degrees, with fire windows and doors along course of same, with counterbalanced stairs from 2nd story balcony to yard, and thence through adjoining premises to Wooster street; that there is a fire escape on the front of each building, consisting of balconies at each story above the 1st, connected by stairs at an angle of 60 degrees, with counterbalanced stairs to the street, with non-fireproof windows along course of same; that the building is equipped with a fire alarm signal system; that the building is occupied as a tenant factory, with not more than 80 persons in each building above 1st story; and

WHEREAS, it becomes necessary to remove the counterbalanced stairs on the 2nd story fire escape balcony at rear of No. 121 Prince street, which leads into the adjoining yard at north (No. 134 Wooster street); and

WHEREAS, the petitioner proposes to connect all fire escape balconies at rear of 2nd story, making one continuous balcony, and connect this continuous balcony with the 2nd story fire escape balcony on rear of Nos. 121-123 Greene street, also to extend the party wall balconies on rear of Nos. 113-115 Prince street at each story so as to include a window and provide regulation 60 degree connecting stairs from 2nd story to roof.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that buildings Nos. 121 and 117-119 Prince street shall be provided with a standard party wall fire escape at the rear of premises; that premises Nos. 113-115 Prince street shall be provided with a standard fire escape on the rear; that the entire premises from 113 to 121 Prince street at the 2nd story level shall be provided with a continuous balcony, with egress therefrom by an iron 45 degree stairs to fire escape on premises Nos. 121-123 Greene street; and that the windows throughout on course of fire escapes and balconies shall be standard in accordance with the rules of the board of standards and appeals in all other respects.

THE RESOLUTION:

(899-25-S)

WHEREAS, Robert Teichman, for Est. of Sol. M. Swartz, owner, filed, September 3, 1925, a petition with the board of standards and appeals for a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 121-3 Greene street, Borough of Manhattan; and

WHEREAS, this petition was denied by the board January 6, 1926, reopened May 11, 1926, and set for hearing June 8, 1926; and

WHEREAS, the order of the fire commissioner, No. 83 LD, dated August 15, 1925, reads:

# MINUTES

"1. Provide safe and unobstructed egress from lowest termination of the fire escape at rear of building, by constructing a fireproof passageway with unobstructed width of at least three feet throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law.

"2. Remove the sub-standard fire escape on the front of the building or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals adopted May 9th, 1924. Among the defects noted are the following:

- "1. Windows on course not fireproof, self-closing.
- "2. No 60 degree connecting stairs.
- "3. No drop ladder in guides from lowest balcony to ground."

WHEREAS, the building is non-fireproof, six stories in height, 50 ft. by 92 ft. in area at 1st story and 50 ft. by 50 ft. in area above. OCCUPIED: 1st story, shipping, 10 persons; 2nd story, manufacturing dolls, 13 persons; 3rd story, manufacturing dolls, 45 persons; 4th story, manufacturing hat-blocks, 16 persons; 5th story, manufacturing dolls, 18 persons; 6th story, manufacturing dolls, 27 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from 1st story to top story, enclosed in partitions of stud-metal lath and 3/4 in. of Portland cement mortar, with fireproof doors at all openings; a fire escape on the rear of the building, having fireproof openings on the course thereof, extending from the roof to the yard of adjoining building at west; ROOFS of adjoining buildings 12 ft. lower at north and south; and

WHEREAS, the petitioner now proposes an additional means of egress from rear fire escapes by connecting the rear 1st story fire escape balcony with the 2nd story fire escape balcony on rear of 119 Prince street; the petitioner has submitted plans showing the additional egress, also a copy of an agreement for reciprocal egress privileges duly signed by the trustee for the Estate of No. 119 Prince Street.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1, only so far as it affects the egress from the termination of the fire escape, on condition that the fire escape otherwise shall comply with the labor law requirements and be connected with the fire escape to the south, connecting with premises Nos. 113-121 Prince street by means of an iron stair not less than 2 ft. wide and not steeper than 45 degrees; and denied as to Item 2.

25-S.  
PETITIONER—Robert Kaplan, for 117-119 West 26th Street Corp., lessee.

THE RESOLUTION:

(962-25-S)

WHEREAS, Robert Kaplan, for 117-19 West 26th Street Corporation, lessee, filed, September 16, 1925, a petition for variation from the requirements of the labor law, as cited

in a decision of the superintendent of buildings, affecting premises 117-19 West 26th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered July 22, 1925, reads:

"With reference to application for Certificate of Occupancy for above premises we beg to state that certificate cannot be issued as building is over 4 stories in height and is not of fireproof construction."

and

WHEREAS, the building is non-fireproof, five stories and pent house (65 ft.) in height, 46 ft. 10 in. by 98 ft. 9 in. in area; subdivided into two sections by a 12 in. brick wall, with self-closing kalameine and wire glass doors at openings therein. OCCUPIED: 1st story, stores; 2nd story (east), manufacturing furrier, 3 persons; (west) printer, 3 persons; 3rd story (east), manufacturing furrier, 3 persons; (west) manufacture of furs and buttons, 5 persons; 4th story (east and west), manufacturing furrier, 6 persons; pent house, engineers' workroom and also as a studio, 6 persons; a total of 36 persons above the 1st story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to pent house story; enclosed in metal lath and cement plaster partitions with kalamein doors at openings; a fire escape on the rear of the western section of the building, having fireproof openings along the course thereof, extending from the main roof to the roof of the 1st story extension roof of No. 117; with EGRESS from the termination of the fire escape by means of a ladder from extension roof to yard and also by means of a connecting bridge to a fire escape on the building to rear, leading to a fire passageway to street; ROOFS of adjoining buildings to west 10 ft. lower, to east 80 ft. higher; and

WHEREAS, petitioner proposes to provide an additional means of egress from the termination of the fire escape (on the rear of the 1st story extension roof of No. 117) by means of an iron bridge leading easterly across the extension roof of No. 119 to the building to the east; petitioner contends that building No. 119 was formerly occupied as a factory, and contends, further, that the premises in question are suitable for factory use.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the petition be and it hereby is denied.

THE RESOLUTION:

(1140-25-S)

WHEREAS, Crocker National Fire Prevention Engineering Co., for American Railway Express Co., owner, filed, November 6, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 217-223 East 43rd

# MINUTES

street and Nos. 218-226 East 44th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 15, 1925, reads (Order No. 77460-LD):

"1. Enclose the interior stairway at east side center of 7-story portion of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the cellar to 3 feet above the roof, constructed as per Sec. 271 of the Labor Law, or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law."

and

WHEREAS, the building, facing on two streets, is fireproof, seven stories in height on the 43rd street and eleven stories in height on 44th street front; 125 ft. by 200 ft., irregular, in area; OCCUPIED as a garage and repair shop used exclusively for motor vehicles of owner of the premises; 1st to 10th story, average of 6 persons per story; 11th story, 33 persons; EQUIPPED with a fire alarm signal system. EXITS: Four interior fireproof stairways, extending from the 1st story to roof; stairways Nos. 1, 2 and 3 being enclosed in fireproof partitions with fireproof doors at openings; stairway No. 4 (east side center of seven-story section) being enclosed in fireproof partitions with a fireproof door at the top and bottom of each run; and

WHEREAS, petitioner contends that the only point on the floor, more than 100 ft. (the limit set by the labor law) from a legal exit, is directly at the entrance to stairway No. 4, where the distance is but 102 ft., and contends, further, that the existing three legal exits are adequate for the limited occupancy of the premises.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the openings be equipped with self-closing fireproof doors; and that the building otherwise shall be provided with not less than three interior regulation approved stairways.

THE RESOLUTION:

(1274-25-S)

WHEREAS, J. J. Gloster, for National Family Laundry Service Corporation, owner, filed, December 10, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 2, 4, 6 and 8 West 141st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 12, 1926, No. 92593-LD, reads:

"1. Extend interior stairway at southwest end from 1st to 2nd story and enclose same in fireproof material having direct passage to street, as per Section 270 of the Labor Law."

and

WHEREAS, the building, facing on two streets, is fireproof, two and three stories in height, 100 ft. by 99 ft. 11 in. in area; OCCUPIED as a laundry (3rd story being used as a restaurant for employees); 1st story, 75 persons; 2nd story, 75 persons; restaurant accommodates 90 persons; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Three interior fireproof stairways, enclosed in fireproof partitions with fire doors at openings; stairway No. 1 (southeast corner) extending from 2nd to 1st story; No. 2 (southwest corner) extending from roof to 2nd story; No. 3 (north center) extending from roof to street; and

WHEREAS, petitioner contends that there are two fireproof stairways leading from the 2nd story to the street, and that the existing means of egress are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the building otherwise shall be provided with required exits in accordance with the labor law; so long as the use and occupancy remain substantially unchanged.

WHEREAS, Levy & Berger, for Phoenix Commercial Company, Inc., owner, filed, February 11, 1926, a petition for variation from the requirements of the labor law, as set forth in an order of the fire commissioner, affecting premises at 550 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 1924, Order No. 60705-LD, reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law.

"2. Provide an additional means of exit from the 1st story and cellar, said exit to be located at the rear of the building in accordance with the provisions of Sec. 271 of the Labor Law."

WHEREAS, the building is non-fireproof, five stories in height, 35 ft. by 99 ft. in area at 1st story and 35 ft. by 80 ft. in area above. OCCUPIED: Cellar, storage and drying dry goods, 3 persons; 1st story, wholesale dry goods store, 9 persons; upper stories, tenant factory, mostly making apparel, 33 persons above the 1st story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to roof; enclosed in fire-resisting partitions with fireproof doors at openings; an interior iron stairway on the rear of the building, having fireproof partitions along the course thereof, extending from main floor to the 2nd story balcony; with EGRESS from the building to the roof of the fire escape by means of an iron bridge across the roof of No. 90 Crosby street; ROOFS of adjoining buildings same level; and

WHEREAS, petitioner proposes to connect the present termination of the fire escape (the iron bridge landing on

the roof of 90 Crosby street) by means of an iron bridge across the roof of 90 Crosby street to the 2nd story balcony of the fire escape on the front of 92 Crosby street, where there is a counterbalanced stair to street; 90 and 92 Crosby street being under same ownership as premises in question; and, in regard to Item 2, proposes to erect at the rear of the 1st story a ladder to scuttle in roof of the 1st story extension, affording egress to the existing fire escape.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 1, only so far as it affects the egress from the termination of the fire escape, *on condition* that an iron balcony shall be provided at the 2nd story to the roof of one-story building at No. 90 Crosby street, with egress from the roof to the balcony of the fire escape at No. 92 Crosby street, with egress therefrom by counterbalanced stairways to the street, also to the premises to the north, No. 552 Broadway, through plain glass openings; and *granted*, as to Item 2, *on condition* that a 60 degree stairway be provided from the cellar to the 1st story, continuing to the roof of the extension at the 2nd story level, with counterbalanced scuttle in roof; and *granted* only so long as conditions as to the use and occupancy remain unchanged.

178-26-S.

PETITIONER—Emery Roth, for W. A. R. Realty Corp., owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—20-22 East 57th street, Manhattan.

APPEARANCES—

For Petitioner: Julian Roth.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(178-26-S)

WHEREAS, Emery Roth, for W. A. R. Realty Corporation, owner, filed, March 1, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises at 20-22 East 57th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered February 25, 1926, N. B. Applic. 632-1925, reads:

"26. All windows, including show windows, should comply with Rule 503 of Industrial Code with panes not exceeding 720 square inches in area and not over 48 in. in any dimensions. Section 264 of Labor Law."

and

WHEREAS, the building is fireproof, 18 stories in height, 54 ft. by 100 ft. in area. OCCUPIED: 1st story, stores; upper stories as a tenant factory, approximately 70 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from 1st story to roof, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, there are windows in the street walls of the building, part fixed and part pivoted, on the 1st, mezzanine and 2nd stories, glazed with 1/4 in. plate glass; the maximum area of the glass on the 1st story being 8 ft. by 8 ft. and on the 2nd story being 7 ft. by 7 ft.; and

WHEREAS, appellant contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lowest two stories, and would also affect the architectural appearance of the building.

*Resolved*, that the board of standards and appeals does

# MINUTES

hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows on the street front on the 1st, mezzanine and 2nd stories, *on condition* that the openings shall be equipped with approved metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass; and that the requirements of the labor law shall be complied with in all other respects.

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(189-26-S)

WHEREAS, William I. Hohauser, Inc., for 315 Seventh Avenue Corporation, owner, filed, March 5, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 315 Seventh avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered February 18, 1926, N. B. Application No. 776-1926, reads:

"9. All windows must comply with Section 264 of the Labor Law and Rule 503 of the Industrial Code."; and

WHEREAS, the proposed building is fireproof, 21 stories in height, 78 ft.  $1\frac{1}{2}$  in. by 56 ft.  $11\frac{1}{2}$  in. in area; OCCUPIED as tenant factory, about 30 persons on each story; and

WHEREAS, the petitioner proposes to install plate glass windows in fireproof frames on both street fronts, the maximum size glass at 2nd, 3rd and 4th stories to be 5 ft. by 6 ft., at 1st story to be 9 ft. 6 in. by 10 ft. in area; and

WHEREAS, the petitioner contends that the windows on the first four floors will be show windows; that the rental value of these floors would be affected if compelled to cut up the windows into small lights.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows on the street front of the three lower stories, *on condition* that the openings shall be equipped with approved metal frames and sashes, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the labor law requirements be complied with in all other respects.

194-26-S.

PETITIONER—National Bridge Works, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—100 Review avenue, Long Island City, Borough of Queens.

APPEARANCES—

For Petitioner: Harry B. Royer.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

Negative .....

Absent: Chief Kenlon .....

THE RESOLUTION:

(194-26-S)

WHEREAS, National Bridge Works, owner, filed, March 11, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner affecting premises 100 Review avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated October 15, 1925, No. 86103-LD, reads:

"1. Provide continuous safe and unobstructed passageway at least 3 feet wide throughout their length leading directly to both required means of exits, cutting a door at least 3 feet wide through the dividing partition of storeroom and drafting room on the 2nd story, said doors shall not be locked, bolted or fastened during working hours, as per Sec. 272 of the Labor Law."; and

and

WHEREAS, the building is non-fireproof, two stories in height, 153 ft. by 229 ft. in area at 1st story and 95 ft. by 132 ft. in area above. OCCUPIED: 1st story, structural steel and machine shop, 60 persons; 2nd story, drafting, blue print, template and store rooms, 12 persons. EQUIPPED with a fire alarm signal system. EXITS: An open interior wooden stairway, extending from the 1st story to 2nd story, an outside open iron stairway, extending from 2nd story drafting room to the ground; there is also an auxiliary interior wooden stairway leading from 1st story to a blind store room on 2nd story; and

WHEREAS, the petitioner contends that the present exits are adequate; furthermore, due to the steel construction of the building, it is impossible to obtain an opening of 7 ft. in the partitions enclosing the blue print room on 2nd story.

*Resolved*, that the board of standards and appeals hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the space designated as drafting room *on condition* that an exterior iron stairs shall be provided and maintained on the outside of the building and the occupancy shall not exceed 8 persons (male employees).

THE RESOLUTION:

(1186-25-S)

WHEREAS, Samuel Rosenblum, for L. S. Briggs, filed, November 14, 1925, a petition for variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 41-5 Washington avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 14, 1925, reads:

"Order No. 76801-LD—

"1. Provide a second means of exit remote from interior stairway at 1st and 2nd stories, as per 3 of the Board of Standards and Appeals, adopted 29th, 1924.";

# MINUTES

WHEREAS, the building is non-fireproof, two stories in height, 100 ft. by 51 ft.  $\frac{3}{4}$  in. in area. OCCUPIED: 1st story, bank and stores; 2nd story, manufacturing of slippers, 45 persons. EXITS: An interior wooden stairway, extending from the 1st story to 2nd story, enclosed in wood with plaster partitions, with wooden doors at openings; ROOFS of adjoining buildings one story lower at east and south; and

WHEREAS, the petitioner proposes to construct an iron balcony from 2nd story window at center of court, extending over the roof of 1st story extension and leading to roof of one-story building adjoining at east; and

WHEREAS, this petition was granted by the board at its meeting March 2, 1926, on certain conditions, and petitioner requests a modification of these conditions as to fireproofing of windows opening on fire escape.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that a fire escape balcony shall be provided on the Flushing avenue front, embracing the five (5) center openings, with non-fireproof windows; that a counterbalanced drop ladder in guides shall be provided at both ends of the balcony; that the occupancy of the 1st story shall be restricted to the operation of a public bank; and that the building shall not exceed a height of two stories above grade.

THE VOTE TO RECONSIDER REOPENING AND MODIFICATION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(765-25-S)

WHEREAS, Charles B. Meyers, for Bermey Realty Company, Inc., owner, filed, June 23, 1925, a petition, with the aid of standards and appeals, for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 149 West 40th street and 561-565 Seventh avenue, Borough of Manhattan;

WHEREAS, the decision of the superintendent of buildings, rendered July 14, 1925, reads:

"1. Provide two lawful exits from each floor. Section 276, Subd. 3 of Labor Law."

WHEREAS, the proposed building is fireproof, 21 stories in height, 60 ft. by 59 ft. 3 in. in area; OCCUPIED as office and 25 per cent factory use; about 45 persons on each floor; EQUIPPED with a sprinkler system and a fire alarm system. EXITS: An interior fireproof stairway, extending from the 1st story to 17th story, enclosed in fire-

proof partitions with fire doors at openings; a fire tower from ground to roof; ROOFS of adjoining buildings 17 stories lower; and

WHEREAS, the petitioner proposes to erect a 21-story fireproof building, to provide a fire tower opening to each and every story as one means of exit; one interior fireproof enclosed stairway opening to each story up to and including the 17th story as a second means of exit; he claims that each floor above the 17th story is less than 2,500 sq. ft. and is further reduced by the required height-zone setbacks of the street wall, to such an extent as to make it impracticable for renting purposes if he were compelled to install two stairways to the upper four stories; he further claims that the said upper stories will be for office purposes only, and requests the board to permit the construction of this building, as proposed, as there will be no factory occupancy on the four upper stories but they will be provided with a fire tower, giving adequate means of entrance and exit; and

WHEREAS, this petition was granted by the board at its meeting October 13, 1925, on certain conditions, and petitioner requested a modification of these conditions as to the sprinkler requirements for bank in 1st story.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and the petition be and it hereby is granted, only so far as it affects the upper stories of the building (18th, 19th, 20th and 21st), on condition that the building shall be not increased in area and that there shall be no manufacturing use of any nature or description above the 17th story; that this portion of the structure shall be reserved exclusively for executive office use; that the interior of the building shall be constructed fireproof and that the requirements of the labor law shall be complied with in all other respects throughout the building; that the standpipe equipment shall be continued throughout the entire building and that the structure shall be sprinklered (100 per cent), except that the sprinkler system may be omitted for bank use area of 1st story; that not more than 25 per cent of the building shall be used for manufacturing; that the building shall comply with the requirements of the building zone resolution in all other respects.

54-26-S.

PETITIONER—New York Dock Company, owner.

SUBJECT—Application for reopening—modification—variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—Foot of Van Dyke street (Warehouses Nos. 326 and 327), Brooklyn.

APPEARANCES—

For Petitioner: G. A. Eweler.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and resolution modified.

THE VOTE TO REOPEN AND MODIFY—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(54-26-S)

WHEREAS, C. E. Hicks, chief engineer of the New York Dock Company, owner, filed, January 21, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises foot of Van Dyke street (Warehouses 326-327), Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 22, 1925, reads (Order No. 88717-LD):

"1. Provide an interior stairway from the 1st to 2nd story at east side of building as per Rule 3, Board of Standards and Appeals, adopted July 29th, 1924.

# MINUTES

"2. Provide a secondary means of exit from every floor of building at west end of south side of building as per Rule 3, Board of Standards and Appeals, adopted July 29th, 1924.";

and

WHEREAS, the building is non-fireproof, two stories in height, 120 ft. 5 in. by 140 ft. 8 in. in area; OCCUPIED as a distributing warehouse for the storage of magnesite cement; 1st story, 5 persons; 2nd story, 8 persons; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two exterior wooden stairways, extending from the 1st story to 2nd story; interior wood stair to scuttle in roof; ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner contends that the material stored is non-inflammable and that in view of the light occupancy the existing means of exit are adequate; and

WHEREAS, this petition was granted by the board at its meeting May 11, 1926, on certain conditions, and petitioner requests a modification of these conditions.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and the petition be and it hereby is granted on condition that horizontal exit in the division wall shall be provided at the rear adjacent to the existing bins; and that an exterior fire escape shall be provided on the westerly gable wall.

988-25-S.

PETITIONER—William F. Doyle, for 385 Madison Ave., Inc., owner.

SUBJECT—Application for reopening—correction—variation of labor law as cited in orders of fire commissioner and decision of superintendent of buildings.

PREMISES AFFECTED—385 Madison avenue, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

ACTION OF BOARD—Petition reopened and resolution corrected to read "6th" instead of "7th" story in fourth line of last paragraph of resolution.

THE VOTE TO REOPEN AND CORRECT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle ..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(988-25-S)

WHEREAS, William F. Doyle, for 385 Madison Avenue, Inc., owner, filed, September 25, 1925, a petition for variation from the requirements of the labor law, as cited in the orders of the fire commissioner and in the decision of the superintendent of buildings, affecting premises No. 385 Madison avenue, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated July 18, 1925, read:

(Order No. 83017-LF)

"An inspection of premises 385 Madison Avenue, Borough of Manhattan, shows that the following must be done to comply with Section 279 of the Labor Law:

"No. 1. Install an adequate interior electric fire alarm system in accordance with the rules of the Board of Standards and Appeals and the enclosed approved layout."

(Order No. 83018-LF)

"An inspection of the premises 385 Madison Avenue, Borough of Manhattan, shows that a fire drill should be established and maintained therein according to the requirements of Sec. 279 of the Labor Law. The labor law specifically charges the Fire Commissioner with the duty of enforcing the provisions of the law, as to fire drills.";

and

WHEREAS, the decision of the superintendent of buildings rendered March 29, 1926, in acting on request for certificate of occupancy, reads:

"1. All windows in exterior walls must be fireproof and self-closing and must not exceed 720 sq. in. per light.

"2. Doors along interior and fire tower stairways must be entirely fireproof. Glass not permitted.

"3. All partitions throughout the building must be built of incombustible material.

"4. Remove gate which obstructs egress from main stairway at first floor into main hall.

"5. All partitions enclosing stair halls must be of 4 in. terra cotta or 8 in. brick.

"6. All steel beams must have two inches of fireproofing.";

and

WHEREAS, the building is fireproof, 12 stories in height, 215 ft. by 100 ft. 4 in. in area. OCCUPIED: 1st story, stores; upper stories, offices and show rooms (mostly millinery) with a 25 per cent factory occupancy on the 4th, 6th and 8th stories, approximately 8 persons above the 1st story; pent house occupied for office. EQUIPPED with a two source automatic sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; closed in fireproof partitions with metal-covered wood doors at openings; and

WHEREAS, petitioner contends that there is installed the west stairway of the premises an interior fire alarm system, extending from the sub-basement to roof, with stations on each story; the fire alarm system connects directly to a central station, which in turn transmits alarm to headquarters; and contends further that the two source automatic sprinkler system covers all of the premises excepting a portion of the pent house; and

WHEREAS, this petition was granted by the board at its meeting May 11, 1926, on certain conditions, and it appears that an error was made as to the story mentioned, which should have been the 6th story instead of 7th.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects an area of 3,000 sq. ft. on the 7th story of building for occupancy use of light industrial needlework incidental to the conduct of millinery in a wholesale agency, and that the certificate of occupancy now in force shall be applied with in all other respects; as to orders of the fire commissioner, Nos. 83017 and 83018, the petition be and it hereby is granted on condition that the stipulations of the certificate of occupancy now in force shall be maintained.

 THE RESOLUTION:

(62-24-SA)  
 WHEREAS, Wm. F. Doyle filed, January 16, 1924, a petition with the board of standards and appeals for approval of the device known as the Kleen Heet Oil Burner; and  
 WHEREAS, a committee of the board inspected this device in operation at 139 Kosciusko street, Brooklyn, and recommended the device for approval:

Cal. No. 62-24-A.  
 Approval of the Kleen Heet Fuel Oil Burner.  
 June 25, 1924.

REPORT OF COMMITTEE:  
 A committee of the board, consisting of Chairman Walsh, Fire Chief Kenlon and Mr. Holland, visited the premises No. 139 Kosciusko street, Brooklyn, and inspected the Kleen Heet Burner in operation.  
 The burner consists of a cast steel fire pot, a combustion chamber, operating with a pump and fan set and using Grade B fuel oil.

Setting the burner on the grate bars would tend to develop direct or impinging flame and excess temperature to the effect of oxidizing the boiler plates or tubes, therefore, the burner should not be set on or at the grate bar level.

The committee recommends the approval of the

# MINUTES

Kleen Heet fuel oil burner pump and fan set for use with Grade B fuel oil.

(Signed) WILLIAM E. WALSH,  
JOHN KENLON,  
JAMES P. HOLLAND.

and

WHEREAS, this device was approved by the board at its meeting July 29, 1924, and January 19, 1926, for use with Grade A and B oil in domestic installations, and petitioner requests an amendment to permit the device to be used in all types of installations and to permit the use of burner without the pump and fan set and vacuum tank as a burner fed by gravity.

Resolved, that the board of standards and appeals does hereby approve the device known as Kleen Heet fuel oil burner, pump, fan set for use with Grade A and B fuel oil, as a unit or separately, when installed in accordance with the recommendation of the committee and the fuel oil rules of the board of standards and appeals.

THE RESOLUTION:

(1295-24-SA)

WHEREAS, Par-X-Oil Burner Corporation filed, November 1, 1924, a petition with the board of standards and appeals for approval of their device known as the ABC Oil Burner; and

WHEREAS, under date of December 21, 1925, the Stat Burner Corporation was substituted as the petitioner by the Automatic Burner Corporation of Chicago, the manufacturers of the ABC Burner; and

WHEREAS, a committee of the board visited the premises St. Leonard's Academy, 36 Brevoort place, Brooklyn, and inspected the ABC Oil Burner in operation; and

WHEREAS, this device was approved by the board at its meeting April 27, 1926, for use with Grade B fuel oil, and petitioner requests a modification of resolution to permit use with Grade A oil also.

Resolved, that the board of standards and appeals do hereby approve the device known as the ABC Oil Burner for use with Grade A and B fuel oil for domestic installations, on condition that the fuel oil burning equipment installed and maintained in accordance with the fuel oil rules of the board of standards and appeals.

Adjourned 6 p. m.

WILLIAM J. O'GORMAN, Secretary

# MINUTES

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, May 25, 1926, as they appeared in Bulletin No. 22, Vol. XI, are hereby corrected to read as follows:

463-21-BZ.

APPLICANT—Louis A. Sheinart, for Taft Buick Corp., owner.

SUBJECT—Application for reopening—to amend.

PREMISES AFFECTED—139 Broadway, Flushing, Borough of Queens.

APPEARANCES—

For Applicant: Louis A. Sheinart.

For Opposition: None.

ACTION OF BOARD—Application reopened and resolution modified.

THE VOTE TO REOPEN AND MODIFY—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....

Negative .....

Absent .....

THE RESOLUTION:

(463-21-BZ)

WHEREAS, A. Edward Richardson, for Taft City Garage, owner, filed, April 21, 1921, with the board of appeals, an application under the building zone resolution to permit in a business district the alteration of an existing building to be used as a salesroom and garage for more than five motor vehicles; premises 139 Broadway, Flushing, Queens; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its special meeting June 28,

\*Correction—Words "amendment (re: appeal from order of fire commissioner)" omitted in lines 3 and 4 of digest and words "to amend" substituted.

1921, after due notice by publication in the Bulletin of Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Broadway is a business district and Main street is a business district; and

WHEREAS, the decision of the superintendent of buildings rendered December 6, 1920, in acting on Alt. Application No. 3170-20, reads:

"The change and extension of this building for use as a service station is prohibited by the Zoning Resolution."

and

WHEREAS, the building is of brick and frame construction, three stories in height, 50 ft. by 125 ft. in area the 1st story and 38 ft. by 44 ft. 6 in. irregular above the 1st story as salesroom and garage for more than five motor vehicles and as offices and storage above; and

WHEREAS, there existed a stable for more than 50 horses on this street between the intersecting streets of July 25, 1916, which stable still exists, and no one appeared in opposition to the granting of this application and petitions endorsing this application having been filed from the Chamber of Commerce of the Borough of Queens and the Flushing United Association; and

WHEREAS, the following resolution was adopted by the board of appeals at its meeting June 28, 1924:

"Resolved, that the board of appeals does hereby grant a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that no gasoline tank shall be maintained on the premises that no repairs other than minor repairs and alterations shall be made; that no power machinery of any type shall be installed, and that the interior of the garage, walls and ceilings shall be covered with app-

# MINUTES

fire retarding material and that there shall be no connection between the garage and the business portion of the building above the 1st story; that the walls separating the show rooms from the garage portion of the building on the 1st story shall be unpierced except for one doorway, which shall be protected by an automatic self-closing fireproof door.”;

WHEREAS, the owner requests a modification of the resolution.

Resolved, that the board of standards and appeals does hereby modify the resolution adopted June 28, 1924, only so far as concerns opening between the accessory store and garage area not exceeding 3 ft. by 7 ft., equipped with self-closing fireproof door, the conditions in the original resolution otherwise to remain the same.

## RULES

### FIRE DRILL RULES, ADOPTED OCTOBER 5, 1923.

The following rules, governing Fire Drills, were adopted by the Board of Standards and Appeals at the special meeting held on Friday, October 5, 1923:

#### DEFINITION OF "FIRE DRILL."

The method and practice of the systematic and orderly evacuation of a building by its occupants in case of emergency, panic or fire in the least possible time—by the nearest safe means of exit—and the use of fire appliances which shall be provided for the extinguishing or retarding of fire and the safeguarding of human life.

Rule 1.

In all buildings as defined in Article 1, Section 10 of the Labor Law in which fire drills are required pursuant to Section 279 and in any other building in which the Fire Commissioner may be directed pursuant to the power conferred in section 775-B of the Greater New York Charter it shall be the duty of the owners, lessees or tenants to conduct fire drills monthly and at such other times as the Fire Commissioner may direct. For the purpose of conducting such fire drills the owner or tenant shall appoint from among their employees such responsible and dependable persons, male or female, who shall efficiently perform the duties of the various positions of the fire drill organization, as specified on the accompanying chart.

It shall be the duty of the owner or tenant to enter the blank spaces provided for that purpose in said chart and to fill in the names of persons so selected and post said chart and copies of the rules in a conspicuous place.

#### Rule 2. Duties of Foreman.

The Foreman or Person in Charge shall direct, enforce and have full charge of the "Fire Drill" in every factory on each floor. Each day before work is begun he shall see that extinguishers, fire hose, fire buckets, etc., are in readiness for use, exit doors are unlocked, aisles are free from obstruction, that stairways, halls, etc., are properly lighted, and shall remedy any dangerous condition found to exist. Immediately after work is commenced he shall check up the Fire Drill Organization list and note if the regularly assigned persons are present; if any are found to be absent, he shall assign other employees (if practicable) to perform their duties.

He shall immediately notify new employees of the existence of the Fire Drill Organization and give them the necessary instructions as to the duties they are to perform, etc.

He shall be familiar with the operation and location of the interior alarm signal box on his floor.

He shall listen for the test signal each morning at the appointed hour and in the event of the test signal not being heard he shall communicate with the superintendent or other person in charge of the building and advise him of the fact. The (Floor Captains) Foreman's orders are final as to the carrying out of the fire drill on his particular floor.

#### Rule 3. Duties of Watchmen.

The WATCHMEN shall see that all doors and windows are closed so as to prevent the spread of fire. The

# RULES

**WATCHMEN** shall be the only persons permitted to remain on the floor during the progress of a fire drill and do so at their own risk. For ordinary purposes only one watchman and a substitute shall be designated. In special cases, however, extra watchmen may be assigned by consent in writing from Fire Commissioner.

## Rule 4. Duties of Searchers.

The **MALE** and **FEMALE SEARCHERS** shall search all toilets, dressing rooms and emergency rooms used and frequented by their sex and all other portions of the floor and order all persons, except those authorized to remain, to leave the premises. They are to take care of and assist all persons who may faint or be disabled.

**SEARCHERS** shall leave the floor immediately after the last squad leaves.

## Rule 5. Duties of Street Alarm Box Runner.

The **STREET ALARM BOX RUNNER** shall be familiar with the location of the nearest city fire alarm box and know how it is operated.

In ordinary practice fire drills the **STREET-ALARM-BOX-RUNNER** shall report to the Foreman for orders and if his services are not required he shall promptly file out of the premises with the other occupants.

Only when a fire actually occurs on his floor, or when ordered to do so by the Foreman, shall the **STREET-ALARM-BOX-RUNNER** proceed to the street alarm box and send in the fire alarm.

## Rule 6. Duties of Fire Brigade.

The fire brigade shall have full charge of the operation of all auxiliary fire fighting apparatus and shall endeavor to extinguish, or at least hold in check until the arrival of the fire department, any fire that may occur. When it is necessary for the fire brigade to respond to different floors in the building they shall not use the stairways or fire escapes while the occupants are escaping from the premises.

## Rule 7. Duties of Exit Guards.

The **EXIT GUARDS** shall station themselves at all exit doors leading to fire escapes, stairways and other means of escape immediately upon the sounding of the alarm. There shall be two guards for each exit, if practicable; one to stand in the hallway holding back the door and the other directly inside on the floor. They are to keep the exit doors open and direct the movements of the persons using these exits and prevent congestion.

**EXIT GUARDS** shall remain at their stations until all of the occupants of the building have passed their station. Then close their doors and pass out of the building. Upon signal for the occupants to return, **EXIT GUARDS** shall take their designated stations and remain there until all persons have returned to their respective floors.

## Rule 8. Duties of Squad Monitors.

The **SQUAD MONITORS**, as soon as the alarm is sounded, shall see that the employees under their charge quickly form into line, two abreast, and numbering not more than thirty to each squad. They shall see that all aisles and passageways are cleared of obstructions.

**Note:** Chairs, stools, baskets, etc., should be pushed under or placed on top of work benches.

**MONITORS** shall proceed at the head of their respective squads to the exit assigned, and then march up or down the stairs or to other exits as directed by the **EXIT GUARDS**.

On reaching the sidewalk **MONITORS** shall keep their squads in order and lead them a reasonable distance from

the building, so as not to cause congestion and interference with fire apparatus. When the proper signal is given they shall return to their respective floors at head of their squads.

**MONITORS** will at all times see that those under their charge conduct themselves in a respectable and orderly manner.

## Rule 9. Holding of Drills.

**FIRE DRILLS** shall be held at least once each month at varied hours of the day, and all of the occupants shall participate therein simultaneously. Such drills shall conduct all occupants to a place of safety.

Where dual operation interior fire alarm systems are installed as permitted under Rule 11 of the interior fire alarm rules of the Board of Standards and Appeals, the fire drill conducted each month shall include all of the persons on the premises engaged at work for a factory, and drills shall be conducted at least twice each year in which all of the persons on the premises shall participate simultaneously.

## Rule 10. Duties of Owner.

It shall be the duty of the **OWNER, LESSEE OR TENANT OF THE BUILDING** or his authorized agent or their representatives to personally observe that the "Fire Drill" is held simultaneously on every floor of the building and the participation therein of every occupant of such building. Any **FIRE DRILL** in which all of the occupants do not participate shall not be considered as complying with the **LAW**, except as otherwise provided in these rules.

The person or persons representing the **OWNER, LESSEE OR TENANT** who supervises the **FIRE DRILL** of the building shall submit to an examination by the Bureau of Fire Prevention as to their experience and general fitness for such duties, and shall be so certified in writing to the **FIRE COMMISSIONER**.

## Rule 11. Duties of Engineer.

It shall be the duty of the **ENGINEER, SUPERINTENDENT** or other **PERSON IN CHARGE** of a building having an interior fire alarm system to test such system daily immediately after the beginning of business, and see that all apparatus operated by springs requiring winding are rewound after each alarm and kept in normal condition for operation.

Whenever it is necessary to test the fire alarm system at any other time of the day, owing to repairs, etc., being made, the **PERSON IN CHARGE OF BUILDING** will first notify all Foremen of the several floors of the intended test and likewise notify them when the repairs, etc., are completed. This precaution is taken to prevent confusion and excitement, also misunderstanding of alarm signals.

It shall also be the duty of the **PERSON IN CHARGE OF BUILDING** to sound the interior alarm system at irregular intervals, but not less than once each calendar month, for the purpose of holding practice fire drills. He shall keep on the premises a record of such drills showing the date when held and the required time for all occupants to reach the street or a point of safety outside the building.

The **PERSON IN CHARGE OF BUILDING** must immediately acquaint new tenants of the existence of the "Fire Drill" Organization and its purport.

## Rule 12. Registration.

The name and address of every person, corporation or co-partnership, that will, under professional service, carry on the trade, business or calling of establishing, maintaining or supervising the "Fire Drill" shall be registered in the Fire Department, which Department shall, upon evidence of fitness, grant a certificate to that effect.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO FUEL OIL RULES.

(217-21-SR)

(598-19-SR)

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, June 18, 1926, at 10 a. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules.

*Matter in italics is new. Matter in [ ] is old matter to be removed.*

### Rule 1. Definition.

The term "fuel oil" under these rules includes any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

#### a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

#### b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

### [Rule 33.] Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial plants, a Certificate of Qualification will be required as per Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow bricks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately ventilated direct to the outer air.

(e) [(a)] No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

### [GRADE A FUEL OIL.]

#### Rule 2. Manner of Storage for [Grade A] Fuel Oil.

Fuel oil, to be used for [commercial] heating and power purposes, shall be at all times contained in metal tanks in all openings or connections through the tops of the tanks.

#### Rule 3. General Location of Tanks for [Grade A] Fuel Oil.

(a) In all *except* fireproof buildings fuel oil storage tanks shall be buried below the floor of the lowest story

in the manner required for tanks outside of the building or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of wall separating building from subway and, if practical, tanks shall be placed in a lower position than the roadbed of subway.

### Rule 4A. Location and Capacity of Tanks for the Storage of Grade A Fuel Oil.

#### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space surrounding the tank formed by the enclosure walls and roof shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is adequately ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

#### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried below a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Section 1 (g) and (h).

[(b)] Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.]

[(c)] Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.]

#### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# PUBLIC HEARING

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above grounds, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

## Rule 4B [19.] Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, unless an approved anti syphon valve is used, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Material and Construction of Tanks for the Storage of [Grade A] Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Same shall be free

from physical imperfections, such as, laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. shell and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should the owner desire to use flat heads, these flat heads must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{4}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

### Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality before mentioned for cylindrical tanks, of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles at the builder's option.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of (6) inches center to center on these members.

(f) When structural reinforcing members are used together with braces, in order to reduce the effective length, the braces shall not be stressed higher than ten thousand (9,000) pounds per square inch taken on minimum net section.

(g) If structural members are omitted and the flat surfaces of the tank are braced entirely by means of rods or these members should not be spaced greater than twenty-four (24) inches center to center in all directions. Unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch taken in the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars; in other words, the bar will break before the connection will let go.

### Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality before mentioned for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of

# PUBLIC HEARING

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements in above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) [Rule 20 (a)] Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

[Rule 20 (b)] Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 5.

(b) All welded seams of plates shall be lapped or butt.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight metal to metal before welding and kept tight together during welding. Both inside and outside welds shall be of full 5 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For 3/16 inch heads, 1 3/4 inch flange.

For 1/4 inch heads, 2 inch flange.

For 5/16 inch heads, 2 inch flange.

For 3/8 inch heads, 2 1/4 inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all round. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall be staggered. At no point of a butt girth joint shall the seam on one side be offset with the seam on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and cut and

reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, in which they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 6. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half (1 1/2) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth (1/4) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; masonry or impervious reinforced concrete. Earthwork embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half (1 1/2) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

### Section 2. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanketing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half (1/2) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit, there shall be kept ready for use, a hand fire extinguisher of not less than two (2) quarts capacity suitable for extinguishing oil fires.

## Rule 7. Tests of Tanks for the Storage of [Grade A] Fuel Oil.

### Section 1. Inside of Buildings or Outside Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks,

# PUBLIC HEARING

shall withstand after being set in place, a hydrostatic *or oil* test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic *or oil* pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic *or oil* test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

## Section 2. Horizontal Tanks Outside Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic *or oil* test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

## Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

## Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 to 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for [Grade A] Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as possible, without sags, and, except as provided in Rule 11-e, shall be laid so that where practicable pipes shall pitch toward the supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted. *Except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.*

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. Hose shall be no longer than necessary.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic *or oil* pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in., the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) Where pressure systems are used an automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

### Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) Fill pipe shall be provided with a trap or seal carried within four (4) inches of the lowest point in tank.

(d) Fill pipe shall be made up with screwed flanged fittings and shall be oil tight and securely fastened in place.

### Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without cap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold same class of liquids is installed, vent pipes may be connected into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation.

# PUBLIC HEARING

ents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter (1¼) inches in diameter.

(d) Vent pipes shall be provided with weatherproof hoods and terminate outside the building above the roof surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to oil trucks by tight connections and filled by pressure, one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow into the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the coils shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Section 9. Valves and Control of Flow for Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge suction lines near each pump; in discharge line at each tank as near the tank as practicable, and in discharge lines near each burner.

## Section 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept closed when not in use.

## Section 11A. Pumps for Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankments, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a viscosity of not more than eighteen (18) degrees Baume

and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 11B. [Rule 24.] Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11A (a).

## Rule 12. Burners for [Grade A] Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. *In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.*

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer walls with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Other Than Domestic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of qualification from the Police Commissioner. A certificate of qualification will be required of each person who is directly in charge of the operation of the plant during each shift.

## Rule 16. Installation.

No fuel oil system shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil system shall be submitted to the Fire Commissioner, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## [Rule 17. Systems Prohibited Where Grade A Fuel Oil Is Used.

Systems fed by gravity or force systems are prohibited.]

## [GRADE B FUEL OIL.]

## [Rule 18. Manner of Storage for Grade B Fuel Oil.

Fuel oil to be used for domestic heating purposes where stored, shall be at all times contained in closed metal tanks.]

## [Rule 19. Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal

# PUBLIC HEARING

outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

## 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.]

### [Rule 20. Material and Construction of Tanks for Grade B Fuel Oil.

(a) Tanks shall be constructed in accordance with the requirements of Rule 5, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

(b) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.]

### [Rule 21. Tests of Tanks for the Storage of Grade B Fuel Oil.

All storage tanks located inside of buildings, either on or below the lowest floor level, or outside buried tanks, shall withstand a hydrostatic test for at least 30 minutes, of not less than twenty-five (25) pounds per square inch and shall show no leaks.]

### Rule 17. [22.] Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frame or cradle and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

### [Rule 23. Oil Level Indicating Device for Grade B Fuel Oil.

Gauging devices or test wells, the breakage of which would permit the escape of oil or vapor within the building, shall be prohibited. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

### [Rule 24. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11 (a).]

### [Rule 25. Piping for Grade B Fuel Oil.

#### Section 1. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel. Supply pipe shall be not less than one-fourth (1/4) inch in diameter, iron pipe size.

All piping shall be buried so far as it is practicable.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire retarding materials. Hose shall be no longer than necessary.

#### Section 2. Tests.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

#### Section 3. Fill Pipes.

See Rule 8, Section 5—(a), (b), (c) and (d).

#### Section 4. Vent Pipes.

See Rule 8, Section 6—(a), (b), (c), (d) and (e).

#### Section 5. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.]

### Rule 18. [26.] Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

[(b) See Rule 9 (a) for construction of valves.]

(b) [(c)] A remote or *thermostatic* control for shutting off the supply of oil to the burners shall be provided.

(c) [(d)] An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valve shall be set at not more than fifty (50) per cent above the maximum working pressure.

### [Rule 27. Burners for Grade B Fuel Oil.

Burners shall be of a recognized standard type approved by the Board of Standards and Appeals and shall be equipped with an overflow attachment so arranged as to shut off the flow of oil to prevent flooding.]

### Rule 19. [28.] Pilot Light.

Automatic systems *unless electrically ignited* shall be designed that the flame cannot be extinguished by operation of the automatic control valve and a [A] pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not be easily extinguished.

### Rule 20. [29.] Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately ventilated and if used shall be of such construction as to withstand the maximum temperature of which the oil burning device to be installed is capable.

(b) No damper for closing of more than eighty per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

### Rule 21. [30.] Fire Protection in Domestic Installations.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) Any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back or eight (8) feet from the front of the furnace shall be covered with approved plaster or other approved incombustible material. Above the furnace there shall be constructed a ceiling consisting of plaster board covered with 26 U. S. gauge sheet metal or three-fourths (3/4) of an inch of Portland cement plaster on metal lath; said ceiling shall extend four (4) feet beyond the sides and back and eight (8) feet from the front.

(c) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

### [Rule 31. Instruction Cards.]

See Rule 14.

### [Rule 32. Installation.]

See Rule 16.

# PUBLIC HEARING

## Rule 33. Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall not be used for domestic heating in buildings occupied by more than two (2) families. If used in buildings occupied by more than two families or in commercial buildings, a Certificate of Qualification will be required as provided in Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of concrete, concrete or gypsum, and not less than four inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately ventilated direct to the outer air.]

## 22. [34.] Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by

gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 23. [35.] Use of Grade A or Grade B Fuel Oil.

(a) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

(b) These Rules shall not apply to gas companies in the storage or use of fuel oil in the manufacture of illuminating gas for public use.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(d) These Rules shall take effect immediately.

# RULES

## SMOKING IN FACTORIES.

Adopted by the Board of Standards and Appeals,  
August 13, 1918.

### 1. PERMIT.

**Prohibition.** No person shall smoke, or carry a cigar or cigarette in any factory as defined in Section 1, Section 2, of the State Labor Law, nor in any part of a factory, within the City of New York, except in protected portions or special classes of occupancies specified in Rule 2 of these rules, and then only after the issuance of a permit by the fire commissioner.

It shall be the joint and several duty of the owner and lessee or lessees of the building containing such factories to cause to be posted in each and every hall, stairhall or room throughout the building, as well as in every elevator-car, in English, and also in such language or languages as the fire commissioner shall determine, a notice of such prohibition, and the penalty for its violation.

**Application.** Application for such permit shall be made only by the owner of the building on suitable forms to be furnished by the fire commissioner.

**Time Limit.** Such permit shall be for a definite period not exceeding one year, and shall not be renewed after expiration until a reinspection of the premises for which it is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

**Conditions.** The permit shall state the conditions under which, the hours between which, and the place or places in such factory where smoking may be permitted, and the permit shall be framed and kept posted in a conspicuous place in the factory.

**Revocation.** Violation of any of the conditions specified in the permit, in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the fire commissioner, and he shall not again issue a permit for the same premises until at least one year has elapsed.

## RULE 2. PERMISSIBLE CASES.

Smoking may be permitted in:—

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof or fire-resisting partitions, with all openings therein protected by self-closing fire doors, and, further, unless the building is of fireproof construction or equipped with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire-retarding material.

(3) Such chemical fire extinguishers as the fire commissioner may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

Blacksmithing or horseshoeing;

Boiler making;

Brick, terra cotta or artificial stone works;

Forge shops;

Foundries;

Iron, steel, brass or copper works;

Machine shops;

Smelting;

Stone or monumental works;

provided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the fire commissioner may direct are installed; waste materials are deposited in fireproof receptacles.

(3) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the failure to receive such notice is no excuse for not appearing.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of the failure of the appellant or petitioner to file necessary data by any other method of delay.

All hearings are held in Room 1013, Municipal Building, Manhattan.

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, June 22, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, June 29, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## THE RESOLUTION:

(1130-25-A)

WHEREAS, the Croker National Fire Prevention Engineering Company, for Chasmore Construction Company, owner, November 4, 1925, an appeal from an order of the commissioner, affecting premises 537-541 East 15th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 8, 1925, Order No. 85837-F, reads:

"1. Provide a separate and distinct system of *AUTOMATIC SPRINKLERS* throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24th, 1917 \* \* \*";

WHEREAS, the building, situated on the rear of the lot, is fireproof, four stories (41 ft.) in height, 82 ft. by 30 ft. in area; OCCUPIED as a woodworking establishment, 40 persons in entire building; and

WHEREAS, appellant contends that there is no heat in the building; that the building is amply provided with exits; there are city fire hydrants in the immediate vicinity; appellant proposes to provide, on each story, a 40 gallon chemical extinguisher on wheels.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that a sprinkler system shall be installed in accordance with the rules in all other respects, and only so long as the building remains in single occupancy.

-A.  
APPELLANT—Express Garage Corp., lessee.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—411-413 East 31st street, Manhattan.

## APPEARANCES—

For Appellant: J. V. Waite, Jr.  
For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

## THE RESOLUTION:

(171-26-A)

WHEREAS, Express Garage Corporation, lessee, filed, May 27, 1926, an appeal from an order of the fire commissioner, affecting premises 411-413 East 31st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 5, 1925, No. 31577-LC, reads:

"1. Remove all connection of disused gasoline storage tanks and seal opening.

2. Discontinue the use of 2nd story, rear, west side storage of lumber as shown on approval plan No. 25."

WHEREAS, the premises, divided into two sections by a fore wall, is non-fireproof; Building A being three stories and 28 ft. by 98 ft. in area, and Building B being two stories in height and 47 ft. by 90 ft. in area. OCCUPIED: Building A—1st story, public garage, 1 person; 2nd story, shop and furniture factory, 1 person; 3rd story,

office, 1 person. Building B—1st story, public garage, 1 person; upper stories (excepting the 4th), occupied as a furniture factory, 10 persons per story, the 4th story being occupied as a machine shop, 10 persons; and

WHEREAS, appellant contends, in re: Item 5, that when plan No. 271-25 was submitted to the fire department, due to an error, no furniture occupancy was shown in Building A; but contends that the garage portion of the premises is built of reinforced concrete and is cut off entirely from the rest of the building; in re Item 4, states that when plan No. 271-25 was filed, without authorization, it was stated that the old tanks were defective and were to be sealed; appellant contends, further, that two tanks, each for a different brand of gasoline, are necessary in the conduct of appellant's garage business; and

WHEREAS, a permit has been in force for the same use and occupancy since 1911.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that there shall be no vertical openings between the garage area on the 1st story and the structure above, and *on further condition* that all exits required shall be provided and maintained and that all required permits for the installation and maintenance of a gasoline system shall be obtained within sixty days.

217-26-A.

APPELLANT—Ebinger Baking Company, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—2290 Bedford avenue and 40 Snyder avenue, Brooklyn.

## APPEARANCES—

For Appellant: Walter D. Ebinger.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

## THE RESOLUTION:

(217-26-A)

WHEREAS, Ebinger Baking Company, owner, filed, March 13, 1925, an appeal from an order of the fire commissioner, affecting premises 2290 Bedford avenue, 40 Snyder avenue and northwest corner Albemarle road, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated February 24, 1926, No. 91282-F, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure."

and

WHEREAS, the building is non-fireproof, two stories (30 ft.) in height above grade; L-shape, having a frontage of 218 ft. 3 in. and a depth of 223 ft.; there being also a non-fireproof one-story portion at center east, 50 ft. by 180 ft. in area; a total area of approximately 31,000 sq. ft.; separated into five approximately equal units by 12 in. brick walls with automatic self-closing fireproof doors on each side of openings therein; OCCUPIED as a bakery, the northeast unit being used as a garage, 40 persons per story; and

WHEREAS, appellant contends that the building is equipped with a 100 per cent sprinkler system, supplied by a 10,000 gallon gravity tank and by three siamese; that a local fire alarm connection is installed; that there is an organized fire brigade instructed in the use of emergency fire

# MINUTES

fighting appliances, and contends, further, that there are several city fire hydrants in the immediate vicinity.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the premises shall be equipped throughout with an approved two-source sprinkler system, and that the building as subdivided now shall not be extended nor changed; that all horizontal openings shall be equipped with approved fireproof doors and all exits required by the labor law shall be provided and maintained, and that the building shall not be increased in height nor area.

288-26-A.

APPELLANT—Edward P. Doyle, for Watkins Garage Realty Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—740-748 Whitlock avenue, The Bronx.

APPEARANCES—

For Appellant: Edward P. Doyle.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(288-26-A)

WHEREAS, Edward P. Doyle, for Watkins Garage Realty Company, owner, filed, April 5, 1926, an appeal from an order of the fire commissioner, affecting premises 740-48 Whitlock avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated February 4, 1926, No. 32952-LC, reads:

"1. Construct 6 in. terra cotta wall with automatic fireproof doors across garage 120 ft. from front wall of garage as shown on approved plan 1117-24."

and

WHEREAS, the building is non-fireproof, one story in height, 100 ft. by 170 ft. and 180 ft., irregular, in depth; about 17,000 sq. ft. in area; OCCUPIED as a storage garage, 3 persons; EQUIPPED with a 4 in. standpipe, 3 outlets and sufficient lengths of 2½ in. hose to reach all portions of the floor area; and

WHEREAS, the appellant contends that the building is only one story in height, has less than 24,000 sq. ft. floor area, faces two streets and is easily accessible to firemen.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

294-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Market Managing & Operating Co., Inc., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—440-444 West 13th street and 854-856 Washington street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(294-26-A)

WHEREAS, Croker National Fire Prevention Engineering Company, for Market Managing and Operating Company,

Inc., lessee, filed, April 6, 1926, an appeal from an order of the fire commissioner, affecting premises 440-44 West 13th street and 854-56 Washington street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 30, 1925, No. 88570-F, reads:

"1. Provide a separate and distinct system of AUTOMATIC SPRINKLERS throughout building having TWO SOURCES OF WATER SUPPLY, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 1, 1919."

and

WHEREAS, the building is non-fireproof, five stories in height, 84 ft. 6 in. by 52 ft. 6 in., about 5,000 sq. ft., in area; OCCUPIED as a tenant factory; 1st story, stores; 2nd and 3rd stories, manufacture of boxes, total of 15 persons; 4th story, jewelry boxes, 8 persons; 5th story, patterns, 8 persons; and

WHEREAS, the appellant contends that the present occupancy has existed since 1920 without objection; that the lease expires May 1, 1927, the building will then be vacated and put to some other use; that it would mean a large expense and great hardship if compelled to install a sprinkler system under such conditions.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

296-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Realty Improvement Company, owner.

SUBJECT—Appeal from order of fire commissioner affecting premises 329 East 47th street, Borough of Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on conditions specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....

Negative .....

Absent: Chief Kenlon .....

THE RESOLUTION:

(296-26-A)

WHEREAS, Croker National Fire Prevention Engineering Company, for Realty Improvement Company, owner, filed, April 6, 1926, an appeal from an order of the fire commissioner, affecting premises 329 East 47th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 3, 1926, No. 90266-F, reads:

"1. Provide a non-automatic sprinkler system, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 1, 1919, and in the rules and regulations of the fire department and in connection therewith provide a complete fire alarm complete with Central Office connection."

and

WHEREAS, the building is non-fireproof, three stories in height, 25 ft. by 100 ft. 5 in., about 2,500 sq. ft. in area. OCCUPIED: Cellar, storage; 1st story, manufacture of printing inks, 5 persons; 2nd story, makers, 8 persons; 3rd story, sculptors, 5 persons;

WHEREAS, the appellant contends that the cellar is for the storage of ground colors and the 1st story

# MINUTES

manufacture of printers' ink; that no fire hazard exists; furthermore, in case of fire in the cellar, there is a stairway at the rear of cellar, also a stairway from areaway at rear of building, which provide adequate means of exit entrance; and

WHEREAS, there has been a permit in force for the same material and occupancy in the cellar since 1921, and there have been no changes in conditions.

Resolved, that the order of the fire commissioner be and hereby is modified, and the appeal be and it hereby is granted on condition that there shall be provided and distributed throughout the cellar story not less than eight gallon approved fire extinguishers; that the stair halls and stairway from the cellar to 1st story be enclosed in fireproof construction, with self-closing fireproof doors at each opening; that the stairway at the front of the building to the sidewalk be maintained free, clear and unobstructed.

6-A.  
APPELLANT—John J. Gilmartin, for Thompson & Norris Co., owner.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—239-259 Gold street, Brooklyn.

APPEARANCES—  
For Appellant: John J. Gilmartin.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

VOTE—

Negative ..... 0  
Absent: Chief Kenlon ..... 1

## RESOLUTION:

(307-26-A)

WHEREAS, John J. Gilmartin, for Thompson and Norris Co., owner, filed, April 9, 1926, an appeal from an order of the fire commissioner, affecting premises 239-259 Gold street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 25, 1926, No. 91079-F, reads:

"1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, attics and roofs), placed within main stairway enclosure."

WHEREAS, the building, facing on two street fronts, is fireproof, one story (19 ft.) in height, having a front lot 205 ft. on Gold street and 37 ft. on Concord street, a total area of approximately 17,000 sq. ft., subdivided into two sections of approximately equal area by a terra cotta wall, with one opening therein providing a sliding fire door; OCCUPIED as a paper warehouse for persons; and

WHEREAS, appellant contends that the building is low and amply provided with means of ingress and egress, and proposes to install an additional fireproof door on the side of the openings in the division wall.

Resolved, that the order of the fire commissioner be and hereby is modified, and the appeal be and it hereby is granted, only so far as it affects the one-story structure on Gold street front, on condition that this building be subdivided by a 12 in. terra cotta wall, provided with not less than two openings, equipped with automatic fire doors on each side of said openings; and on condition that the building shall not be increased in height, area and so long as conditions as to occupancy and use remain substantially unchanged.

## BUILDING ZONE CASES.

1425-24-BZ.

APPLICANT—William F. Doyle, for Charles Milgrim, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a residence district the maintenance of a factory use of an existing building (previously denied by the board).

## THE RESOLUTION:

(1144-24-BZ)

WHEREAS, John J. Dunnigan, for Thomas Keenan, owner, filed, September 18, 1924, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 560-562 11th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 11th street is in a residence district; Eighth avenue is in a business district, and that 12th street is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 2, 1924, reads (Applic. No. 17815-24):

"Denied. Proposition contrary to the Zone Resolution, Art. II, Sec. 4:

"A garage for more than five motor vehicles in a business district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 50 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

209-26-BZ.

APPLICANT—John J. Dunnigan, for Tremont Monterey Corporation, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a residence district the alteration and conversion of use of dwellings to business purposes on the first story.

PREMISES AFFECTED—202-206 East Tremont avenue, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan.  
For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(209-26-BZ)

WHEREAS, John J. Dunnigan, for Tremont Monterey Corporation, owner, filed, March 12, 1926, an application, under the building zone resolution, to permit in a residence district the alteration and conversion of use of dwellings to business purposes on the 1st story; premises 202-206 East Tremont avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Grand boulevard and Concourse is in a residence district and that East Tremont avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings rendered March 11, 1926, reads (Alt. Applic. 68-1926):

"1. Alteration and conversion of dwellings in residence district to be used for business purposes is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the premises consist of a plot of ground 5 ft. by 110 ft. in area; upon the front portion of which are two three-story frame dwellings; it is proposed to alter the existing frame buildings by extending the 1st story to cover the entire plot (50 ft. by 100 ft.), using the 1st story for three stores and the upper portion of the premises as dwellings; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals do hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as affects the 1st story of these premises for use and occupancy as retail mercantile shops or stores, *on condition* that the entire remainder of the premises shall be restricted to conforming dwelling uses; that any signs erected shall be restricted to the name and title of the business and shall be restricted as to location to the cornices of the store or the plate glass show windows of the store fronts; that all permits required shall be obtained within six months and the work completed within one year from the date of this action.

300-26-BZ.

APPLICANT—S. Stanwood Menken, for 110 West 42nd Street Corporation, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7c of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a building to be occupied for business purposes.

PREMISES AFFECTED—664 Fifth avenue, Manhattan.

APPEARANCES—

For Applicant: S. Stanwood Menken and Allan Goldhammer.

For Opposition: E. Stratton.

## THE RESOLUTION:

(300-26-BZ)

WHEREAS, S. Stanwood Menken, for 110 West 42nd Street Corporation, owner, filed, April 7, 1926, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a building for business purposes premises No. 664 Fifth avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fifth avenue is in a business district, and that both 52nd street and 53rd street are in a residence district; and

WHEREAS, the decision of the superintendent of buildings rendered March 26, 1926, reads (N. B. 150-26):

"1. Use of part of building extending into a

# MINUTES

dence district should comply with Section 3, Art. II, of the Zone Resolution.”;

WHEREAS, the proposed building is to be of fireproof construction, five stories in height, with a frontage of 25 ft. and a depth of 120 ft.; to be occupied as a building for stores and showroom purposes; and

WHEREAS, the board deemed that applicant was entitled to relief under the provisions of sections 7b and 7c of the building zone resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the extension from the business to the residence use area shall not exceed 20 ft. in depth and a width of not more than 25 ft.; that the northerly gable wall shall be pierced throughout its entire height and length; that the requirements of the building zone resolution shall be complied with in all other respects; that all permits necessary for the prosecution of the work shall be obtained within six months and the building completed within eighteen months from the date of this action.

23-26-BZ.

APPLICANT—Henry J. Nurick, for Harry Gare, owner. SUBJECT—Application (re: decision of superintendent of buildings), under sections 7a, 7e and 21 of the building zone resolution, to permit in a business district the extension of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—316-320 Saratoga avenue, Brooklyn.

THE RESOLUTION:

(13-26-BZ)

WHEREAS, Henry J. Nurick, for Harry Gare, owner, filed, January 5, 1926, an application, under the building zone resolution, to permit in a business district the extension of a garage for the storage of more than five motor vehicles; premises Nos. 316-320 Saratoga avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Saratoga avenue is in a business district; that Bergen street is in a business district, that Dean street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 22, 1925, reads:

“Proposition contrary to the Zone Resolution, Art. 2, Sec. 4-a-15.

“The extension of a garage for more than five motor vehicles in a business district.”;

WHEREAS, the premises consist of a plot of ground 53 by 100 ft. in area; upon the rear portion is located a garage, 15 ft. by 50 ft. in area, and also some frame structures; permission having been granted by the building department to alter these structures into one garage 53 ft. by 50 ft. in area; it is proposed to extend this garage to cover an additional space 30 ft. by 53 ft. in area

between the existing garage and stores on the front of the plot; and

WHEREAS, the board deemed that applicant was not entitled to relief under sections 7a and 7e of the building zone resolution, nor under section 21 on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

233-26-BZ.

APPLICANT—John DeHart, for Morris Katz, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7b of the building zone resolution, to permit the extension from a business district into a residence district of a proposed business building (stores).

PREMISES AFFECTED—3361-3371 Westchester avenue, The Bronx.

THE RESOLUTION:

(233-26-BZ)

WHEREAS, John De Hart, for Morris Katz, owner, filed, March 19, 1926, an application, under the building zone resolution, to permit the extension from a business district into a residence district of a proposed business building (stores); premises Nos. 3361-3371 Westchester avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Westchester avenue is in a business district and that Colonial avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 15, 1926, reads (N. B. 13-26):

“1. Proposed extension of business building from business district into residence district is contrary to provisions of Building Zone Resolution.”;

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 77.97 ft. on Westchester avenue and 104.27 ft. on Colonial avenue; to be occupied as a business building (stores); and

WHEREAS, the board deemed that applicant was entitled to relief under section 7b of the building zone resolution and that it would be an unnecessary hardship to deprive him of the extension requested.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building within the residence area shall not exceed a one-story structure above grade; that the gable walls shall be unpierced throughout their entire height and length; that the store use within the residence use area district shall be restricted to retail mercantile shops or stores in accordance with section 4 of the building zone resolution; that there shall be no signs of any nature or description within the residence area; and that all required permits shall be obtained within six months and the work completed within one year from the date of this action.

337-26-BZ.

APPLICANT—Arnold Lichtig, for Mosholu Building Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a building to be occupied for store purposes on the first story.

PREMISES AFFECTED—188-196 Audubon avenue and 550 West 175th street, Manhattan

APPEARANCES—

For Applicant: Arnold Lichtig.

For Opposition: George Strack and William P. Schmitt.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(337-26-BZ)

WHEREAS, Arnold Lichtig, for Mosholu Building Corporation, owner, filed, April 17, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building for store occupancy on 1st story; premises Nos. 188-196 Audubon avenue and 550 West 175th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Audubon avenue, West 174th street and West 175th street are all in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 29, 1926, reads:

"This amendment is disapproved with the following objections repeated:

"1. The proposed building of store is prohibited in a residential district. Zoning Resolution, Art. 2, Paragraph 2. Additional objection due to amendment.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, four stories in height, with a frontage of 145 ft. 8 in. at 1st story, 135 ft. 8 in. above, and a depth of 25 ft.; to be occupied as a building for store occupancy on 1st story and dwellings above; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the board of standards and appeals hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only so far as it affects the occupancy of the 1st story for the use: conduct of retail mercantile stores, as permitted under section 4 of the building zone resolution, on condition that the entire remainder of the plot shall be restricted to conducting dwelling use of not less than three stories above said store; that the gable wall on the 175th street front shall be finished with face brick and architectural terra cotta or natural stone trimming; that the 175th street front shall be returned on the Audubon avenue front for not less than 16 in.; that the westerly gable walls shall be unpierced for a depth of not less than 44 ft.; that a rear yard for a depth of not less than 6 ft. 6 in., starting 44 ft. southerly from 175th street, shall be maintained open and unincumbered; that any advertising shall be restricted to the glass sides of windows of the stores; that all permits necessary for prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

AREAS FIXED.

(201-26-BZ)

The chairman presented and read a communication from John Messerschmitt, requesting the board to fix the areas deemed affected and within which to obtain consents for extension of an existing garage; premises 290-292 East 17th avenue, Astoria, L. I.

The following area was approved by the board:

Both sides of Eighth avenue from a point 40 ft. north of the proposed garage to a point 100 ft. north of Broadway and also the property at the rear for a distance of 50 ft. each side of the side lot of the premises in question.

(244-26-BZ)

The chairman presented and read a communication from Edward L. Larkin, requesting the board to fix the areas deemed affected and within which to obtain consent for the erection and maintenance of a store and theatre building; premises 285 East 170th street, The Bronx.

The following area was approved by the board:

Both sides of Morris avenue, also both sides of East 17th avenue from a point 100 ft. north of East 17th street to a point 400 ft. north of premises in question.

## THE RESOLUTION:

(1111-25-A)

WHEREAS, Industrial Automatic Sprinkler Co., for Abraham & Straus, owner, filed, October 28, 1925, an appeal from the decision of the fire commissioner, affecting premises Nos. 50-58 Boerum place and 209-233 State street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner reads: "1. No more than 400 heads are allowed on one dry pipe valve.";

and

WHEREAS, the building is non-fireproof, four stories in height, 90 ft. by 160 ft. (approximately 15,000 sq. ft.) in area; OCCUPIED as a furniture warehouse, 10 persons in the entire premises; and

WHEREAS, appellant proposes to install a standard two-source automatic sprinkler system with two dry pipe valves and an "accelerator" and with 697 and 564 heads, respectively, on the lines, and contends that the "accelerator" reduces the time of tripping of an air valve 90 per cent.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the increase in number of heads shall not exceed 25 per cent of that allowed by the existing sprinkler rules controlling dry pipe valves equipment; and that this sprinkler installation shall comply with the rules in all other respects.

224-26-A.  
APPELLANT—Warren & Wetmore, for Gould Realty Co., owner.  
SUBJECT—Appeal from decision of superintendent of buildings.  
PREMISES AFFECTED—689-691 Fifth avenue and 1 East 54th street, Manhattan.

Absent: Chief Kenlon .....	1

## THE RESOLUTION:

(224-26-A)

WHEREAS, Warren & Wetmore, for Gould Realty Co., owner, filed, March 17, 1926, an appeal from a decision of the superintendent of buildings, affecting premises Nos. 689-691 Fifth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated March 3, 1926, reads (N. B. Applic. No. 435-25):

"This amendment is disapproved with the following objection due to amendment:

# MINUTES

"22. All finished wood floors must be fireproofed wood as per Section 356 of Code.";

and WHEREAS, the proposed building is to be of fireproof construction, 14 stories in height, 50 ft. 5 in. by 125 ft. in area; to be occupied as offices and showrooms; and

WHEREAS, the appellant proposes to use hardwood flooring only in the tuning rooms of basement and in the tone demonstration rooms on the 3rd and 4th stories; no corridors, toilets or stairs included; the appellant contends that hardwood floors are a practical necessity where heavy pianos are constantly being wheeled about; that the hardwood flooring will be laid in asphalt directly on the concrete floor construction.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only as to the floor finish of the tone demonstrating rooms on the 3rd and 4th stories and the tuning room in the basement, *on condition* that the wood surface incorporated in these rooms shall be of wood blocks, approximately 2½ in. thick, laid on edge in mastic cement, additional to the cement-finished floor, as required by the building code; and that the finished floors throughout the remainder of the building shall be constructed in compliance with the building code.

5-26-BZ.

APPLICANT—William F. Doyle, for Benj. Sobol, owner.  
SUBJECT—Application (re: decision of fire commissioner), under sections 21 and 7a of the building zone resolution, to permit in a business district the extension and enlargement of an existing gasoline service station.

PREMISES AFFECTED—Southeast corner of East 168th street and Jerome avenue, The Bronx.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: D. Hollander, Bertha Friedman.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle ..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(95-26-BZ)

WHEREAS, William F. Doyle, for Benj. Sobol, owner, filed, January 1, 1926, an application, under the building zone resolution, to permit in a business district the extension and enlargement of an existing gasoline service station; premises, southeast corner of East 168th street and Jerome avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 168th street, Jerome avenue and River avenue are in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 28, 1926, Applic. 29-1926, reads: "1. The extension of a gasoline system beyond that previously permitted in a business district, is denied. Appeal may be taken to the Board of Appeals.";

WHEREAS, it is proposed to bury six gasoline tanks, 550 gallons each, and erect six new pumps, in addition to a new building, one story in height, 25 ft. by 15 ft. in area; entire premises to be occupied as a gasoline service station; and

WHEREAS, the board deemed that the applicant was entitled to the variation under sections 21 and 7a of the building zone resolution on the ground that the proposed extension is incidental to the gasoline station existing on part of the plot so used prior to the amendment of the zone resolution prohibiting gas stations.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that application be and it hereby is granted on condition that any additional pumps installed shall be located on the rear avenue frontage; and that all permits required shall be obtained within six months and any work involved thereon shall be completed within one year from the date of action.

6-BZ.

APPLICANT—Edward P. Doyle, for Lever & Sidway, Inc., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7c of the building zone resolution, to permit in a business district extending from an unrestricted district the erection of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—253-263 Nagle avenue, 500-508 West 204th street and 3814 Tenth avenue, Manhattan.

APPEARANCES—

For Applicant: Edward P. Doyle.

For Opposition: Francis J. Kuerzi, James N. Buttery.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle ..... 4

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(146-26-BZ)

WHEREAS, Edward P. Doyle, for Lever & Sidway, Inc., owner, filed, February 19, 1926, an application, under the building zone resolution, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 235-263 Nagle avenue, 500-508 West 204th street and 3814 Tenth avenue, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Nagle avenue and West 204th street are both business districts, and Tenth avenue is business and unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 6, 1926, N. B. 46-1926, reads:

"Disapproved with following objection:

"1. Garage for more than five motor vehicles is not a lawful use in a business district. Sec. 4 of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 150 ft. 6 in. on Nagle avenue and 126 ft. 3 5/8 in. on West 204th street, and an irregular depth; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant was not entitled to the variation under section 7c of the building zone resolution, for the reason that only a small triangular gore of one leg of the plot at the rear lies in the unrestricted district.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

151-26-BZ.

APPLICANT—Tengis Realty Company, Inc., owner.

SUBJECT—Application (re: order of the superintendent of buildings), under sections 7a and 21 of the building zone resolution, to permit in a residence district the change of occupancy of the basement and 1st story from residence use to a business use.

PREMISES AFFECTED—81 West 118th street, Manhattan.

APPEARANCES—

For Applicant: Siegfried Moisseiss.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

lution, to permit in a residence district the change of occupancy of the basement and 1st floor from residence use to a business use; premises No. 81 West 118th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 118th street and West 119th street are in a residence and that Lenox avenue is in a business district; and

WHEREAS, the order of the superintendent of buildings (Order No. 2226-1925), rendered May 12, 1925, reads:

"In that of occupying basement and 1st floor for business purposes. Contrary to certificate of occupancy 3114.

"You are hereby directed to discontinue the said use of the above described building until a certificate of occupancy has been issued by the Superintendent of Buildings.";

and

WHEREAS, the existing building is of non-fireproof construction, three stories and basement in height, with a frontage of 20 ft. and a depth of 56 ft. Occupied: Basement and 1st story, stores; upper stories, dwelling; and

WHEREAS, applicant claims he was the victim of circumstances, inasmuch as at the time he purchased the property he had a search made by the Title Guaranty Co. and no violations were found against the property, although the structure as it is today was in existence at time of his purchase; the board deemed applicant is entitled to relief under section 21.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the front portion of the basement, street grade story, on condition that the entire remainder of the premises shall be restricted to conforming dwelling uses, and that the use of the basement story shall be restricted to offices or retail mercantile store; that any permits required shall be obtained within sixty days and any work involved thereby shall be completed within ninety days from the date of this action.

285-26-BZ.

APPLICANT—Abraham H. Schwartz, for Homack Construction Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a building for store and theatre purposes.

PREMISES AFFECTED—12 to 24 East Roosevelt avenue, Corona, Borough of Queens.

APPEARANCES—

For Applicant: A. A. Hovell.

Negative .....

Absent: Chief Kenlon .....

## THE RESOLUTION:

(285-26-BZ)

WHEREAS, Abraham H. Schwartz, for Homack Construction Corp., owner, filed, April 5, 1926, an application under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a building for store and theatre purposes; premises Nos. 12-24 East Roosevelt avenue, Corona, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East Roosevelt avenue is a business district, and that both Lake (41st avenue) street and Alburdis (104th street) avenue are in a residence district; and

WHEREAS, the decision of the superintendent of buildings rendered January 5, 1926, reads (Applic. 24010/25):

"The erection of business building (theatre stores) extending into a residence district is contrary to the Building Zone Resolution.";

and

WHEREAS, the proposed building is of fireproof construction, three stories in height, with a frontage of 150 ft. and a depth of 140 ft.; to be occupied as building for store and theatre purposes; and

WHEREAS, no objections were filed, nor presented at a public hearing; applicant filed consents of the only immediately affected property owners, and fifty property owners in the immediate vicinity and abutting and adjoining were presented in support of variation; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the gable walls on the lot line shall be unpainted throughout their entire height and length; that the exterior face of the building on the Lake street front and the proposed returns of all courts on the Lake street front shall be finished with face brick with architectural terra cotta or stone trimmings; that there shall be no door on the Lake street front other than emergency exit required under article 25 of the building code; that the business use shall be restricted to the Roosevelt business front; that the building shall comply with the requirements of the building zone resolution in all respects; and that all permits necessary shall be obtained within nine months and the building completed within ten months from the date of this action.

## BOARD OF STANDARDS AND APPEALS

### SPECIAL MEETING.

WEDNESDAY MORNING, JUNE 16, 1926.

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.

### APPEALS FROM ADMINISTRATIVE ORDERS.

69-26-A.  
APPELLANT—Louis A. Sheinart, for Sophia Heiligman, owner.

SUBJECT—Appeal from order of the fire commissioner.  
PREMISES AFFECTED—3902-3912 14th avenue, Brooklyn.

### APPEARANCES—

For Appellant: Louis A. Sheinart.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal denied.

### THE VOTE TO GRANT—

Affirmative: Commissioner Guilfoyle ..... 1

Negative: Chairman Walsh, Commissioners Connell and Holland and Deputy Fire Chief Martin ..... 4

Absent ..... 0

### THE RESOLUTION:

(223-26-A)

WHEREAS, Louis A. Sheinart, for Sophia Heiligman, owner, filed, March 17, 1926, an appeal from an order of the fire commissioner, affecting premises 3902-12 14th avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, No. 2514- reads:

"With reference to your application, Feb. 27th, 1926, for a permit at the above location, I regret to inform you that I am without power to grant such a permit for the reason that Section 151, Chapter 10, Code of Ordinances, N. Y., provides that no permit for a storage garage shall be issued for any building, shed or enclosure where dry goods or other highly inflammable materials are manufactured or kept for sale.

"You are therefore ordered to remove all gasoline from the underground storage tank—remove the gasoline delivery pump, permanently close and seal the inlet and outlet opening of the said storage tank and discontinue the use of said premises as a storage garage."

WHEREAS, the building is non-fireproof, two stories in height, 40 ft. by 95 ft. 2 in. in area. OCCUPIED: 1st story, public garage, 5 persons; 2nd story, manufacture of ladies' dresses, 25 persons; and

WHEREAS, the appellant contends that the building has been occupied in the same way since 1920, under a certificate of occupancy, No. 5310 of 1920, issued by the superintendent of buildings, a copy of which is filed in the file; furthermore, the ceiling of 1st floor, also both sides of airway enclosure, extending from 1st story to roof, is covered with wire lath and 3/4 in. cement plaster; there is also a fire escape balcony at 2nd story on 39th street front with a counterbalanced stairs to street.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

A.

APPELLANT—Albert H. Stines, for James V. Scully, owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—3517 91st street, Jackson Heights, Borough of Queens.

### APPEARANCES—

For Appellant: Albert H. Stines and Mrs. James V. Scully.

ACTION OF BOARD—Appeal denied.

### THE VOTE TO GRANT—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle ..... 3

Negative: Commissioner Connell and Deputy Fire Chief Martin ..... 2

Absent ..... 0

### THE RESOLUTION:

(69-26-A)

WHEREAS, Albert H. Stines, for James V. Scully, owner, filed, January 26, 1926, an appeal from a decision of the superintendent of buildings, affecting premises 3517 91st street, Jackson Heights, Borough of Queens; and

WHEREAS, the decision of the superintendent of buildings, dated January 18, 1926, reads:

"Replying to your communication of May 19, 1925, I wish to advise that an examination of the premises indicates that your building is of frame construction, more than 20 feet high. It cannot therefore be used as a sanatorium. The building code requires that a building to be used as a sanatorium must be of fireproof construction."

and

WHEREAS, the building is of wood frame construction, covered with cement stucco on expanded metal lath, two stories and attic (27 ft. 10 in.) in height, 22 ft. by 62 ft. in area; OCCUPIED on the 2nd story as a sanatorium for six patients, the remainder of the premises being used as living quarters for owner and nurses; and

WHEREAS, appellant contends that the 2nd story of the premises, which is 12 ft. 10 in. above the curb level, is the only part of the building wherein patients will be received and treated.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the appeal be and it hereby is denied.

### BUILDING ZONE CASES.

APPLICANT—William F. Doyle, for Hyman Greenberg, owner.

SUBJECT—Application (re: decision of tenement house commissioner), under sections 7c and 21 of the building zone resolution, to permit in an "F" area district extending from a "C" area district, the erection and maintenance of a tenement house, with the area of lot occupied, yard and courts designed as required by the zone resolution for a "C" area district.

PREMISES AFFECTED—Southwest corner of Forest parkway and Ruth place, Woodhaven, Borough of Queens.

### APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: Edwin C. Morsch, George C. Buechner.

ACTION OF BOARD—Application denied without prejudice to legal status of permit in force prior to amendment of the building zone resolution in May, 1925.

### THE VOTE TO RECONSIDER—

Affirmative: Chairman Walsh, Commissioners Connell and Holland and Deputy Chief Martin ..... 4

Negative: Commissioner Guilfoyle ..... 1

Absent ..... 0

### THE VOTE TO DENY WITHOUT PREJUDICE TO LEGAL STATUS OF FORMER PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle ..... 4

Negative: Deputy Fire Chief Martin ..... 1

Absent ..... 0

# MINUTES

## THE RESOLUTION:

(199-26-BZ)

WHEREAS, William F. Doyle, for Hyman Greenberg, owner, filed, March 9, 1926, an application, under the building zone resolution, to permit in an "F" area district, extending from a "C" area district, the erection and maintenance of a tenement house with the area of lot occupied, yard and courts designed as required by the zone resolution for a "C" area district; premises southwest corner of Forest parkway and Ruth place, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, June 16, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Forest parkway, "F" area district, extending to a line 100 ft. east and west; 95th drive (Ruth place), "C" area district, extending westerly from a line 100 ft. west of Forest parkway, are in a residence use district; and

WHEREAS, the decision of the tenement house commissioner, rendered February 2, 1926, reads (N. B. 93-1925):

"4. As area of this district has been changed from a "C" to an "F" district and proposed building does not comply with all the requirements of the Zone Law.";

and

WHEREAS, the proposed building is of non-fireproof construction, six stories in height, with a frontage of 151.08 ft. and a depth of 100.06 ft. and 157.9 ft., irregular; to be occupied as a tenement house with the area of lot occupied; yard and courts designed as required by the zone resolution for a "C" area district; and

WHEREAS, the plot in which the proposed building is to be erected was originally located in a "C" area district and plans were filed in the bureau of buildings and tenement house department for a four-story tenement to be erected in conformity to the "C" area district requirement, and after the plans were approved the district in which the plot is located was changed to an "F" area district, and an amendment was then made to plans to permit an additional two stories, which plans were disapproved; and

WHEREAS, this application was denied by the board at its meeting June 15, 1926, and reopened by vote of the board; and

WHEREAS, the board deemed it advisable to deny the application without prejudice to any legal permit in force prior to the adoption of the amendment to the zone resolution by the board of estimate and apportionment on May 22nd, affecting these premises.

*Resolved*, that the decision of the tenement house commissioner be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

135-26-BZ.

APPLICANT—Livingston & Livingston, for Isaac Mintzer, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7e and 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—528-544 Lefferts avenue, Brooklyn.

## RULES

### FIRE DRILL RULES, ADOPTED OCTOBER 5, 1923.

The following rules, governing Fire Drills, were adopted by the Board of Standards and Appeals at the special meeting held on Friday, October 5, 1923:

#### DEFINITION OF "FIRE DRILL."

The method and practice of the systematic and orderly evacuation of a building by its occupants in case of emergency, panic or fire in the least possible time—by the nearest means of exit—and the use of fire appliances which may be provided for the extinguishing or retarding of fire for the safeguarding of human life.

1. In all buildings as defined in Article 1, Section 10 of the Labor Law in which fire drills are required pursuant to section 279 and in any other building in which the Commissioner may be directed pursuant to the power conferred in section 775-B of the Greater New York Charter shall be the duty of the owners, lessees or tenants to conduct fire drills monthly and at such other times as the Commissioner may direct.

For the purpose of conducting such fire drills the owner or tenant shall appoint from among their employees such reliable and dependable persons, male or female, who will efficiently perform the duties of the various positions of the fire drill organization, as specified on the accompanying chart.

It shall be the duty of the owner or tenant to enter the blank spaces provided for that purpose in said chart the names of persons so selected and post said chart and copies of the rules in a conspicuous place.

#### FIRE DRILL ORGANIZATION.

#### Rule 2. Duties of Foreman.

The Foreman or Person in Charge shall direct, enforce and have full charge of the "Fire Drill" in every factory on each floor. Each day before work is begun he shall see that extinguishers, fire hose, fire buckets, etc., are in readiness for use, exit doors are unlocked, aisles are free from obstruction, that stairways, halls, etc., are properly lighted, and shall remedy any dangerous condition found to exist. Immediately after work is commenced he shall check up the Fire Drill Organization list and note if the regularly assigned persons are present; if any are found to be absent, he shall assign other employees (if practicable) to perform their duties.

He shall immediately notify new employees of the existence of the Fire Drill Organization and give them the necessary instructions as to the duties they are to perform, etc.

He shall be familiar with the operation and location of the interior alarm signal box on his floor.

He shall listen for the test signal each morning at the appointed hour and in the event of the test signal not being heard he shall communicate with the superintendent or other person in charge of the building and advise him of the fact. The (Floor Captains) Foreman's orders are final as to the carrying out of the fire drill on his particular floor.

#### Rule 3. Duties of Watchmen.

The WATCHMEN shall see that all doors and windows are closed so as to prevent the spread of fire. The

# RULES

## RULES FOR THE CONSTRUCTION AND INSTALLATION OF GAS SHUT-OFF VALVES, ADOPTED BY THE BOARD OF STANDARDS AND APPEALS, JANUARY 11, 1924.

RULES FOR GAS SHUT-OFF VALVES TO COMPLY WITH ORDINANCE AMENDING ARTICLE 2 OF CHAPTER 12 OF THE CODE OF ORDINANCES, RELATING TO CONTROL OF GAS IN CERTAIN BUILDINGS IN CASE OF FIRE.

1. Gas shut-off valves and accessory appliances shall include valves approved as such by the Bureau of Standards, Washington, D. C., by the Underwriters' Laboratories, Inc., Chicago, Ill., by the Associated Factory Mutual Laboratories of Boston, or other recognized standard laboratory; and all valves shall be approved and meet the test prescribed by the Board of Standards and Appeals.

2. Gas shut-off valves shall be installed only by corporations, firms or individuals who shall furnish evidence of their qualifications under the Code of Ordinances, to the Fire Commissioner or the Tenement House Commissioner in their respective jurisdictions.

3. Such corporations, firms, or individuals shall maintain a Service Station which shall be in direct communication with the Fire Department by telephone or telegraph. Location of service station and means of communication shall be on file with the Fire Commissioner, in order that the Fire Department may insure immediate service when the gas is turned off by the members of the Fire Department or from any other cause.

The Fire Department shall have exclusive use of gas shut-off valves to be operated in the event of fire or other emergencies.

4. All gas shut-off valves to be installed must be made of the best quality of standard materials.

### Protection of Valves:

5. The gas shut-off control shall be protected by a suitable, approved metal box, placed on the exterior of the building, which shall be connected, through a rigid metal conduit, by a cable, with the valve body placed on the gas intake where the gas pipe enters the building, and as near as practicable to the inside face of the wall, before reaching the meters. The lock for securing box on outside wall of building shall be operative only by a Fire Department inner box key by members of the Fire Department.

6. All valve bodies shall be made of brass or bronze. If a spring is used to actuate a valve in conjunction with the fusible link, it shall be of the best quality phosphor bronze.

7. The internal mechanism which acts to shut off the gas shall be securely connected with the external mechanism by a direct mechanical connection, made gas tight, where it passes through the valve body, by a stuffing box filled with soft, well-lubricated packing, in accordance with recognized standard practice.

### Installation:

8. The valve shall be so installed as to be conspicuously displayed and readily inspected and reset by authorized persons.

Valves shall be located so that condensation will not accumulate in the valves; and shall be installed so that gas will flow through the valve in direction indicated on it.

9. Valves shall be secured in piping by threaded connections or companion flanges. Combustible packing or sheet lead shall not be used between flanges.

10. The gas main at both ends of the valve must be rigid and secure to withstand the pull from the control handle. Additional non-combustible brackets or hangers must be provided, if necessary, to secure and maintain rigid installation.

11. The valve shall be enclosed in a substantial, perforated metal case, conspicuously exposed, painted red, protected by standard lock acceptable to the Fire Prevention Bureau, and shall indicate the name, telephone number and address of installer, to insure prompt service to property owner.

12. Casing of the valve on gas intake shall be kept locked to protect valve from interference and make it accessible only to authorized persons. Perforations, to allow circulation of air around fusible link, shall be provided and so arranged as to prevent tampering with valve when casing is locked.

### Control Box:

13. The control handle for the manual closing of the valve shall be in a locked metal control box having a cast iron cover conspicuously labeled with raised letter painted red.

14. On the outside of the cover or the inside of the control box, in raised or stamped letters, or on a securely fastened metal plate, shall be displayed concise operating directions, together with the name, initials or registered trademark of the manufacturer.

15. The control box must be placed as nearly vertically above the point where the gas main enters the premises as is practicable, when this does not involve excessive length of cable and extra turns, and at a height above the sidewalk or grade, of not less than two (2) feet and not more than five (5) feet. Without special permission, the control box shall not be placed or mounted on basement window frames, or directly above basement windows or other openings, nor shall it be located behind doors or other obstructions which would prevent the Fire Department from having easy access to it.

16. Control boxes must be securely and permanently fastened. Whenever possible, they shall be fastened to non-combustible wall, pillar or column. They shall be secured by not less than two 3/16 inch bolts or their equivalent. Unless the building is so constructed that the control box must unavoidably be secured to a wood part, the use of wood screws is not permitted for supporting countersunk control boxes; lag bolts shall be used. When the walls are of masonry or concrete through bolts, expansion bolts or toggle bolts shall be used. All fastenings must be arranged so that they cannot be loosened except from inside opening of the control box.

17. Control boxes may be set or recessed into the wall to a depth not greater than the depth of the box so that the cover is flush with the face of the wall. Control boxes may be mounted directly on the surface of the wall.

18. The control box shall be located on the outside of the building wall, facing the street, whenever possible. When the control box is installed on an alley face of building, or in a similar place where the control box is subject to injury from passing vehicles, etc., the control box must be thoroughly protected. This may be done by having the control box recessed, marked by waterproof red paint ring and waterproof white paint ring on wall, or, when such protection is not available, protected by heavy iron channels or angles secured to the wall through bolts, expansion bolts, or toggle bolts.

### Control Handles:

19. Control handles shall be of standard construction arranged to fit the control boxes so that they may be locked without difficulty, and cable connections shall be securely made in an approved manner, according to design of the handle.

# RULES

ble:

20. The connection between the valve and control handle shall be as direct as practicable, and shall consist of a single piece of stranded phosphor bronze cable not less than 3/32 inch in diameter. No splices in the cable shall be permitted.

21. It is essential that cable connections to valve and handle be securely made according to the design in each case. The cable may be slightly annealed for making joints, and, when cutting the cable, it should be taped and protected through the tape, or a small amount of solder applied where it is to be cut, so as to prevent frayed end.

Conduit:

22. The control cable for the shut-off valve shall be run in galvanized wrought iron or steel pipe or other standard approved conduit not less than 1/2 inch in diameter. The pipe or conduit line must be water-tight and continuous from the casing enclosing the operating mechanism of the valve to the control box on outside of building. The cable shall not be exposed at any point in its length.

23. All ends of pipe or conduit, not only at valve and control box terminals, but in the run of the piping, shall be carefully reamed so as to remove burrs and fins caused by cutting-off tools, which would interfere with the movement of the cable in the run, or cut, or wear the cable. Connections should not be employed in making joints.

24. Pipe or conduit must be rigidly and permanently secured in position. Pipe straps and hangers of standard type may be employed for this purpose. In every case supports must be provided at points sufficiently numerous to prevent sagging. Pipe straps (if used) must be of metal of sufficient thickness to insure a permanent fastening and must be thoroughly coated to prevent corrosion.

Bends and Offsets:

25. Bends of small radius or through much of an arc, produce possibilities of binding of the cable or of an appreciable friction resisting the pull of the cable; therefore, approved roller fittings shall be required wherever the pipe or conduit is bent to a radius of less than 4 feet, or wherever the bend is through an arc exceeding 90 degrees, except as outlined for offsets.

26. When connections to control boxes are made from below, it is frequently necessary to make an offset in the conduit to avoid a water table or other part of a building.

27. One offset of not more than 2 inches will be permitted for each installation at such points. The bends in the pipe forming the offsets must be carefully made to avoid cracking the enamel or galvanized coating, or the weakening or cracking of the pipe or conduit. The amount of offset shall not exceed 2 inches and the length of the offset shall not be less than five times the amount of the offset. For example, a 2-inch offset must be at least 10 inches long. Single offsets only shall be permitted. Multiple offsets are not acceptable.

Roller Fittings:

28. For turns in the conduit greater than those mentioned above, approved roller fittings shall be used. No roller fittings turning more than 90 degrees from a straight line shall be used.

Automatic Control:

29. The fusible link which controls actuation of the valve in the event of direct heat, shall melt at not less than 225 degrees F and shall be so arranged as to in no way interfere with the manual means of shutting off the gas which is controlled by the handle in box placed on the face of the building. Only approved fusible links shall be used. Automatic control shall in no way depend upon electric current in its operation.

## Production Tests at Factory:

29. Valves must be tight under the following tests:

(a) Valves shall be mounted in the position in which they are designed to operate. Normal city gas pressure or equivalent air pressure shall be applied to the inlet side and the valve shall completely shut off the gas or air when closed as in normal operation.

(b) To determine whether the valve shuts off tightly under this test, a tube shall be connected with the outlet side of the valve and the outer end of the tube shall be immersed in water to a depth not exceeding one (1) inch, indicating leakage by bubbles rising through the water from the end of this tube.

(c) Valves, after this test, shall be capable of shutting off ten (10) pounds air pressure applied to the inlet side: to determine whether the valve is tight, the test procedure shall be as indicated in the preceding test.

(d) Valve bodies shall be strong enough to withstand, without leakage, one hundred (100) pounds pressure applied from either end with the other end closed. In this test the entire valve, including the stuffing box, shall be completely immersed in water, so that leakage will be indicated by bubbles rising through the water.

(e) The fusible link connections of each valve shall be carefully tested to avoid prematurely operating the gas shut-off valve through vibration or concussion. The construction of the fusible link connections shall be so designed and made that the automatic feature will not operate through vibration or concussion.

(f) The entire process of manufacture of the valves shall be subject to inspection and review and each valve shall be tested at the factory by a recognized laboratory or agency with facilities for making the test prescribed by the Board of Standards and Appeals, and each valve must bear satisfactory evidence that it has been so tested.

(g) Manufacturers of gas shut-off valves must submit the name or names of said laboratories or agencies to the Fire Commissioner or the Tenement House Commissioner, in their respective jurisdictions, with satisfactory evidence of their ability and facilities to properly carry out said tests.

(h) Valves and operating mechanism shall be so designed and constructed that they will withstand deteriorating effects or corrosion, as evidenced by operating tests.

## Installation and Inspection Tests:

30. a. After shut-off valve is installed, it shall be set and operated to determine that proper closure is secured by operating the control handle. Particular care should be taken to observe that when operating the control handle, no part of the cable or of its attachment to the valve interferes in any way with the positive closure of the valve.

b. After the above test, all gas outlets in the building must be inspected to insure their being closed before the valve shall be set and the gas turned on. Valve and connections shall also be tested for leaks by applying a solution of soap and water to all parts, including connections to gas piping.

c. After the valve has been used to shut off gas, it shall be reset only by authorized corporations, firms or individuals, or by members of the Fire Department.

d. Operating and installation corporations, firms or individuals responsible for the installation of the gas shut-off valves shall permanently maintain properly equipped service stations in each of the boroughs where they install valves.

Gas shut-off valves and installations shall be inspected at least once a year by members of the Fire Department or the Tenement House Department, in their respective jurisdictions, or by corporations, firms or individuals authorized to install gas shut-off valves, as determined by the Fire Commissioner or the Tenement House Commissioner, in their respective jurisdictions.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO RULES GOVERNING FIRE EXTINGUISHING APPLIANCES— SPRINKLER SYSTEMS.

[77-25-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the Board of Standards and Appeals on Friday, June 25, 1926, at 10 a. m., Room 1013, Municipal Building, on proposed amendments to Rules for Fire Extinguishing Appliances, Sprinkler Rules.

Matter in brackets [ ] to be omitted. Matter in italics is new.

*General Requirements.* The rules contained herein cover the general details of a sprinkler equipment only. Before an equipment is installed or before a present equipment is remodeled, complete working plans should be submitted for approval to Fire Department.

These plans shall be drawn to an indicated scale; give correct address and points of compass; show sectional elevations of the building; and the essential features of the construction, viz., size, location and direction of joists, timbers or other structural members. They shall also indicate the location and size of water supplies, connecting pipes, feed mains and risers, gate, check, alarm and dry-pipe valves, as well as the location, spacing, number and type of sprinklers.

Upon approval of preliminary plans such number of sets of clean, corrected plans on cloth as the Fire Commissioner may require, not exceeding three (3), shall be filed for final approval of the Fire Commissioner. A certified copy of the approved plans shall be forwarded to the Bureau of Buildings by the Bureau of Fire Prevention. Such application and specification forms as may be prescribed by the Fire Commissioner shall accompany preliminary plans. If a standpipe (fire line) equipment is provided throughout the building, the plans shall include a note to that effect.

When entirely completed in accordance with the approved plans and as per test herein provided for, application shall be made to the Bureau of Fire Prevention for inspection of the completed installation. When the sprinkler equipment is approved the applicant will be so advised in writing by the Bureau of Fire Prevention.

All sprinkler equipments shall be installed in a thoroughly workmanlike manner.

Rule 1. Definition of Automatic Extinguisher Systems. Automatic extinguisher systems shall consist of a system of piping connected to one or more acceptable sources of water supply, or other extinguishing medium, provided with distributing devices so arranged and located as to discharge and diffuse automatically under the action of heat an effective stream or spray over every part of the interior of the building area in which a fire may start or to which it may be communicated.

Rule 2. Classification of Sprinkler Systems. For the purpose of these rules, sprinkler systems shall be classified as:

(a) Automatic Wet Pipe Systems, in which all pipes and sprinkler heads are at all times filled with water;

(b) Automatic Dry Pipe Systems, in which the pipes and sprinkler heads are filled with air, either compressed or at atmospheric pressure, and the water supply is operated by a Dry Pipe Valve as defined in Rule 27 of these Rules.

(c) Non-Automatic Systems, in which all pipes and sprinkler heads are maintained dry with a fire department connection for water supply.

Thermostatic fire alarm with direct connection to Central Office or Fire Department Headquarters shall be provided in connection with all non-automatic sprinkler systems.

Rule 3. Approved Devices. Automatic Sprinklers and accessory appliances shall include all devices approved as such by the Bureau of Standards, Washington, D. C.; by the Underwriters' Laboratories, Inc., of Chicago; by the Associated Factory Mutual Laboratories of Boston; and all devices which meet the tests prescribed by the Board of Standards and Appeals.

Rule 4. Water Supply. Approved sources of water supply shall be classified as Automatic and Auxiliary.

(a) Automatic Sources shall include the Gravity Tank, the Pressure Tank, [and] the Public Water System, and the Automatic Electric Fire Pump, installed as required under the provisions of Rule 8, hereinafter provided for.

b) Auxiliary Sources shall include the non-automatic Fire Pump and the Fire Department Connection.

Rule 5. Gravity Tank. Gravity tanks shall contain available quantity of water sufficient to supply twenty per cent (25%) of the number of sprinkler heads in average protected fire area for twenty (20) minutes, but not less than 5,000 gallons; and the bottom of the tank shall have an elevation of not less than twenty (20) feet above the highest line of sprinklers below the main roof. Where the area of a pent house exceeds 2,500 sq. ft. the bottom of the tank shall be required to be not less than 20 feet above the highest line of sprinklers below the pent house roof, but where a pent house contains only pressure tanks this rule will not apply.

Where a tank capacity in excess of [25,000] 30,000 gallons is required by this rule, the amount of water to be provided in excess of [25,000] 30,000 gallons shall be specified by the Board of Standards and Appeals, except where tanks of unlimited capacities are supported on structures independent of buildings.

The tank shall be filled through a fixed pipe, independent of the sprinkler piping, not less than two inches in size, discharging into the top of the tank, through a by-pass not less than two (2) inches in diameter around the check valve in the discharge pipe, providing the supply is of sufficient pressure to fill the tank. The water supply and connections shall be capable of supplying the tank at a rate of not less than sixty-five (65) gallons per minute.

The filling pipe shall be carried up inside a frost-proof casing and may extend through tank bottom to discharge at top of tank above full water level. The portion of the inside tank must be of brass or copper or other non-corrosive material.

Tanks shall not be fed through sprinkler lines.

The sprinkler and standpipe tanks may be fed from a common source of supply, either a pump or a direct service main connection, provided that there are separate feed mains from the basement or lowest story and a check valve in each feed line in a pump or engine room.

The overflow pipe shall be not less than two (2) inches in diameter for tanks up to 30,000 gallons capacity and not less than three (3) inches in diameter for larger tanks. The top of the overflow pipe shall be three (3) inches below the top of the staves in wooden tanks and one inch from the top in steel tanks. The pipe may extend through the bottom of tank provided the portion inside the tank is of brass or copper or other non-corrosive metal without joints or it may extend through side of tank. Tanks over roofs overflow pipes shall terminate not less than twenty-four (24) inches above roof and shall be provided with a 90 degree elbow.

The discharge, heating or filling pipes where exposed to the weather shall be protected from freezing by a frost-proof covering which may be of three layers of one (1") hair felt interspersed with building paper well tacked and secured and covered with canvas well painted over frost-proof boxing as specified by the National Board of Fire Underwriters.

Easy access to top of each tank shall be provided by means of a steel gooseneck ladder substantially constructed and rigidly braced, the top of which shall not tip out from the vertical at any point.

Tanks above roofs shall be constructed according to the requirements of the Building Code and supporting structure.

# PUBLIC HEARING

shall be approved by the Superintendent of Buildings. Tanks not enclosed and exposed to the weather shall be covered with a double roof of acceptable construction consisting of a tight flat cover of matched boards and above that a conical roof which shall be covered with an approved roofing.

Where a gravity tank may supply both sprinklers and hydrants it shall not be of less than 30,000 gallons capacity and located on a structure altogether independent of buildings and the bottom shall not be less than 75 feet above ground level, and not less than 20 feet above the highest line of sprinklers below the main roof of the highest building in a group of buildings.

Rule 6. Pressure Tank. Pressure tanks shall contain sufficient water to supply twelve and one-half per cent (12½%) of the number of sprinklers in the average protected fire area for twenty (20) minutes, but not less than 3,000 gallons of water for a wet pipe system supplemented by an auxiliary water supply, and not less than 5,000 gallons of water for a dry-pipe system. No tank shall have a capacity greater than 9,000 gallons. A tank shall be kept two-thirds (2/3) full of water at a pressure of seventy-five (75) pounds per square inch and shall be so proportioned and located that a pressure of not less than fifteen (15) pounds per square inch be available on the highest line of sprinklers below main roof when all the water has been discharged from the tank.

The tank shall be placed either on the roof or in the least sprinklered story.]

Pressure tank or tanks shall not be located below the lowest line of sprinklers supplied by tank or tanks.

Where [a tank] the total capacity of the pressure tank is in excess of [25,000] 30,000 gallons as required by rule, the amount of water to be provided in excess of [25,000] 30,000 gallons shall be specified by the Board of Appeals.

Water shall be supplied through a fixed pipe, independent of the sprinkler piping, not less than [two] one-half (1½) inches in size [with a one and one-quarter (1¼) inch connection to the tank], or through a pipe not less than [two (2)] one and one-half (1½) inches in size around the check valve in the discharge pipe. The supply is of sufficient pressure to fill the tank. Water supply and connections shall be capable of supplying the tank at a rate of not less than sixty-five (65) gallons per minute without reducing the pressure in the tank. The tank shall have a fixed metallic horizontal line at the end opposite the glass gauge, or other acceptable device, to indicate the level of the water when the tank is full.

An air compressor shall be of sufficient capacity to maintain the air pressure at the average rate of one pound in two minutes in each pressure tank.

Rule 7. Public Water System. Direct connection to the city water supply shall be capable of furnishing water at not less than fifteen (15) pounds per square inch static pressure at the highest line of sprinklers below the main roof.

In accordance with the requirements of the Department of Water Supply, Gas and Electricity, the size of each connection shall be as large as that of the main riser and not less than four (4) inches, and shall have a convenient accessible control valve fixed to it at, or near, the riser, or, when possible, still further away from the riser. The control valve shall be fitted with a frost-proof box, not less than four (4) feet nor more than six (6) feet below the curb, with a fixed stem leading to a compartment at the level of the sidewalk.

The cover shall be bolted to the casing and shall be so marked as to be quickly located and to indicate the purpose of the valve. The valve shall be marked with a distinctive pattern, operated by a special socket approved by the department of water supply, gas and electricity.

Where it is impractical to install a control valve box at the curb because of a vault under the sidewalk and within 18" thereof, the control valve may be located in the water supply connection at a point not more than two (2) feet from the point of entry into a vault.

Where a water meter is required in the water supply connection to an automatic sprinkler equipment, it shall be of a type which allows free flow of water and approved by the Department of Water Supply, Gas and Electricity, or a type of fire line meter which has been specifically approved by the Fire Commissioner for use in connection with fire extinguishing equipment.

Evidence establishing the fact that water supply conditions and pressures are as may be required shall be submitted to the Fire Department.

Rule 8. Fire Pump. An automatic electric fire pump as an automatic source of water supply is one approved for such use and controlled by an approved automatic controlling device, which shall be adjusted to maintain not less than 15 pounds water pressure at the highest sprinkler below main roof and in pent houses over 2,500 sq. ft., as provided in Rule 5. And shall receive water supply only from a direct connection to the city water main.

As auxiliary sources of water supply steam or electric standard fire pumps shall receive water supply from a suction tank, a direct connection to the city water main or other approved sources capable of supplying the pump at its rated capacity for sixty (60) minutes. The rated capacity of the pump shall be not less than five hundred (500) gallons per minute, and shall be sufficient to supply twenty-five per cent (25%) of the number of sprinklers in the average protected fire area.

The pump shall be located in a room of fireproof construction, properly ventilated, lighted and drained, enclosed in eight (8) inch brick or concrete walls with approved fire doors at openings and with fireproof floor and ceiling construction. If located in the lowest story of the building, the pump shall be placed on a foundation not less than one (1) foot in height. The pump room shall be readily accessible with safe egress for the attendant.

A reliable source of energy for driving the pump shall be provided. For steam pumps, provision shall be made for sufficient steam power to operate the pumps at full rated capacity, and a steam pressure of not less than fifty (50) pounds shall be maintained at the pump at all times. Where there is more than one boiler, the pipes and valves shall be so arranged to permit the cutting out of any one boiler without interrupting the steam supply to the pump from the other boilers. The boiler room shall be cut off from the remainder of the building by fireproof floor and wall construction with approved fire doors at all openings.

Electrical energy from a public service plant shall be acceptable as a source of energy for driving electric fire pumps. When local power plants supply the energy for operating electric pumps, two motor generator units shall be provided, or one generator unit supplemented by a public service break-down switch. Local electric power plants shall be located in rooms of fireproof construction with approved fire doors at openings.

Rule 9. Sprinkler Discharge. For the purpose of computing the capacity of water supplies, standard one-half (½) inch sprinkler heads shall be assumed to have an average discharge of twenty (20) gallons per minute, and the discharge of larger heads shall be computed proportionately in the ratio of the areas of their respective orifices.

Rule 10. Fire Area. A fire area is any floor space enclosed on all sides by exterior walls or fire walls or a combination of both. The number of sprinklers in the average protected fire area shall be determined by the number of sprinklered stories in such section. In

# PUBLIC HEARING

determining the required capacity of water supplies, the number of sprinklers in the average protected fire area need not include those located in low positions, such as under benches, low shelves, closets and platforms and between cars in car barns.

**Rule 11. Fire Department Connection.** All automatic sprinkler systems shall be provided with at least one two-way Siamese connection on each street front of the building for connection to the fire department hose. Buildings fronting on only one street shall be provided with at least two Siamese connections when the street frontage of building exceeds [one hundred and fifty (150)] two hundred (200) feet [in width].

*Where buildings have frontages on more than one street there shall be a fire department connection on each street front where frontage is not continuous but in all cases where more than one fire department connection is required they shall be located as the Fire Commissioner may direct and shall not be grouped.*

All Siamese hose connections hereafter installed, except those on piers or warehouses intended for fire boat use, shall be three (3) inches in size. Fire boat connections shall be three and one-half (3½) inches in size. All hose connections shall be female, with standard fire department threads.

The inlets shall be placed at least eighteen (18) inches and not more than two (2) feet above the sidewalk, in a horizontal position accessible to the fire department, and shall be provided with a four (4) inch discharge connecting with a four (4) inch pipe to the sprinkler system for three (3) inch fire department connection and with a six (6) inch discharge outlet and six (6) inch pipe for three and one-half (3½) inch fire boat connection. Each inlet shall be provided with a clapper valve machined to a true face.

Each Siamese connection shall be designated by raised letters at least one (1) inch in size, cast in the fitting in a clear and prominent manner and reading for the service designated, viz.: "Base. Spkr.," etc., as the case may be. If the entire building is sprinklered, the fitting shall be marked "Auto. Spkr."

*Siamese hose connections may project through a street wall not more than twelve (12) inches beyond the building line except that where there is an angle formed by the street wall and a check piece or the base of a column, pilaster or ornamental projection, they may be so located that no part extends more than fifteen (15) inches from either side of such angle in accordance with the provisions of the Building Code.*

In each fire department connection there shall be an approved straightway check valve installed in a horizontal position, unless suitably designed for vertical position, and the piping shall be arranged to drain between the check valve and the outside siamese coupling by either a ball drip having a one-half (½) inch pipe connection and one-half (½) inch orifice and a bronze ball of proper size, or by a three-quarter (¾) inch drip connection, with plugged valve attached, and when necessary arranged to drain to a sewer. A drain connection may be tapped into the body of check valve only when located in a horizontal position.

**Rule 12. Automatic Sprinkler Systems.** Automatic sprinkler systems shall be classified as:

(a) One Source Systems, supplied with water from any one of the automatic sources; and

(b) Two Source Systems, supplied with water from a combination of any two of the automatic sources; two pressure tanks with a total water capacity twice that required for a one source supply; direct connection to the city water supply on two different streets, so located that the closing of the controlling valve on one main will not eliminate the main on the other street; or a direct connection to the city water supply and one of the auxiliary sources provided the water supply main is at least six (6) inches in size, the main is fed both

ways and a two (2) inch test pipe at the top of sprinkler riser shows a flowing pressure of fifteen (15) pounds per square inch between the hours of six a. m. to six p. m.

*A gravity tank and pressure tank, or a gravity tank and pressure tank and one of the automatic sources or two pressure tanks having a total water capacity for a one source supply may be considered as a two-source supply where the occupancy of the building does not conflict with Rules 38, 39 and 40 hereinafter provided for.*

**Rule 13. Sprinkler Spacing.** Sprinkler heads and lines shall be spaced as herein provided:

**Mill Construction.** Under mill ceiling (smooth plank and timber construction, 5 to 12 foot bays) line of sprinklers shall be placed in the center of each bay and the distance between the heads on each line shall not exceed the following:

- (a) For Standard one-half (½) inch heads—
  - 8 feet in 12 foot bays;
  - 9 feet in 11 foot bays;
  - 10 feet in 10 foot bays;
  - 11 feet in 9 foot bays;
  - 12 feet in 5 to 8 foot bays;
- (b) For Conran\* one (1) inch heads—
  - 20 feet in 5 to 12 foot bays.
- (c) For Conran\* one and one-quarter (1¼) inch heads—
  - 25 feet in 5 to 12 foot bays.
- (d) Vaults used for the storage of nitro-celulo products and vaults used for the storage of flammable motion picture films shall have standard one-half (½) inch head for each cubic feet of available storage space, or one inch Conran\* head for each 250 cubic feet of available storage space.

Measurements shall be taken from center to center of timbers.

Ceilings of modified mill construction having less than three (3) feet wide shall be treated as joist construction and sprinkler heads and lines spaced accordingly.

Bay timbers spaced three (3) feet or more on centers, but less than five (5) feet on centers, will require special ruling by the administrative official having jurisdiction.

**Joisted Construction.** Under open finish joisted construction ceilings, floor, decks and roofs, the sprinkler lines shall be run at right angles to the joists and heads "Staggered spaced" so that heads on one line be opposite a point half way between heads on adjacent lines.

- (a) For Standard one-half (½) inch heads the distance between lines of sprinklers shall not exceed ten (10) feet and the distance between heads on each line shall not exceed eight (8) feet, the end heads on alternate lines being not more than two (2) feet from wall or partition. In all cases where such bays are over eleven and one-half (11½) feet wide, two or more lines of sprinklers shall be installed in each bay as required by the rules for

\*Wherever the term "Conran head" is used in these Rules, it is to be taken as meaning either a head of the type tested and approved by the Fire Department, or one that has passed similar tests by the Fire Department.

# PUBLIC HEARING

where girders and joists are flush at the bottom, heads shall be spaced according to the general rule.

(b) For Conran\* one (1) inch heads the distance between adjacent lines shall not exceed twenty (20) feet and the distance between the heads on each line shall not exceed sixteen (16) feet, the end heads on alternate lines being spaced not more than four (4) feet from wall or partition. Where girders project below the under side of joists and divide the ceiling into bays not exceeding twenty (20) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty (20) feet in width at least two (2) lines shall be installed in each bay and in no case shall the distance between adjacent lines exceed twenty (20) feet.

(c) For Conran\* one and one-quarter (1¼) inch heads the distance between adjacent lines shall not exceed twenty-five (25) feet and the distance between the head on each line shall not exceed twenty (20) feet, the end head on alternate lines being spaced not more than five (5) feet from wall or partition. Where girders project below the under side of joists and divide the ceiling into bays not exceeding twenty-five (25) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty-five (25) feet in width at least two lines shall be installed in each bay, and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

**Smooth Finish, Sheathed or Plastered Ceilings.** Under smooth finish, sheathed or plastered ceilings, in bays six (6) feet wide and over (measurements to be taken from center of timber, girder or other projection or support forming the bay), sprinkler heads and lines shall be spaced as follows:

(a) For standard one-half (½) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twelve (12) feet in width, and the distance between the heads on each line shall not exceed the following:

- 8 feet in 12 foot bays;
- 9 feet in 11 foot bays;
- 10 feet in 8 to 10 foot bays.

Bays in excess of twelve (12) feet in width and less than twenty-three (23) feet in width, shall contain at least two (2) lines of sprinklers; bays twenty-three (23) feet in width or over shall have the lines therein not over (10) feet apart. In bays in excess of twelve (12) feet in width, not more than one hundred (100) square feet of ceiling area shall be allotted to any single head.

(b) For Conran\* one (1) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty (20) feet in width, and the distance between the heads on each line shall not exceed twenty (20) feet. Bays in excess of twenty (20) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty (20) feet.

(c) For Conran\* one and one-quarter (1¼) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty-five (25) feet in width, and the distance between the heads on each line shall not exceed twenty-five (25) feet. Bays in excess of twenty-five (25) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

**Fireproof Construction.** The rules of slow-burning construction shall apply as far as practicable. The spacing of heads to protect the contents rather than the ceilings; but in no case shall the distance between a head on one line and a head on an adjacent line exceed the following:

(a) For standard one-half (½) inch heads, 12 feet.

(b) For Conran one (1) inch heads, 20 feet.

(c) For Conran one and one-quarter (1¼) inch heads, 25 feet.

**Distance From Walls.** The distance from wall or partition to the first head on a sprinkler line shall not exceed one-half the allowable distance between the heads on such line. Additional heads may be required in the narrow pockets formed by bay timbers or beams and wall. Where beams, girders, columns, walls, partitions or other obstructions prevent the effective discharge of water, additional heads shall be installed to effectively sprinkle the area.

**Vertical Shafts.** In vertical shafts having inflammable sides, heads shall be provided within the shaft in addition to the head or heads at the tops of shafts, as follows:

(a) One standard one-half (½) inch head for each 200 square feet of inflammable surface.

(b) One Conran\* one (1) inch head for each 400 square feet of inflammable surface.

(c) One Conran\* one and one-quarter (1¼) inch head for each 500 square feet of inflammable surface.

Such head or heads shall be installed at each floor when practicable, and always when shaft is trapped. Where practicable, heads shall be "staggered" at the alternate floor levels, particularly when only one head is installed at each floor level.

**Pitched Roofs.** Under a pitched roof sloping more steeply than one (1) foot in three (3) feet, heads shall be located in peak of roof, and those on either side of the peak shall be spaced according to the foregoing requirements. The distance between heads shall be measured on a line parallel with the roof. Where the roof meets the side wall or the floor line, the heads shall be placed not more than the following distance from such intersection:

(a) For standard one-half (½) inch heads, 3½ feet.

(b) For Conran\* one (1) inch heads, 7 feet.

(c) For Conran\* one and one-quarter (1¼) inch heads, 8½ feet.

Heads spaced not to exceed the following distance each way from the peak of roof, measured on a line parallel with the roof, may be used in lieu of heads located in peak of roof:

(a) For standard one-half (½) inch heads, 2½ feet.

(b) For Conran\* one (1) inch heads, 5 feet.

(c) For Conran\* one and one-quarter (1¼) inch heads, 6¼ feet.

In sawtooth roof construction, the end heads on the branch line shall be spaced not to exceed the following distance from the peak of the sawtooth:

(a) For standard one-half (½) inch heads, 2½ feet.

(b) For Conran\* one (1) inch heads, 5 feet.

(c) For Conran\* one and one-quarter (1¼) inch heads, 6¼ feet.

**Special Locations and Variations.** In special locations, such as over electric generating, power and transforming apparatus, over their controlling devices and switchboards, where water from the fire extinguishing equipment would be detrimental, the sprinkler lines and heads may be omitted at the discretion of the administrative official having jurisdiction, and when in his judgment a slight variation of this rule of spacing is desirable to effect a more efficient distribution of water for fire extinguishing purposes, the sprinkler lines and heads shall be spaced as he may direct.

**Rule 14. Sprinkler Position.** All sprinkler heads shall be located, wherever possible, in an upright position on top of the pipes, except that sprinkler heads on automatic wet pipe systems may be pendant on concealed piping and when construction or occupancy of a room or enclosure makes it preferable.

(a) Where standard one-half (½) inch heads are installed sprinkler detectors shall be parallel to ceilings, roofs or the

# PUBLIC HEARING

incline of stairs, but when installed in the peak of a pitched roof they shall be horizontal. Distance of deflectors from ceilings of mill or other smooth construction, or bottom of joists of open joist construction, shall be not less than three (3) inches nor more than ten (10) inches.

In fireproof buildings, the distance between deflectors and panel ceilings shall not exceed fifteen (15) inches.

Not less than eighteen (18) inches effective clear space shall be left below the sprinkler heads, so that they may discharge an unbroken spray blanket from sprinkler to sprinkler and sides of room when in operation. Any stock piles, racks or other obstructions interfering with such action shall not be permitted. *Sprinkler system piping shall not be used for the support of stock, clothing, etc.*

(b) Where Conran\*, heads are installed, the top of head shall be located the same distance below joists or ceiling as specified for deflectors in paragraph (a) of this rule; except that when heads are located under pitched roofs of piers or similar structures, they shall in general be installed in the upright position (not normal to slope of roof) and three (3) feet vertically below the underside of roof. When the administrative official having jurisdiction deems a variation of this rule advisable to obtain a more efficient distribution of water, the heads shall be located with respect to joists or ceiling, as he may direct.

Rule 15. Pipe Sizes. The number of heads on a given size pipe in one fire area in any story shall not exceed the following:

(a) For standard one-half (1/2) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
3/4 inch	1 head
1	2 heads
1 1/4	3 "
1 1/2	5 "
2	10 "
2 1/2	20 "
3	36 "
3 1/2	55 "
4	80 "
5	140 "
6	200 "
7	300 "
8	420 "

(b) For Conran\* one (1) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
1 inch	1 head
1 1/4	2 heads
1 1/2	3 "
2	4 "
2 1/2	6 "
3	9 "
4	18 "
5	34 "
6	51 "
7	75 "
8	105 "

(c) For Conran\* one and one-quarter (1 1/4) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
1 1/4 inch	1 head
1 1/2	2 heads
2	3 "
2 1/2	4 "
3	6 "
4	12 "
5	21 "
6	40 "
7	60 "
8	84 "

When it is desired to use pipe of larger size than eight (8) inches in diameter, special ruling will be required by the administrative official having jurisdiction as to the permissibility of its use and the number of heads that may be fed thereby.

Where practicable, it is desirable to arrange the piping so that the number of heads on a branch line will not exceed eight.

When the piping is arranged on the "gridiron" plan, the permissible number of heads may be doubled, provided the feed main is of the size indicated in the schedule for the total number of heads.

Where feed mains supply branch lines of only two heads each, the conditions approach those of long single line. Such feed mains shall usually be centrally supplied when there are over eight (8) or ten (10) branch lines. Branch lines up to fourteen (14) in number may be fed from a main provided a two and one-half (2 1/2) inch pipe does not supply more than sixteen (16) standard one-half (1/2) inch heads in lieu of twenty (20).

Buildings having slatted floors, or large unprotected floor openings without approved stops, shall be treated as one room with reference to the pipe sizes, and the feed main shall be of sufficient size to accommodate the number of heads called for. Larger pipe sizes than are allowed in the schedule may be required wherever the introduction of unusually long runs of pipe or conditions introduce unusually long runs of pipe or many angles. Buildings with blind attics with unprotected openings to floor below, may be piped from a system on the ceiling of floor below, provided pipe size schedule is not overloaded on sizes three (3) inches or under.

Rule 16. Feed Mains. The size of feed mains shall be less than the size of riser and shall be arranged to run direct as possible from source of water supply to riser.

Feed mains for stair or other towers without approved stops between floors, when piped on independent riser, shall be of sufficient size to accommodate the total number of sprinklers in such tower.

Rule 17. Risers. There shall be one or more separate risers in each building and in each section of the building divided by fire walls. Risers shall be arranged to provide "Center Central" or "Side Central" supply to feed risers. Each riser shall be of sufficient size to supply all the heads on said riser in one story, according to the schedule of sizes in Rule 15.

In buildings of fireproof construction, and for the purposes of this rule, a blank wall, or one in which the openings are protected by standard fire doors, may be considered a fire wall, if of equivalent construction.

If the conditions warrant, special permission may be granted allowing the heads in a fire section of small area to be fed from the risers in another section, provided the total number of heads in such area does not exceed the following number per floor:

(a) For standard one-half (1/2) inch heads, 48.

(b) For Conran\* one (1) inch heads, 12.

(c) For Conran\* one and one-quarter (1 1/4) inch heads, 12.

Risers shall not be located close to windows, and shall be protected from mechanical injury and freezing and shall be properly supported on foundations and by floor plates, couplings or hangers.

No connections, such as for sill cocks, house service hose outlets, shall be made with a sprinkler system or any part thereof.

Where gravity and pressure tanks feed through a discharge pipe or "dead riser" to the foot of a riser, an air lock is likely to develop the discharge pipe of the tank shall connect with the discharge pipe, or "dead riser" forty (40) feet below the bottom of the pressure tank.

# PUBLIC HEARING

Rule 18. Pipes and Fittings. All pipe shall be full-weight standard wrought iron or steel threaded pipe, well reamed and screwed up tight into fittings without reducing the passageway. Fittings shall be standard cast iron fittings, and shall be long turn pattern on feed mains and risers.

Such fittings shall be designed and guaranteed for a working pressure of 150 pounds per square inch and must be capable of withstanding a hydrostatic test pressure of 750 pounds per square inch without failure.

All pipe shall be secured to the ceiling, walls and other parts of the building with standard steel, wrought or malleable iron hangers.

Extra heavy fittings shall be employed where the normal pressure in the pipe system exceeds one hundred and fifty (150) pounds per square inch, and shall be designed for a working pressure of 250 pounds per square inch and be capable of withstanding a hydrostatic test pressure of 1,250 pounds per square inch without failure.

All underground pipe shall comply with the specifications for cast iron pipe of the American Water Works Association.

Rule 19. Protection of Pipes and Sprinklers. When exposed to moisture, sprinkler pipes and hangers shall be protected against corrosion whenever found necessary by thoroughly cleaning the pipe of all scale and grease and painting with a coat of red lead and linseed oil paint or other suitable moisture resistive paint. When exposed to chemicals, the pipe and fittings shall be coated with graphite or other approved chemical resistive paint. Care shall be taken not to paint the sprinkler heads.

Supply pipes of risers in low basements or low spaces or ground floors exposed to frost, shall be properly protected by a masonry or wood enclosure, properly heated, or covered with mineral wool, sawdust or tar mixed with granular cork, extending below bottom of pipe and through the flooring of ground floor, or the pipe shall be protected by three alternate layers of one-inch hair felt and build-up paper or by other approved method. When of wood, the enclosure shall be constructed double with a layer of paper between the two thicknesses of wood.

Where risers, drains, heating pipes, etc., pass through concrete floors or partitions, they shall be protected by a metal sleeve or be grouted with cement mortar.

Whenever sprinklers are exposed to corrosion, the heads shall be protected with an approved hermetically sealed cover, with an approved wax coating.

Rule 20. Drainage. All sprinkler pipe and fittings shall be installed that they can be thoroughly drained, and where practicable, all piping shall be arranged to drain at main drips.

Mains or drip pipes shall be so arranged as not to expose any part of the sprinkler system to frost, and shall be connected, either by check valves or other means, so they will not [overthrow] overflow domestic service or connections to the same sewer or house drain, or if exposed through the wall and exposed to the weather, they shall be fitted with hoods or down-turned elbows.

Drains, pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet, shall be installed:

- at the base of the main riser;
- at each alarm valve;
- at each dry-pipe valve;
- at each gravity tank;
- at each pressure tank;
- at each fire department connection;
- at each floor, if independent floor control valves are used;

at each supply main, when the water in the same cannot be removed through any of the above drains. Such drains shall be installed with controlling valves so that flow-stops may be made to determine if the water supplies connections from yard mains to the inside of the build-

ing are in order without causing water damage or overflowing service connections to the same house drain. Any such drain shall be not less than two (2) inches in size except that drains at independent floor valves [may be one and one-quarter ( $1\frac{1}{4}$ ) inches in size] shall be not less than 1 inch in size where floor valves are not over  $2\frac{1}{2}$  inches in size and  $1\frac{1}{4}$  inches where floor valves are larger, and connected to a main drain riser of not less than  $1\frac{1}{2}$  inches in size. The drain at the main riser shall discharge into a cone or sight drain, or if carried through the wall and exposed to the weather, it shall be fitted with a hood or down-turned elbow.

*At an alarm valve at the top of a riser in a down-fed system a drain shall not be required.*

*At each gravity or pressure tank erected above roof of a building there shall be a 4-inch valved drain connection so arranged as to discharge on roof of building. And where a tank is on a separate structure altogether independent of buildings drain connection to be arranged to discharge at ground level.*

On automatic wet pipe systems, the horizontal branch pipes shall be pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet to drain towards the sources of supply with drip valves at the low points.

On automatic dry-pipe systems, branch pipes shall be pitched at least one-half ( $\frac{1}{2}$ ) inch in ten (10) feet.

Rule 21. Test Pipe. [On] In all wet-pipe automatic sprinkler systems a test pipe of not less than  $\frac{3}{4}$  inch in diameter shall be connected directly with each [riser] system but shall be connected to a pipe of not less than  $1\frac{3}{4}$  inches in diameter in upper story and arranged to discharge, through a  $\frac{1}{2}$ -inch brass outlet, preferably to a point where it can readily be seen. With long runs or many angles, size of test pipe [shall] should be increased to one (1) inch or larger. Controlling valve should be located at a sufficient distance from where the test pipe passes through the wall of the building so as to reduce to a minimum the chance of freezing of water in test pipe.

*In all dry-pipe automatic sprinkler systems a  $\frac{3}{4}$ -inch inspector's test pipe shall be installed at the end of the most distant branch line and fitted with a  $\frac{3}{4}$ -inch shut-off valve stopped with a brass plug.*

Rule 22. Pressure Gauges. A four and one-half ( $4\frac{1}{2}$ ) inch double-spring Bourdon pressure gauge shall be provided in all automatic sprinkler systems as follows:

- Above dry-pipe valves;
- Below dry-pipe valves;
- At the pressure tank;
- At the air compressor;
- Above the alarm valve;
- Below the alarm valve; and

In the connections from city water supply.

Provision may be made for taking the pressure both above and below the alarm valve and the dry-pipe valve with only one gauge at each valve.

*A gauge shall not be required at an alarm valve located at the top of a riser in a down-fed system.*

Gauge connections shall be taken from the supply main or riser and not from the two-inch drain or test pipe.

Gauges shall be installed in a suitable place protected from freezing and be controlled by a valve with arrangements for draining. A plugged outlet, not less than one-quarter ( $\frac{1}{4}$ ) inch in size, shall be located between each valve and gauge for purpose of installing the inspector's gauge.

Rule 23. Valves. All valves two (2) inches in diameter and under shall be of brass or bronze, or other approved [non-corrodible] non-corrosive material. Valves over two (2) inches in diameter shall be of brass, or bronze or iron body, brass mounted, or of other approved [non-corrodible] non-corrosive material.

All sidewalk Siamese inlet valves, caps and chains shall be of galvanized cast iron or other approved [non-corrodible] non-corrosive material.

# PUBLIC HEARING

All gate valves shall be solid or double wedge disc, sufficing box pattern with hand wheel, outside screw and yoke, or other approved indicator pattern.

All check valves shall be approved straight way regrinding pattern, so built that the clappers may be readily removed for repairs.

Rule 24. Water Supply Gate Valves. The piping connecting each source of water supply with the sprinkler system shall be provided with a gate valve of the outside screw and yoke type, sealed open and tagged to designate its purpose, so located as to control **each source of water** supply except that from fire department hose connections. All such gate valves shall be located within the building where easily visible and readily accessible and as close as possible to the supply inlet.

Rule 25. Water Supply Check Valves. The piping connecting each source of water supply with the sprinkler system, including fire department connections, shall be provided with a check valve.

On two-source systems, check valves shall have a gate valve on each side to permit repair of check without shutting off both supplies, except that where the two sources of supply consist of tanks located above the highest line of sprinklers, a gate valve need only be provided on the downstream side of each check valve.

Rule 26. Control Valves. All automatic sprinkler systems shall be provided with a **main control or shutoff valve** arranged to be readily accessible and sealed in the open position; except that when the sprinkler system is fed from water supplies on the roof of the building, independent and readily accessible floor control valves, sealed in the open position, may be installed.

When not more than ten (10) standard one-half ( $\frac{1}{2}$ ) inch sprinkler heads or three (3) Conran\* heads in any automatic wet pipe system are exposed to cold and subject to freezing, shutoff valves may be provided to discontinue the water supply to such heads between November 1 and April 1. A greater number of heads than specified above, located in places which cannot be properly heated, shall be controlled by an automatic dry-pipe valve.

Rule 27. Dry-Pipe Valves. A dry-pipe valve shall be taken to mean a valve automatically controlling the water supply of the sprinkler system in such a manner that under normal conditions its piping system beyond the valve is maintained dry, but in the event of fire, the valve automatically releases the water into the sprinkler system, for fire extinguishing purposes.

Dry-pipe valves shall, for the purpose of these rules, be classified as follows:

Type A, in which the valve is actuated by the release of compressed air in the sprinkler piping system, due to the opening of a sprinkler head; and

Type B, in which the valve is actuated by an approved trip under electric control of an approved automatic thermostatic fire alarm system.

Dry-pipe valves shall be located as near as practicable to the sprinkler system in an enclosed and accessible place protected from mechanical injury and freezing.

*When anti-columning pipes are used, they shall be either lead lined or of brass.*

Automatic wet-pipe sprinkler systems in which only twenty-five (25) per cent of the heads are required to be maintained dry for protection from freezing, shall have only such heads under dry-pipe valve control.

(a) When "Type A" valve is installed, the air pressure in sprinkler systems under such dry-pipe valve control shall not exceed forty (40) pounds per square inch, nor be permitted to fall below twenty-five (25) pounds per square inch, nor shall it be less than one-sixth ( $\frac{1}{6}$ ) of the water pressure in any case.

The air compressor shall have a capacity of not less than eleven (11) cubic feet per minute and the air supply to the pump shall be taken, if possible, from a room containing dry air, or it shall be passed through a drying chamber containing calcium chloride, in order to avoid the introduction of moisture into the system.

The air pressure on such dry-pipe systems shall be maintained throughout the year.

Not more than the following number of heads shall be controlled by one "Type A" dry-pipe valve:

- (a) For standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

*Where equipped with an approved quick-opening device, the following number of heads may be controlled by one "Type A" dry-pipe valve:*

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

(b) When "Type B" valve is installed the actuating system shall be designed to operate at a temperature higher than that required to open the sprinkler heads, and all connections between the alarm system and the dry-pipe system shall be adequately protected against injury of any kind.

When required by the administrative official having jurisdiction, the dead end of every feed main in such dry-pipe system shall be provided with an air relief valve or device so constructed as to be normally open in order to permit the free escape of air from the system, but to close automatically against the escape of water.

Not more than the following number of heads shall be controlled by one "Type B" dry-pipe valve:

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

Rule 28. Alarm Valve. All automatic wet pipe sprinkler systems shall be equipped with an alarm valve so constructed that a flow of water through a one-half ( $\frac{1}{2}$ ) inch orifice will operate an electric or mechanical gong.

Dry pipe valves shall be equipped with a reliable device to give either an electrical or mechanical alarm.

Rule 29. High and Low Water and Pressure Alarm. Gravity tanks shall be equipped with a device to indicate when the water falls below or rises above the normal level of the tank, with an indicator or alarm located in the engine room near the pump.

All pressure tanks shall be equipped with a device to indicate when the pressure in the tank falls below seventy (70) or rises above eighty (80) pounds per square inch with an indicator or alarm located in the engineer's room [near the compressor].

Rule 30. Heating of Tanks. The water in all pressure tanks subject to freezing shall be protected by insulating the tanks or enclosing the tank in a frost-proof house properly heated and lighted.

Rule 31. Concealed Pipe Systems. All pipe in concealed pipe systems shall be of standard full-weight wrought iron or steel, painted with two coats of protective paint before and one after installation. Such pipe shall be installed in ducts or be encased in cement mortar and shall be inspected prior to concealment. When installed in concealed space between floor arches and ceiling, such pipe shall be supported by hangers and all pipe, fittings and hangers be protected with two coats of paint.

Rule 32. Preparation of Building. Floor or wall openings and other structural defects which prevent the escape of heated air and retard the automatic action of sprinkler heads shall be provided with the necessary boards and draft stops to permit specific control of the building by the local sprinklers.

Curtain boards shall project at least three (3) inches below the lowest sprinkler.

# PUBLIC HEARING

Rule 33. *Approval of Sprinkler System [Tests]. Before* **all automatic sprinkler systems, excluding the water supply tanks, shall be subjected after installation to a hydrostatic pressure of a test of at least fifty (50) pounds per square inch in excess of that which will be normally required and observed in the sprinkler system, such test pressure, however, never to be less than one hundred and (150) pounds per square inch in any part of the system.**

**Pressure tanks shall be tested after erection to a test pressure of one and one-half (1½) times the working pressure.**

**To prevent the possibility of serious water damage in case of a break, the pressure shall be maintained by a pump, the main controlling gate being meanwhile shut. Brine or other corrosive chemicals shall not be used for testing systems.**

**Automatic dry-pipe systems with "Type A" valve containing an air pressure of forty (40) pounds per square inch shall be pumped up, be held for twenty-four (24) hours, all leaks stopped which allow a loss of pressure of over (2) pounds per square inch for the twenty-four (24) hours.**

**In the case of automatic dry-pipe systems with different "Type A" valve, the valve shall be held off its seat during the test to prevent injuring the valve.**

**Non-automatic systems shall be tested after installation to a pressure of at least fifty (50) pounds per square inch in excess of the pressure necessary to reach the highest line of sprinkler.**

**Tests of installed systems shall be made by the contractor in the presence of the Fire Commissioner, or his authorized representative.**

**Piping, devices nor any portion of a newly constructed sprinkler system shall be covered up or permanently concealed until tested by the Bureau of Fire Prevention and approved in writing, except piping passing through floors, partitions or beams for distances equal to the thickness of such floors, walls, partitions or beams.**

34. *Non-fireproof Business Buildings.* Automatic sprinklers required in non-fireproof business buildings under the provisions of Chapter 5, Article 4, Section 72, Code of Ordinances, unless otherwise specifically provided in these rules shall consist of at least a One Source System.

35. *Dangerous or Hazardous Buildings.* Automatic sprinklers required in buildings having occupancies considered to be dangerous or hazardous by the Fire Commissioner shall consist of at least a one-source system unless otherwise specifically provided for in these rules.

36. *Factories and other Buildings.* Automatic sprinklers required in buildings under the provisions of the Code of Ordinances and the Labor Law shall consist of at least a one source system.

[35] 37. *Theatre Buildings.* Automatic sprinklers required in theatre buildings under the provisions of Chapter 10, Article 25, Section 524, Code of Ordinances, shall consist of at least a One Source System.

[36] 38. *Firework Storage.* Automatic sprinklers required in buildings in which fireworks are stored or sold under the provisions of Chapter 10, Article 6, Section 92, Code of Ordinances, shall consist of a Two Source System.

Rule [37] 39. *Nitro-Cellulose Products.* Automatic sprinklers as required in buildings in which nitro-cellulose products are stored under the provisions of Chapter 10, Article 19, Section 232, Code of Ordinances, shall consist of a system supplied from both approved gravity tank supply and an approved pressure tank supply, except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems, in conformity with the provisions of this rule as in force up to December 1, 1921.

*In buildings wherein are stored or handled only limited quantities of nitro-cellulose products, not exceeding 500 pounds, the automatic sprinklers may consist of a two source system as provided for in Rule 12.*

Rule [38] 40. *Inflammable Motion-Picture Films.* Automatic sprinklers, required in buildings in which inflammable motion-picture films are stored under the provisions of Chapter 10, Article 20, Section 241, Code of Ordinances, shall consist of a system supplied from both an approved gravity tank supply and an approved pressure tank supply except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems in conformity with the provisions of this rule as in force up to December 1st, 1921.

Rule [39] 41. *Existing Installations and Approvals.* Automatic extinguisher systems and devices heretofore approved and accepted by the authorities having jurisdiction shall not be required to conform to the provisions of these rules; and all such systems heretofore installed shall not be required to be altered to conform to these rules so long as the fire hazard due to construction and occupancy of the building is not increased or where substantial additions or extensions in height or area is made to the building when these rules shall apply if deemed advisable or necessary by the Fire Commissioner and the system after inspection is found to be in good working order.

Rule 42. *Communicating Openings.* When a building fully equipped with sprinklers communicates with another not so equipped the openings must be protected by approved fire doors on both sides of the wall, one of which must be automatic.

Rule 43. *Maintenance Inspections.* Automatic sprinkler systems shall be inspected at least once a month by the person in charge of the building, or by other competent person employed by the owner, to see that all parts of the system are in perfect working order, and the fire department connection or connections, if any, ready for immediate use by the Fire Department. A detailed record of each inspection shall be kept for examination by a representative of the Fire Department.

There shall be kept available at all times in the premises a supply of extra sprinklers, never less than six (6), to replace promptly any fused or damaged sprinklers. And there shall be one or more employees-instructed in the maintenance of sprinkler system.

Rule 44. *Open Sprinklers.* When open sprinklers are required for exposure protection by the Fire Department as specified in the Building Code they shall be installed in accordance with the rules of the National Board of Fire Underwriters. Plans for such installation to be filed with the Fire Department for approval.

## FORMS FOR NOTICES TO PROPERTY OWNERS

Applicants, under the building zone resolution, desire of Form 13A, for notices to property owners, such forms are not to be supplied by this office. Applicant is entitled only to one copy of Form 13A, filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board  
offices of the board and of the further publication  
calendars in the daily press.

*Fourth*, That no one is entitled to written notice date for the hearing in his case, and that the failure to receive such notice is no excuse for not appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of the appellant or petitioner to file necessary data by any other method of delay.

gress Report.

## PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

## HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

## CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, June 29, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, July 6, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

## NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## THE RESOLUTION:

(247-26-A)

WHEREAS, Charles Sheres, for John H. Sturk & Son, lessees, filed, March 23, 1926, an appeal from an order of the fire commissioner, affecting premises 283 Rider avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated March 4, 1926, Order No. 33207-LC, reads:

"Inspection of premises No. 283 Rider Avenue, Bronx, shows that you are conducting a non-storage garage in a building of frame construction in violation of Section 5, Paragraph 4, Chapter 5 and Section 90, Chapter 5 of the Code of Ordinances.

"You are therefore ordered to

"1. Remove all motor vehicles, the fuel tanks of which are not empty from above premises and discontinue the maintenance of a garage."

and

WHEREAS, the premises consist of a plot of ground 25 ft. by 125 ft. in area; the rear portion being used for the storage of builder's material and on the front portion is a frame building, one story in height, 25 ft. by 46 ft. in area, being OCCUPIED for the storage of lime and cement, an office and also as a garage for the storage of one motor truck; and

WHEREAS, appellant contends that no gasoline, other than that in the tank of the car, is stored on the premises; that the garage portion of the building is fire-retarded, and that fire pails, on hooks along the walls, have been provided.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that not more than one motor truck, the property of the lessee, used in the conduct of the business on the premises, shall be permitted; that said truck shall be stored in the front portion of the one-story structure; that the garage portion of this structure shall be fire-retarded with plaster boards and metal; that not more than one door between garage and the material-loading area shall be permitted, this door to be fireproof and self-closing; that the existing door between garage portion and office shall be closed up and permanently sealed; that there shall be no gasoline storage equipment maintained on the premises; and that the above appeal is *granted* for a temporary period of two (2) years from the date of this action.

257-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Devoe & Raynolds Co., Inc., owner.

SUBJECT—Appeal from order of fire commissioner. PREMISES AFFECTED—383-393 Hamilton avenue and 567-577 Smith street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Commissioner Guilfoyle .....	1

THE RESOLUTION:

(257-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Devoe & Raynolds Co., Inc., owner, filed, March

25, 1926, an appeal from an order of the fire commissioner affecting premises Nos. 383-393 Hamilton avenue and 567-577 Smith street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated tober 27, 1925, reads (Order No. 86147-F):

"1. Install a standpipe system with risers 4 in diameter, tested to withstand a pressure of 3 per square inch, extending from cellar to roof necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway sure."

and

WHEREAS, the premises consist of nine (9) ad non-fireproof buildings, connected by doorways 1, 2, 4 stories (63 ft.) in height, 140 ft. by 216 ft. and irregular, in depth, about 37,760 sq. ft. in area at 1st 34,322 sq. ft. at 2nd story, 18,434 sq. ft. at 3rd story 17,000 sq. ft. at 4th story; OCCUPIED for the maintenance of paint and putty; 1st story, 50 persons; 2nd 70 persons; 3rd story, 45 persons; 4th story, 20 persons

WHEREAS, the appellant contends that each building separated by fire doors; that the largest single building less than 10,000 sq. ft. (building No. 9), which is fireproof; that the group of buildings are equipped with a sprinkler system, consisting of two 14,000 gallon tanks and two 9,000 gallon pressure tanks.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the existing premises height, area and dimensions shall not be increased; all horizontal openings shall be protected with self-closing fireproof doors on both sides; that all exits required by law as modified by action of board shall be provided and maintained; and that the entire premises shall be protected throughout with an approved two-source sprinkler system; also with an approved central office watchman's supervision system; and that the conditions as to occupancy shall otherwise remain unchanged.

THE RESOLUTION:

(202-26-A)

WHEREAS, Matthew W. Del Gaudio, for 10 Minute Auto Laundry Co., Inc., owner, filed, March 10, 1926, an appeal from a decision of the fire commissioner, affecting premises Nos. 619-21 East Fordham road and 2521 Hughes avenue, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, dated February 19, 1926, reads (Applic. No. 2374-24):

“1. Water boiler may not be permitted in garage, same must be separated by unpierced fire wall with entrance to outer air only.

“2. Sump pit may not be permitted.”;

and

WHEREAS, the building is non-fireproof, one story in height, 50 ft. by 100 ft. in area; OCCUPIED as an automobile laundry (limited to storage, preparatory to washing, of five cars at one time); and

WHEREAS, there has been installed, for washing automobiles, a trough-like arrangement (pitched to one end where the sump is located), from the bottom and sides of which hot water is sprayed for this purpose; for heating the water an automatic gas water heater has been installed; and

WHEREAS, appellant contends that the sump (which is connected to the oil separator) operates in a manner similar to the oil separator and that it is cleaned daily; that the oil separator is of an approved type; and proposes to provide for the water heater a separate fireproof block compartment, with ventilating skylight over same.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that not more than one gas water-heater shall be maintained on 1st story, enclosed in fire-proof partitions, with not more than one opening therein, provided with self-closing fireproof door, and a concrete sill not less than 12 in. above floor level shall be provided; that said enclosed room shall be ventilated by fixed louver skylight at the roof; that a reservoir constructed of concrete shall be maintained for the accumulation of the floor surface water, with no connection to the drainage system of the premises, discharging through an oil separator of approved type; that no gasoline storage equipment shall be maintained on the premises; and that the building shall not be increased in height, area or dimension.

## THE RESOLUTION:

(190-26-A)

WHEREAS, The Continental Iron Works, for Estate of Thomas P. Rowland, owner, filed, March 5, 1926, an appeal from an order of the fire commissioner, affecting premises north side of Calyer street, 430 ft. west of West street, Building "A", and south side of Calyer street, 380 ft. west of West street, Building "B", Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 26, 1926, reads (Order No. 1585-LC):

"1. Install a 4 in. standpipe in 2 story frame machine shop, same to be installed in accordance with Chapter 5, Section 581, Code of Ordinances. Plans and specifications in duplicate to be filed with and approved by the Fire Department before work can be commenced.

"2. Install a 4 in. standpipe in the one and one-half story frame and corrugated iron building, same to be installed in accordance with Chapter 5, Sec. 581 of the Code of Ordinances. Plans and specifications in duplicate to be filed with and approved by the Fire Department before work can be commenced."

and

WHEREAS, the premises consist of several frame buildings, two of which are designated on plans as "A" and "B", one story (20 ft. 5 in. and 23 ft.) in height, 205 ft. 6 in. by 90 ft. and 212 ft. by 47 ft., about 18,495 sq. ft. and 9,964 sq. ft. in area, respectively; Building "B" is covered with corrugated iron. OCCUPIED: Building "A", machine shop, 12 persons; Building "B", iron work shop, 25 persons; and

WHEREAS, the appellant contends that the buildings are provided with fire alarm boxes, fire tanks with an adequate number of fire pails, fire extinguishers, and the premises kept constantly under patrol by watchmen; and

WHEREAS, this is a group of buildings, conducted and maintained as iron works, open on three street fronts and the East River.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the existing one-story buildings shall not be increased in height, area or dimension; that the buildings shall be equipped throughout with an approved fire alarm system with central office connection to fire headquarters; that watchman patrol service shall be maintained; that all fire pails, fire extinguishers and sand pails, as required by the fire commissioner, shall be provided.

(216-26-A)

WHEREAS, Jean Jeame, for J. Odell Whitenack, owner, filed, March 13, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 231-233 West street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 30, 1925, reads (Order No. 88217-F):

"1. Provide a separate and distinct system of automatic *Sprinklers* throughout building having at least one source of water supply, \* \* \*";

and

WHEREAS, the building is non-fireproof, three stories above ground and cellar (40 ft. above curb level) in height, 92 ft. by 92 ft. in area; separated into two sections by a partition wall; having openings therein, open on the street, basement and 1st stories and protected with fireproof doors on the upper stories. OCCUPIED: Cellar, storage for builder's plant; basement, ornamental iron shops; 1st story, garage (for commercial car) and also woodworking shop; 2nd story, woodworking shop and dwelling at the rear portion; 3rd story, offices and also dwelling, approximately 40 persons in the entire premises; and

WHEREAS, appellant contends that the garage portion of the premises is fireproof and proposes to fire-retard the portion of that portion of the woodworking shop (on 2nd story) beneath the dwelling occupancy on the 2nd story and proposes, further, to provide a portable chemical extinguisher on wheels.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the woodworking portion of the premises shall not be increased in area and shall be equipped with a one-source sprinkler system, with a 4 in. direct connection to city main; that the garage area shall be limited to one (1) automobile, the property of the owner, and premises, used in conjunction with the business conducted on the property; and that the garage portion shall be entirely enclosed in fireproof construction, any opening from the interior of building equipped with self-closing fireproof door or rolling iron shutter.

RESOLUTION:

(493-26-A)

WHEREAS, Sloan and Robertson, for Eastern Offices, Inc., filed, June 1, 1926, an appeal from a decision of the fire commissioner, affecting premises Nos. 424-442 Lexington avenue, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated March 31, 1926, reads (N. B. Applic. No. 824-1926):

1. The area of the premises is over 46,000 square feet, four risers should be provided.

2. No more than 100 feet of hose is allowed at each outlet. Sufficient outlets must be provided to cover fire floor area.

3. An intermediate gravity tank must be provided at each 300 feet of height or fraction thereof.”;

WHEREAS, the proposed building is fireproof, 29 stories (9 in.) in height, 224 ft. by 275 ft. (exceeding 46,000 sq. ft. area at typical floors). OCCUPANCY: 30 offices story; and

WHEREAS, the appellant proposes to install three (3) standpipes, one in each of the three stairwells, with an additional outlet and rack extending into the corridor on each floor from each of the two easterly rising stairwell lines and including the 16th story; also to install a 4,000 gallon tank 20 ft. above main roof and an intermediate gravity tank at 17th story level, causing about 85 1/4 psi pressure at lowest point of pipe lines; to install pressure reducing valves where the pressure exceeds 85 psi; otherwise the standpipes to conform with the rules of the board; the appellant contends that the plans for the building have been approved by the superintendent of buildings with three stairways.

Resolved, that the decision of the fire commissioner be and hereby is modified, and the appeal be and it hereby is granted, as to Item 1, on condition that all stairhalls as

required by law shall be provided with standpipe equipments installed therein throughout; as to Item 2, on condition that all outlets in stairhall enclosure shall be equipped with hose length not exceeding 125 ft., sufficient to cover all floor areas; as to Item 3, only so far as it affects the installation of one additional intermediate tank, on condition that approved pressure reducing valves, where required, shall be installed; that the standpipe system otherwise shall comply with the rules in all respects; and that the use and occupancy of building shall be restricted to business offices throughout.

THE RESOLUTION:

(308-26-A)

WHEREAS, Thomas W. White, for Sinclair Refining Co., lessee, filed, April 9, 1926, an appeal from a decision of the fire commissioner, affecting premises Nos. 1117-1163 Grand street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated March 31, 1926, reads (Applic. No. 670-26):

“1. All storage tanks comprising or forming a part of an oil storage plant shall be buried so that the tops thereof shall be at least two feet below the grade level, and such tanks must be separated from each other by not less than one foot of solid concrete, well tamped into place as per Section 111, Subdivision 5 of Article 8 of Chapter 10.”;

and

WHEREAS, the premises consist of a large plot of ground, 406 ft. by 145 ft. (irregular) in depth, bounded on the north and east sides by Newtown Creek, upon which an oil storage plant is being erected; and

WHEREAS, the appellant proposes to install one 50,000 gallon gasoline tank, one kerosene and one furnace oil tank, each of 25,000 gallons capacity, eight gasoline and two kerosene tanks, each of 15,000 gallons capacity, all to be erected upon concrete foundations above the ground level, separated into batteries not exceeding 50,000 gallons, each battery surrounded by reinforced concrete dyke walls enclosing an open space equal to 1 1/2 times the volume of tanks; and

WHEREAS, the appellant contends that the plant is erected upon filled in ground at tidewater level; that there are two fire hydrants within 50 ft. from the plant; furthermore, the appellant proposes to equip the tanks with an approved type of chemical fire-fighting apparatus, together with whirling water sprays, vents, manholes, etc.; and

WHEREAS, a committee of the board visited the premises and reports:

Cal. No. 308-26-A;

Premises 1117-63 Grand Street, Brooklyn.

# MINUTES

## REPORT OF INSPECTION.

The full Board visited these premises on May 14, 1926, for personal observation.

This is an appeal from an order of the Fire Commissioner requiring the burial of all storage tanks in connection with proposed liquid oil storage plant located on Newtown Creek.

The property is approximately 406 ft. long along Grand Avenue; approximately 133 ft. in depth from Grand Ave. to Newtown Creek. It is intended as a local distributing commercial sales plant.

The property is bounded on the westerly line by Grand Avenue, running into Metropolitan Avenue, having, at this point, an extensive public highway frontage on the westerly side. To the south, 65 ft. distant from this property, is a building material storage yard, with great heaps of building sand, brick, etc. The northerly and easterly boundary of the property is on Newtown Creek. The entire plot is a low lying strip of land of mud river bottom exposed at low tide.

The Board recommends granting of the appeal omitting the requirement as to the entire burial of the tanks, *on condition* that there shall be not more than one (1) 50,000-gallon single storage tank for gasoline, and not more than eight (8) 15,000-gallon gasoline tanks, together with two (2) tanks of 15,000-gallon capacity for kerosene, one (1) 25,000-gallon kerosene storage tank, and one (1) 25,000-gallon furnace oil storage tank; and *on further condition* that the 50,000-gallon tank for gasoline shall be enclosed in a separate reinforced concrete reservoir, and that there shall be not more than two (2) 15,000-gallon tanks in any other single reservoir.

The entire oil storage tanks shall be enclosed with reinforced concrete walls from 12 ft. to 14 ft. 6 in. in height, providing reservoirs of not less than 150 per cent in excess of the tank capacity so enclosed.

From the top of the concrete wall to the top of the tanks, there shall be constructed brick walls of approved masonry as flame deflectors.

All tanks shall be equipped with an acceptable liquid fire extinguishing medium, and each tank shall also be equipped with whirling water sprays, vents, manholes, etc.; and there shall be maintained a driveway at the southerly end of the premises between this property and the adjoining property to the south, an open driveway of not less than fifteen (15) feet in width, unincumbered for its entire distance from Grand Avenue to Newtown Creek.

Plans shall be returned to this Board for approval as to location and equipment in accordance with the foregoing stipulations.

Submit for consideration.

(Signed) WILLIAM E. WALSH,  
HENRY L. CONNELL,  
JOHN KENLON,  
JAMES P. HOLLAND,  
JOHN GUILFOYLE.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the burial of the tanks, *on condition* that the requirements stipulated in the report of the committee, as adopted, shall be complied with; that the equipment and maintenance of plant shall otherwise comply with the requirements of law in all respects. The plans, as to location and equipment, as stipulated in said report of committee, shall be returned to this board for its approval before they are submitted to the fire commissioner for his action thereon.

1491-21-A.

APPELLANT—Mrs. Fannie Kelly. owner.

SUBJECT—Application for reopening—extension of permit—appeal from order of fire commissioner.

PREMISES AFFECTED—North side Hillside avenue, 400 ft. east of Nagel avenue, Manhattan.

## APPEARANCES—

For Appellant: Frank Kelly.

ACTION OF BOARD—Appeal reopened and extension of permit granted for one year.

## THE VOTE TO GRANT EXTENSION OF PERMIT—

Affirmative: Chairman Walsh, Commissioner Connell, Holland and Guilfoyle .....

Negative .....

Absent: Deputy Chief Martin .....

## THE RESOLUTION:

(1491-21-A)

WHEREAS, Fannie Kelly, owner, filed, November 30, 1925, an appeal, with the board of appeals, from an order of the fire commissioner, affecting premises north side of Hillside avenue, 400 ft. east of Nagel avenue, Manhattan; and

WHEREAS, the order of the fire commissioner, No. 4, L.C., dated January 8, 1921, reads:

"With reference to your application, dated July 1, 1920, for a permit to maintain a non-storage garage at the above location, I regret to inform you that I am without power to grant such permit because the building is of frame construction.

"Sec. 5, par. 4, Chapt. 5 of the Code of Ordinances provides that 'no change of occupancy or use shall be made in any \* \* \* now existing \* \* \* building \* \* \* unless such building conforms to the provisions of the building code with respect to buildings hereafter erected for the proposed new occupancy or use.

"Sec. 90, Chapt. 5 of the Code of Ordinances provides that \* \* \* no frame \* \* \* structure shall hereafter be built \* \* \* within \* \* \* the fire limits.

"You are, therefore, ordered to—

"1. Remove all motor vehicles, the fuel tanks of which are not empty and to discontinue the use of the premises as a non-storage garage.";

and

WHEREAS, the building is of frame and corrugated metal construction, located in a residence district, one story high, 20 ft. by 30 ft. in area; OCCUPIED as a residence for five cars; and

WHEREAS, appellant states that the building has been used as a garage since its erection in 1906 and that space has been continually rented out from 1907 until the present time and has filed affidavits as to the renting out of space since 1915; and

WHEREAS, this appeal was granted by the board of appeals at its meeting February 14, 1922, and April 28, 1925, on the conditions, and appellant requested a modification of the conditions as to time limit.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* to permit the temporary use of the building as a five-car garage for a period not to exceed one year from the date of this action.

## CASES DISMISSED.

The chairman called attention to the following cases where notices of intention to appeal were offered for filing but where, despite notices from this office, papers had not been completed, thus tying the hands of the administrative official in the performance of his duty:

(1184-25-A)

Filed November 30, 1925—Premises 35 Sixth avenue, Manhattan. Order of the fire commissioner. Appealants, Strulson Brothers. Dismissed for failure to prosecute.

Negative ..... 0

Absent ..... 0

## THE RESOLUTION:

(230-26-BZ)

WHEREAS, Frederick J. Flynn, for Metropolitan Realty, Inc., owner, filed, March 18, 1926, an application, under the building zone resolution, to permit in residence district the erection and maintenance of a building for business occupancy; premises 24-26 East 40th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 22, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 40th street is in a residence and business district; Madison avenue is in a business

# MINUTES

district, and that East 39th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 8, 1926, reads (N. B. 106/26):

"1. Proposed occupancy is unlawful within a residence district. Section 3 of Building Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, 15 stories and pent house in height, with a frontage of 50 ft. and a depth of 98 ft. 9 in.; to be occupied as stores and offices; and

WHEREAS, the board deemed it would be a hardship to restrict this property in view of the fact that the premises are now occupied for garage use and that applicant was entitled to relief under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the use and occupancy of the premises shall be restricted to the conduct and operation of executive offices throughout; that the building zone resolution as to height, area and rear yard shall be complied with in all respects; that the facade of the building shall be of attractive architectural design; that all permits required shall be obtained within nine months and the building completed within eighteen months from the date of this action.

326-26-BZ.

APPLICANT—Jacob Lubroth, Inc., for Beardsley Realty Corp., owner.

SUBJECT—Application (re: decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a building to be occupied for store purposes on the first story.

PREMISES AFFECTED—6306-6312 Bay Parkway, Brooklyn.

APPEARANCES—

For Applicant: Jacob Lubroth.  
For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell and Guilfoyle and Deputy Chief Martin .....	4
Negative: Commissioner Holland .....	1
Absent .....	0

THE RESOLUTION:

(326-26-BZ)

WHEREAS, Jacob Lubroth, Inc., for Beardsley Realty Corp., owner, filed, April 16, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building to be occupied for store purposes on the first story; premises 6306-6312 Bay parkway (22nd avenue), Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 22, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bay parkway (22nd avenue), 63rd street and 64th street are all in a residence district; and

WHEREAS, the decision of the superintendent of buildings (Applic. 487/26), rendered April 7, 1926, reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

"The erection of stores in a residential district."

and

WHEREAS, it is proposed to erect three adjoining buildings, each of non-fireproof construction, two stories height, with a frontage of 20 ft. and a depth of 65 ft.; to be occupied as stores on the first story and dwellings above;

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship, the premises being located between buildings now having store occupancy.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that buildings two stories in height shall be erected, the 2nd story to be occupied for dwelling purposes, and this variation is granted only so far as it affects the ground floor, street grade, for retail shops and store use; that any signs or advertising display shall be restricted to the plate glass windows of the store fronts; that all permits required shall be obtained within nine months and the building completed within eighteen months from the date of this action.

## THE RESOLUTION:

(402-25-BZ)

WHEREAS, William F. Doyle, for Emma A. Justice, owner, filed, April 14, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises southeast corner of East 182nd street and Folin street, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, October 9, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 182nd street and Webster avenue are in the business district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 4, 1925, reads:

"Erection of proposed garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 37.95 ft. and a depth of 122.10 ft. (irregular); to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the basis of appeal under section 21 of the building zone resolution was substantiated; and

WHEREAS, this application was granted by the board at its meeting, October 9, 1925, on certain conditions, and applicant requested a modification of these conditions as to the vehicular entrance on 182nd street and as to the color of brick on front, and this request was granted, and applicant now requests an extension of time to complete the work.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building be restricted in height to a two-story structure; that there shall be not more than one vehicular exit or entrance on the 182nd street frontage; that the street elevations shall be finished in face brick with architectural terra cotta or stone trimmings; that the 182nd street front shall be of panel design; that the rear wall and southerly gable wall shall be unpierced throughout their entire height and length; that there shall be no advertising signs of any nature or description displayed on the 182nd street frontage; that no roof signs shall be erected or maintained and no advertising sign other than one projecting sign be erected on the Folin street front; that there shall be no vehicular exit or entrance on Folin street within 25 ft. of the corner formed by the intersection of 182nd street; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within one year from June 22, 1926.

681-25-BZ.

APPLICANT—Lee J. Eastman, for Packard Motor Car Co., owner.

SUBJECT—Application for reopening—extension of time to obtain permits (re: decision of superintendent of buildings) to permit partly in a business and partly in a residence district the erection and maintenance of an automobile showroom, sales and distributing and service station.

PREMISES AFFECTED—4650-4664 Broadway and 2-16 Sherman avenue, Manhattan.

APPEARANCES—

For Applicant: L. E. Ginn.

For Opposition: None.

ACTION OF BOARD—Application reopened and extension of time granted to obtain permits within six months and to complete work within eighteen months.

## THE VOTE TO EXTEND TIME TO OBTAIN PERMITS AND COMPLETE WORK—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....

Negative .....

Absent: Deputy Chief Martin .....

## THE RESOLUTION:

(681-25-BZ)

WHEREAS, James J. Walker, for Elizabeth Schindler, owner, filed, July 1, 1925, an application, under the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of an automobile showroom, salesroom, distributing and service station; premises 4650-4664 Broadway and 2-16 Sherman avenue, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, July 8, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sherman avenue and Broadway are business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered July 21, 1925, in acting on N. B. App. No. 7-25, reads:

"1. Garages for more than five cars or automobile repair shops are not permitted in a business or residence district.";

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 18 ft. and a depth of 202 ft.; to be occupied as an automobile salesroom, showroom and distributing and service station; no gasoline storage on premises other than that in tanks for cars and in a 50-gallon portable tank necessary for refueling and discharge of cars on premises incidental to the operation and conduct of the automobile business conducted and

WHEREAS, the board deemed that applicant substantiated his basis of appeal, and that it would be a hardship to deny the adjustment requested, and the use for public garage purposes is neither requested nor invoked; and

WHEREAS, this application was granted by the board at its meeting, July 28, 1925, and on April 27, 1926, on certain conditions, and applicant requested a modification of the limit imposed.

*Resolved*, that the board of appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the structure be limited to two stories in height above grade; that no gasoline equipment shall be maintained or installed on the premises other than portable tank of not exceeding 50 gallon capacity; that the use, conduct and operation of the structure shall be restricted to automobile manufacturer's sales and distributing agency; that no part of the structure shall be rented, leased or hired for live garage storage use; that there shall be no advertising signs or display exposed on the front of the building, other than the name and address of the business; that no portion of the roof within the business use area shall be rented, leased or hired for advertising signs or display; any roof advertising to be limited to that of the occupants or lessees of the premises, authorized under the code of ordinances; that the front elevations shall be finished substantially in accordance with the photograph reproduction filed in this case, as to design and materials; that all permits necessary for the prosecution of the work shall be obtained within six months and the building completed within eighteen months from June 22, 1926.

## CASES DISMISSED.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(1276-25-BZ)

Filed December 10, 1925—Premises 675-9 Rockaway avenue, Brooklyn. Decision of the superintendent of buildings. Applicant, Croker National Fire Prevention Engineering Co. Dismissed for lack of prosecution.

(1288-25-BZ)

Filed December 14, 1925—Premises northwest corner of Newtown avenue and Second avenue, Astoria, Borough of Queens. Decision of the superintendent of buildings. Applicant, Martin Heilbut. Dismissed for lack of prosecution.

(1315-25-BZ)

Filed December 18, 1925—Premises 1938 Boston road, The Bronx. Decision of the superintendent of buildings. Applicant, George W. Swiller. Dismissed for lack of prosecution.

(1318-25-BZ)

Filed December 18, 1925—Premises 330-340 West 140th street, Manhattan. Decision of the tenement house commissioner. Applicant, Rudolf Ludwig. Dismissed for lack of prosecution.

(1324-25-BZ)

Filed December 21, 1925—Premises north side of Central avenue, 96 ft. east of Merrick road, St. Albans, Borough of Queens. Decision of the superintendent of buildings. Applicant, Licari Building Corporation. Dismissed for lack of prosecution.

## THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Holland, Connell and Guilfoyle ..... 4  
Negative ..... 0  
Absent: Deputy Chief Martin ..... 1

## THE RESOLUTION:

WHEREAS, the foregoing applicants have filed with the board of standards and appeals applications under the building zone resolution, affecting the premises in question; and

WHEREAS, the applicants have failed to complete their papers, though duly notified to do so.

Resolved, that the applications be and they hereby are dismissed for lack of prosecution.

Adjourned 3.30 p. m.

WILLIAM J. O'GORMAN, *Secretary.*

For Petitioner: George E. Strehan.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Deputy Chief Martin .....	1

THE RESOLUTION:

(196-26-S)

WHEREAS, George E. Strehan, for Tottenville Copper Co., Inc., owner, filed, March 8, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 300 ft. east of Bethel avenue and 50 ft. north of S. I. R. R., Tottenville, Borough of Richmond; and

WHEREAS, the order of the fire commissioner, dated February 15, 1926, reads (Order No. 67104-LD):

"1. Provide an interior stairway enclosed in fireproof partition at northwest corner of the building or carry out a proper alternative method of complying with Sec. 270 of the Labor Law.

"2. Enclose the interior stairway at southwest corner of the building in partitions built of fireproof material, as per Section 270 of the Labor Law."

and

WHEREAS, the building is fireproof, two stories in height, 75 ft. by 35 ft. in area. OCCUPIED: 1st story, toilet, shower and locker room, 50 persons; 2nd story, metallurgical

laboratory, 3 persons. EXITS: An interior fireproof stairway, extending from the 1st story to 2nd story; enclosed in brick partitions with fireproof doors at the 2nd story openings; an iron ladder to roof scuttle; ROOFS of adjoining buildings 10 ft. higher at north; and

WHEREAS, in lieu of constructing two interior fireproof stairways, the petitioner proposes to provide fireproof doors to all openings off the existing stairhall at 1st story, also to construct an unenclosed exterior iron stairway at the northwest corner of the building with casement sash window opening thereon at 2nd story; the petitioner further contends that this building is not used for factory purposes; it is only the service building for the plant, also that the entire plant is protected with an approved fire line system, accepted by the board of appeals and the fire department.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1, on condition that an exterior iron stairway shall be provided at the westerly side of the northerly end of the two-story building with balcony at sill level, and iron steps from floor level to sill on the interior of the building, with fireproof casement doors at balcony level, opening out; and granted, as to Item 2, on condition that any openings in the existing brick enclosed stairhall shall be provided with self-closing fireproof doors and that a fixed double-rung iron ladder shall be provided within the 2nd story hall to a scuttle in roof; and that the building shall not be increased in height, area or dimension, and granted so long as conditions as to occupancy and use remain unchanged.

993-25-S.

PETITIONER—Thompson-Greger, Inc., owner.

SUBJECT—Variation of labor law, as cited in order of fire commissioner.

PREMISES AFFECTED—408-410 Broadway, Manhattan.  
APPEARANCES—

For Petitioner: M. M. Greger, Louis D. Green.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland, Guilfoyle and Deputy Chief Martin .....	
Negative .....	
Absent .....	

THE RESOLUTION:

(993-25-S)

WHEREAS, Thompson-Greger, Inc., owner, filed September 29, 1925, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 408-10 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 10, 1925, reads (Order No. 85007-LD):

"1. Remove the two substandard fire escapes at the rear of the building (Cortland alley) or reconstruct same as per Section 274 of the Labor Law and Rule Board of Standards and Appeals adopted May 9th, 1925.

"NOTE: Among the defects noted are the following:

"Windows on the course not fireproof self-closing.

"No 60 degree connecting stairways."

and

WHEREAS, the building is non-fireproof, 5 stories in height having a frontage of 53 ft. 8 in. on Broadway, 80 ft. 4 in. on Cortland alley and a depth of 175 ft.; separated into two sections by a fore and aft wall with openings therein on each story. OCCUPIED: 1st story, stores; 2nd story, manufacture of shirts, 15 persons; 3rd story, salesroom for sporting goods, 27 persons; 4th story and 5th story, vaca

# MINUTES

present. EQUIPPED: With a 100% sprinkler system and a fire alarm signal system. EXITS: Two interior wooden stairways, enclosed in fire resisting partitions, with metal covered doors at openings. The Broadway stairway extending from the 1st story to roof and the Cortland alley stairway extending from the 1st story to the top story. Two standard fire escapes on the Cortland alley front of the building extending from the top story to an intermediate landing below the 2nd story, with drop ladder to street. ROOFS: Of adjoining buildings are 6 feet lower; and WHEREAS, petitioner contends that the premises are amply provided with exits; that the fire escapes in question are not "This is not an Exit" and contends, further, that they would serve as an additional means of exit in an emergency.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted, only insofar as it affects the existing fire escapes, on condition that they shall be maintained structurally safe and that all required interior exits shall be provided and maintained; that the occupancy shall not exceed that allowed under No. 403-23-S by resolution of the board of standards and appeals.

PETITIONER—Patrick J. Murray, for Alice Hoffman, owner.

SUBJECT—Application for modification—variation of labor law as cited in order of fire commissioner and decision of superintendent of buildings.

PREMISES AFFECTED—17 East 54th street, Manhattan.

APPEARANCES—

For Petitioner: Patrick J. Murray.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(28-25-S)

WHEREAS, Samuel Cohen for Alice Hoffman, owner, Jan. 8, 1925, a petition, with the board of standards and appeals, for variation from the requirements of the labor law, as cited in an order of the fire commissioner, decision of superintendent of buildings, affecting premises 17 East 54th street, Manhattan; and

WHEREAS, the order of the fire commissioner dated Dec. 3, 1925, reads:

Order No. 69167-LD:

1. Extend the interior stairway at the west side of building to the roof, as per Section 271 of the labor law.  
2. Arrange the fire escape on the rear of building at the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of labor law \* \* \*

Among the defects noted are the following:

Windows on course not fireproof, self-closing. No balcony provided on 4th story, roof extension. No safe passageway from termination to street."

WHEREAS, on April 21st, 1925, this case was amended to the following decision of the superintendent of buildings:

Before a Certificate of Occupancy may be issued it shall be necessary to extend the interior stairs to the roof and arrange the fire escape on the rear of building

to comply with Section 271 of the Labor Law. Among the defects noted are the following:

"Windows on course of fire escape not fireproof; self-closing; no balcony provided on 4th story roof extension; no safe passageway from termination of fire escape to street; no knobs on doors leading to fire escape."

WHEREAS, the building is non-fireproof, 5 stories in height, 20 ft. 10 in. by 100 ft. in area at the 1st, 2nd and 3rd stories and 20 ft. 10 in. by 60 ft. in area on the 4th and 5th stories; OCCUPIED: 1st story, stores and 25% manufacturing, 30 persons; upper stories showrooms and 25% manufacturing, 48 persons above the 1st story. EXITS: An interior wooden stairway, extending from the 1st story to the top story, with ladder to scuttle in roof, enclosed in fire retarding partitions with kalameined doors at openings; a fire escape with non-fireproof windows along the course thereof; on the rear of the main building, extending from the main roof to the roof of the three-story extension, with egress across this roof to a fire escape on the easterly side of the extension, with balconies and stairs to yard; with egress from the termination of fire escape by means of steps to adjoining yard to east. ROOFS: Of adjoining buildings are at the same level; and

WHEREAS, this petition was denied by the board May 19, 1925, reopened April 23, 1926, for the purpose of amendment; and

WHEREAS, the petitioner now proposes to comply with the fire department order No. 69167-LD, with the exception of providing a fireproof passageway from the termination of rear fire escapes to the street; and

WHEREAS, the petitioner contends that the present means of egress from east yard court by stairway to the yard of adjoining building at east is adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to fire commissioner's order No. 69167, item 2, and the decision of the superintendent of buildings only so far as the egress across roof, 4th story, and from the termination of the fire escape is concerned, on condition that the egress shall be provided and maintained at the yard level to the adjoining yard to the east; and that the opening to the premises to the rear on 4th story shall be maintained unlocked during working hours (premises 18 East 55th street); and that the occupancy of the entire building shall not exceed the legal capacity of the interior stairs; and that the order of the fire commissioner and the decision of the superintendent of buildings, dated April 21, 1925, be and it hereby is affirmed in all other respects, and the petition as to these other items be and it hereby is denied.

1131-25-S.

PETITIONER—Philip Steigman, for 135-7 East 12th Street Corporation, lessee.

SUBJECT—Petition for variation of the labor law as cited in a decision and order of the superintendent of buildings.

PREMISES AFFECTED—135-7 East 12th street, Manhattan.

APPEARANCES—

THE RESOLUTION:

(1131-25-S)

WHEREAS, Philip Steigman for August Van H. Stuyvesant, owner, filed November 4, 1925, a petition for variation from the requirements of the labor law, as cited in a decision and order of the superintendent of buildings, affecting prem-

# MINUTES

ises Nos. 135-7 East 12th street, Borough of Manhattan; and

WHEREAS, the decision and order of the superintendent of buildings, rendered July 2nd, 1925, and May 25, 1926, respectively, read (Alt. 1237-1925):

"2. Provide a safe and unobstructed passageway from the foot of the fire-escape to the street."

(Exit order No. 105.)

"You are hereby notified that the building known as No. 137 East 12th Street, in The City of New York, does not conform to section 161 of the Building Code in the respects noted below:

"You are hereby directed to enclose the interior stairway from basement to roof with fire-resisting partitions, properly fire-stopped at floor levels. All doors in inclosure to be fireproof or hardwood self-closing."

and

WHEREAS, the premises consist of two non-fireproof buildings, each 4 stories in height and each 20 ft. by 32 ft. in area; there being a rear porch on the 2nd story of each section. OCCUPIED: 1st story, stores; 2nd story, stores, 3 persons in each section; 3rd story, tenant factory, 3 persons in each section; 4th story, tenant factory, 6 persons in each section. EXITS: An interior wooden stairway in each building, extending from the 1st to top story, enclosed in wood and plaster partitions with wooden doors at openings. A PROPOSED party wall fire escape on the rear of the premises, having fireproof windows along the course thereof, extending from the roof to yard. With egress from yard to street through stores on the 1st story (of building in question); and

WHEREAS, petitioner contends, in view of the small occupancy, that the existing means of egress are adequate; and

WHEREAS, the matter before the board was a question of variation of the labor law as to egress from the termination of the fire escape.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the petition be and it hereby is denied.

39-26-S.

PETITIONER—Bencele Realty Corporation, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—74 Foster avenue, Long Island City, Borough of Queens.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

THE RESOLUTION—

(39-26-S)

WHEREAS, Samuel Rosenblum, for Bencele Realty Corporation, owner, filed May 4, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 74 Foster avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated November 19, 1925, reads (Order No. 87246LD):

"2. Extend both interior stairways to roof, as per Section 270 of the Labor Law.

"3. Provide a secondary means of exit from office, 2nd story, southeast corner as per Section 270 of the Labor Law.

"4. Enclose the stairway at the west side with partitions of fireproof material extending from 1st story

to roof, as per Section 270 of the Labor Law."; and

WHEREAS, the building is non-fireproof, the northerly portion being 2 stories and the southerly one story in height, 100 ft. by 110 ft. 6 in. in area at 1st story and 100 ft. by 40 ft. 8 in. in area above, subdivided into 2 sections, on the 1st story, by a fireproof partition. OCCUPIED: 1st story, west, manufacture of disinfectants, 4 persons; 1st story, east, enamelling, 12 persons; 2nd story, west, office of disinfectant company, 5 persons; 2nd story, east, office and also enamelling and spraying, 5 persons. EXITS: An interior wooden stairway, extending from the 1st story to 2nd story, closed on the 1st story in fireproof partitions (with fireproof doors at openings) and fire retarded above the 2nd story. An open accommodation iron stair, in the east section, leading from the 1st to 2nd story; a fire escape on the south side center of the building, having non-fireproof openings along the course thereof, extending from the south side of the 1st story extension to the yard; with EGRESS on the south side of the building, leading to the termination of the fire escape by means of opening in a fence, leading to premises to south, with open egress to street. ROOFS of adjoining buildings: 6 ft. 4 in. low to east; and

WHEREAS, petitioner contends, in view of the light occupancy, that the existing means of exit are adequate.

Resolved, that the order of the fire commissioner be and the same hereby is affirmed, and that the petition be and it hereby is denied.

THE RESOLUTION:

(27-26-S)

WHEREAS, Mortimer J. Downing, for W. R. Betts, owner, filed, January 11, 1926, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises No. 22 East 65th street and No. 750 Madison avenue, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated August 7, 1925, read:

(Order No. 83631-LD)

"1. Provide exit signs, letters to be at least 8 in. in height, at all means of egress with a red light over all such exits for use in time of darkness, as per Section 272 of the Labor Law."

(Order No. 83632-LD)

"1. Arrange the doors leading to the stairways on all stories upon which five or more persons are employed, so as to open outwardly without obstructing the stairways, as per Section 271 of the Labor Law."

"2. Provide a door opening on interior stairs at west end of building, 3rd story. Section 271 of the Labor Law."

"3. Arrange the doors leading to stairway at street so as to open outwardly, as per Section 271 of the Labor Law."

(Order No. 83633-LD)

"1. Remove the substandard fire escapes on the front of the building or reconstruct same as per Section 274 of the Labor Law and Rule 3, Board of Standards and Appeals, adopted May 9th, 1924.";

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 93 ft. in area. OCCUPIED: 1st story, stores; 2nd story, showroom, 1 person; 3rd and 4th stories, dwelling apartments; 5th story, workroom (dressmaking), 19 persons. EXITS: An interior wooden fireproof stairway, extending from the 1st story to top story; enclosed in wooden partitions with wooden doors at openings; a fireproof stairway at the rear of the building extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; a substandard fire escape on the

northwest street front of the building, with balconies on the 2nd, 3rd and 4th stories, connected by vertical ladder and openings glazed with wire glass along the course thereof; ROOFS of adjoining building to west 4 ft. higher; and

WHEREAS, petitioner contends, as to Order No. 8363-LD, that the two dwelling apartments and the showroom on 2nd story would be disfigured by the proposed exit sign as to Order No. 83632-LD, Item 1, contends that the door in the premises do comply with the order; Item 2, contends that the 3rd story is occupied for dwelling purposes, and that the door is not a necessity; and Item 3, contends that this order applies to the main entrance door and that said door is a costly and highly ornamental structure a hardship would result if compelled to alter it to conform with the order; as to Order No. 83633-LD, petitioner contends that the fire escape is not a needed legal means of exit but would be of use to the fire department in the event of a fire; that it is highly ornamental and to remove would disfigure the building; and

WHEREAS, the board deemed that the orders of the fire commissioner are reasonable and not excessive; and

WHEREAS, the reasonable minimum exit requirements are not provided for the 19 girls employed on the 5th story in the dressmaking workroom.

*Resolved*, that the orders of the fire commissioner be and they hereby are *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION:

(1237-25-S)

WHEREAS, Edward P. Doyle, for 159 West 27th Street  
Corp., owner, filed December 2, 1925, a petition for varia-  
tion from the requirements of the labor law, as cited in an  
order of the fire commissioner, affecting premises Nos.  
153-159 West 27th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated No-  
vember 17, 1925, reads (Order No. 87186-LD):

"Inspection shows the following to be necessary to  
make the above premises comply with the requirements  
of the Labor Law.

"1. Remove all articles and wares from stairway en-  
closures at east side of building on first story, as per  
Rule 5 of the Board of Standards and Appeals, adopted  
7/29/24.

"Note: Candy Stand.";

WHEREAS, the building is fireproof, 12 stories in height,  
by 98 ft. in area; OCCUPIED as a tenant factory, ap-  
proximately 460 persons above the 1st story. EQUIPPED:  
a sprinkler system and a fire alarm signal system.  
S: Two interior fireproof stairways, extending from  
1st story to roof, enclosed in fireproof partitions with fire  
doors at openings; an outside iron stairway, on the west  
side of the building, extending from roof to yard with  
fireproof enclosure from termination by means of freight entrance to  
and

WHEREAS, there is a candy stand located in the stairway  
enclosure on the 1st story, at the east side of the building;

WHEREAS, petitioner contends that the candy stand is lo-  
cated in such a position as to offer no obstruction in the  
stairway leading to the street from the termination of  
the 1st stairway and that there is a clear space of 8 ft.  
between the stand and the westerly wall of the passage-

THE RESOLUTION:

(722-25-S)

WHEREAS, John Hessler, for Hessler Realty Corp.,  
owner, filed July 8, 1925, a petition for variation from the  
requirements of the labor law, as cited in orders of the fire  
commissioner, affecting premises No. 38 Paynter avenue,  
Long Island City, Borough of Queens; and

WHEREAS, the orders of the fire commissioner, dated June  
13, 1925, read (Order No. 80185-LD):

"1. Extend the fireproof enclosure of the front  
stairway to 3 ft. above the roof as per Section 270 of  
the Labor Law.

"2. Arrange the stairway at the rear of building so  
that same conforms to Section 270 of the Labor Law.

"Among the defects noted are the following:

"Not constructed of incombustible material. The fire-  
proof enclosure does not extend 3 ft. above the roof."

(Order No. 80186-LD)

"1. Arrange bars on windows on east side of cellar  
story and on all sides of 1st story so as to be readily  
movable or removable from both sides in such a man-  
ner as to afford the free and unobstructed use of such  
windows for purposes of egress as per Section 272 of  
the Labor Law.";

and

WHEREAS, the building is non-fireproof, 2 stories in height,  
25 ft. by 100 ft. in area. OCCUPIED: Factory, 1st story,  
45 persons; 2nd story, 30 persons. EXITS: An interior  
iron stairway at the Paynter avenue front, extending from  
the 1st story to top story; enclosed in 4 in. terra cotta  
block partitions with fire doors at openings; and a wooden  
stairway at the rear of the building extending from the  
1st to top story, enclosed in 8 in. brick walls, with fire  
doors at openings; and

WHEREAS, there are five windows in the easterly wall of  
the basement; and also two windows in the northerly wall  
of the building on the 1st story protected with iron bars;  
and

WHEREAS, petitioner contends that the existing means of  
egress are adequate.

Resolved, that the order of the fire commissioner, No.  
80185-LD, be and it hereby is *modified*, and the petition be  
and it hereby is *granted*, as to Item 1, on condition that the  
stairhall enclosure shall be of fireproof material, extending  
to the underside of roof boards, any opening therein to be  
provided with a fireproof self-closing door; as to Item 2,  
*granted on condition* that the stair enclosure shall be of  
fireproof construction, any openings therein protected with  
fireproof, self-closing doors; and that a fixed vertical iron  
ladder shall be provided from top story hall to scuttle in  
the roof; that Order No. 80186-LD of the fire commis-  
sioner be and it hereby is *modified*, and the petition as to  
Item 1 be and it hereby is *granted* only so far as it affects  
the two windows at the street front on condition that two  
exits direct from the 1st story shall be provided to the street  
at front and rear of building.

Absent .....	0

THE RESOLUTION:

(14-26-5)

WHEREAS, Samuel Rosenblum, for F. Livingston Pell, owner, filed January 5, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises No. 23 West 32nd street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered November 25, 1925, reads:

"4. Egress from termination of fire escape should comply with Section 274.";

and

WHEREAS, the building is non-fireproof, 5 stories in height, 23 ft. 9 in. by 64 ft. 9 in. in area, having a 4 story non-fireproof extension at rear 34 ft. by 13 ft. in area; OCCUPIED for offices, show rooms and manufacturing, 1st story, store; 2nd story, 20 persons; 10 persons on each story above the 2nd story and not more than 25 persons above the 2nd story engaged at manufacturing; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to top story; enclosed in wood lath and plaster partitions with fire doors at openings; an iron ladder from the main roof to the 4 story extension roof and a 60 degree fire escape on the easterly gable wall of the building, having fireproof openings along the course thereof, extending from the 4 story extension roof to the 2nd story balcony, with a 45 degree stationary stair to yard; with EGRESS from the termination of the fire escape by means of open yards at rear. ROOFS of adjoining buildings, to east, 7 stories higher; to west, 2 stories higher; and

WHEREAS, petitioner contends that direct egress may be had from the termination of the fire escape to the yard of the adjoining building and requests the acceptance of this condition in view of the light occupancy of the premises under consideration.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects egress from the termination of fire escape, on condition that the occupancy of these premises shall not exceed 25 persons above 2nd story, and that the yard between these and adjoining premises to the east shall be maintained open; that iron stairs shall be provided from the concrete roof of cellar extension of adjoining structure at yard level to first story window of adjoining hotel, with egress through adjoining hotel premises to street.

THE RESOLUTION:

(1269-25-S)

WHEREAS, William G. Walters, for 598 8th Avenue Corporation, owner, filed, December 9, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 594-598 Eighth avenue and 272 West 39th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered May 14, 1926, N. B. Applic. No. 424-1925, reads:

"12. Glass in store front should conform to the provisions of Section 264 of Labor Law and Rule 503 Industrial Code. Glass in 1st, 2nd and 3rd stories both 8th Avenue and 39th Street fronts should comply with the provisions of Section 264 of Labor Law and Rule 503 Industrial Code.";

and

WHEREAS, the building is fireproof, 20 stories in height, facing two streets; having a frontage of 100 ft. on West 39th street and 39 ft. 9 in. on Eighth avenue. OCCUPIED: 1st story, stores; upper stories, showrooms and light manufacturing, 75 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: T interior fireproof stairways, extending from the 1st story, roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are windows in both the West 39th street and Eighth avenue walls of the building on the 1st, 2nd and 3rd stories, glazed with plate glass; the maximum area of the glass on the 1st story being 116 sq. ft.; on the 2nd story 28 sq. ft. and on the 3rd story 27 sq. ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lowest three stories and would affect the architectural appearance of the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on three lower stories of street front, on condition that the openings shall be equipped with approved metal frames and sash, glazed with 1/4" polished plate glass; and that the requirements of the labor law shall be complied with in all other respects.

WHEREAS, Croker National Fire Prevention Engineering Company, for Devoe & Raynolds Co., Inc., owner, March 25, 1926, a petition for variation from the requirements of the labor law, as cited in orders of the fire

# MINUTES

Commissioner, affecting premises Nos. 383-393 Hamilton avenue and Nos. 567-577 Smith street, Borough of Brooklyn; and WHEREAS, the orders of the fire commissioner, dated October 20, 1925, reads:

(Order No. 86143-LD)

"1. Arrange the doors leading to the stairway on all stories west southerly side upon which five or more persons are employed, so as to open outwardly without obstructing the stairway, as per Section 271 of the Labor Law."

(Order No. 86140-LD)

"1. Arrange the stairway on northwest side of building (Smith Street side) so that same leads direct to street, as per Section 271 of the Labor Law."

"2. Extend the interior stairway on the Smith Street side of building to the roof, as per Section 271 of the Labor Law. SEE NOTE."

"3. Provide an interior stairway from 1st story to 2nd story in building No. 4, facing Gowanus Canal, as per Rule 3 of the Board of Standards and Appeals adopted July 29th, 1924."

WHEREAS, the premises consist of a plot of ground having frontage of 327 ft. on Gowanus Canal, 140 ft. on Hamilton avenue and 216 ft. on Smith street, upon which is located a paint plant of Devoe and Reynolds Co., Inc., consisting of a group of nine fireproof and also non-fireproof, one, two and four-story buildings; Building No. 9 (the one in question in re: Order No. 86143-LD) being fireproof, four stories in height, 140 ft. by 140 ft. (irregular) in area; EQUIPPED with a sprinkler system, 15 persons per story above the 1st story; the stairway in question (located on Hamilton avenue front) extending from the 1st story to the roof; Building No. 2 (the one in question in re: Items 2 and 3 of Order No. 86140-LD) is non-fireproof, four stories in height, and has a frontage of 95 ft. on Smith street a depth of 60 ft.; EQUIPPED with a sprinkler system; the stairway in question (at the Smith street front) is open and extends from the 1st story to the top story, 15 persons above the 1st story; Building No. 4 (the one in question as to Item 3, Order No. 86140-LD) is non-fireproof, two stories in height, having a frontage of 80 ft. on Gowanus Canal and a depth of 97 ft.; 1st story, no occupancy; 2nd story, 20 persons; and

WHEREAS, petitioner, in re: Order No. 86143-LD, contends that the building is fireproof and sprinklered and that the present stairway, in view of the horizontal exits, is adequate for the occupancy of 15 persons per story; in re: Items 2 and 3 of Order No. 86140-LD, contends that in view of the horizontal exits, that the stairway in question does not provide an adequate means of exit; and in re: Item 3 of Order No. 86140-LD (in re: Building 4), contends that there are four means of egress from each floor of this building, i. e., the horizontal exits.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted, as to Items 2 and 3 of Order No. 86140-LD (Item 1) and 86140-LD (Item 2), giving the action of the board of review, dated January 19, on condition that the stipulations of such action be complied with; and as to Order No. 86140-LD (Item 3), the petition be and it hereby is granted on condition that the existing horizontal exits shall be maintained and protected with self-closing fireproof doors on all sides of openings; and granted so long as conditions as

to occupancy and use remain substantially unchanged, and that the requirements of all resolutions affecting these premises and which were adopted by this board shall be complied with.

## CASE DISMISSED.

The chairman called attention to the following case, where notice of intention to petition was offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(1008-25-S)

Filed October 2, 1925—Premises west side of Bronx River place (Baldwin street), 133 ft. north of Bradley street, The Bronx. Order of the fire commissioner, labor law. Petitioner, Noesting Pin Ticket Co., Inc. Dismissed for lack of prosecution.

# MINUTES

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, May 25, 1926, as they appeared in Bulletin No. 22, Vol. XI, are hereby corrected to read as follows:

### THE RESOLUTION:

(106-26-S)

WHEREAS, Samuel Rosenblum, for Simon J. Harding, owner, filed, February 5, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises No. 29 Mangin street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated January 16, 1926, reads (Alt. Applic. No. 2001-1925):

"10. Stair enclosure must be fire retarded in accordance with Rule 504 of the Industrial Code.";

and

WHEREAS, the building is non-fireproof, seven stories in height, 25 ft. by 100 ft. 2 in. in area at 1st story and 25 ft. by 95 ft. 2 in. in area above. OCCUPIED: 1st floor, storage; 2nd floor, front, apartment, 2 persons; rear, vacant at present; 3rd floor, manufacturing coats, 25 persons; 4th floor, manufacturing suits, 30 persons; 5th floor, vacant at present; 6th floor, rear, manufacturing coats, 18 persons;

\*Correction—Number "20" in line 41 changed to number "26".

front, vacant at present; 7th floor, vacant at present; vacant floors when occupied will not exceed capacity of interior stairs (28 persons per story); EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to top story; enclosed in wood studs, covered with wood sheathing, ½ in. plaster board and stamped metal on both sides, with fireproof doors; openings; a 60 degree fire escape on the rear of the building, having fireproof self-closing windows along the course thereof, extending from the roof to the yard; with EGRESS from the termination of the fire escape by means of door in fence leading to yard of premises to north; ROOF of adjoining buildings to north 6 stories lower, to south 2 stories lower; and

WHEREAS, petitioner contends that the occupancy is not hazardous and proposes to cover the existing partitions with 26 gauge metal.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the existing enclosure, to wit, 7/8 in. tong and groove boarding on both sides of the stair and the enclosure, shall be covered with ½ in. plaster board with 26 gauge stamped metal, lapped seams, and fire stopped between the floor beams throughout, all openings to be equipped with self-closing fireproof doors opening out, and granted only so long as conditions as to occupancy and use shall remain unchanged.

# RULES

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Amended Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of a definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, where machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

# CONCRETE RULES

## USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

## FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, three cents each, postage to be added if the forms are to be supplied by mail.

# RULES

## RULES FOR THE CONSTRUCTION AND INSTALLATION OF GAS SHUT-OFF VALVES, ADOPTED BY THE BOARD OF STANDARDS AND APPEALS, JANUARY 11, 1924.

RULES FOR GAS SHUT-OFF VALVES TO COMPLY WITH ORDINANCE AMENDING ARTICLE OF CHAPTER 12 OF THE CODE OF ORDINANCES, RELATING TO CONTROL OF GAS IN CERTAIN BUILDINGS IN CASE OF FIRE.

1. Gas shut-off valves and accessory appliances shall include valves approved as such by the Bureau of Standards, Washington, D. C., by the Underwriters' Laboratories, Inc., Chicago, Ill., by the Associated Factory Mutual Laboratories of Boston, or other recognized standard laboratory; and all valves shall be approved and meet the requirements prescribed by the Board of Standards and Appeals.

2. Gas shut-off valves shall be installed only by corporations, firms or individuals who shall furnish evidence of their qualifications under the Code of Ordinances, to the Fire Commissioner or the Tenement House Commissioner in their respective jurisdictions.

3. Such corporations, firms, or individuals shall maintain a service station which shall be in direct communication with the Fire Department by telephone or telegraph. Location of service station and means of communication shall be on file with the Fire Commissioner, in order that the Fire Department may insure immediate service when the gas is turned off by the members of the Fire Department or in any other cause.

4. The Fire Department shall have exclusive use of gas shut-off valves to be operated in the event of fire or other emergencies.

5. All gas shut-off valves to be installed must be made of the best quality of standard materials.

### Protection of Valves:

6. The gas shut-off control shall be protected by a suitable, approved metal box, placed on the exterior of the building, which shall be connected, through a rigid metal conduit, by a cable, with the valve body placed on the exterior intake where the gas pipe enters the building, and as far as practicable to the inside face of the wall, before reaching the meters. The lock for securing box on outside wall of building shall be operative only by a Fire Department inner box key by members of the Fire Department.

7. All valve bodies shall be made of brass or bronze. A spring is used to actuate a valve in conjunction with a fusible link, it shall be of the best quality phosphor bronze.

8. The internal mechanism which acts to shut off the gas shall be securely connected with the external mechanism by a direct mechanical connection, made gas tight, so that it passes through the valve body, by a stuffing box packed with soft, well-lubricated packing, in accordance with recognized standard practice.

### Installation:

9. The valve shall be so installed as to be conspicuously displayed and readily inspected and reset by authorized persons.

10. Valves shall be located so that condensation will not accumulate in the valves; and shall be installed so that gas will flow through the valve in direction indicated on it. Valves shall be secured in piping by threaded connections or companion flanges. Combustible packing or lead shall not be used between flanges.

11. The gas main at both ends of the valve must be secured and secure to withstand the pull from the control handle. Additional non-combustible brackets or hangers shall be provided, if necessary, to secure and maintain proper installation.

11. The valve shall be enclosed in a substantial, perforated metal case, conspicuously exposed, painted red, protected by standard lock acceptable to the Fire Prevention Bureau, and shall indicate the name, telephone number and address of installer, to insure prompt service to property owner.

12. Casing of the valve on gas intake shall be kept locked to protect valve from interference and make it accessible only to authorized persons. Perforations, to allow circulation of air around fusible link, shall be provided and so arranged as to prevent tampering with valve when casing is locked.

### Control Box:

13. The control handle for the manual closing of the valve shall be in a locked metal control box having a cast iron cover conspicuously labeled with raised letters, painted red.

14. On the outside of the cover or the inside of the control box, in raised or stamped letters, or on a securely fastened metal plate, shall be displayed concise operating directions, together with the name, initials or registered trademark of the manufacturer.

15. The control box must be placed as nearly vertically above the point where the gas main enters the premises as is practicable, when this does not involve excessive length of cable and extra turns, and at a height above the sidewalk or grade, of not less than two (2) feet and not more than five (5) feet. Without special permission, the control box shall not be placed or mounted on basement window frames, or directly above basement windows or other openings, nor shall it be located behind doors or other obstructions which would prevent the Fire Department from having easy access to it.

16. Control boxes must be securely and permanently fastened. Whenever possible, they shall be fastened to a non-combustible wall, pillar or column. They shall be secured by not less than two 3/16 inch bolts or the equivalent. Unless the building is so constructed that the control box must unavoidably be secured to a wooden part, the use of wood screws is not permitted for supporting countersunk control boxes; lag bolts shall be used. When the walls are of masonry or concrete, through bolts, expansion bolts or toggle bolts shall be used. All fastenings must be arranged so that they cannot be loosened except from inside opening of the control box.

17. Control boxes may be set or recessed into the wall to a depth not greater than the depth of the box so that cover is flush with the face of the wall. Control boxes may be mounted directly on the surface of the wall.

18. The control box shall be located on the outside of the building wall, facing the street, whenever possible. When the control box is installed on an alley face of a building, or in a similar place where the control box is subject to injury from passing vehicles, etc., the control box must be thoroughly protected. This may be done by having the control box recessed, marked by waterproof red paint ring and waterproof white paint ring on the wall, or, when such protection is not available, protected by heavy iron channels or angles secured to the wall by through bolts, expansion bolts, or toggle bolts.

### Control Handles:

19. Control handles shall be of standard construction, arranged to fit the control boxes so that they may be locked without difficulty, and cable connections shall be securely made in an approved manner, according to the design of the handle.

# RULES

## Cable:

20. The connection between the valve and control handle shall be as direct as practicable, and shall consist of a single piece of stranded phosphor bronze cable not less than 3/32 inch in diameter. No splices in the cable shall be permitted.

21. It is essential that cable connections to valve and handle be securely made according to the design in each case. The cable may be slightly annealed for making ends, and, when cutting the cable, it should be taped and cut through the tape, or a small amount of solder applied where it is to be cut, so as to prevent frayed end.

## Conduit:

22. The control cable for the shut-off valve shall be run in galvanized wrought iron or steel pipe or other standard approved conduit not less than 1/2 inch in pipe size. The pipe or conduit line must be water-tight and continuous from the casing enclosing the operating mechanism of the valve to the control box on outside of building. The cable shall not be exposed at any point in its length.

23. All ends of pipe or conduit, not only at valve and control box terminals, but in the run of the piping, shall be carefully reamed so as to remove burrs and fins caused by cutting-off tools, which would interfere with the movement of the cable in the run, or cut, or wear the cable. Unions should not be employed in making joints.

24. Pipe or conduit must be rigidly and permanently secured in position. Pipe straps and hangers of standard forms may be employed for this purpose. In every case supports must be provided at points sufficiently numerous to prevent sagging. Pipe straps (if used) must be of metal of sufficient thickness to insure a permanent fastening and must be thoroughly coated to prevent corrosion.

## Bends and Offsets:

25. Bends of small radius or through much of an arc, introduce possibilities of binding of the cable or of an appreciable friction resisting the pull of the cable; therefore, approved roller fittings shall be required wherever the pipe or conduit is bent to a radius of less than 4 inches, or wherever the bend is through an arc exceeding 15 degrees, except as outlined for offsets.

26. When connections to control boxes are made from below, it is frequently necessary to make an offset in the conduit to avoid a water table or other part of a building wall. One offset of not more than 2 inches will be permitted for each installation at such points. The bends in the pipe forming the offsets must be carefully made to avoid cracking the enamel or galvanized coating, or the flattening or cracking of the pipe or conduit. The amount of offset shall not exceed 2 inches and the length of the offset shall not be less than five times the amount of the offset. For example, a 2-inch offset must be at least 10 inches long. Single offsets only shall be permitted. Double offsets are not acceptable.

## Roller Fittings:

27. For turns in the conduit greater than those mentioned above, approved roller fittings shall be used. No roller fittings turning more than 90 degrees from a straight line shall be used.

## Automatic Control:

28. The fusible link which controls actuation of the valve in the event of direct heat, shall melt at not less than 225 degrees F and shall be so arranged as to in no way interfere with the manual means of shutting off the gas which is controlled by the handle in box placed on the face of the building. Only approved fusible links shall be used. Automatic control shall in no way depend upon electric current for its operation.

## Production Tests at Factory:

29. Valves must be tight under the following tests:

(a) Valves shall be mounted in the position in which they are designed to operate. Normal city gas pressure equivalent air pressure shall be applied to the inlet side and the valve shall completely shut off the gas or air when closed as in normal operation.

(b) To determine whether the valve shuts off tight under this test, a tube shall be connected with the outside of the valve and the outer end of the tube shall be immersed in water to a depth not exceeding one (1) inch, indicating leakage by bubbles rising through the water from the end of this tube.

(c) Valves, after this test, shall be capable of shutting off ten (10) pounds air pressure applied to the inlet side to determine whether the valve is tight, the test procedure shall be as indicated in the preceding test.

(d) Valve bodies shall be strong enough to withstand without leakage, one hundred (100) pounds pressure applied from either end with the other end closed. In this test the entire valve, including the stuffing box, shall be completely immersed in water, so that leakage will be indicated by bubbles rising through the water.

(e) The fusible link connections of each valve shall be carefully tested to avoid prematurely operating the gas shut off valve through vibration or concussion. The construction of the fusible link connections shall be so designed and made that the automatic feature will not operate through vibration or concussion.

(f) The entire process of manufacture of the valve shall be subject to inspection and review and each valve shall be tested at the factory by a recognized laboratory agency with facilities for making the test prescribed by the Board of Standards and Appeals, and each valve must furnish satisfactory evidence that it has been so tested.

(g) Manufacturers of gas shut-off valves must submit the name or names of said laboratories or agencies to the Fire Commissioner or the Tenement House Commission in their respective jurisdictions, with satisfactory evidence of their ability and facilities to properly carry out tests.

(h) Valves and operating mechanism shall be so designed and constructed that they will withstand deteriorating effects or corrosion, as evidenced by operating tests.

## Installation and Inspection Tests:

30. a. After shut-off valve is installed, it shall be operated to determine that proper closure is secured by operating the control handle. Particular care shall be taken to observe that when operating the control handle no part of the cable or of its attachment to the valve interferes in any way with the positive closure of the valve.

b. After the above test, all gas outlets in the building must be inspected to insure their being closed before the valve shall be set and the gas turned on. Valve and connections shall also be tested for leaks by applying a solution of soap and water to all parts, including connections to piping.

c. After the valve has been used to shut off gas, it shall be reset only by authorized corporations, firms or individuals, or by members of the Fire Department.

d. Operating and installation corporations, firms or individuals responsible for the installation of the gas shut-off valves shall permanently maintain properly equipped stations in each of the boroughs where they install valves.

Gas shut-off valves and installations shall be inspected at least once a year by members of the Fire Department, the Tenement House Department, in their respective jurisdictions, or by corporations, firms or individuals authorized to install gas shut-off valves, as determined by the Fire Commissioner or the Tenement House Commission in their respective jurisdictions.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO FUEL OIL RULES.

(217-21-SR)

(598-19-SR)

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, July 1, 1926, at 10 a. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules. Matter in italics is new. Matter in [ ] is old matter removed.

### 1. Definition.

The term "fuel oil" under these rules includes any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

### Grade A Fuel Oil Shall Include:

Oil used for fuel purposes under these rules which show a minimum flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

### Grade B Fuel Oil Shall Include:

Oil used for fuel purposes under these rules which show a minimum flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

### Rule 33.] Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by more than two (2) families. If used in buildings occupied by more than two families or in commercial buildings a Certificate of Qualification will be required as provided in Article 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow tile of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately ventilated direct to the outer air.

[a.] No person, firm, company or corporation shall violate the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus has been approved by the Board of Standards and Appeals.

### [GRADE A FUEL OIL.]

### Manner of Storage for [Grade A] Fuel Oil.

Oil, to be used for [commercial] heating and power shall be at all times contained in metal tanks without openings or connections through the tops of the tanks.

### General Location of Tanks for [Grade A] Fuel Oil.

Except fireproof buildings fuel oil storage shall be buried below the floor of the lowest story

in the manner required for tanks outside of the building or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of wall separating building from subway and, if practical, tanks shall be placed in a lower position than the roadbed of subway.

### Rule 4A. Location and Capacity of Tanks for the Storage of Grade A Fuel Oil.

#### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space surrounding the tank formed by the enclosure walls and roof shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is adequately ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

#### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried below a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Section 1 (g) and (h).

[(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.]

[(c) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.]

#### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# PUBLIC HEARING

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above grounds, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

## Rule 4B [19.] Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, *unless an approved anti siphon valve is used*, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Material and Construction of Tanks for the Storage of [Grade A] Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Same shall be free

from physical imperfections, such as, laminations, etc. All steel must be new, in good condition and from rust. The thickness of steel required and the and spacing of rivets shall be as stated in the table below.

(b) All tanks must be welded, riveted and caulked or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell, heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell, 5/16 in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell, heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be with dished heads. Should the owner desire to use flat heads, these flat heads must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

### Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel of the quality before mentioned for cylindrical tanks of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles at the builder's option.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will carry the load with a factor of safety of five (5), using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from the center of the rivet lines on these members must be in excess of twenty-four inches, and the rivets must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of (6) inches center to center on these members.

(f) When structural reinforcing members are used together with braces, in order to reduce the effective length, the braces shall not be stressed higher than ten thousand (9,000) pounds per square inch taken in the minimum net section.

(g) If structural members are omitted and the flat surfaces of the tank are braced entirely by means of rods, these members should not be spaced greater than four (24) inches center to center in all directions. Unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch taken in the minimum net section.

(h) The fastening between these members on the flat sides of the tank must in all cases be such that it will develop the full net sections of the bars; in other words, the bar will break before the connection will let.

### Section 3. Vertical Storage Tanks Located Outside of Buildings Above Ground.

(a) Vertical tanks located outside of buildings and placed above ground shall be built of steel plates of the quality before mentioned for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of heads  $\frac{1}{8}$  inch.

# PUBLIC HEARING

The thickness of shell plates shall be figured in accordance with the following formula:

t equals  $\frac{P \times r \times F}{T \times E}$

equals head pressure at bottom of ring under con-  
 dition.

equals radius of shell in inches.

equals factor of safety (taken as 5).

equals tensile strength of plate in pounds per square (55,000 pounds per square inch).

equals efficiency of vertical joint in ring under con-  
 straint (calculations to be based on formulas as given  
 Bulletin No. 14 of the New York State Industrial  
 Commission).

Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plates shall be designed, with proper efficiency to meet requirements in above formula for shell plates.

) In all cases, steel tanks for the storage of fuel must be built metal to metal. No filler of any kind be permitted.

(b) [Rule 20 (a)] Tanks *for storage of grade B oil* shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

rule 20 (b)] Auxiliary supply tanks of 60 gallons or less may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

ction 4. Welding.

Where welding is to be used for a part or for the tank, the tank shall be fabricated as required under

d. All welded seams of plates shall be lapped or

When the joint is a lapped joint, the sheet shall be not less than two inches and welded both inside and outside. The plates shall be pulled up tight against the metal before welding and kept tight together during welding. Both inside and outside welds shall be of full penetration fillet.

Where a butt joint is used, it shall be of the 90 deg. V type welded both inside and outside and reinforced to a total thickness of at least one and one-half the plate thickness.

All heads shall be flanged, the straight part of flange being not less than as follows:

For 3/16 inch heads, 1 3/4 inch flange.

For  $\frac{1}{4}$  inch heads, 2 inch flange.

For 5/16 inch heads, 2 inch flange.

For  $\frac{3}{8}$  inch heads,  $2\frac{1}{4}$  inch flange.

heads over 120 inches diameter the flange shall be  
 sed in length by one-half inch for each increase in  
 ter of 2 feet.

ere heads are set into the shell, they shall be a  
g fit and the shell shall fit the head closely all  
If of over 1.100 "

1. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

For tanks of 1,100 gallon capacity or less and not 8 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of 1,100 gallon capacity the head welds shall be of the double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

Where tanks are made up of two or more rings welded longitudinal joints of adjacent sections shall be staggered. At no point of a butt girth joint shall the offset on one side be offset with the sheet on the other side. The offset shall be not less than one-half of the thickness of the plate. All girth joints shall be welded inside and out and

reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, in which they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

### Section 5. Rust Proofing.

Section 5. Rust Proofing.  
All tanks shall be thoroughly coated on the outside with tar asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

**Section 7. Manhole Covers.**

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

### Rule 6. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

## Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ( $1\frac{1}{2}$ ) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ( $\frac{1}{4}$ ) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; masonry or impervious reinforced concrete. Earthwork embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ( $1\frac{1}{2}$ ) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

Section 2. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket-ing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ( $\frac{1}{2}$ ) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit, there shall be kept ready for use, a hand fire extinguisher of not less than two (2) quarts capacity suitable for extinguishing oil fires.

### Rule 7. Tests of Tanks for the Storage of [Grade A] Fuel Oil.

Section 1. Inside of Buildings or Outside Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks,

# PUBLIC HEARING

shall withstand after being set in place, a hydrostatic *or oil* test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic *or oil* pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic *or oil* test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

## Section 2. Horizontal Tanks Outside Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic *or oil* test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

## Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

## Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 to 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for [Grade A] Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as possible, without sags, and, except as provided in Rule 11-e, shall be laid so that where practicable pipes shall pitch toward the supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted. *Except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.*

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. Hose shall be no longer than necessary.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plan. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic *or oil* pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than the supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) Where pressure systems are used an automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

### Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practical so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) Fill pipe shall be provided with a trap or seal carried within four (4) inches of the lowest point in the tank.

(d) Fill pipe shall be made up with screwed flanged fittings and shall be oil tight and securely held in place.

### Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be connected into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation.

# PUBLIC HEARING

ents shall be not less than two (2) inches in diameter tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ( $1\frac{1}{4}$ ) inches in diameter.

(d) Vent pipes shall be provided with weatherproof hoods and terminate outside the building above the roof surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to the tank by tight connections and filled by pressure, one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow into the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of water coils thermostatically controlled and the tanks shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Section 9. Valves and Control of Flow for Grade A Fuel Oil.

Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the wheel. The use of packing which may be affected by oil or heat is prohibited.

A shut-off valve shall be provided in discharge suction lines near each pump; in discharge line near each tank as near the tank as practicable, and in return lines near each burner.

## Section 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so arranged as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept closed when not in use.

## Section 11A. Pumps for Grade A Fuel Oil.

Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel for heating or steam.

Pumps located in the same room where burners are installed shall be provided with a remote control.

Pumps used in connection with outside above ground storage tanks shall be located outside embankments, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

Pumps may be located below the top of the oil tank or tanks where heavy oil is used having a flash point of not more than eighteen (18) degrees Baume

and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 11B. [Rule 24.] Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11A (a).

## Rule 12. Burners for [Grade A] Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. *In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.*

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer walls with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Other Than Domestic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of qualification from the Police Commissioner. A certificate of qualification will be required of each person who is directly in charge of the operation of the plant during each shift.

## Rule 16. Installation.

No fuel oil system shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil system shall be submitted to the Fire Commissioner, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## [Rule 17. Systems Prohibited Where Grade A Fuel Oil Is Used.

Systems fed by gravity or force systems are prohibited.]

## [GRADE B FUEL OIL.]

## [Rule 18. Manner of Storage for Grade B Fuel Oil.

Fuel oil to be used for domestic heating purposes where stored, shall be at all times contained in closed metal tanks.]

## [Rule 19. Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tanks shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal

# PUBLIC HEARING

outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

## 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.]

### [Rule 20. Material and Construction of Tanks for Grade B Fuel Oil.

(a) Tanks shall be constructed in accordance with the requirements of Rule 5, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

(b) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.]

### [Rule 21. Tests of Tanks for the Storage of Grade B Fuel Oil.

All storage tanks located inside of buildings, either on or below the lowest floor level, or outside buried tanks, shall withstand a hydrostatic test for at least 30 minutes, of not less than twenty-five (25) pounds per square inch and shall show no leaks.]

### Rule 17. [22.] Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frame or cradle and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

### [Rule 23. Oil Level Indicating Device for Grade B Fuel Oil.

Gauging devices or test wells, the breakage of which would permit the escape of oil or vapor within the building, shall be prohibited. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

### [Rule 24. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11 (a).]

### [Rule 25. Piping for Grade B Fuel Oil.

#### Section 1. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel. Supply pipe shall be not less than one-fourth (1/4) inch in diameter, iron pipe size.

All piping shall be buried so far as it is practicable.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire retarding materials. Hose shall be no longer than necessary.

#### Section 2. Tests.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

#### Section 3. Fill Pipes.

See Rule 8, Section 5—(a), (b), (c) and (d).

#### Section 4. Vent Pipes.

See Rule 8, Section 6—(a), (b), (c), (d) and (e).

#### Section 5. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.]

### Rule 18. [26.] Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided on each burner and in the discharge line from each storage tank.

[(b) See Rule 9 (a) for construction of valves.]

(b) [(c)] A remote or thermostatic control for shutting off the supply of oil to the burners shall be provided.

(c) [(d)] An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valve shall be set at not more than fifty (50) per cent above the maximum working pressure.

### [Rule 27. Burners for Grade B Fuel Oil.

Burners shall be of a recognized standard type approved by the Board of Standards and Appeals and shall be equipped with an overflow attachment so arranged as to shut off the flow of oil to prevent flooding.]

### Rule 19. [28.] Pilot Light.

Automatic systems unless electrically ignited shall be designed that the flame cannot be extinguished by operation of the automatic control valve and a [A] pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not be easily extinguished.

### Rule 20. [29.] Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented and if used shall be of such construction as to withstand the maximum temperature of which the oil burning device to be installed is capable.

(b) No damper for closing of more than eighty per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

### Rule 21. [30.] Fire Protection in Domestic Installations.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) Any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back or eight (8) feet from the front of the furnace shall be covered with approved plaster board or other approved incombustible material. Above the furnace there shall be constructed a ceiling consisting of plaster board covered with 26 U. S. gauge sheet metal or three-fourths (3/4) of an inch of Portland cement plaster on metal lath; said ceiling shall extend four (4) feet beyond the sides and back and eight (8) feet from the front.

(c) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

### [Rule 31. Instruction Cards.]

See Rule 14.

### [Rule 32. Installation.]

See Rule 16.

# PUBLIC HEARING

## Rule 33. Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall not be used for domestic heating in buildings occupied by more than two (2) families. If used in buildings occupied by more than two families or in commercial buildings, a Certificate of Qualification will be required as provided in Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gypsum, and not less than four inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately ventilated direct to the outer air.]

## 22. [34.] Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by

gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 23. [35.] Use of Grade A or Grade B Fuel Oil.

(a) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

(b) These Rules shall not apply to gas companies in the storage or use of fuel oil in the manufacture of illuminating gas for public use.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(d) These Rules shall take effect immediately.

# RULES

## SMOKING IN FACTORIES.

Adopted by the Board of Standards and Appeals,  
August 13, 1918.

### 1. PERMIT.

**Prohibition.** No person shall smoke, or carry a cigar or cigarette in any factory as defined in Section 1, Section 2, of the State Labor Law, nor in any part of a factory, within the City of New York, except in protected portions or special classes of occupancies specified in Rule 2 of these rules, and then only upon the issuance of a permit by the fire commissioner.

It shall be the joint and several duty of the owner and lessee or lessees of the building containing such factories to cause to be posted in each and every hall, stairhall or room throughout the building, as well as in every elevator-car, in English, and also in such other language or languages as the fire commissioner shall require, notice of such prohibition, and the penalty for its violation.

**Application.** Application for such permit shall be made only by the owner of the building on suitable forms to be furnished by the fire commissioner.

**Time Limit.** Such permit shall be for a definite period not exceeding one year, and shall not be renewed without a reinspection of the premises for which the permit is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

**Conditions.** The permit shall state the conditions under which, the hours between which, and the place or places in such factory where smoking may be permitted, and the permit shall be framed and kept posted in a conspicuous place in the factory.

**Revocation.** Violation of any of the conditions specified in the permit, in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the fire commissioner, and he shall not again issue a permit for the same premises until at least one year has elapsed.

## RULE 2. PERMISSIBLE CASES.

Smoking may be permitted in:—

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof or fire-resisting partitions, with all openings therein protected by self-closing fire doors, and, further, unless the building is of fireproof construction or equipped with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire-retarding material.

(3) Such chemical fire extinguishers as the fire commissioner may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

Blacksmithing or horseshoeing;  
Boiler making;  
Brick, terra cotta or artificial stone works;  
Forge shops;  
Foundries;  
Iron, steel, brass or copper works;  
Machine shops;  
Smelting;  
Stone or monumental works;

provided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the fire commissioner may direct are installed; waste materials are deposited in fireproof receptacles.

(3) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board of the offices of the board and of the further publication of calendars in the daily press.

Fourth, That no one is entitled to written notice of date for the hearing in his case, and that the plaintiff's failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

BOARD OF STANDARDS AND APPEALS,  
Room 1001, Municipal Building,  
New York City.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

—Municipal Building, Rooms 1001 to 1015.

ONE—Worth 0184.

HOURS—9 a. m. to 4 p. m. Saturdays, 9 a. m. to noon.

Communications should be addressed to the chairman of the board.

### CONTENTS

Issue of the Bulletin contains, in the order given—

ket.

of Clerk's Calendar.

Trial Calendar.

ces in Building Zone Cases.

ates of Special Meeting, June 25, 1926, at 10 a. m.

ates of Regular Meeting, June 29, 1926, at 10 a. m.

ates of Regular Meeting, June 29, 1926, at 2 p. m.

ess Report.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, July 6, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, July 13, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

### THE RESOLUTION:

(1320-25-A)

WHEREAS, Vulcan Rail & Construction Co., owner, filed December 19, 1925, an appeal from an order of the fire commissioner, affecting premises south side Grand street, 460 ft. west of Garrison avenue, Maspeth, Borough of Queens, and

WHEREAS, the order of the fire commissioner, dated July 2, 1925, reads (Order No. 78888-LF):

"An inspection of premises S. S. Grand St., 460 West of Garrison Ave., Maspeth (Rear Building), Borough of Queens, shows a fire hazard, to correct which you are hereby specially directed within five days, to the following:

"1. Complete standpipe installation as per plan No. 121524, Sec. 20, Ch. 12, Code of Ordinances.";

and

WHEREAS, the buildings are non-fireproof, two stories (ft.) in height, 105 ft. by 107 ft. (irregular), approximately 13,000 sq. ft. in area, and one story in height; OCCUPIED for the manufacture of printing inks. Two-story structure, 1st story, 20 persons; 2nd story, 5 persons. One story structure, storage; and

WHEREAS, appellant contends that the inks manufactured on the premises contain a percentage of inflammable oil and that there has been installed a complete Foamite system, consisting of two 3,000 gallon solution tanks, rotary pumps, field lines and the necessary hose to cover the entire building; appellant contends, further, in view of the composition of the material manufactured, that in case of fire the Foamite will be more effectual than water.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby granted on condition that the two solution tanks and pump of present fire extinguishing equipment shall be housed on top and sides in brick enclosure or 6 in. of concrete; enclosure to be unpierced except for one door opening from the exterior of building, said door to be properly marked in 6 in. red letters, "FIRE PUMP AND TANKS," and to remain unlocked at all times; that there shall be at least one person on the premises at all times who is qualified in the operation of the fire extinguishing equipment; that a watchman on the premises shall be supervised by Central Office boxes located throughout the buildings; that the occupancy shall be restricted to storage occupancy, and laboratory with an occupancy of not more than five persons; granted so long as conditions as to occupancy and operation shall remain unchanged.

5-26-A.

APPELLANT—Murray Klein, for Thomas Lupo, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—328-340 Teneyck street, Brooklyn.

APPEARANCES—

For Appellant: Murray Klein.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and Chief  
Kenlon .....

Negative .....

Absent .....

THE RESOLUTION:

(85-26-A)

WHEREAS, Murray Klein, for Thomas Lupo, owner, filed, January 28, 1926, an appeal from an order of the fire commissioner, affecting premises 328-40 Teneyck street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 5, 1926, Order No. 88609-F, reads:

"1. Install a standpipe system with risers 4 inches in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

WHEREAS, the building is non-fireproof, one story (146 ft. in height, 125 ft. by 100 ft. in area; OCCUPIED as a furniture factory, 10 persons in entire premises; and

WHEREAS, appellant contends that the building is low in height and fronts on two streets; that there is an open yard at the rear of the premises and that there is a city hydrant in front of the building.

Resolved, that the order of the fire commissioner be and hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be equipped throughout with an approved one-source wet sprinkler system; that the existing open unoccupied space or yard shall be maintained from the easterly gable wall of present building to the highway of Bogart street, to the east; and the building shall not be increased in height or area; *granted* so long as conditions otherwise as to occupancy use shall remain unchanged.

6-A.

APPELLANT—Associated Ballrooms, Inc., lessee.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—596-614 Lenox avenue, Manhattan.

APPEARANCES—

For Appellant: James J. Munro.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon .....

Negative .....

Absent .....

THE RESOLUTION:

(241-26-A)

WHEREAS, Associated Ballrooms, Inc., for Bourgo Realty Corporation, owner, filed, March 22, 1926, an appeal from the order of the superintendent of buildings, affecting premises 596-614 Lenox avenue, Borough of Manhattan;

WHEREAS, the decision of the superintendent of buildings, dated March 13, 1926, reads:

"Relative to application for Certificate of Occupancy for use of second floor of above building as a dance hall for 1,000 persons, we beg to state that as the building is over 5,000 square feet in area, the building must be of fireproof construction."

and

WHEREAS, the building is non-fireproof, two stories (26 ft. 11 in.) in height, 74 ft. frontage on 141st street, 75 ft. frontage on 140th street and 199 ft. 10 in. frontage on Lenox avenue, about 15,000 sq. ft. in area. OCCUPIED: 1st story, stores; 2nd story, dance hall, 1,000 persons. EXITS: Three interior fireproof stairs, two of which extend from 1st story to 2nd story, the other extends from 1st story to roof, enclosed in fireproof partitions, with fireproof doors at openings; and

WHEREAS, the appellant proposes to construct two additional means of exit; an outside iron stairway at east side leading down to court with egress to street and a fire escape balcony at 2nd story of 140th street front, with drop ladder to sidewalk; and

WHEREAS, the appellant contends that the building was leased with the understanding that it was fireproof and the proposed occupancy would be permitted, also that a large sum of money has been invested which would be a total loss if prevented to use the premises for a dance hall on 2nd story.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height or area; that in addition to the interior primary enclosed means of exits there shall be installed an outside iron stairway in the rear or yard court, with egress direct to 141st street; that iron balcony fire escapes with counterbalanced stairs shall be provided on the exterior of the building, on 140th and 141st streets, embracing all windows other than those of lavatories; that the existing standpipe system shall be maintained; that the ceiling throughout of 1st story shall be fire-retarded with plaster boards and metal; and that any reinforcement necessary for the safe carrying capacity of the floor construction, as determined by the superintendent of buildings, shall be installed.

248-26-A.

APPELLANT—Guy W. Culgin and John S. Hyers, for Howell, Field and Goddard, Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—100 Review Avenue, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: Guy W. Culgin and John S. Hyers.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION:

(248-26-A)

WHEREAS, Guy W. Culgin, for Field & Goddard, Inc., owner, filed March 23, 1926, an appeal from an order of the fire commissioner, affecting premises No. 100 Review Avenue, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated January 8, 1926, reads (Order No. 88591-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation FIRE DE-

# MINUTES

PARTMENT outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.”;

and  
WHEREAS, the building is mill frame construction, two stories in height, 120 ft. by 200 ft. in area in the 1st story and 140 ft. by 20 ft. in area above. OCCUPIED: 1st story, manufacture of fireproof doors and windows, 125 persons; 2nd story, offices, 16 persons; and

WHEREAS, appellant contends that the building is amply provided with exits; that there is an interior fire alarm signal, connected with the fire department through the District Telegraph Co.; that a watchman service is maintained; that all paints and benzines are stored in an adjoining fireproof building and that the 2nd story is used solely for offices.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the one-story building shall be not increased in height or area; that the use and occupancy of the 2nd story extension shall be maintained, with legal required exits provided therefrom; that the entire premises shall be equipped with a thermostatic fire alarm system, with direct central office connection to fire headquarters; that not less than four (4) forty-gallon portable fire extinguishers shall be maintained on the 1st story; that all water pails or other extinguishing accessories required by the fire department shall be installed; that there shall be no open flames device, or forges maintained on the premises; and *granted* so long as conditions as to occupancy and use shall remain unchanged.

275-26-A.

APPELLANT—Samuel Rosenblum, for Perfect Window Regulator Corp., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—Southwest corner Van Alst and Harris avenues, L. I. City, Borough of Queens.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

THE RESOLUTION:

(275-26-A)

WHEREAS, Samuel Rosenblum, for Perfect Window Regulator Corp., owner, filed April 1, 1926, an appeal from an order of the fire commissioner affecting premises southwest corner Van Alst and Harris avenues, Long Island City, Borough of Queens; and,

WHEREAS, the order of the fire commissioner, dated January 27, 1926, reads:

“Order No. 89807-F—

“1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story \* \* \*.”;

and

WHEREAS, the building is fireproof, one story in height, 95 ft. by 230 ft., about 20,000 sq. ft. in area; OCCUPIED for the manufacture of window regulators, 175 persons; and

WHEREAS, the appellant contends that the occupancy is not hazardous; that the building faces two streets, is

provided with fire extinguishers, fire pails and watchman's services.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* so long as the existing one-story fireproof building shall be not increased in height, area or dimension that the present occupancy and use shall remain unchanged that the existing side and rear courts shall be maintained open and unencumbered; and that all water pails or other fire extinguishing accessories required by the fire commissioner shall be provided.

315-26-A.

APPELLANT—Ballard Oil Equipment Co., for Oscar Engels, owner.

SUBJECT—Appeal from decision of the fire commissioner.  
PREMISES AFFECTED—West side of Mickle place, 125 ft. south of 36th avenue, Bayside, Borough of Queens.

THE RESOLUTION:

(315-26-A)

WHEREAS, David Kaufman, for Ballard Oil Equipment Co., for Oscar Engels, owner, filed, April 13, 1926, an appeal from a decision of the fire commissioner, affecting premises west side of Mickle place, 125 ft. south of 36th avenue, Bayside, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, dated April 10, 1926, re: Alt. App. No. 2465-1925, reads:

“3. Pumps must be of a type approved by the Board of Standards and Appeals.

“5. Burners must be of a type approved by the Board of Standards and Appeals.”;

and

WHEREAS, the building is non-fireproof, 2½ stories in height, 21 ft. by 42 ft. in area; OCCUPIED as a dwelling; and

WHEREAS, a fuel oil burning system has been installed consisting of a 550-gallon fuel oil storage tank (buried on the side the premises), a Cook electric pump, a Ballard standard domestic burner, and the necessary valves and piping make a complete installation; and

WHEREAS, appellant requests a temporary permit, pending the approval of the pump and burner by the board;

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as the operation of the proposed pump is concerned on condition that the fuel oil equipment of the building shall comply with the rules in all respects; that a temporary permit for ninety (90) days shall be granted pending determination by the board on request for approval of the pump and burner.

321-26-A.

APPELLANT—Crocker National Fire Prevention Engineering Co., for Barnet Weinstein, owner.

SUBJECT—Appeal from order of the fire commissioner.  
PREMISES AFFECTED—126-134 Stewart avenue, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Lynch of fire department.

Connell, Holland, Guilfoyle and Chief  
Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(321-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Barnet Weinstein, owner, filed, April 14, 1926, an appeal from an order of the fire commissioner, affecting premises 126-134 Stewart ave., Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 13, 1926, reads:

"Order No. 99954-C:

"1. Surrender to bearer Permit 139027 issued 4/17/25 to expire 1/10/26, for premises 126-134 Stewart Ave., authorizing the storage and use of two tanks of hydro gas and two tanks of oxygen as it is revoked for reason that the following orders which have been issued on the same premises for use of garage will have to be complied with:

"2. Install a 4 in. standpipe to withstand a pressure of 300 lbs. per sq. in. \* \* \*

"3. Provide an enclosure of fire-retarding material about space where open flames (torches for welding and iron cutting) are used, separating same from remainder of the building and make door to said enclosure self-closing fireproof construction.

"4. Install an automatic fireproof self-closing door in opening now protected by wood door, which leads from storeroom into garage.";

WHEREAS, the building is non-fireproof, one story (28 ft. n. to 41 ft. 6 in.) in height, 150 ft. by 140 ft., about 21,000 sq. ft. in area. OCCUPIED: Iron and steel warehouse, persons; and

WHEREAS, the appellant contends in re: Items 1 and 4, that the premises are not used as a garage; in re: Item 2, that the occupancy as an iron and steel warehouse is not hazardous, and there is easy access from three street fronts; in re: Item 3, that it is impossible to enclose the space on account of the steel girders being 60 ft. in length; furthermore, the cutting by torch is principally done in a small enclosure outside the building.

Resolved, that the order of the fire commissioner be and hereby is modified, and the appeal be and it hereby is granted as to Item 1 on condition that any garage use of building shall be discontinued; as to Item 2 granted on condition that the building shall be not increased in height, or dimension; granted as to Item 3 on condition that there shall be no open flame, acetylene or oxyhydrogen welding or welding device maintained within the main structure itself; and granted so long as conditions as to occupancy and use otherwise shall remain unchanged, as to Item 4, the appeal be and it hereby is denied.

26-A.  
PELLANT—Samuel Rosenblum, for Western Chair Co., owner.

SUBJECT—Appeal from order and decision of the fire commissioner.

## THE RESOLUTION:

(347-26-A)

WHEREAS, Samuel Rosenblum, for Western Chair Co., owner, filed, April 21, 1926, an appeal from an order and decision of the fire commissioner, affecting premises No. 215 Dupont street and Nos. 40-50 Paidge avenue, Borough of Brooklyn; and

WHEREAS, the order and decision of the fire commissioner, dated March 8, 1926, and October 2, 1925, respectively, read:

(N. B. Applic. No. 2629-25.)

"5. A 4 in. standpipe must be installed covering all areas of building. File plans showing details in conformity with rules of Board of Standards and Appeals."

(Order No. 85284-F.)

"Install a standpipe system with risers 4 in. in diameter, etc.";

and

WHEREAS, the building is non-fireproof, three stories (36 ft. 6 in.) in height, 175 ft. by 80 ft., 1½ in. and 120 ft. irregular in depth, about 20,000 sq. ft. in area, divided by terra cotta partitions into three areas, 8,450, 4,400 and 6,970 sq. ft. each; OCCUPIED for the storage of furniture and finishing of chairs, total of 18 persons; and

WHEREAS, the appellant contends that the building is equipped with a one source automatic dry sprinkler system, a fire alarm system and telegraphic connections with headquarters.

Resolved, that the order and decision of the fire commissioner be and they hereby are affirmed, and the appeal be and it hereby is denied.

356-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for William H. Wheeler, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—28-30 West 38th street, Manhattan.

## APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

## THE VOTE TO GRANT—

Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners  
Connell, Holland, Guilfoyle and Chief  
Kenlon ..... 5  
Absent ..... 0

## THE RESOLUTION:

(356-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., filed, April 23, 1926, for William H. Wheeler, owner, an appeal from order of fire commissioner affecting premises 28-30 West 38th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 31, 1925, reads:

"Order No. 88991-F—

"1. Provide a separate and distinct system of automatic sprinklers throughout the building, having at least one source of water supply \* \* \*";

and

WHEREAS, the building is fireproof, twelve stories (149 ft. 2 in.) in height, 50 ft. by 96 ft. 2 in. in area at 1st story, and 50 ft. by 89 ft. 8 in. in area above. OCCUPIED: 1st story, stores; upper stories, tenant factory (millinery); approximately 35 persons per story; and

WHEREAS, appellant contends that the building is equipped with an approved standpipe system, a fire alarm signal

# MINUTES

system, and that fire drills are regularly conducted; that the building is amply provided with exits and contends, further, that the manufacture of millinery is not a hazardous use.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

305-26-A.

APPELLANT—New York Zoological Society, owner.  
SUBJECT—Appeal from order of the fire commissioner.  
PREMISES AFFECTED—East side of Southern Boulevard, 975 ft. east of 185th street, The Bronx.

APPEARANCES—

For Appellant: Raymond L. Ditmars.  
For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland, Guilfoyle and Chief  
Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(305-26-A)

WHEREAS, New York Zoological Society, owner, filed, April 9, 1926, an appeal from an order of the fire commissioner, affecting premises east side of Southern Boulevard, 975 ft. east of 185th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated March 19, 1926, reads (Order No. 33329-LC):

"A. Premises not equipped with an approved system of automatic sprinklers (workroom and storage). Section 241-E, Chapter 10, Code of Ordinances.

"B. Premises occupied as a place of public amusement of assembly. Section 241-a, Chapter 10, Code of Ordinances.

"C. No fireproof compartment for the examining, repairing or piecing together of inflammable motion picture film has been provided.

"D. No fireproof furniture and fittings in compartments wherein inflammable motion picture film is repaired, examined or pieced together has been provided. Section 243, Chapter 10, Code of Ordinances."

and

WHEREAS, the premises, one of the buildings of the New York Zoological Park, is constructed of brick and glass, one story in height, 61 ft. by 34 ft. in area; OCCUPIED as winter quarters for water fowl, a photographic laboratory and as a film vault; and

WHEREAS, appellant in re: Item "A", proposes to install a sprinkler system connected with the water supply pipes of the building; in re: Item "B" contends that the building is not a place of public assembly, and in re: Items "C" and "D", contends that at the place for examining and piecing films (in a rear room of the reptile house) the amount of film never exceeds 4,000 feet.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* as to Objection "A" *on condition* that a one-source sprinkler system shall be installed; as to Objection "B" *on condition* that the film storage shall be confined to the brick enclosure indicated on plans, approximately 9 ft. by 12 ft.; as to Objection "C" *on condition* that the walls of enclosure shall be of brick with fire-retarded ceiling, and that a fireproof door shall be provided at the opening; as to Objection "D" *on condition* that the foregoing conditions shall be complied with; and *on further condition* that all film reels stored on premises shall be maintained in approved metal film containers.

95-25-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Brooklyn Box and Lumber Co. Inc., lessee.

SUBJECT—Application for reopening, modification, appeal from order of the fire commissioner.

PREMISES AFFECTED—216-224 Seigel street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

ACTION OF BOARD—Appeal reopened and resolution modified.

THE VOTE TO REOPEN AND MODIFY—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland, Guilfoyle and Chief  
Kenlon .....  
Negative .....  
Absent .....

THE RESOLUTION:

(95-25-A)

WHEREAS, Croker National Fire Prevention Engineering Company, for Brooklyn Box and Lumber Co., Inc., lessee, filed, January 23, 1925, an appeal, with the board of appeals, from orders of the fire commissioner, affecting premises 216-224 Seigel street, Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated November 25, 1924, read:

"Order No. 68139-F:

"1. Install a standpipe system with risers 4 in. diameter tested to withstand a pressure of 300 lb. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.

"Such standpipe shall be kept constantly filled with water by means of an approved tank or pump supplied and be ready for use at all times. Standpipe to be connected with two-way, 3 inch siamese connections with double clapper valves and caps and signs, placed on street front of building at least 18 inches and not more than two feet above sidewalk in a horizontal position, accessible to the Fire Department."

"Order No. 68140-F:

"1. Provide a separate and distinct system of automatic sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals, March 24, 1917, as amended May 2, 1918, and January 1, 1919, effective February 17, 1919."

and

WHEREAS, the buildings are of frame construction consisting of three attached buildings and lumber shed with connecting doorways; two and three stories in height, 148 ft. 11 in. by 100 ft., irregular, approximately 11,978 sq. ft. first floor area. OCCUPIED: 1st story, storage, woolen rags and lumber, 11 persons; 2nd and 3rd stories, manufacturing boxes, 14 persons; and

WHEREAS, this appeal was granted by the board at meeting, July 14, 1925, and appellant requested a reopening of the case which request was granted by vote of the board and now proposes to install a sprinkler system.

*Resolved*, that the order of the fire commissioner, No. 68139-F, be *reversed* and the appeal as to this order be and it hereby is *granted* and that the order of the fire commissioner No. 68140-F be and it hereby is *affirmed*, and the appeal as to this order be and it hereby is *denied*.

966-25-A.

APPELLANT—Schoenherr, for Lena J. Fry, owner.  
SUBJECT—Application for reopening, extension of permit, appeal from order of the fire commissioner

# MINUTES

PREMISES AFFECTED—South side of Kenmore road, 72 ft. west of Douglas road, Douglaston, Borough of Queens.

APPEARANCES—None.

ACTION OF BOARD—Chairman read request to extend permit. Extension of permit for 90 days granted.

THE VOTE TO EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners	
Connell, Holland, Guilfoyle and Chief	
Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(966-25-A)

WHEREAS, Lena J. Fry, owner, filed, September 17, 1925, appeal from an order of the fire commissioner, affecting premises on the south side of Kenmore road, 72 ft. west of Douglas road, Douglaston, Borough of Queens;

WHEREAS, the order of the fire commissioner, dated August 31, 1925, reads (Order No. 97847 1 C):

"You are hereby notified that an inspection of the above premises, used for the storage of fuel oil, shows that the following must be done before the permit requested by you can be issued:

"FORTHWITH—

"1. Remove all fuel oil until the following orders are complied with.

"2. File plans showing the complete installation of the fuel oil burning equipment, as per Rule 16 of the Fuel Oil Rules.

"3. Submit a certificate from the Superintendent of Buildings approving the proposed construction of the tank enclosure and location of the tanks, as per Rule 16 of the Fuel Oil Rules.

"5. Have fuel oil burning device or apparatus for Grade B Fuel Oil approved by the Board of Standards and Appeals as per Rule 35-a of the Fuel Oil Rules.

"6. Provide fuel oil burner or burners of a type approved by the Board of Standards and Appeals as per Rule 217 of the Fuel Oil Rules.

"7. Provide an automatic shut-off to prevent abnormal flow of fuel oil to the burners, as per Rule 22-a of the Fuel Oil Rules.

"9. Provide a hydrostatic test of not less than one hundred pounds per square inch for all Grade B Fuel Oil carrying piping, as per Rule 25, Sec. 2 of the Fuel Oil Rules."

"12. Provide a pilot light for each automatic fuel oil burning system of an adequate intensity, in each combustion chamber so arranged as not to be easily extinguished, as per Rule 28 of the Fuel Oil Rules."

WHEREAS, the building is frame, 1½ stories in height, by 28 ft. in area; OCCUPIED as a dwelling; and WHEREAS, a fuel oil burning equipment has been installed consisting of a 1,000 gallon tank buried outside the building, "Electrol" burner and the necessary valves and piping make a complete installation; and

WHEREAS, appellant contends: In re Item 2, that the red plans have been filed; re Item 3, that the tank enclosure and enclosure conform with the fuel oil rules; in items 5 and 6, that application has been made to the Board of standards and appeals for the approval of the same; in re Item 7, that the automatic shut-off is part of the apparatus; re Item 9, appellant contends that the same will withstand the required test; and in re Item 12, appellant contends that no pilot light is required in the installation for the reason that it is electrically ignited; and WHEREAS, this appeal was granted by the board at its meeting, April 6, 1926, for a temporary period of 90 days; appellant requests a further extension.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, for a temporary permit as to the use of Electrol burner for a period of ninety days at the owner's risk pending determination by the board on petition for approval of burner for general use, *on condition* that the fuel oil burning equipment installation shall comply with the fuel oil rules in all other respects.

## BUILDING ZONE CASES.

1154-25-BZ.

APPLICANT—Gardiner Conroy, for Fogel-Hursh Building Co., Inc.

SUBJECT—Application (re: decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a building for a business occupancy on the first story.

159-26-BZ.

APPLICANT—John J. Dunnigan, for Albert J. Schwarzler, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—Southwest corner of Cromwell avenue and West 169th street, The Bronx.

APPEARANCES—

For Applicant: Hugh A. McGarry.

For Opposition: William J. Flynn, Edward J. Hogarty, George C. Livers, Mr. Hauben, Warren F. Johnson, Jerry Mahoney and 12 others.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative: Commissioner Guilfoyle .....	1
Negative: Chairman Walsh, Commissioners Connell and Holland and Chief Kenlon ...	4
Absent .....	0

THE RESOLUTION:

(159-26-BZ)

WHEREAS, John J. Dunnigan, for Albert J. Schwarzler, owner, filed, February 25, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises southwest corner

of Cromwell avenue and West 169th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 29, 1926, after due notice by publication in Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Cromwell avenue, south of a point 100 ft. north of West 169th street, is in a business district; that Cromwell avenue, north of a point 100 ft. north of West 169th street, is in an unrestricted district; and that West 169th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings rendered February 15, 1926, reads:

"1. Erection of a proposed garage for storage of more than five motor vehicles in business district contrary to provisions of Building Zone Resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story and basement in height, with a frontage of 121.21 ft. on Cromwell avenue and 79.65 ft. on West 169th street; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the property under appeal is in the block bounded by Boscobel avenue, 169th street and Cromwell avenue, uninhabited by non-conforming use, and the board deems that applicant is not entitled to relief under section 21 of the ground of practical difficulty and unnecessary hardship and that the granting of a variation to permit the proposed use would not be in harmony with the general intent of the zoning resolution, to the end that the public health, safety and general welfare may be secured and substantial justice done.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the application be and it hereby is denied.

210-26-BZ.

APPLICANT—John J. Dunnigan, for Walter S. Thompson, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station and also garages for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—Southeast corner of Jerome avenue and East 169th street, The Bronx.

APPEARANCES—

For Applicant: Hugh A. McGarry.

For Opposition: Wm. J. Flynn, Geo. C. Livers, Edward J. Hogarty.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	0
Absent: Chief Kenlon .....	0

THE RESOLUTION:

(210-26-BZ)

WHEREAS, John J. Dunnigan, for Walter S. Thompson, owner, filed, March 12, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station and also garages for the storage of more than five motor vehicles; premises southeast corner of Jerome avenue and East 169th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 29, 1926, after due notice by publication in Bulletin of the Board of Standards and Appeals; and

# MINUTES

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue is in a business district; East 169th street is in a business district, and Gerard avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 11, 1926, reads (N. B. 219-26):

"1. Erection of gasoline station and garages for storage of more than five motor vehicles in a business district is contrary to provisions of Building Zone Resolution."

WHEREAS, the premises consist of an irregular plot of ground, having a frontage of 276 ft. on Jerome avenue and 54 ft. on West 169th street; it is proposed to erect there a gasoline selling station along the Jerome avenue front; apartment houses and stores on the Gerard avenue front and occupy the rest of the premises for individual garages;

WHEREAS, the site under appeal is within 200 ft. of the New Bronx Memorial Hospital, the board deems that applicant is not entitled to relief under sections 7e and 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

26-BZ.

APPLICANT—Joseph Leone, for Edward H. Litchfield, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

## THE RESOLUTION:

(303-26-BZ)

WHEREAS, James W. Byrnes, for Mary G. Conboy, owner, filed, April 7, 1926, an application, under the building zone resolution, to permit partly in a residence district and partly in a business district the alteration, extension and change of occupancy of a stable for more than five horses to a garage for the storage of more than five motor vehicles; premises 405-413-423 44th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 29, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fourth avenue is in a business district and that 44th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 24, 1926, reads (Applic. No. 8707-26):

"Proposition contrary to Zone Resolution, Art. II, Section 6-a.

"Converting and *extending* a stable for more than five horses to a garage for more than five motor vehicles. The extension being partly in a residential and partly in a business district."

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 162 ft. and a depth of 100 ft. 2 in.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7c, as to the existing garage space extending into a more restricted use district, and under section 21 of the building zone resolution, on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not be erected in excess of two stories above grade; that there shall be no cellar or basement other than the necessary space for the accommodation of the heating apparatus; that the rear and easterly gable walls shall be unpierced throughout their entire height and length; that the openings in the westerly gable wall shall be permitted only so long as the corner plot and these premises shall remain in the one ownership; that the structure shall be erected fireproof throughout; that a rear yard of not less than 10 ft. in depth for the entire width of property shall be provided and maintained at the level of 2nd story; that a sky-

light throughout shall be provided in the roof of this one-story extension, glazed with wire glass, with fixed ventilated louvres, attached to the rear wall of the second story; that there shall be no signs or advertising of any nature or description displayed on the proposed building other than one projecting sign indicating the name and title of the business; that there shall be no roof sign erected that the front elevation be finished with face brick and architectural terra cotta or natural stone trimmings, of attractive design; that any gasoline equipment installed shall be located at the extreme westerly end at the street front of this structure; that a return of the proposed design of the front elevation shall be made to this board for approval before submission to the superintendent of buildings for acceptance; that all permits required shall be obtained within nine months and the building completed within eighteen months.

346-26-BZ.

## THE RESOLUTION:

(346-26-BZ)

WHEREAS, James Kearney, for Edward Morrisson, owner, filed, April 20, 1926, an application, under the building zone resolution, to permit in a business district, also in a "area district, the erection and maintenance of a garage the storage of more than five motor vehicles, and also omission of the rear yard; premises 116-122 West 100 street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 29, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 100th street is in a business district; West 99th street is in a business district; and that Columbus avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 8 and June 2, 1926, reads (N. B. 44-1926) Decision of April 8th reads—

"This amendment is disapproved with the following objection:

"17. In a business district a garage for more than five motor vehicles may not be erected. Sec. 4, Building Zone Resolution."

Decision of June 2nd reads—

"This amendment is disapproved with the following objection:

"19. Rear yard must be provided as required by section 17 of the Building Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, three stories and basement in height, with a frontage of 75 ft. and a depth of 100 ft. and 11 in.; to be occupied as a garage for the storage of more than five motor vehicles; and

# MINUTES

WHEREAS, the applicant proposes a building for automob-  
manufacturer's garage use as distributing station and  
agency, and established his basis of appeal under section  
and the board deemed that he was entitled to the relief  
requested under section 21 of the building zone resolution  
on the ground of practical difficulties and unnecessary hard-

*Resolved*, that the board of standards and appeals does  
hereby *make a variation* in the application of the use dis-  
trict regulations of the building zone resolution, and that  
the application be and it hereby is *granted on condition* that  
the building shall be restricted to a three-story structure  
above grade; that the entire building shall be constructed  
of steel frame and with a fixed louvre ventilator attached  
to the roof; that a rear yard of not less than 10 ft. shall be  
maintained for the entire width of the premises at the 2nd  
story level; that the offset shall be glazed with wire glass  
steel frame and with a fixed louvre ventilator attached  
to the wall at the skylight roof; that the gable walls through-  
out the rear wall of the 1st story shall be unpierced; that  
there shall be no opening in the rear wall within 20 ft.  
of the easterly gable wall; that any openings if installed,  
in the rear wall above the 2nd story level, shall be provided  
with fixed steel sash glazed with wire glass; that there  
shall be no signs nor advertising on the front of the build-  
ing or on the roof, other than one projecting electric sign  
indicating the title and conduct of the business; that there  
shall be no gasoline storage equipment installed or maintained  
on the premises; that all permits necessary for the prosecu-  
tion of the work shall be obtained within nine months and  
the building completed within eighteen months from the  
date of this action.

RESOLUTION:

(991-25-BZ)

WHEREAS, William F. Doyle, for Fordham Realty Com-  
pany, filed, September 28, 1925, an application, under  
building zone resolution, to permit in a business district  
the erection and maintenance of a garage for the storage  
of more than five motor vehicles; premises east side of  
Jerome avenue, 50 ft. north of 200th street (Bedford Park  
boulevard), Borough of The Bronx; and

WHEREAS, a public hearing was held on this application  
before the board of standards and appeals, at its regular meet-  
ing, February 9, 1926, after due notice by publication in  
the minutes of the Board of Standards and Appeals; and  
WHEREAS, the use district maps accompanying the build-  
ing zone resolution show that Jerome avenue is in a busi-  
ness district; that 200th street (Bedford Park boulevard)  
is in a business district, and that Villa avenue is in a resi-  
dential district; and

WHEREAS, the decision of the superintendent of buildings,  
rendered September 15, 1925, reads:

"1. Occupancy of proposed building in business dis-  
trict as garage for storage of more than five motor  
vehicles is contrary to the provisions of the Building  
Zone Resolution."

and

WHEREAS, the proposed building is of non-fireproof con-  
struction, two stories in height, with a frontage of 100 ft.  
and a depth of 100 ft.; to be occupied as a garage for the  
storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant was en-  
titled to relief under section 21 of the building zone reso-  
lution on the ground of practical difficulty and unnecessary  
hardship; and

WHEREAS, under date of February 9, 1926, the board  
adopted the following resolution:

"*Resolved*, that the board of standards and appeals  
does hereby *make a variation* in the application of the  
use district regulations of the building zone resolution,  
and that the application be and it hereby is *granted on*  
*condition* that the building shall be restricted to a two  
(2) story structure above grade, with no cellar other  
than a boiler room, the use and occupancy of which  
will be restricted exclusively to heating apparatus for  
the use of this structure; that the 1st tier of this build-  
ing shall be built of fireproof construction, steel beams,  
reinforced concrete arches; that the roof shall be of flat  
design and construction, the underside of which shall  
be fire retarded in accordance with the rules of the  
board of standards and appeals; that the rear and gable  
walls shall be unpierced throughout the entire height  
and length; no roof signs shall be erected; that there  
shall be no signs or advertising on the street front of  
the building other than one projecting electric sign in-  
dicating the title of the business conducted on the prem-  
ises; that the street wall shall be finished with face  
brick and architectural terra cotta or stone trimmings;  
any gasoline storage equipment installed shall be located  
on the extreme northerly end at the street front; that  
the rear wall shall be painted a light color and that  
there shall be no skylight in the roof within 30 ft. of  
the rear wall; all permits necessary for the prosecution  
of the work shall be obtained within nine (9) months  
and the building completed within eighteen (18) months  
from the date of this action."

and

WHEREAS, applicant now requests a modification of this  
resolution as to location of gasoline storage and as to sky-  
light.

*Resolved*, that the resolution of the board adopted Febru-  
ary 9, 1926, be and it hereby is *modified* to read:

*Resolved*, that the board of standards and appeals does  
hereby *make a variation* in the application of the use dis-  
trict regulations of the building zone resolution, and that  
the application be and it hereby is *granted on condition*  
that the building shall be restricted to a two (2) story  
structure above grade, with no cellar other than a boiler  
room, the use and occupancy of which will be restricted ex-  
clusively to heating apparatus for the use of this structure;  
that the 1st tier of this building shall be built of fireproof  
construction, steel beams, reinforced concrete arches; that  
the roof shall be of flat design and construction, the under-  
side of which shall be fire retarded in accordance with the  
rules of the board of standards and appeals; that the rear  
and gable walls shall be unpierced throughout the entire  
height and length; no roof signs shall be erected; that there  
shall be no signs or advertising on the street front of the  
building other than one projecting electric sign indicating  
the title of the business conducted on the premises; that  
the street wall shall be finished with face brick and archi-  
tectural terra cotta or stone trimmings; any gasoline stor-  
age equipment installed shall be located approximately at the

## THE RESOLUTION:

(964-25-S)

WHEREAS, Joseph Mitchell, for 37th Street and Broad-  
Corp., owner, filed, September 17, 1925, a petition for  
variation from the requirements of the labor law, as cited  
in an order of the fire commissioner, affecting premises Nos.  
1370 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner (No. 68848-  
C), reads:

"Remove non-fireproof partitions on 3rd story.";

WHEREAS, the building is fireproof, 16 stories in height,  
5 ft. by 173 ft. (irregular) in area; OCCUPIED as a  
factory, approximately 50 persons per story, peti-  
tioner occupying the 3rd story of the premises as offices,  
rooms and factory (women's coats), 65 persons;  
EQUIPPED with a sprinkler system and a fire alarm sys-  
tem. EXITS: Two interior fireproof stairways, extending  
from 1st story to roof; enclosed in fireproof partitions with  
doors at openings; and

WHEREAS, petitioner proposes to remove the upper por-  
tion of the partitions so as they will not affect the sprinkler  
system.

Resolved, that the order of the fire commissioner be and  
the same hereby is affirmed, and that the petition be and it  
is denied.

## THE RESOLUTION:

(1238-25-S)

WHEREAS, McKenzie, Voorhees & Gmelin, for Bell Labo-  
ratories, Inc., owner, filed, December 2, 1925, a petition for  
variation from the requirements of the labor law, as cited  
in an order of the superintendent of buildings, affecting  
premises 744-754 Washington street and 51-55 Bethune  
street, Borough of Manhattan; and

WHEREAS, the order of the superintendent of buildings,  
dated November 23, 1925 (Violation Order No. 5148),  
reads:

"All windows from 1st to 11th floors are not self-  
closing as required by Section 264 of the Labor Law.

"You are hereby directed to have all windows self-  
closing in accordance with Section 264 of the Labor  
Law.";

and

WHEREAS, the building is fireproof, 11 stories in height,  
128 ft. by 81 ft. in area; OCCUPIED as laboratories for  
the Bell Telephone Company, approximately 50 persons per  
story; and as an auditorium on the 11th story, under same  
auspices, accommodating 650 persons; and EQUIPPED  
with a sprinkler system and a fire alarm signal system.  
EXITS: Two interior fireproof stairways, the northwest  
stair extending from the 1st story to roof, and the south-  
west stair extending from the 1st story to top story, both  
enclosed in fireproof partitions with fireproof doors at open-  
ings; and

WHEREAS, automatic self-closing devices, as required by  
the labor law, have been omitted on all of the windows in  
the exterior walls of the building; and

WHEREAS, petitioner contends that the windows on Bethune  
and Washington street fronts are metal frame and sash,  
glazed with plate glass; that the windows in the south  
wall, adjoining a three-story building, and also those in  
the court walls, west side, are metal frame and sash, glazed  
with wire glass; and

WHEREAS, the building is occupied for research labora-  
tory use and operation by the Bell Telephone Corporation  
and is not used, maintained or operated as a factory build-  
ing.

Resolved, that the board of standards and appeals does  
hereby make a variation from the requirements of the labor  
law, and that the petition be and it hereby is granted on  
condition that there be no combustible or explosive mate-  
rials maintained or stored on the premises, and that all  
openings shall be equipped with approved metal frames and  
sashes, glazed with 1/4 in. polished plate glass, and that  
the building shall not be increased in height.

1230-25-S.

THE RESOLUTION:

(1230-25-S)

WHEREAS, Rt. Rev. Joseph H. McMahon, executor, for Estate of Catherine and Mary Tone, owner, filed, November 27, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 424 Broome street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 5, 1925 (Order No. 86838-LD), reads:

"2. Provide safe and unobstructed egress from the lower termination of the fire escape at the rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street, \* \* \*";

and

WHEREAS, the building is non-fireproof, seven stories (85 ft.) in height, 25 ft. 2 in. by 107 ft. 8 in. in area at 1st story and 25 ft. 2 in. by 100 ft. in area above. OCCUPIED: 1st story, stores; 2nd, 3rd, 4th, 5th and 6th stories, tenant factory, 20 persons on each story; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from roof to the 2nd story balcony, with connecting iron stairs leading to the fire escape balcony on rear of building directly at north, with EGRESS from the termination of the fire escape by means of a drop ladder to adjoining yard or through building adjoining at north; ROOFS of adjoining buildings 3 ft. higher at east, 20 ft. lower at west.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the lowest balcony, on condition that the skylight of the 1st story extension be glazed with wire glass and that an iron bridge connecting with the fire escape balcony at the 2nd story level of No. 45 Crosby street shall be provided; that egress from the lowest balcony of No. 45 Crosby street shall be provided through not less than four plain glass openings, one of which shall be from an extended balcony on 45 Crosby street, and as long as conditions as to occupancy and use remain substantially unchanged.

THE RESOLUTION:

(1160-25-S)

WHEREAS, Croker National Fire Prevention Engineering

Co., for Dora Ungar, owner, filed, November 10, a petition for variation of the requirements of the labor law as cited in order of the fire commissioner, affecting premises 1337 Gates avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 15, 1925, reads:

"Order No. 83818-LD—

"1. Provide safe and unobstructed egress from lower termination of the fire escape at rear of building by constructing a fireproof passageway \* and

WHEREAS, the building is non-fireproof, three stories height, 30 ft. by 90 ft. in area; OCCUPIED as a factory, 1st story, glass works, 10 persons; 2nd story, 12 persons; 3rd story, flax spinning, 25 persons. EXIT: An interior steel stairway, extending from the 1st story to roof, enclosed in fireproof partitions, with fireproof openings at openings, a fire escape on the rear of the building, fireproof openings along the course thereof, extending from roof to the yard level; ROOFS of adjoining buildings same level at east, 14 ft. lower at west; and

WHEREAS, the petitioner claims that egress from yard to street may be had by gate in fence leading to and between two adjoining buildings at east; furthermore, the petitioner contends that with the two standard means of egress provided (except egress from yard) and the small openings the exits are adequate.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects egress from the termination of the rear fire escape, on condition that an opening to the rear of the immediate adjoining premises to the east (No. 1335) shall be provided and maintained, the gate in the fence remain open and unlocked during working hours, a sign word "EXIT" painted in red letters, 8 in. high, and that an open yard shall be maintained from the premises in the same ownership, No. 1335, to the adjoining premises, No. 1333; that authorized permission for egress through the yard of No. 1333 shall be filed with the fire commissioner; and that this variation is granted so long as egress from the termination of fire escape be maintained as directed in the foregoing resolution.

THE RESOLUTION:

(265-25-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Hermitage Co., owner, filed, March 29, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 29 West 15th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 17, 1923, reads (Order No. 45496-LD):

# MINUTES

"1. Provide a fireproof enclosed passageway independent of other exits from the termination of exterior screened stairway, leading to the street, as per Sec. 268 of the Labor Law. Note: Plans for all structural changes should be filed in the Bureau of Buildings as required by Chapter 503, Laws of 1916.";

WHEREAS, the building is fireproof, ten stories in height, 94 ft. in area; OCCUPIED as a tenant factory, 25 persons on each story; EQUIPPED with a fire alarm signal system. EXITS: An interior fireproof stairway extending from the 1st story to top story, enclosed in fireproof partitions with fireproof doors at openings, a standard fire escape on the front of the building; also fireproof exterior screened stairway on the rear of the building, having fireproof openings along the course thereof, leading from roof to the yard level, a door in fence leading to adjoining yard at east; ROOFS of adjoining building four stories lower at east, two stories lower at west;

WHEREAS, the petitioner contends that egress from yard street may be had through adjoining building at east; an order was filed in 1915 by the state labor department to provide additional means of egress; that the present exit facilities were accepted as compliance with such order by all city departments having jurisdiction until the present order was filed; furthermore, that the exits are adequate for the small occupancy maintained in this building;

WHEREAS, there has been a recognition of this egress by the state department of labor prior to 1916.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects egress from the termination of the rear fire escape, on condition that an open, unfastened doorway to adjoining open rear yard of the premises to the east be maintained, and that a copy of authorization for the same of egress to the adjoining premises to the east shall be filed with the fire commissioner, and that the fire escape comply with the requirements of the labor law and the decision of the board of standards and appeals in all other respects.

RESOLUTION:

(269-26-S)

WHEREAS, George & Edward Blum, for Rondax Building Corp., owner, filed, March 29, 1926, a petition for variation from the requirements of the labor law, as cited in decision of the superintendent of buildings, affecting premises Nos. 51-57 West 39th street, Borough of Manhattan;

WHEREAS, the decision of the superintendent of buildings, rendered March 26, 1926, reads (N. B. Applic. No. 550-26): "This amendment is disapproved with the following objections:

"28. All windows must comply with Sections 264-7 of Labor Law.";

and

WHEREAS, the building is fireproof, 16 stories in height, 85 ft. 8 4/7 in. by 98 ft. 9 in. in area; OCCUPIED as show rooms and 25% manufacturing, about 70 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use 1/4 in. plate glass in windows opening on the street front, the maximum size at 1st story, 9 ft. 4 1/2 in. by 10 ft. 6 in.; at 2nd and 3rd stories, 8 ft. 7 in. by 7 ft. 0 in.; all other windows will comply with the labor law; the petitioner further contends that the architectural effect of the building would be destroyed if compelled to divide the window glass on the first three stories into small lights.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows of the three lower stories on the street front, on condition that the openings be provided with metal frames and sashes, glazed with 1/4 in. polished plate glass, and that the requirements of the labor law be complied with in all other respects.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the windows of the three lower stories on the street front, *on condition*, that the openings be provided with metal frames and sashes, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law be complied with in all other respects.

271-26-S.

PETITIONER—Edward P. Doyle for Sarah L. Horn, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—52 West 21st street, Manhattan.

APPEARANCES—

For Petitioner: Edward P. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland, Guilfoyle and Chief Kenlon 4

Negative ..... 0

Absent: Commissioner Connell ..... 1

THE RESOLUTION:

(271-26-S)

WHEREAS, Edward P. Doyle, for Sarah L. Horn, owner, filed, March 31, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 52 West 21st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 11, 1926, reads (Order No. 92492-LD):

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273, Labor Law."

and

WHEREAS, the building is non-fireproof, four stories and basement in height, 15 ft. 1½ in. by 70 ft. in area. OCCUPIED: Basement, restaurant, 3 persons; 1st story, vacant; 2nd story, dressmaking, 12 persons; 3rd story, pleating, 7 persons; 4th story, vacant; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to top story, enclosed in non-fireproof partitions with wooden doors at openings, and a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from top story to the yard level, a gooseneck ladder to roof; and

WHEREAS, the petitioner proposes to construct two 45 degree stairways leading from the yard level up to and connecting with the outside fireproof stairs located on the rear of adjoining buildings at east and west.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects egress from the termination of the fire escape, *on condition* that 45 degree iron stairs shall be provided from the yard level to the first story balcony of the adjoining properties to the east and west, with egress therefrom through fireproof passageway direct to the street from the exterior screened stairway to the west, and the occupancy shall not exceed 25 persons above the second story.

THE RESOLUTION:

(310-26-S)

WHEREAS, Roy Press, for Daniel C. Adams, et al., owners, filed, April 9, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 63-65 Beekman street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 22, 1926, reads (Order No. 93119-LD):

"1. Extend the interior stairway at the south side of building to the roof, as per Section 271 of Labor Law, said extension and the landings and passageways connecting therewith to be enclosed on all sides with partitions of fire resisting material extending at least 3 feet above the roof, as per Sections 271 and 272 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 6 stories in height, 48 ft. 6 in. by 42 ft. 6 in. in area; OCCUPIED: a printing establishment; 1st story, 11 persons; 2nd story, 6 persons; 3rd story, 14 persons; 4th story, 7 persons; 5th story, 16 persons; 6th story, 17 persons; EQUIPPED with a fire alarm signal system. EXITS: Two interior wooden stairways; the northeast stairway, extending from the 1st story to roof and the southwest stairway extending from the 1st to top story; a fire escape on the Beekman street front of the building, having fireproof openings along the course thereof, extending from the top story to the 1st story balcony, with ladder to street; ROOFS of adjoining buildings 5 and 15 feet lower; and

WHEREAS, petitioner contends that the existing means of exit are adequate.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the required interior means of exit be provided and that the loft side of the rear stairs under appeal shall be fire-retarded in accordance with the order of the board of standards and appeals, and that any openings to the stairhall shall be equipped with metal core self-closing doors.

## THE RESOLUTION:

(312-26-S)

WHEREAS, Joseph W. Keller, for James Brown, et al.,  
rs, filed, April 12, 1926, a petition for variation from  
requirements of the labor law, as cited in an order of  
fire commissioner, affecting premises Nos. 387-393  
th avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated  
mber 24, 1925, reads (Order No. 88812 LD):

"1. Remove all articles and wares from stairway  
nclosure at west side of building on the 1st story, as  
per Rule 5 of the Board of Standards and Appeals,  
mended July 29th, 1924. Note—Office of the West-  
rn Union Telegraph Co.";

WHEREAS, the building is fireproof, 12 stories in height, 98  
in. by 166 ft. 8 in. in area. OCCUPIED: 1st story,  
; upper stories, offices, show rooms and tenant factories,  
rsons above the 1st story; petitioner occupying a portion  
e 4th Avenue front (westerly) stair hall as an office  
e Western Union Telegraph Co.; said office being  
ed with wood and glass partitions, 8 ft. high and is  
by 7 ft. in area. EQUIPPED with a sprinkler sys-  
EXITS: Two interior fireproof stairways, extend-  
om the 1st story to roof; enclosed in fireproof parti-  
with fireproof doors at openings; and

WHEREAS, petitioner contends having occupied this por-  
f the premises for eight years and contends further  
he office does not in any way obstruct the entrance  
ess from the building.

olved, that the board of standards and appeals does  
make a variation from the requirements of the  
law, and that the petition be and it hereby is granted  
dition that the space restricted for office use and occu-  
shall not exceed an area 7 ft. wide by 27 ft. in length  
at a clear passageway in the main corridor of not  
an 10 ft. shall be maintained; that this office shall  
losed in partitions of metal construction and glass,  
in. polished plate, fixed sash; there shall be but one  
opening at the westerly end of office, equipped with  
osing metal door, opening in, and not more than two-  
transom sash for ventilation; and that the lights of  
panels in said enclosure shall comply with the re-  
ents of the labor law and the rules of the board of  
ds and appeals.

## THE RESOLUTION:

(314-26-S)

REAS, Samuel Rosenblum, for Loft Realty Co.,

owner, filed, April 13, 1926, a petition for a variation of  
the labor law as cited in order of the fire commissioner,  
affecting premises 135-139 West 26th street, Borough of  
Manhattan; and

WHEREAS, the order of the fire commissioner, dated  
June 30, 1926, reads:

"Order No. 81584-LD—

"1. Remove all combustible articles from stairway  
enclosure at east side of building on 1st story, as per  
Rule 5 of the Board of Standards and Appeals, re-  
vised and adopted 7/29/24.

"NOTE:—Candy stand in entrance hall.";

and

WHEREAS, the building is fireproof, twelve stories in  
height, 50 ft. by 94 ft. in area at 1st story and 50 ft. by  
88 ft. in area above; OCCUPIED as a tenant factory;  
approximately 30 persons per story; there being a candy  
stand situated on the 1st story south of the elevators;  
EQUIPPED with a fire alarm signal system. EXITS:  
An interior fireproof stairway, extending from the 1st  
story to roof, enclosed in fireproof partitions with fireproof  
doors at openings; an exterior iron stairway on the rear  
of the building, having fireproof openings along the course  
thereof, extending from the top story to the 2nd story  
balcony, with EGRESS from the termination of the fire  
escape by means of connection to exterior stairs of adjoining  
building to east, thence through fireproof passageway  
to street; and

WHEREAS, petitioner contends that there is a 4 ft. 10 in.  
wide passageway in front of the stand in question; that  
the interior stairway is only three feet in width; that the  
stand offers no obstruction in the hallway to the street,  
and petitioner, in order to prevent persons standing in front  
of the stand, proposes to build up a wire glass partition  
at the westerly side of the stand.

Resolved, that the order of the fire commissioner be and  
the same hereby is affirmed, and that the petition be and it  
hereby is denied.

## THE RESOLUTION:

(317-26-S)

WHEREAS, George and Edward Blum, for Herogal Con-  
struction Co., owner, filed a petition April 13, 1926, for a  
variation of the requirements of the labor law as cited in  
decision of the superintendent of buildings, affecting prem-  
ises 315-325 West 36th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings,  
dated March 19, 1926, re: Applic. No. 65-1926, reads:

"This amendment is disapproved with the following  
additional objection due to amendment:

"10. Windows on 1st, 2nd and 3rd floors should  
comply with Section 264 of Labor Law and 503 of  
Industrial Code.";

and

WHEREAS, the proposed building is fireproof, 16 stories  
in height, 140 ft. by 88 ft. 9 in. in area. OCCUPIED:  
Offices, showrooms and 25% manufacturing; about 140

# MINUTES

persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use  $\frac{1}{4}$  in. plate glass in window openings on the street front, the maximum size at 1st story 11 ft. 4 in. by 17 ft. 11 $\frac{1}{2}$  in.; 2nd story 17 ft. 11 $\frac{1}{2}$  in. by 7 ft.; 3rd story, 17 ft. 11 $\frac{1}{2}$  in. by 6 ft. 8 in.; all other windows will comply with the labor law; the petitioner further contends that the architectural effect of the building would be destroyed if compelled to divide the window glass on the first three stories into small lights.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects the windows of the three lower stories on the street front, on condition, that the openings be provided with metal frames and sashes, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law be complied with in all other respects.

320-26-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for Mirror Clothing Shop, Inc., lessee.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—91 Canal street, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners	
Connell, Holland and Guilfoyle and	
Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(320-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Louis Rubenstein, owner, filed, April 14, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 91 Canal street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 3, 1924, reads (Order No. 60156-LD):

"1. Arrange the fire escape on the front of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or other proper alternative method to comply with Section 271 of the Labor Law. Among the defects noted are the following: No counterbalanced stairway from the lowest balcony to the ground."

and

WHEREAS, the building is non-fireproof, 5 stories in height, 25 feet by 50 feet in area. OCCUPIED: 1st story, store, 3 persons; 2nd story, stock rooms, 3 persons; 3rd story, dressmaking, 6 persons; 4th and 5th stories, manufacture of infants' wear, 5 persons on each story. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in fire retarding partitions with fireproof doors at openings, a fire escape on the front of the building, having fireproof openings along the course thereof, extending from top story to the 2nd story and drop ladder in guides to sidewalk; and

WHEREAS, the petitioner contends on account of the 1st

story show window at front; that a counterbalanced stairway would detract from the show window and lower the value of the store; and that the exits are adequate; petitioner further proposes to counterbalance the present drop ladder in guides.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the lower balcony shall be extended to include not less than two windows, and that the two counterbalanced drop ladders in guides shall be provided, at each end of the fire escape, and granted only so long as conditions as to occupancy and use remain substantially unchanged.

1023-25-S.

PETITIONER—John Cramer & Son, owner.

SUBJECT—Variation of labor law, as cited in order of fire commissioner.

PREMISES AFFECTED—199-209 Steuben street, Brooklyn.

APPEARANCES—

For Petitioner: Frederick W. Mayes.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Affirmative .....	
Negative: Chairman Walsh, Commissioners	
Connell, Holland and Guilfoyle and	
Deputy Chief Martin .....	
Absent .....	

THE RESOLUTION:

(1023-25-S)

WHEREAS, John Cramer & Son, filed, October 5, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 199-209 Steuben street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated May 8, 1925, reads (Order No. 76809-LD):

"1. Arrange the fire escape on the south side of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"Among the defects noted are the following:

"No stairway provided from top balcony to roof

and

WHEREAS, the building is of standard mill construction, three stories in height, 106 ft. by 53 ft. in area. OCCUPIED: Basement, cutting leather, 35 persons; 1st story, shipping, 25 persons; 2nd and 3rd stories, manufacture of shoes, 55 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: An interior wooden stairway, enclosed in brick partition with fireproof doors at openings; two fire escapes, one on north side and one on the south side of the building, having fireproof openings along the course thereof, extending from the top story to the ground; with EGRESS from the building by means of driven street; no buildings adjoining; and

WHEREAS, the petitioner contends in view of the fact that the building is of mill construction, provided with an approved sprinkler system, accessible from all sides, that advantage would be gained by extending the southern fire escape to the roof.

Resolved, that the order of the fire commissioner, dated May 8, 1925, is affirmed, and that the petition be and it hereby is denied.

Absent ..... 0

## THE RESOLUTION:

(328-26-S)

WHEREAS, Schwartz & Gross, for 36th Street and 8th Avenue Corp., owner, filed, April 16, 1926, a petition for variation from the requirements of the labor law, as cited in decision of the superintendent of buildings, affecting places Nos. 520-530 Eighth avenue, Nos. 267-275 West 36th street and Nos. 260-264 West 37th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered April 13, 1925, reads (N. B. Applic. 549-25):

"1. All windows throughout must comply with Section 264 of Labor Law and Rule 503 of Industrial Code.";

WHEREAS, the building, facing on three street fronts, is 24 stories in height, having a frontage of 150 ft. on Eighth avenue, 197 ft. on West 36th street and 50 ft. on West 37th street. OCCUPIED: 1st story, stores; upper stories, offices, showrooms and manufacturing, 180 persons; EQUIPPED with a sprinkler system. EXITS: fire interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the 1st, 2nd and 3rd stories, in the front walls of the building, on each of the three street fronts, glazed with  $\frac{1}{4}$  in. plate glass, the maximum area of the glass being 8 ft. by 17 ft. on the 1st story and 5 ft. by 10 ft. on the 2nd and 3rd stories; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the three lower stories and would also destroy the architectural appearance of the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted, only in as far as it affects windows on the three lower stories on the three street fronts, on condition that the openings shall be fitted with metal frames and sash, glazed with  $\frac{1}{4}$  in. plate glass; and that the requirements of the labor law shall be complied with in all other respects.

## THE RESOLUTION:

(1193-25-SA)

WHEREAS, the Paramount Fuel Oil Burner, Inc., filed, November 17, 1925, a petition for approval of their device, known as the Paramount Fuel Oil Burner; and

# MINUTES

WHEREAS, a committee of the board inspected this device operation on Jackson street, Bayside, Long Island, Borough of Queens.

Resolved, that the board of standards and appeals does hereby approve the Paramount Fuel Oil Burner in accordance with report of engineer of board, for use with grade

"B" fuel oil, on condition and in conjunction with installations and equipment complying with the rules of the board of standards and appeals in all respects.

Adjourned 5.35 p. m.

WILLIAM J. O'GORMAN, Secretary.

# RULES

## FIRE ESCAPE RULES

ADOPTED JULY 2, 1918; CAL. NO. 1218-18-S; AMENDED DEC. 12, 1918; CAL. NO. 1708-18-S; AMENDED MAY 9, 1924; CAL. NO. 414-24-SR.

Rule 1. In any building erected prior to October 1, now occupied or to be occupied as a factory, more than five stories in height and not exceeding nine stories in height, nor in any case more than 90 ft. from curb level to top floor level, one of the required means of exit or egress under Section 271-1 of the Labor Law may consist of an outside fire escape, provided that:

Any such fire escape hereafter erected shall comply with all the provisions of Section 273, labor law, and in addition thereto:

(1) The balconies and stairs shall be protected on the outside by substantial railings to a height of at least 4 ft. 6 in., measured from floor of balcony or center of stair tread, constructed of bars at least one-half ( $\frac{1}{2}$ ) inch in diameter, spaced not more than six (6) inches on centers, or of substantial grill work, or of screening not less than No. 10 U. S. gauge wire with not more than one and one-half ( $1\frac{1}{2}$ ) inches mesh, all rigidly braced;

(2) When there is safe egress from the roof of the building to any adjoining structure, the fire escape stairway shall continue to the roof, and if there be no safe means of egress, a gooseneck ladder shall be provided from the top story balcony to the roof.

Any such fire escape erected prior to October 1, shall conform in every respect with the requirements of paragraph (a) of this rule, except that balconies may be less than 3 feet in width; the connecting stairs not less than 20 inches in width, and placed at an angle not more than 60 degrees if the building is not over six stories in height, otherwise at an angle of 45 degrees; fire win-  
leading to balconies may be at window sill level if steps not less than sixteen (16) inches wide are provided on the inside from floor level, leading thereto. Any such fire escape erected subsequent to October 1, 1913, and prior to these rules taking effect, unless previously accepted as one of the required means of exit or egress by the administrative official having jurisdiction, shall conform in every respect to paragraph (a) of this rule.

2. A fire escape shall not hereafter be accepted as one of the required means of exit or escape under Section 271-1 of the Labor Law, in any building erected prior to October 1, 1913, now occupied or to be oc-

cupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

Rule 3. When in addition to the required exits from any factory or factory building, there exist other means of egress which are not entirely in accordance with the requirements of the Labor Law and the Rules of the Board of Standards and Appeals, such means of egress may be retained under the following conditions:

(a) Fire Escapes.—All substandard fire escapes on factory buildings shall be removed or reconstructed in accordance with Section 274 of the Labor Law, except that in lieu of a counterbalanced stair a drop ladder in guides from the lowest balcony to ground may be provided. Substandard fire escapes shall not be considered as a basis for increased occupancy of the building. When such substandard fire escapes are located in any court or on the side or rear of a building, proper egress to a point of safety shall be provided, either to open adjoining yards, or the lowest balcony may be connected to an adjoining fire escape, exterior stairway, or to roof of adjoining extension, or other egress satisfactory to the Fire Commissioner. All such fire escapes shall be maintained structurally safe and properly painted.

(b) Interior Stairways.—All interior stairways not conforming to the requirements of the Labor Law or rules of the Board of Standards and Appeals may be retained, provided that egress to same is maintained unobstructed, halls are properly lighted, and all landings, passageways, etc., are maintained free and unobstructed. An easily operated panic bolt or other similar device may be installed at street exit door.

(c) Exterior Screened Stairways.—Exterior screened stairways not serving as a required means of egress shall be either removed or maintained structurally safe and properly painted, exits thereto and all platforms and passageways thereof shall be maintained unobstructed, and egress from termination shall be provided for sub-standard fire escapes in subdivision a.

(d) Horizontal Bridges.—Horizontal bridges and party wall balconies between buildings shall be removed or maintained structurally safe and properly painted, and access thereto and all passageways thereof shall be maintained unobstructed.

(e) No sign of any character shall be placed at openings leading to these sub-standard exits.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

gress Report.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, July 13, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, July 20, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## THE RESOLUTION:

(68-25-A)

WHEREAS, Croker National Fire Prevention Engineering Co. for the Dictograph Products Corporation, owner, filed, January 16, 1925, an appeal from an order of the fire commissioner, affecting premises northeast corner of Schooley place and Beaufort street, Jamaica, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated July 8, 1924, reads (Order No. 898311-C):

"1. Install a 4-inch standpipe system in building No. 6 as per section 581 of the Building Code and in accordance with the rules of the Board of Standards and Appeals. . . ."

and

WHEREAS, the premises consist of a plot of ground on which is located the plant of the Dictograph Products Corp., consisting of a number of two-story structures and the building in question No. 6, which is a non-fireproof building, one story in height, 150 feet by 77 feet in area, OCCUPIED for machine work and painting and plating, the building being equipped with a two-source sprinkler system, consisting of a 6-inch connection to main on Beaufort street and a 15,000 gallon gravity tank on another of the group; and

WHEREAS, this appeal was dismissed for lack of prosecution on October 9, 1925, and re-opened by vote of the board, May 4, 1926; and

WHEREAS, appellant contends that the total inside area of building is approximately 11,000 square feet and that the maximum total open area is approximately 7,500 square feet.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as it affects Building No. 6, one-story structure, *on condition* that the existing wet sprinkler system shall be maintained; that the building shall be not increased in height or area; that all doorway openings between small work-rooms and main open area of first story shall be provided with self-closing, fireproof doors; and *granted* so long as conditions as to operation and use shall remain substantially unchanged.

1177-25-A.

APPELLANT—Croker National Fire Prevention Engineering Corporation, for Oscar Trilsch Co., owner.

SUBJECT—Appeal from orders of the fire commissioner.

PREMISES AFFECTED—17 East 10th street, Whitestone Borough of Queens.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland, and Guilfoyle .....  
Negative .....  
Absent: Chief Kenlon .....

## THE RESOLUTION:

(1177-25-A)

WHEREAS, Croker Nat'l Fire Prev. Eng. Co., for Oscar Trilsch Co., owner, filed November 12, 1925, an appeal from orders of the fire commissioner, affecting premises No. 17 East 10th Street, Whitestone, Borough of Queens; and

WHEREAS, the orders of the Fire Commissioner, dated September 26, 1925, read (Order No. 85772-LF):

"3. Provide a fireproof vault with a self-closing fireproof door to same for the storage of cotton on first story. LL281."

(Order No. 85775-F:)

"1. Provide a separate and distinct system of Automatic Sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919."

and

WHEREAS, the building is of brick and frame construction 2½ stories and basement in height, 40 feet by 96 feet, shaped in area; OCCUPIED for the manufacture of jewelry boxes; basement—10 persons; first story—30 persons; second story—25 persons; attic—storage; and

WHEREAS, the appellant claims that: these premises are located outside the fire limits; that: the present business has been conducted since 1902; that: there is about 100 pounds of cotton padding kept on the premises; that: there are two fire hydrants within 200 feet in front of premises.

*Resolved*, that the orders of the fire commissioner be and they hereby are *modified*, and the appeal as to Order No. 85772, Item 3, be and it hereby is *granted on condition* that at no time shall more than 300 lbs. of cotton be kept on the premises, stored or maintained in an approved, self-closing, metal receptacle; as to Order No. 85775, Item 1, *granted on condition* that all portable fire extinguishers, water pails and bucket tanks, as required by the fire commissioner, shall be distributed and maintained throughout the building; that not more than four tons of tight-packed cardboard shall be maintained on the premises, located in the basement; and that the building shall be not increased in height or area.

# MINUTES

4-26-A.  
APPELLANT—J. J. Gloster, for 1480 Shakespeare Avenue Corp., owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—1501-1505 Shakespeare avenue, The Bronx.

APPEARANCES—

For Appellant: William F. Doyle.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle ..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(104-26-A)

WHEREAS, J. J. Gloster for 1480 Shakespeare Avenue Corp., owner, filed February 4, 1926, an appeal from a decision of the superintendent of buildings, affecting premises No. 1501-1505 Shakespeare avenue, Borough of The Bronx; and

WHEREAS, the decision of the superintendent of buildings, dated January 15, 1926, reads (N. B.—1790-1925):

"Your letter of January 12th, 1926, received, requesting a temporary certificate of occupancy for the garages erected at No. 1501-1505 Shakespeare Avenue, west side, 250 feet north of 172nd Street, Bronx.

"While I am of the opinion that the occupancy of these buildings as private garages accessory to the adjoining apartment houses would be an advantage to the neighborhood and constitute only a technical violation of the Building Zone Resolution, as the premises are located within a residence district as established by the Building Zone Resolution, I am without authority to grant your request and I would suggest that you appeal to the Board of Standards and Appeals from my decision in denying your application for a certificate of occupancy."

WHEREAS, the building is non-fireproof, one story in height, 83 feet by 23 feet in area, subdivided into two sections by an 8-inch brick wall and OCCUPIED as a four-car five-car garage; and

WHEREAS, the appellant contends that the garages are accessory to the apartment house Nos. 1491 and 1511 Shakespeare avenue and that the front of the premises is a wholly lawn and is to be used in the future as a playground.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted* for a temporary period of one year from date of this action, pending the erection of four two-family houses on front of this plot, for the use and accommodation of the owners or occupants of such houses when completed or the occupants of the tenement house to the north in the interim, both properties in the same ownership, on condition that the automobiles stored therein shall be of the pleasure-car type; that the garage shall be limited to two structures, the capacity of either shall not exceed (5) automobiles and shall not be over one story in height; that the rear and gable walls shall be unpierced throughout the entire height and length; that no gasoline storage equipment shall be maintained; that no signs of nature or description shall be exposed or displayed; that this temporary permit is specifically *granted* for not more than one year unless work on the private residences at the front of the plot shall actually be in the course of construction within same period.

26-A.  
APPELLANT—Charles F. Schoenherr and Henry Schoenherr, owners.

SUBJECT—Appeal from orders of the fire commissioner.

PREMISES AFFECTED—35 Suydam street, Brooklyn.

APPEARANCES—

For Appellant: Henry Schoenherr.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners  
Connell, Holland, and Guilfoyle ..... 4  
Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(266-26-A)

WHEREAS, Charles F. Schoenherr and Henry Schoenherr, owners, filed March 29, 1926, an appeal from the order of the fire commissioner affecting premises 35 Suydam street, Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 9, 1926, reads (Order No. 2538-LC):

"1. Remove all fuel oil from the premises until permit has been issued by the Fire Commissioner as per Rule 16 of the Fuel Oil Rules.

"2. File plans showing the complete installation of the fuel oil burning equipment, as per Rule 16 of the Fuel Oil Rules.

"3. Provide fuel oil burner or burners of a type approved by the Board of Standards and Appeals, as per Rule 12 of the Fuel Oil Rules.

"4. Provide fuel oil pump or pumps of a type approved by the Board of Standards and Appeals, as per Rule 11, Sec. a of the Fuel Oil Rules."

and

WHEREAS, the building is of a frame construction, 2 stories in height, 25 feet by 64 feet in area; OCCUPIED: two-family dwelling; and

WHEREAS, the appellant has installed a fuel oil burning system in the cellar for heating purposes, consisting of a 1,000 gallon outside storage tank, buried 7 feet from the building, connected with all necessary piping to the boiler in cellar, using an electrol burner with fuel oil having a flash point of 135 degrees Fahrenheit; and

WHEREAS, the appellant has filed drawings showing a 1,000 gallon tank, 49½ inches in diameter, ¼ inch shell, 5/16 inch convexed heads, 45 degree welded and lapped joints; the appellant contends that: the electrol burner and pump are safe, meet with all requirements, and approved by the National Board of Fire Underwriters.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

277-26-A.

APPELLANT—Samuel Rosenblum, for L. Brooks, Inc., owner.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland, and Guilfoyle ..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(277-26-A)

WHEREAS, Samuel Rosenblum for L. Brooks, Inc., owner.

# MINUTES

filed April 3, 1926, an appeal from an order of the fire commissioner, affecting premises Woodward avenue, 165 feet west of Flushing Avenue, Maspeth, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated January 16, 1924, reads (Order No. 52472-F):

"1. Provide 1 yard hydrant with hose equipment to reach all parts of yard. Sec. 776, Greater New York Charter.";

and

WHEREAS, the premises consist of a large plot of ground, 300 feet by 200 feet, containing a one story frame office and mill-room, 30 feet by 38 feet, also frame sheds; OCCUPIED: collectively as a lumber yard—5 persons; and

WHEREAS, the appellant claims that since the fire department order No. 52472-F was issued, the city authorities have installed a fire hydrant directly in front of the premises; also four water casks, each of 50 gallons capacity and fire pails have been distributed throughout the premises.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the dimensions and location of lumber piles as indicated on plans filed in this case shall not be increased; cross-over aisles and driveways, none of which shall be less than 15 ft. in width, shall be maintained; that the height of lumber piles shall in no case exceed 15 ft.; that not less than 25—40-gallon water casks, with 6 buckets to each cask, painted red and marked "FIRE" shall be provided and distributed throughout aisles as required by the fire commissioner.

THE RESOLUTION:

(286-26-A)

WHEREAS, J. L. Hernon, for Midcity Realty Corp., owner, filed April 5, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 226-8 Wooster street and Nos. 215-7 Greene street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 17, 1926, reads (Order No. 92345-F):

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 feet from any opening in any other building and not in the same plane with said openings and which are not more than 50 feet above a neighboring roof at north and south sides of building, or other approved protection, as per Sec. 375, Art. 18, Ch. 5 of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, 6 stories in height, 50 feet by 200 feet in area; OCCUPIED: as a tenant factory; 2nd story, hat blocks and dies—20 persons; 3rd story, office and storage—8 persons; 4th story, files and binders, 40 persons; 5th story, electric light fixtures, 33 persons; 6th story, men's clothing—28 persons; and

WHEREAS, the appellant claims that: all windows are equipped with iron and rolling shutters except 24 windows on the north wall and 4 on the south wall; furthermore

the appellant contends that: the windows causing the exposures are equipped with iron shutters; that: the building in question is equipped with a sprinkler system having a line of sprinkler heads within 58 inches of the windows in question.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as it affects openings not on course of stairhalls or shafts *on condition* and that all other openings (not technically complying with the law) shall be provided with sprinkler head protection within two feet of the glass

## THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Absent .....	0

## THE RESOLUTION:

(373-26-A)

WHEREAS, Bernard Herzbrun for Starnic Realty Corporation, owner, filed April 28, 1926, an appeal from a decision of the fire commissioner, affecting premises Nos. 229-239 Knickerbocker avenue, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated February 27, 1926, reads (N. B. 218-A-26):

"1. Provide a 250 gallon per minute fire pump with 25 horse power electric motor, etc., suctioning from a 5,000 gallon tank, all according to Rule No. 38, Board of Standards and Appeals rules.

"2. Provide a gravity tank of at least 3,500 gallon fire reserve, bottom tank to be 20 feet above the roof."

WHEREAS, the building, facing on two street fronts, is fireproof, one story (29 feet) in height, 100 feet by 100 feet in area. OCCUPIED: as a motion picture theatre—auditorium seating 1,013 persons and the roof garden—persons; there being, also, 5 stores on the Knickerbocker avenue front of the premises; and

WHEREAS, appellant contends that the building faces on two streets; that the existing standpipe system (the highest outlet being 34 feet above grade) is supplied by a direct vertical connection to the 20 inch city main in Knickerbocker avenue—that the main is fed two ways and has a hydrostatic pressure of 45 pounds and contends that a hydrostatic pressure test was made on the highest outlet at the westerly end—said test showing, thereat, a constant pressure of 41 pounds on the gauge.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

## THE RESOLUTION:

(1175-25-A)

WHEREAS, Croker Nat'l Fire Prev. Eng. Co. for City Corrugated Paper Products Co., owner, filed November 12, 1925, an appeal from an order of the fire commissioner, affecting premises Nos. 622-640 West 57th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 25, 1925, reads (Order No. 30398-LC):

"Referring to your application, dated May 11, 1925, for a permit to maintain a storage garage at the foregoing address, I regret to inform you that your application for such a permit is disapproved for the following reasons:

"1. Building in part is used for the storage of paper and manufacture of paper boxes. Sec. 151-c, Chapter 10, Code of Ordinances."

and

WHEREAS, the building is fireproof, 4 stories (61 feet 9 inches) in height, 251 feet 6 inches by 145 feet 10 inches (36,400 square feet) in area. OCCUPIED: 1st story, manufacture of paper boxes and a 5 car garage—30 persons; 2nd story, automobile service station—15 persons; 3rd story, automobile storage; 4th story, automobile repairing—10 persons; and

WHEREAS, the appellant claims the building is fireproof, provided with an approved sprinkler system and also a standpipe system; that the five automobiles are stored in a one story fireproof wing of the building; the appellant proposes to either brick up all openings between the one story garage and the main building or provide fireproof self-closing doors to said openings.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

168-26-A.

APPELLANT—Wm. F. Doyle, substituted for Cohen and Siegel, for Westin Realty Corp., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—Southwest corner of Perry avenue and East 204th street, The Bronx.

APPEARANCES—

For Appellant: William F. Doyle.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Negative: Chief Kenlon .....	1
Absent .....	0

## THE RESOLUTION:

(168-26-A)

WHEREAS, William F. Doyle, substituted for Cohen & Siegel, for Westin Realty Corp., owner, filed February 26, 1926, an appeal from a decision of the fire commissioner, affecting premises southwest corner of Perry avenue and 204th street, The Bronx; and

WHEREAS, the decision of the fire commissioner, re N. B. App. 2760-1925, dated February 25, 1926, reads:

"1. Provide an approved electric 25 H.P. fire pump of 250 gallons per minute capacity, suctioning from a 5,000 gallon tank, all according to Rule No. 38, Board of Standards and Appeals."

and

WHEREAS, the building is fireproof, one story (33 ft.) in height, having a frontage of 125 ft. 0 in. on East 204th street and 100 ft. on Perry avenue; OCCUPIED: On the East 204th street front by eight stores and the remainder of the premises as a motion picture theatre; the auditorium seating 922 persons; and, the roof garden seating 896 persons; and

WHEREAS, appellant proposes to equip the building with a standard standpipe system supplied from a 3,500 gallon gravity tank, located 20 ft. above the main roof; tank to be fed by street pressure from the city main in East 204th street; and contends that said city main has a pressure of 55 lbs. and is fed two ways.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted only so far as it affects the requirements of suction tank and fire pump on condition that the standpipe equipment shall comply with the regulations in all other respects; and that this modification is granted only on condition that the occupancy and use of auditorium and roof garden shall not be operated at the one time.

Absent ..... 0

THE RESOLUTION:

(267-25-A)

WHEREAS, Fox and Weller for The Hanover Fire Insurance Company, owner, filed, March 9, 1925, an appeal from an order of the fire commissioner affecting premises 34-38 Pine street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 27, 1925, reads (Order No. 71072-F):

"1. PROVIDE approved fireproof windows, with metal or kalameined frames, glazed with wired glass for all openings in the exterior wall above the 1st story, which are distant in a direct line less than 30 feet from any opening in any other building and not in the same plane with said openings and which are not more than 50 feet above a neighboring roof at East and North sides of building, or other approved protection as per Section 375, Article 18, Chapter 5, of the Code of Ordinances."

and

WHEREAS, the building is fireproof, 14 stories in height, 68 feet, 1 inch, by 63 feet, 6 inches, in area at the 1st story; OCCUPIED: as an office building; about 30 persons on each story; and

WHEREAS, the appellant claims there are 68 windows on the north side of the building and 32 windows on the east side which are affected; that most of the windows are ¼ inch plate glass in hollow metal frames; he further contends that no hazard would be incurred if the order were reversed; and

WHEREAS, this appeal was denied by the board December 8, 1925; and reopened June 22, 1926, for the purpose of amendment; and

WHEREAS, the appellant has filed revised plans showing in detail the existing conditions.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as it affects windows on Pine street front and easterly gable wall.

Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(258-23-A)

WHEREAS, Leonard Padula, lessee, filed, February 23,

1923, an appeal, with the board of appeals, from an order of the fire commissioner, affecting premises 307 Morris avenue, The Bronx; and

WHEREAS, the order of the fire commissioner, dated February 8, 1923, reads:

"You are therefore ordered to

"1. Reduce the stock of paper and rags to one ton;"

and

WHEREAS, the premises consist of a plot of ground on which is located a one-story frame structure, 58 ft. 9 in. by 37 ft. 8 in. in area; OCCUPIED for the storage of rags and papers; and a building 31 ft. by 65 ft. in area; OCCUPIED as baling room and stock room, located in an unrestricted district; and

WHEREAS, the appeal on this order was modified by the board at the meeting held on April 17, 1923, by granting an extension of time for such use until May 1, 1924, and reopened by vote of the board on April 21, 1925, and July 6, 1926; and

WHEREAS, appellant proposes to reduce the quantity of stored rags and paper from the quantity permitted in the original appeal (five tons of rags and five tons of paper) to 2½ tons of rags and 2½ tons of paper and, in view of having covered all exposed woodwork on the premises with galvanized iron, requests a permit for a further period; and

WHEREAS, that appeal was granted by the board of appeals at its meeting May 12, 1925, "for a temporary period not to extend beyond June 1, 1926, on condition that not more than 2½ tons of paper and 2½ tons of rags shall be maintained on the premises; and that the interior of the structure shall be lined with galvanized iron."

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, in accordance with resolution adopted May 12, 1925, on same conditions and on the *further condition* that the use and occupancy of rag and paper storage shall be discontinued on or before December 31, 1926.

THE RESOLUTION:

(322-26-BZ)

WHEREAS, Philip J. Sinnott, for Ruland Holding Corp., owner, filed, April 15, 1926, an application, under the building zone resolution, to permit in business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises S. E. corner 233rd street and Broadway, Borough of Bronx;

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 6, 1926, A. M., after due notice by publication in the Bulletin of the Board of Standards and Appeals;

WHEREAS, the use district maps accompanying the building zone resolution show that West 233rd street is business; Broadway is business and Albany Crescent is residence;

WHEREAS, the decision of the superintendent of buildings, N. B. 2908-1925 rendered December 9, 1925, reads:

"Erection of proposed garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution."

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 268 ft.

11¾ in. and a depth of 150 ft. 6⅛ in., to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief on the ground of practical difficulties and unnecessary hardship;

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the garage use shall be set back from the Broadway line not less than 100 ft. easterly from the corner formed by the intersection of 233rd street and Broadway; that a structure of conforming business use shall be erected on the Broadway front in conjunction with the erection of this proposed garage; that the garage building shall be constructed fireproof and shall not exceed a height of one story above the fixed sidewalk grade; that there shall be no openings in the rear and westerly gable walls; that there shall be no roof signs erected and that the front elevation shall be finished in face brick, with architectural terra cotta or stone trimmings; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from date of this action.

THE RESOLUTION:  
(360-26-BZ)

WHEREAS, John J. Dunnigan, for N. E. 168th St. Corp., owner, filed, April 23, 1926, an application, under the building zone resolution, to permit the extension from an unrestricted district into a business district of a proposed garage for the storage of more than five motor vehicles; premises 31-2841 Bailey avenue, The Bronx; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, July 6, 1926, A. M., after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that N. Y. C. Railroad right-of-way is unrestricted; Bailey avenue is business and Heath avenue is residence; and

WHEREAS, the decision of the superintendent of buildings, N. B. 939-1926, rendered April 22, 1926, reads:

"1. Erection of proposed garage for more than five motor vehicles in business district extending into unrestricted district is contrary to provisions of Building Zone Resolution."

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 128.43 ft. and a depth of 170.02 and 187.93 ft. to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7-c of the building zone resolution and that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the building shall not exceed in height one story above grade; that the gable walls shall be unpierced throughout their entire height and length; that there shall be no advertising signs erected or displayed other than one projecting electric sign on the front of the building indicating the name and location of the garage; that the front elevation shall be finished face brick with architectural terra cotta or stone trimmings; that no portable gasoline tanks shall be maintained or operated outside of the building line; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within fourteen months from the date of this action.

THE RESOLUTION:  
(290-26-BZ)

WHEREAS, James W. Byrnes, for David Zuckerman, owner, filed, April 5, 1926, an application, under the building zone resolution, to permit in a business district the

erection and maintenance of a gasoline service station; premises 109 Blake avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 6, 1926, A. M., after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Blake avenue is business; Saratoga avenue is residence and Douglass street is residence; and

WHEREAS, the decisions of the fire commissioner, rendered October 2, 1925 (re Alt. 1118-1925); and of the superintendent of buildings, rendered June 4, 1926 (re Applic. 9464-1926), read as follows:

"(Alt. 1118-1925)

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Appeals."

"(Applic. 9464-1926)

"The extension of an expired permit for the installation of Gasoline Service Station in a business district is denied."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 30 ft. and a depth of 100 ft. to be occupied as a gasoline service station; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the decisions of the fire commissioner and of the superintendent of buildings be and they hereby are affirmed and that the application be and it hereby is denied.

THE RESOLUTION:

(334-26-BZ)

WHEREAS, John J. Dunnigan for East Fordham Road Syndicate, Inc., owner, filed, April 16, 1926 an application, under the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of an automobile sales room and service station; premises 690-698 East Fordham road, 2491-2509 Crotona avenue and 2500-2502 Cambrelling avenue, Borough of Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 6, 1926, A. M., after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

# MINUTES

WHEREAS, the use district maps accompanying the building zone resolution show that Crotona avenue is residence; East Fordham road is business and East 189th street is business; and

WHEREAS, the decision of the superintendent of buildings, re N. B. 781-1926 rendered April 9, 1926, reads:

"1. Erection of proposed building to be occupied for business purposes in business district extending into residence district is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, 3 stories in height, with a frontage of 103.45 ft. and a depth of 330.68 ft., irregular, to be occupied as an automobile sales room and service station; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the structure be limited to three stories in height above grade; that no gasoline storage equipment shall be maintained or installed on the premises other than portable tanks not exceeding 50-gallon capacity; that the use, conduct and operation of the property shall be restricted to automobile manufacturer's sales and distributing agency; that no part of the structure shall be rented or hired for live storage garage use; that there shall be no advertising signs or display on the front of the building other than the name and title of the business; that there shall be no roof signs erected or maintained on these premises; that the design of the front elevation shall be substantially in accordance with the photograph filed at the hearing and the facades on the street fronts shall be finished in architectural terra cotta, natural stone, enamel or face brick; that there shall be no door opening on Cambrelling avenue other than an emergency exit not exceeding 3 ft. 8 in. in width; that the requirements of the building zone resolution shall be complied with in all other respects; that all required permits shall be obtained within nine months and the building completed within eighteen months from the date of this action.

28-26-BZ.

APPLICANT—Harry Hurwit, for Mano Realty Corp., owner.

THE RESOLUTION:

(28-26-BZ)

WHEREAS, Harry Hurwit for Mano Realty Corp., owner, filed, January 11, 1926, an application, under the building zone resolution, to permit in business district, the alteration and change of occupancy of a stable for more than five horses to a garage for the storage of more than five motor vehicles: PREMISES: 1311 Amsterdam avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application

by the board of standards and appeals, at its regular meeting, July 6, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Amsterdam avenue is in a business district; and that LaSalle street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 8, 1926, reads:

"1. Proposed conversion to a garage for more than 5 cars is unlawful; since more than 50% structural alterations are to be made. Sec. 6 of Zone Resolution Building may not be enlarged. Sec. 6 of Zone Resolution."

and

WHEREAS, the existing building is of non-fireproof construction, five stories in height, with a frontage of 50 ft. 6 in. and a depth of 100 ft. to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7-e of the building zone resolution and that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the building shall be reconstructed fireproof; that the exterior walls, front, rear and gable shall not be extended in any direction; that the height of the building shall not be increased; that the gable walls shall be unpierced throughout their entire height and length; that there shall be no roof signs; that all required permits shall be obtained within nine months and the building completed in eighteen months from the date of this action.

Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(192-26-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for Express Realty Corp., owner, filed, March 6, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, relating premises No. 131 West 24th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 1, 1925, reads (Order No. 87546-LD):

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"SEE NOTE.

"Among the defects noted on this fire escape are the following: Single wire glass panes in fireproof windows opening on course of fire escape exceeds 720 square inches in area. No steps to sills of openings. No safe passageway to the street from the termination. No openings 2 ft. by 6 ft. provided to balconies.

"2. Enclose the interior stairway at east side of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to 3 feet

above the roof, constructed as per Section 271 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.";

and

WHEREAS, the building is non-fireproof, 7 stories in height, 25 ft. by 111 ft. 6 in. in area at 1st story and 25 ft. by 104 ft. in area above. OCCUPIED: 1st story, vacant; 2nd story, bookbinding, 20 persons; 3rd story, printing, 8 persons; 4th story, pleating, 2 persons; 5th story, vacant; 6th story, printing, 6 persons; 7th story, cloak manufacture, 20 persons. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in non-fireproof partitions with wooden doors at openings; a fire escape on the rear of the building, having fireproof windows along the course thereof, extending from the roof to the 2nd story balcony, with EGRESS from the termination of the fire escape at 2nd story by means of a bridge connecting with the 2nd story balcony on rear of building directly at north. ROOFS of adjoining buildings: Same level; and

WHEREAS, the petitioner proposes as to item 1, to reduce the lights of glass less than 720 square inches and provide steps to the sills at openings; as to item 2, to fire retard the stair enclosure on the loft side in accordance with the rules of the board and provide fireproof self-closing doors at all openings; the petitioner further contends that the rear fire escape as it stands was accepted by the board of review in acting on order No. 76525-LD, in 1918, which covered the same item.

Resolved, that the board of standard and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects egress from termination of lowest balcony, on condition, that an iron bridge shall be erected, connecting to the balcony fire escape of the premises directly to the rear; that the skylight of the 1st story extension shall be glazed with wire glass; that iron steps shall be provided from floor level to the balcony level of the fire escape on each floor; that no single panel of glass in the windows on course of fire escape shall exceed 720 sq. in.; that the written consent of the owner of the premises to the rear for egress from the lowest termination shall be filed with the fire commissioner; as to Item 2 granted on condition that the interior stairs shall be enclosed in fire-resisting partitions, constructed in accordance with the rules of the board of standards and appeals; that the occupancy of the building shall not exceed the legal capacity of the interior stairs so enclosed; and that the building in all other respects shall comply with the requirements of the labor law.

WHEREAS, Croker Nat'l Fire Prev. Eng. Co., for Oscar Trilsch Co., owner, filed November 12, 1925, a petition for

# MINUTES

a variation from the requirements of the labor law as cited in order of the fire commissioner, affecting premises 17 East 10th street, Whitestone, Borough of Queens; and,

WHEREAS, the order of the fire commissioner, dated September 26, 1925, reads:

"Order No. 85767-LD:—

"1. Remove the substandard fire escape on the north side of the building or reconstruct same, as per Sec. 274 of the Labor Law. \* \* \*

"Among the defects noted are the following:

"(1) Windows and doors on course not fireproof self-closing.

"2. Enclose the interior stairway at the center of the building with partitions of fire-resisting material extending from 1st story to the underside of the 3rd story, including any exposed stair soffits, landings, passageways, openings shall be provided with approved self-closing doors as per Rule 2, Board of Standards and Appeals. \* \* \*

"Note: If an approved wet sprinkler system is installed it will not be necessary to comply with this order as per Rule 1, \* \* \*";

and,

WHEREAS, the building is of brick and frame construction, 2½ stories (27 ft. 0 in.) in height, 40 ft. by 96 ft., "L" shaped in area; OCCUPIED for the manufacture of jewelry boxes; basement, 10 persons; 1st story, 30 persons; 2nd story, 25 persons; attic—storage; EXITS: An interior wooden stairway, extending from the 1st story to top story, enclosed in wooden partitions with wooden doors at openings, a sub-standard fire-escape on the east side of the building, having non-fireproof openings along the course thereof, extending from 2nd story to the yard level, with EGRESS from the termination of the fire-escape by means of open yard to street; no adjoining building; and,

WHEREAS, the petitioner claims that there is no fire-escape on the north side of the building; the petitioner proposes to provide fireproof openings on the course of fire-escapes at southeast corner of building; furthermore, the petitioner contends that the present occupancy has existed since 1902; that the exits are adequate and that the occupancy is not a hazardous one.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to Item 2 only so far as it affects the attic story, on condition that same shall be maintained unoccupied; denied as to Item 1.

THE RESOLUTION:

(1115-25-S)

WHEREAS, Croker Nat'l Fire Prev. Eng. Co., for Gilman Paper Co., Inc., owner, filed October 29, 1925, a petition

from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 396-400 South 2nd street, Borough of Brooklyn; and,

WHEREAS, the order of the fire commissioner No. 83462, dated August 5, 1926, reads:

"1. Provide egress to the street from the stairway at the east side of building by means of a passageway enclosed in fire retarding material. \* \* \*

"2. Provide approved, self-closing fire doors at openings leading to stairway east side of building on all stories, opening outwardly so as not to obstruct the stairway. \* \* \*

"3. Arrange the fire-escape on the west side of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of Labor Law. \* \* \*

"Among the defects noted are the following:

"1. No fireproof passageway from termination to street;

"2. No stairway, top story to roof;

"3. Windows on course not fireproof, self-closing."

and,

WHEREAS, the order of the fire commissioner No. 83464, dated August 5, 1926, reads:

"1. Provide a second means of egress from the boiler room.

"2. Remove automatic sliding doors on north and south sides of stairway enclosure on east side of building on all stories."

and,

WHEREAS, the building is non-fireproof, five stories in height, "L" shape, having a frontage of 75 ft., a depth of 120 ft. and a width of 36 ft. 6 in. across the rear; there being also a one-story boiler room, 38 ft. 6 in. by 75 ft. in area at the westerly rear of the premises; subdivide into three sections on the 1st story and into two sections above, by brick walls; with openings therein protected by automatic fire doors; OCCUPIED as a paper box factory—1st story, 5 persons; 2nd story, 15 persons; 3rd story, 20 persons; 4th story, 10 persons, 5th story, 15 persons; EQUIPPED with a fire alarm signal system; EXITS: a interior wooden stairway, extending from the 1st story to top story with ladder leading to scuttle in roof, enclosed in fireproof partitions with fireproof doors at openings; two fire escapes—one on the front of the building, having fireproof openings along the course thereof, extending from the top story balcony to the 2nd story balcony, with counter-balanced stair to street; and also a fire-escape on the westerly rear side of the building, having unprotected openings on the course thereof, extending from the top story balcony (with goose-neck to roof) to the 2nd story balcony with a sliding drop ladder to adjoining yard; ROOFS: adjoining buildings: to east—3 ft. higher; to west—15 ft. lower; and

WHEREAS, petitioner contends that fire drills are regularly conducted and that the building is covered by National District watchman's time service, and in re Order No. 83462-LD, Item 1, contends that egress from the stairway may be had by means of the 10 ft. open driveway to street and also through the open floor area to north street; in re Item 2, contends that on all stories above the 1st story there are in addition to the automatic fire doors at the openings now installed tight-fitting wooden doors opening outwardly; in re Item 3, requests in view of the other exits the acceptance of this fire-escape; in re Item of Order No. 83464-LD, proposes to cut a door in the north wall of the boiler room.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the use and occupancy shall be discontinued at the building vacated on or before October 31st, 1926; and that the requirements of Cal. No. 227-17-S shall be maintained in the meantime.

THE RESOLUTION:

(1119-25-S)

WHEREAS, Croker Nat'l Fire Prev. Eng. Co. for Jacob Davidson, owner, filed October 29, 1925, a petition for variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 56 Myrtle avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 17, 1925, reads:

(Order No. 83835-LD)

"1. Extend the interior stairway at the east side of building to the roof, as per Section 271 of the Labor Law.

"2. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law. See Note.

"Note:—Among the defects noted are the following: No counter-balanced stairway from lowest balcony to ground. No fireproof passageway from termination to street."

WHEREAS, the building is non-fireproof. 4 stories, 42 ft. in height, 22 ft. 6 in. by 77 ft. in area at 1st story, 22 ft. 6 in. by 66 ft. in area above. OCCUPIED: 1st story, store; 2nd story, vacant at present (to be used for light manufacturing); 3rd story, manufacturer, 8 persons.

EXITS: An interior wooden stairway, extending from the 1st story to top story (with iron ladder to scuttle roof); enclosed in wood board metal covered partitions; fireproof doors at openings; a fire escape on the rear of building, having (proposed) fire-proof openings along course thereof, extending from the main roof to the roof of the 1st story extension; with EGRESS from the building by means of the adjoining building's roof extension roofs. ROOFS of adjoining buildings same level; and

WHEREAS, petitioner proposes to limit the occupancy of premises to the capacity of the interior stairs and in view of this occupancy requests the acceptance of the existing means of exit.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted

Item 1 on condition that a fixed, 45-degree iron stair be provided in the stairhall enclosure on top story to lead to roof; as to Item 2 granted only so far as it is egress from the termination of balcony at the 2nd story on condition that an unobstructed passage shall be maintained on the 1st story extension to the east and to south, with egress therefrom through three plain glass doors; and that the occupancy shall not exceed 25 persons above the 1st story.

THE RESOLUTION:

(97-26-S)

WHEREAS, Abraham Farber for Annie Sheen, owner, filed, February 2, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 11 and 13 Thatford avenue, Borough of Brooklyn, and

WHEREAS, the order of the fire commissioner, dated March 31, 1925, reads (Order No. 74941-LD):

"1. Provide an interior stairway at least 44" in width from first to second story, preferably located at the south side of building, to serve as required means of exit, as per Rule 3 of the Board of Standards and Appeals, adopted July 29th, 1924.

"2. Provide an outside iron balcony fire escape at the front of building at northerly end, to comply to section 273, Labor Law, except that exit door shall be a fire door with substantial steps to sills, properly secured; where the step is more than 8 in. above floor level. Where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof, as per Rule 3 of the Board of Standards and Appeals, adopted July 29th, 1924."

and

WHEREAS, the building, situated at the rear of the lot, is frame, 2 stories in height, 27 ft. 6 in. by 37 ft. in area. OCCUPIED: 1st story, embroidery manufacturer, 6 persons; 2nd story, clothing manufacturer, 18 persons. EXITS: Two exterior iron stairs, covered with corrugated iron, leading from 2nd story to yard; also, a gooseneck ladder, leading from the 2nd story balcony of the north stairway to the roof. ROOFS of adjoining buildings: No adjoining buildings; and

WHEREAS, petitioner contends that the building is small in area, and that the existing means of egress are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to Item 1 on condition that an exterior 45-degree iron stairs, enclosed in corrugated iron, shall be provided at the northerly side of the building, with egress from the termination direct to the street through a four-foot passageway, unencumbered and open to sky; as to Item 2, granted on condition that an exterior 45-degree iron stairway, not less than 44 inches in width, enclosed in corrugated iron, shall be provided at the westerly front of rear building, with egress from the termination by means of open, unencumbered passageway not less than 4 ft. in width, direct to street; and granted only so long as conditions as to occupancy and use otherwise remain unchanged.

105-26-S.

PETITIONER—Anthony P. Allocca, for Gennaro Gragnano, owner.

SUBJECT—Variation of the labor law as cited in decision of the board of health.

PREMISES AFFECTED—437 Metropolitan avenue, Brooklyn.

APPEARANCES—

For Petitioner: Anthony P. Allocca.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(105-26-S)

WHEREAS, Anthony P. Allocca for Gennaro Gragnano, owner, filed, February 4, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the board of health, affecting premises No. 435 Metropolitan avenue, Borough of Brooklyn; and

WHEREAS, the decision of the board of health, dated February 3, 1926, reads:

"At a meeting of the Board of Health of the Department of Health of The City of New York, held July 21st, 1925, your application for a permit for a sanitary certificate for a cellar bakery at 435 Metropolitan Avenue, in the Borough of Brooklyn, was denied."

and

WHEREAS, the building is non-fireproof, 3 stories and cellar in height, 20 ft. by 40 ft. in area. OCCUPIED: Cellar, bakery; 1st story, store; upper stories, dwellings. The height of the cellar bakery being 8 ft. 3 in.; the ceiling being 3½ inches above the curb level and the floor being 7 ft. 8 in. below the rear yard. The means of ventilation being three windows, the front window being 1 ft. 8 in. by 3 ft. 5 in. in area and the 2 rear windows being each 2 ft. 5½ in. by 2 ft. 8 in. in area; and

WHEREAS, petitioner contends that in 1905 permission was granted by the bureau of buildings for the construction of a cellar bakery in the rear of the premises in question; that in March, 1920, said oven was demolished and a new one constructed (under permit from bureau of buildings) under the sidewalk; that the former owner had no knowledge of the laws of 1914, in re requirements for permit from board of health and continued the use of the cellar bakery until November, 1925. Petitioner requests the use of the premises as a cellar bakery.

Resolved, that the decision of the department of health be and it hereby is affirmed, and the petition be and it hereby is denied.

220-26-S.

PETITIONER—Emery Roth, for Burnside Improvement Co., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

APPEARANCES—

For Petitioner: Julian Roth.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(220-26-S)

WHEREAS, Emery Roth, for Burnside Improvement Co., owner, filed, March 15, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 309-313 West 36th street and Nos. 306-308 West 37th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated February 23, 1926, reads:

"1. Windows should conform to Section 264 Labor Law and 503 of Industrial Code. No pane exceed 720 square inches."

and

WHEREAS, the building, facing on two street fronts fireproof, 18 stories in height, 77 ft., 2 in. by 197 ft., 6 in. area. OCCUPIED: 1st story, stores; upper stories, offices, show rooms and tenant factories, 145 persons story. EQUIPPED with a sprinkler system and a alarm signal system. EXITS: Three interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings and

WHEREAS, there are openings on the 1st and 2nd story in both street walls of the building, glazed with ¼ in. plate glass; the maximum area of the glass on the 1st story being 13 ft. 4 in. by 8 ft. 0 in. and on the 2nd story, 5 ft. 0 in. by 7 ft. 0 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law, as to the area of the glass, would destroy the intended use of the lowest two stories would, also, affect the architectural appearance of premises.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects the windows on the street front the first, mezzanine and second stories, on condition the openings be equipped with approved metal frames sashes, glazed with ¼ in. polished plate glass and that requirements of the labor law shall be complied with all other respects.

THE RESOLUTION:

(229-26-S)

WHEREAS, Joseph J. Furman, for Tiljay Realty Co., owner, filed, March 18, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 36 West 26th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 27, 1926, reads (Order No. 91790-LD):

"1. Provide an additional required means of egress from the cellar and the 1st story. Said exit to be located at the south side of the building in accordance with the provisions of Section 271 of the Labor Law.

"2. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 ft. throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an

# MINUTES

area having communication with the street, as per Section 273 of the Labor Law. SEE NOTE.”;

WHEREAS, the building is non-fireproof, 5 stories in height, 18 ft. 6 in. by 91 ft. in area in the first story and 18 ft. 6 in. by 65 ft. in area above. OCCUPIED: cement, carpenter shop, 3 persons; 1st story, restaurant, 15 persons; upper stories, factory, 25 persons per story. The means of egress consist of an interior wooden stairway extending from the 1st story to roof, enclosed in wood and lath and plaster partitions with fireproof, self-closing doors at openings. A 45-degree fire escape on the rear of the building with fireproof windows along the course thereof and egress from the termination by a balcony connecting to the fire escape on 34 West 26th street and thence by stair to the yard of 39 West 25th street; and

WHEREAS, petitioner contends that after September 30, 1926, the cellar will be vacated and used for storage purposes only and contends that the means of egress are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to item 1, on condition, that the cross partition be demolished removed on or before October 1st, 1926; in the meantime that an opening shall be provided with 3 ft. door frame, maintained opened and unlocked, and that an iron fire escape shall be erected from the yard level to the existing 1st story balcony; and granted as to item 2 only so far as it affects the egress from the termination of the fire escape, on condition, that an iron balcony bridge shall be provided from the lowest termination, connecting with exterior screened stairs of premises to the rear of 34 West 25th street buildings; and granted as to occupancy, on condition, that the interior stairs shall be properly enclosed in fire-resisting partitions, and that the legal occupancy shall not exceed the legal capacity of stairs so closed.

THE RESOLUTION:

(237-26-S)

WHEREAS, Croker National Fire Prevention Eng. Co., Robert S. Dennison Co., Inc., owner, filed, March 20, 1926, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises 209 Pearl street, Manhattan; and WHEREAS, the order of the fire commissioner, dated July 23, 1925, reads (Order No. 78229-LD):

“1. Enclose the interior stairway at southeast side of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire-resisting material extending continuously from the lowest point of the stairway to and including the bulkhead on the roof constructed as per Section 271 of the Labor Law

and Rule 1 of the Board of Standards and Appeals revised and adopted July 29th, 1924, or carry out a proper alternative method of complying with Section 271 of the Labor Law.

“2. Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law, Section 271. Among the defects noted on this fire escape are the following:

“(a) Windows on course not self-closing.

“(b) Needs painting.

“(c) No stairway from lowest balcony to ground.

“(d) No safe passageway to the street from the termination.”;

and

WHEREAS, the building is non-fireproof, 5 stories in height, 21 ft. 10 in. by 123 ft. 7¾ in. in area at 1st story and 21 ft. 10 in. by 100 ft. in area above. OCCUPIED by job printers; 1st story, 11 persons; 2nd story, 6 persons; 3rd story, 4 persons; 4th story, 12 persons; 5th story, 15 persons; EQUIPPED with a fire alarm signal system; EXITS: An interior wooden stairway, extending from the 1st story to top story, enclosed in wooden partitions with wooden doors at openings, an open iron stairway from top story to roof bulkhead, a standard fire escape in the front of the building, a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from roof to the 3rd story and stairs leading to roof of 1st story extension, with EGRESS from the termination of the fire escape by means of adjoining roof of 1st story extension at north and on the same level; ROOFS of adjoining buildings: Same level; and

WHEREAS, the petitioner proposed as to Item 1: to cover the loft side of existing stair enclosure with plaster board and metal; as to Item 2: to paint the rear fire escapes and make the windows on the course thereof self-closing; furthermore the petitioner contends the exits are adequate; that: egress may be had from the adjoining 1st story extension roof at north by means of plain glass windows in adjoining building or to another adjoining 1st story extension roof at north.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it here is granted as to item 1, on condition; that a standard labor law exterior fire escape shall be provided and maintained on the front of the building; and granted as to item 2, only so far as it affects the egress from the termination of the fire escape, and so long as existing and adjoining extension roofs remain approximately on the same grade, on condition that the use and occupancy otherwise remain exactly as indicated in petition.

## \* CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday afternoon, June 8, 1926, as they appeared in Bulletin No. 24, Vol. XI, are hereby corrected to read as follows:

### THE RESOLUTION:

(988-25-S)

WHEREAS, William F. Doyle, for 385 Madison Avenue, Inc., owner, filed, September 25, 1925, a petition for variation from the requirements of the labor law, as cited in the orders of the fire commissioner and in the decision of the superintendent of buildings, affecting premises No. 385 Madison avenue, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated July 18, 1925, read:

(Order No. 83017-LF)

"An inspection of premises 385 Madison Avenue, Borough of Manhattan, shows that the following must be done to comply with Section 279 of the Labor Law:

"No. 1. Install an adequate interior electric fire alarm system in accordance with the rules of the Board of Standards and Appeals and the enclosed approved layout."

(Order No. 83018-LF)

"An inspection of the premises 385 Madison Avenue, Borough of Manhattan, shows that a fire drill should be established and maintained therein according to the requirements of Sec. 279 of the Labor Law. The labor law specifically charges the Fire Commissioner with the duty of enforcing the provisions of the law, as to fire drills."

and

WHEREAS, the decision of the superintendent of buildings,

\*Correction:—Words "a two source automatic" omitted on line 49, and word "wet" substituted, and words "a fire alarm signal system" omitted in line 50 of resolution.

rendered March 29, 1926, in acting on request for certificate of occupancy, reads:

"1. All windows in exterior walls must be fireproof and self-closing and must not exceed 720 sq. in. of light.

"2. Doors along interior and fire tower stairway must be entirely fireproof. Glass not permitted.

"3. All partitions throughout the building must be built of incombustible material.

"4. Remove gate which obstructs egress from main stairway at first floor into main hall.

"5. All partitions enclosing stair halls must be of 1 in. terra cotta or 8 in. brick.

"6. All steel beams must have two inches of fireproofing."

and

WHEREAS, the building is fireproof, 12 stories and pent house in height, 215 ft. by 100 ft. 4 in. in area, OCCUPIED: 1st story, stores; upper stories, offices and show rooms (mostly millinery) with a 25 per cent factory occupancy on the 4th, 6th and 8th stories, approximately 100 persons above the 1st story; pent house occupied for office EQUIPPED with wet sprinkler system. EXITS: Two exterior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with metal-covered wooden doors at openings; and

WHEREAS, petitioner contends that there is installed in the west stairway of the premises an interior fire alarm system, extending from the sub-basement to roof, with stations on each story; the fire alarm system connects directly to a central station, which in turn transmits alarm to headquarters; and contends further that the two story automatic sprinkler system covers all of the premises excepting a portion of the pent house; and

WHEREAS, this petition was granted by the board at meeting May 11, 1926, on certain conditions, and it appears that an error was made as to the story mentioned, which should have been the 6th story instead of 7th.

# MINUTES

solved, that the board of standards and appeals does  
y make a variation from the requirements of the la-  
aw, and that the petition be and it hereby is granted,  
so far as it affects an area of 3,000 sq. ft. on the 6th  
of building for occupancy use of light industrial  
ework incidental to the conduct of millinery model

wholesale agency, and that the certificate of occupancy of  
the superintendent of buildings now in force shall be com-  
plied with in all other respects; as to orders of the fire  
commissioner, Nos. 83017 and 83018, the petition be and  
it hereby is granted on condition that the stipulations of the  
certificate of occupancy now in force shall be maintained.

### BOARD OF STANDARDS AND APPEALS.

#### Appliances Submitted for Approval.

21-S—Angle Hose Valve, approval of.  
21-S—Ford Fire Line Reducing Valve, approval of.  
22-S—Quinn Acme Crude Oil Burner, approval of.  
22-S—The Surface-Combustion Company Low Pres-  
sure Gas and Oil Burner, approval of.  
2-S—Howard Water Pressure Reducing Devices, ap-  
proval of.  
2-S—Crocker Gas Valve, approval of.  
2-S—Kennell Gas Cut-Off Valve, approval of.  
2-S—Burnwell Mechanical Burner, approval of.  
2-S—Dean Fuel Oil Pump, approval of.  
2-S—Combustion Fuel Oil Burner, approval of.  
2-S—Anti-Syphon Valve, approval of.  
2-S—Thermostats for Automatic Fire Alarm Systems,  
approval of.  
2-S—Coen Oil Burner, approval of.  
2-S—Rodriguez Oil Burner, approval of.  
2-S—Dempsey High & Low Pressure Fuel Oil Burner,  
approval of.  
2-S—Delaney Fuel Oil Burner, approval of.  
3-SA—Collin Patent Automatic Gas Cut-Off Valve,  
approval of.  
3-SA—Master Gas Shut-Off Valve, approval of.  
3-SA—Packless Gas Shut-Off Valve, approval of.  
3-SA—S. & K. Gas Shut-Off Valve, approval of.  
3-SA—Manual and Thermal Gas Cut-Off Valve, ap-  
proval of.  
3-SA—Wm. E. Toelle Manual & Automatic Gas  
Shut-Off Valve, approval of.  
3-SA—Heil Standard 200 Gal. Truck Tank, approval  
of.  
3-SA—"Automatic" Deluge Valve, approval of.  
3-SA—Cornell Falat Oil Burner, approval of.  
3-SA—"Billow" Class G. R. Oil Burner, approval of.  
3-SA—"Billow" Class C. R. F. Oil Burner, approval  
of.  
3-SA—Cornell No. 1 Type "A" Oil Burner, ap-  
proval of.  
3-SA—Automatic Gas Shut-Off, approval of.  
3-SA—Tilman-White Gas Cut-Off Valve, approval  
of.  
3-SA—Domestic Fuel Oil Burner, approval of.  
3-SA—Lewis Oil Burner, approval of.  
3-SA—Enco Type 700 Steam Atomizing Burner, ap-  
proval of.  
3-SA—Automatic Gas Cut-Off, approval of (Brook-  
lyn Co.).  
3-SA—Hydro Carbon Oil Burner, approval of.

960-23-SA—Crescent Combustion Fuel Oil Burner, ap-  
proval of.  
1046-23-SA—Frankfort Type "P" Low Pressure Oil Burner,  
approval of.  
1050-23-SA—Marsh Fuel Oil Burner and Pump, approval  
of.  
1146-23-SA—Pennsylvania Globe Rotary Oil Burner, ap-  
proval of.  
1176-23-SA—Ziegler Oil Burner, approval of.  
1246-23-SA—Ludlow Gas Cut-Off Valve, approval of.  
1339-23-SA—National Light Service Oil Pump, approval of.  
1346-23-SA—Heatiator Oil Burner, approval of.  
1358-23-SA—Worthington Oil Burner, approval of.  
1364-23-SA—Staples & Pfeiffer Oil Burner, approval of.  
1415-23-SA—Enco Mechanical Atomizing Fuel Oil Burner,  
approval of.  
1429-23-SA—Kerrihard Oil Burner, approval of.  
1444-23-SA—Tate-Jones No. 6 Oil Burner, approval of.  
1484-23-SA—Universal G. P. O. Burner, approval of.  
1493-23-SA—Newport Rotary Oil Burner, approval of.  
1538-23-SA—Lillibridge Oil Vapor Burner, approval of.  
1550-23-SA—Apex Gas Cut-Off Valve, approval of.  
254-24-SA—Sherman Oil Burner, approval of.  
269-24-SA—Universe Oil Burner, approval of.  
365-24-SA—Koaless Oil Burner, approval of.  
379-24-SA—Sure Heat Automatic Oil Burner, approval of.  
492-24-SA—Holtzer-Cabot Type "C" Fire Alarm Box,  
approval of.  
501-24-SA—Hagan Swivel Type Burner for Fuel Oil, ap-  
proval of.  
536-24-SA—Climax Oil Burner, approval of.  
634-24-SA—Marvel Oil Burner, approval of.  
702-24-SA—Simplex Mechanical Oil Burner, approval of.  
755-24-SA—Wills Automatic Gas Shut-Off Valve, ap-  
proval of.  
803-24-SA—Holmes-Williams Domestic Oil Burner, ap-  
proval of.  
826-24-SA—Heymsfield Low Pressure Burner, approval of.

*Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department action and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.*

## RULES

### SMOKING IN FACTORIES.

Adopted by the Board of Standards and Appeals,  
 August 13, 1918.

#### RULE 1. PERMIT.

(a) **Prohibition.** No person shall smoke, or carry a lighted cigar or cigarette in any factory as defined in Article 1, Section 2, of the State Labor Law, nor in any portion of a factory, within the City of New York, except in such protected portions or special classes of occupancies as are specified in Rule 2 of these rules, and then only after the issuance of a permit by the fire commissioner.

It shall be the joint and several duty of the owner and of the lessee or lessees of the building containing such factory or factories to cause to be posted in each and every entrance hall, stairhall or room throughout the building, as well as in every elevator-car, in English, and also in such other language or languages as the fire commissioner shall direct, a notice of such prohibition, and the penalty for its violation.

(b) **Application.** Application for such permit shall be made only by the owner of the building on suitable blank forms to be furnished by the fire commissioner.

(c) **Time Limit.** Such permit shall be for a definite period, not exceeding one year, and shall not be renewed upon expiration until a reinspection of the premises for which it is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

(d) **Conditions.** The permit shall state the conditions under which, the hours between which, and the place or places in such factory where smoking may be permitted, and this permit shall be framed and kept posted in a conspicuous place in the factory.

(e) **Revocation.** Violation of any of the conditions specified in the permit, in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the fire commissioner, and he shall not again issue a permit for the same premises until at least one year has elapsed.

#### RULE 2. PERMISSIBLE CASES.

Smoking may be permitted in:—

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof fire-resisting partitions, with all openings there protected by self-closing fire doors, and, further, unless the building is of fireproof construction or equipped with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire-retarding material.

(3) Such chemical fire extinguishers as the fire commissioner may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

Blacksmithing or horseshoeing;  
 Boiler making;  
 Brick, terra cotta or artificial stone works;  
 Forge shops;  
 Foundries;

# RULES

Iron, steel, brass or copper works;  
Machine shops;  
Smelting;  
Stone or monumental works;

vided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the fire commissioner may direct are installed;  
waste materials are deposited in fireproof receptacles.

(3) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

# RULES

## FIRE ESCAPE RULES

ADOPTED JULY 2, 1918; CAL. NO. 1218-18-S; AMENDED DEC. 12, 1918; CAL. NO. 1708-18-S; AMENDED MAY 9, 1924; CAL. NO. 414-24-SR.

**Rule 1.** In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, more than five stories in height and not exceeding nine stories in height, nor in any case more than 90 ft. from curb level to top floor level, one of the required means of exit or escape under Section 271-1 of the Labor Law may consist of an outside fire escape, provided that:

(1) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, labor law, and in addition thereto:

(a) The balconies and stairs shall be protected on the outside by substantial railings to a height of at least 4 ft. 6 in., measured from floor of balcony or center of stair tread, constructed of bars at least one-half ( $\frac{1}{2}$ ) inch in diameter, spaced not more than six (6) inches on centers, or of substantial grill work, or of screening not less than No. 10 U. S. gauge wire with not more than one and one-half ( $1\frac{1}{2}$ ) in. mesh, all rigidly braced;

(2) When there is safe egress from the roof of the building to any adjoining structure, the fire escape stairway shall continue to the roof, and if there be no safe means of egress, a gooseneck ladder shall be provided from the top story balcony to the roof.

(3) Any such fire escape erected prior to October 1, 1913, shall conform in every respect with the requirements of paragraph (a) of this rule, except that balconies may be not less than 3 feet in width; the connecting stairs not less than 20 inches in width, and placed at an angle not exceeding 60 degrees if the building is not over six stories in height, otherwise at an angle of 45 degrees; fire windows leading to balconies may be at window sill level if the steps not less than sixteen (16) inches wide are provided on the inside from floor level, leading thereto.

(4) Any such fire escape erected subsequent to October 1, 1913, and prior to these rules taking effect, unless previously accepted as one of the required means of exit or escape by the administrative official having jurisdiction, shall conform in every respect to paragraph (a) of this rule.

**Rule 2.** A fire escape shall not hereafter be accepted as constituting one of the required means of exit or escape under Section 271-1 of the Labor Law, in any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

cupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

**Rule 3.** When in addition to the required exits from any factory or factory building, there exist other means of egress which are not entirely in accordance with the requirements of the Labor Law and the Rules of the Board of Standards and Appeals, such means of egress may be retained under the following conditions:

(a) Fire Escapes.—All substandard fire escapes on factory buildings shall be removed or reconstructed in accordance with Section 274 of the Labor Law, except that in lieu of a counterbalanced stair a drop ladder in guides from the lowest balcony to ground may be provided. Substandard fire escapes shall not be considered as a basis for increased occupancy of the building. When such substandard fire escapes are located in any court or on the side or rear of a building, proper egress to a point of safety shall be provided, either to open adjoining yards, or the lowest balcony may be connected to an adjoining fire escape, exterior stairway, or to roof of adjoining extension, or other egress satisfactory to the Fire Commissioner. All such fire escapes shall be maintained structurally safe and properly painted.

(b) Interior Stairways.—All interior stairways not conforming to the requirements of the Labor Law or rules of the Board of Standards and Appeals may be retained, provided that egress to same is maintained unobstructed, halls are properly lighted, and all landings, passageways, etc., are maintained free and unobstructed. An easily operated panic bolt or other similar device may be installed at street exit door.

(c) Exterior Screened Stairways.—Exterior screened stairways not serving as a required means of egress shall be either removed or maintained structurally safe and properly painted, exits thereto and all platforms and passageways thereof shall be maintained unobstructed, and egress from termination shall be provided for sub-standard fire escapes in subdivision a.

(d) Horizontal Bridges.—Horizontal bridges and part-wall balconies between buildings shall be removed or maintained structurally safe and properly painted, and access thereto and all passageways thereof shall be maintained unobstructed.

(e) No sign of any character shall be placed at openings leading to these sub-standard exits.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea failure to receive such notice is no excuse for neglect appear.

*Fifth*, That the business of the board is to dispose all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or any other method of delay.

gress Report.

#### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR.

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, July 20, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, July 27, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

Absent

THE RESOLUTION:

(211-26-A)

WHEREAS, Wm. I. Hohausser, Inc., for Schmidt Realty Associates, Inc., owner, filed, March 12, 1926, an appeal from a decision of the fire commissioner affecting premises affected—57-73 Lincoln road, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered February 19, 1926, reads

# MINUTES

"1. Standpipe equipment is required in buildings over 35 feet in height or exceeding 10,000 square feet in area. Plans for such system must be filed and approved.";

WHEREAS, the building is non-fireproof, 6 stories (62 ft. in height, 158 ft. 6 in. by 92 ft. 6 in., about 11,900 sq. ft. in area; OCCUPIED as a tenement house, stores on 1st story; and

WHEREAS, the appellant has submitted plans and applied to the fire commissioner for the installation of a fuel oil burning system, which were disapproved; and

WHEREAS, the appellant claims that the application to install a fuel oil system was disapproved on the ground that the building is not provided with standpipes; further, that the area of the building is divided into areas less than 2,400 sq. ft. by 12 in. and 8 in. brick walls fireproof doors in all openings; also that the first floor between the cellar and first story is fireproof through-

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that each story shall be subdivided into areas not exceeding 2,500 sq. ft. by walls of approved fireproof construction, each section to be provided with all as required by the tenement house law and the building code, and that the building shall be not increased in height or area.

RESOLUTION:

(268-26-A)

WHEREAS, William Porter of Cornell Utilities Company, for Latham Litho and Printing Company, owner, filed, on 29, 1926, an appeal from a decision of the fire commissioner affecting premises at the southwest corner of Woodside and Barnett avenues, Woodside, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, rendered on 25, 1926, reads:

"1. The use of Grade B Fuel Oil is not permitted in commercial plants and residences of more than two families unless the room in which equipment is used is cut off from rest of building by fireproof partitions, ceilings and floors. Such rooms must also have direct entrance from street only and be adequately vented to the outer air.";

WHEREAS, the building is non-fireproof, one story in height, 195 ft. by 110 ft. in area; OCCUPIED as a print-establishment—125 persons; and

WHEREAS, the appellant has installed a fuel oil burning system consisting of a 1,065-gallon outside storage tank and three (3) feet below grade, with all necessary piping connected to a Nokol Automatic Oil Burner, using grade fuel oil; and

WHEREAS, the appellant contends that the building is practically fireproof; that the boiler room is cut off from the rest of the building by approved fireproof construction, with an opening into the air conditioning room which is provided with a self-closing fireproof door—this room in turn opens directly to the outside; there is also a stairway leading from the boiler room to the first story which is necessary in the conduct of the business.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the fuel oil burning installation shall comply with the rules for grade B equipment, and on the *further condition* that an areaway of not less than 2 ft. 6 in. in depth and 4 ft. in width shall be constructed, provided with iron gratings at grade level, with a window opening to the cellar therefrom, and that an engineer's ladder shall be provided in the existing sidewalk hatchway from cellar.

APPELLANT—William F. Regan, for H. Horwitz & Son, lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—102-106 Wooster street, Manhattan.

APPEARANCES—

For Appellant: Jacob Horwitz.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(273-26-A)

WHEREAS, William F. Regan, for H. Horwitz & Son, lessee, filed, April 1, 1926, an appeal from an order of the fire commissioner affecting premises 102-106 Wooster street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 17, 1926, No. 33065-LC, reads:

"1. Reduce quantity of loose combustible fibre to five tons or less. Sections 24-6, Chapter 12, Code of Ordinances.

"2. Separate the portion of the premises wherein combustible fibre is stored from the remainder of the building by walls, floors and ceilings, protected by fire retarding material and with all floor openings similarly protected and constructed as prescribed by rules and regulations of Board of Standards and Appeals. (See Vol. 2, No. 36, Page 620, Bulletin of Board of Standards and Appeals, September 6th, 1917, and Vol. 2, No. 45, Page 795, November 8, 1917.)";

and

WHEREAS, the building is non-fireproof, 5 stories (90 ft.) in height, 75 ft. by 100 ft. in area; OCCUPIED as a tenant factory—1st story, rags and cotton goods, 4 persons; 2nd story, electrical fixtures and suit cases, 8 persons; 3rd story, printing and suit cases, 6 persons; 4th story, toys and hair goods, 8 persons; 5th story, dolls, 10 persons; and

WHEREAS, the appellant contends that the present occupancy has existed since November of 1925; that the part of the first story used to store loose fibre is small, the ceiling is metal covered and not more than 10 tons of loose wool clippings is stored; that the building is provided with a sprinkler system.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

## THE RESOLUTION:

(299-26-A)

WHEREAS, Tompkins Brothers, owners, filed, April 7, 1926, an appeal from an order of the fire commissioner affecting premises 180-2-4-6-8-10 93rd avenue, Jamaica, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated March 22, 1926, Order No. 2722-LC, reads:

"1. Separate boiler from remainder of building by unpierced wall of solid masonry at least 8 inches in thickness. Entrance to boiler room to be from exterior of building only. Sec. 159-1, Ch. 10, C. of O.

"2. Install a standpipe 4 in. in diameter tested to withstand a pressure of 300 lbs. per square inch. Plans and specifications to be filed with and approved by the fire department before work of installing standpipe is commenced.";

and

WHEREAS, the building is non-fireproof, 2 stories in height, 124 ft. 10 in. by 136 ft. 5 in., about 17,000 sq. ft. in area; OCCUPIED for the storage of mason's materials—6 persons; and

WHEREAS, the appellant contends that the building is of brick and heavy mill construction; that the boiler room is practically separate from rest of building; inasmuch as it is in a sunken pit enclosed in concrete and 4-in. hollow tile partitions; furthermore, there is a fire hydrant directly across the street in front of the premises.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 2 of Order No. 2722-LC, on condition that the building shall be not increased in height or area and only so long as the present occupancy (storage of mason's materials and supplies), use and operation remain unchanged; and *denied* as to Item 1 of Order No. 2722-LC.

Connell, Holland and Guilfoyle and Deputy

Chief Martin ..... 5

Negative ..... 0

Absent ..... 0

## THE RESOLUTION:

(301-26-A)

WHEREAS, Croker National Fire Prev. Eng. Company for Otto Goetz, owner, filed, April 7, 1926, an appeal from an order of the fire commissioner affecting premises 260-270 Ten Eyck street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated May 19, 1925, No. 76870-F, reads:

"1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½-inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure.";

and

WHEREAS, the building is of frame construction, brick filled, 2 stories in height, 131 ft. 2 in. by 100 ft. (about 12,650 sq. ft.) in area; OCCUPIED for the storage of china and glassware, 7 persons in the entire building; and

WHEREAS, the appellant claims that the building has had the same occupancy during the past thirty years; that there is no heating apparatus of any kind in the building; that the premises is divided into three sections—A, B and C—section A contains 3,300 sq. ft. in area; B and C together contain 9,350 sq. ft. in area; the appellant proposes to provide fireproof self-closing doors in all openings between sections A and B (one opening on the 1st story and two on the 2nd story); there will then be no area in excess of 10,000 sq. ft. furthermore, the appellant contends that the building is open on three sides and a city fire hydrant is directly opposite to these premises on Ten Eyck street.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the floor area of the building, now subdivided, shall be not increased, and that all partitions separating such floor area shall be brick fill with openings to be equipped with self-closing fireproof door; and that the building shall remain in single occupancy and use and shall be not increased in height or area.

THE RESOLUTION:

(324-26-A)

WHEREAS, M. Margolin, for M. C. K. Contracting Co., filed, April 16, 1926, an appeal from an order of the fire commissioner affecting premises 1254-56 Union street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 22, 1926, reads (Order No. 2720-LC):

"6. Install standpipe 4 inches in diameter tested to withstand a pressure of 300 lbs. per sq. in. Plans and specifications in duplicate must be filed with and approved by this Department before the above work may be commenced. Sec. 581, Ch. 5, C. of O.";

WHEREAS, the building is non-fireproof, 4 stories (45 ft. in height, 145 ft. by 115 ft. 9½ in., about 10,275 sq. ft. in area; OCCUPIED as a tenement house containing 10 apartments; the area of the building is divided into even sections which are separated by 12-inch brick walls and union partitions; and

WHEREAS, the appellant claims the building is divided into sections, each section is less than 2,000 sq. ft. in area; the 12-inch brick wall and union partitions provide partial barriers against the spread of fire.

*Resolved*, that the order of the fire commissioner be and it be *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height or area, and that the floor areas shall be protected by approved fireproof construction as required by building code and the tenement house law.

THE RESOLUTION:

(1176-25-A)

WHEREAS, Croker National Fire Prev. Eng. Co. for Jos. Rubin & Sons, owners, filed, November 12, 1925, an appeal from orders of the fire commissioner affecting premises 35-43 Meserole avenue, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated July 16, 1925, read:

(Order No. 81311-F)

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at east side of building, or other approved protection as per Section 375, Chapter 5, Article 18, Code of Ordinances."

(Order No. 81312)

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½-inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½-inch standard hose attached thereto."

(Order No. 82793-LF)

"1. Provide fireproof receptacles with covers for the storage of waste paper. LL 281.

"2. Provide a fireproof vault with a self-closing fireproof door to same, for the storage of baled waste paper. LL281.";

and

WHEREAS, the building is non-fireproof, 4 stories (50 ft.) in height, 268 ft. by 100 ft., irregular, in plan, about 24,750 sq. ft. in area; OCCUPIED for the manufacture of paper boxes; 1st story, 8 persons; 2nd story, 40 persons; 3rd story, 25 persons; 4th story, 25 persons; and

WHEREAS, the appellant contends as to order No. 82793-LF, items 1 and 2, that there is no waste paper stored in these premises, the waste paper is baled as fast as it accumulates; as to order No. 81311-F, that there are four windows on each story at east side affected by the order; the only exposure is a small one-story building at east; that the building is equipped with a sprinkler system connected with the street main, and a 20,000-gallon gravity tank; furthermore, the windows affected by the order are now protected with sprinkler heads; as to order No. 81312-F, that the building is divided into three areas, A B and C, about 8,900 sq. ft., 7,154 sq. ft., 8,700 sq. ft. in area, also 4 stories, 1 story and 2 stories in height, respectively; the appellant proposes to protect all openings between the three areas with fireproof self-closing doors, there being two unprotected openings between areas A and B; there is one opening between B and C, which is now provided with a fireproof door.

*Resolved*, that the orders of the fire commissioner be and they hereby are *modified*, and the appeal be and it hereby is *denied* as to order No. 81311, item 1; *granted*, as to order No. 81312, item 1, *on condition* that the premises shall be equipped throughout with an approved sprinkler system, that the building shall be not increased in height or area, and that the horizontal openings shall be protected with fireproof self-closing doors; *denied* as to order No. 82793, item 1; and *granted*, as to item 2, *on condition* that the baled paper on the premises shall not exceed 6 bales at any one time and shall be removed daily.

THE RESOLUTION:

(1207-25-A)

WHEREAS, Croker National Fire Prev. Eng. Company for Nachman Korostoff, owner, filed November 20, 1925, an appeal from an order of the fire commissioner affecting premises 166 North 5th street, Borough of Brooklyn; and

WHEREAS, the order of fire commissioner, dated August 27, 1925, No. 83642-F, reads:

"1. Install an automatic dry pipe sprinkler system in cellar and on 1st story, used for the storage and manufacture of paper boxes, having at least one source of water supply, arranged and equipped as provided in the Rules for Fire Extinguishing Appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919.";

and

WHEREAS, the building is non-fireproof, 1 story in height, 74 ft. by 78 ft. 6 in. in area; OCCUPIED, paper box manufacture; a portion of the building at the front having a cellar, 8 ft. 6 in. in height and 30 ft. in depth, with fireproof ceiling; and

WHEREAS, appellant contends that there is no manufacturing or storage of paper boxes in the cellar, which is used for the heating system only; that the easterly and southerly walls of the building are unpierced; that there is no waste kept in the building over night, and that the greater part of the stock consists of cardboard in tight stacks; that there are ten fire pails distributed throughout the premises, and he proposes to install five 40-gallon safety bucket tanks.

*Resolved*, that the order of the fire commissioner be and hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height or area; that the heating apparatus, located in the cellar, shall be enclosed with walls of fireproof construction, and that not less than five 40-gallon water casks, provided with not less than 6 pails to each cask, painted red and marked "Fire", shall be distributed throughout the premises, and that all necessary metal receptacles required by the fire department, shall be provided and distributed throughout the premises; so long as conditions as to occupancy and use remain unchanged.

THE RESOLUTION:

(1295-25-A)

WHEREAS, Croker National Fire Prev. Eng. Company for De La Vergne Machine Company, owner, filed, December 15, 1925, an appeal from an order of the fire commissioner affecting premises 910 East 138th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated November 11, 1925, No. 31636-LC, reads:

"You are hereby notified that an inspection of premises 910 East 138th street, Bronx, used for the storage and use of calcium carbide, shows that the following must be done before permit requested by you can be issued:

"4. Place acetylene generating apparatus in a water proof compartment having the floor, walls and roof of brick or reinforced concrete. The size of such compartment shall not exceed that required to allow the free operation of the apparatus. Secs. 212-3, Chapter 10, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, one story and mezzanine in height, 112 ft. by 125 ft. in area, with a small cupola, 12 ft. by 12 ft. 6 in., projecting above the roof; OCCUPIED: 1st story, pipe shop, 12 persons; mezzanine, pipe-fitting storage and dress presses, 3 persons; cupola, acetylene generator; and

WHEREAS, appellant contends that the floor of the cupola is of concrete, 8 in. thick, and the walls and roof of corrugated iron on steel frame work; that the capacity of the generator is 300 lbs. of carbide and that there is no storage of carbide in the generator room—the carbide being stored in an open lot 500 ft. distant, under a shed.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that not more than one acetylene generating apparatus shall be maintained, located in the cupola of the structure, which is independently supported from the main structure, the floor of this enclosure to be of reinforced concrete; that the walls of existing corrugated enclosure shall be lined with 4 in. terra cotta blocks.

## RESOLUTION:

(1241-25-BZ)

WHEREAS, Philip J. Sinnott, for David Serota, owner, rendered December 3, 1925, an application, under the building zone resolution, to permit under section 21, in a business district the installation and maintenance of a gasoline selling station; premises east side of Utica avenue, 265 ft. 5 in. south of Farragut road, Borough of Brooklyn; and WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kings Highway is in a business district; and that Farragut road is an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 3, 1925, reads:

"Proposed gasoline station to be located in a business district is contrary to Art. II, Sec. 4 (a) of the Zone Resolution.";

and

WHEREAS, it is proposed to install a small office building, a driveway and necessary buried gasoline tank, pumps, etc., for a gasoline selling station; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 on the ground of practical difficulties and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that all permits required shall be obtained within six months and the work entailed thereby shall be finished within one year from the date of this action, and that any gasoline storage equipment installed shall be restricted within the property lines of the premises under appeal.

## THE RESOLUTION:

(395-26-BZ)

WHEREAS, William F. Doyle, for Max Brickner and Herman Zucker, owners, filed, May 6, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station, premises northwest corner of Cooper avenue and Fresh Pond road, Glendale, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fresh Pond road (Kossuth place) is in a business and residence district; Cooper avenue is in a business and residence district; and Lotus avenue is in a business and residence district; and

WHEREAS, the decision of the fire commissioner, rendered May 5, 1926, Application 985-1926, reads:

"1. A gasoline service station may not be permitted in a business district. Appeals may be taken to the Board of Appeals.";

and

WHEREAS, it is proposed to bury six 550-gallon gasoline storage tanks and erect six pumps in addition to a one-

# MINUTES

story office building in about the center of the premises for gasoline service station; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that all permits required shall be obtained within six months and the work completed within one year from the date of this action, and that no tank storage shall be located outside of the building line of these properties.

Connell, Holland and Guilfoyle and Deputy Chief Martin ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(201-26-BZ)

WHEREAS, John Messerschmitt, for Owl Sales Service Co., Inc., owner, filed, March 9, 1926, an application, under the building zone resolution, to permit in a residence district the extension of a garage for the storage of more than five motor vehicles, premises 290-292 Eighth avenue, Astoria, L. I., Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Eighth avenue is in a residence district; Broadway is in a business district; and Ninth avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings rendered February 19, 1926, Alt. 409-1926:

"The extension of a public garage in a residence district is contrary to Article 2, Sec. 3, Zone Law."; and

WHEREAS, the existing building is one story in height, with a frontage of 25 ft. and a depth of 90 ft; it is proposed to extend the building, the extension to be one story, 25 ft. by 90 ft. in area; entire premises to be occupied as a garage for more than five motor vehicles; and

WHEREAS, applicant filed 83 per cent of consents in support of his basis of appeal under section 7-g of the building zone resolution and the board deemed there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the proposed extension to the existing garage shall be confined to a lot 25 ft. frontage by a depth of not exceeding 90 ft. and shall not exceed a height of one story above sidewalk grade, that the roof shall be of flat design and

construction and the ceiling fireretarded in accordance with the rules of the board of standards and appeals; that the northerly gable and rear walls shall be unpierced throughout their entire height and length; that the front wall shall be finished with face brick and shall be of the same design, material and texture as the existing building adjoining to the south; that there shall be no vehicular entrance on the front of the proposed extension; that the exits to and from this garage shall be through the existing one story garage structure to the south; that there shall be no additional gasoline storage equipment installed in this extension; that there shall be no advertising of any nature or description on this building; that all permits required shall be obtained within nine months and the building completed within eighteen months from the date of this action.

## THE RESOLUTION:

(274-26-BZ)

WHEREAS, John deHart, for Ida M. Hewitt, owner, filed, April 1, 1926, an application, under the building zone resolution, to permit in a business district the alteration and extension of a garage for the storage of more than five motor vehicles; premises 3349-3351 East Tremont avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East Tremont avenue is in both a business and residence district; that Haskin avenue is in a residence district, and that Baisley avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 29, 1926, reads:

"1. Extension of garage for storage of more than five motor vehicles in business district extending into a residence district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 51.88 ft. and a depth of 77.71; it is proposed to extend the building, extension to be one story, 59 ft. by 152 ft. 8 in., irregular; entire premises to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the applicant has supported his basis of appeal under section 7-e of the building zone resolution and has filed 97 per cent of consents of affected property owners within the area commonly designated for obtaining consents, and the board deemed that the carrying out of the strict letter of the law would entail practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the building shall not exceed a one-story structure in height above grade; that the gable walls shall be unpierced throughout their entire height and length; an emergency exit should be provided in the rear wall not exceeding a width of 3 ft. 8 in.; that the front elevation shall be finished in face brick with architectural terra cotta or stone trimmings; that there shall be no advertising display on the building, other than a flat wall sign; that all permits required shall be obtained within nine months and the building completed within eighteen months from the date of this action.

Connell, Holland and Guilfoyle and Deputy

Chief Martin ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(644-25-BZ)

WHEREAS, H. I. Feldman, for Max Ackerman, owner, filed, June 22, 1925, an application, under the building zone resolution, to permit in a business district, extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 301-305 East 97th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 24, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 97th street is in a business and unrestricted district; that Second avenue is in a business district, and that East 98th street is in a business and unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 18, 1925, reads:

"The location of a garage for the use of more than five cars in a business district is contrary to section 4 of the Building Zone Resolution.";

and

WHEREAS, the proposed building is non-fireproof construction, two stories in height, with a frontage of 75 ft. 8½ in. and a depth of 100 ft. 11 in.; to be occupied as

a garage for the storage of more than five motor vehicles; and

WHEREAS, applicant supported his basis of appeal under section 7-c of the building zone resolution, and the board deemed it would be an unnecessary hardship in this circumstance to deprive applicant of the use of his entire premises; and

WHEREAS, this application was granted by the board at its meeting, November 24, 1925, on certain conditions and applicant requested a modification of these conditions to rear yard line and proposes to omit the basement.

Resolved, that the board of standards and appeals do hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building be limited in height to two stories above grade; that the rear and gable walls shall be unpierced throughout their entire height and length; that a rear yard of not less than 10 ft. in depth for full width of premises be provided at the level of 23 ft. above curb; that a skylight be provided with louvre wall ventilator over 1st story rear, glazed with wire glass, protected with wire guards above; that any skylight installed in the main roof shall be glazed with plain glass, protected with wire guards above and below; that there shall be no vehicular entrance within the business area of the premises; that the front elevation shall be finished with face brick and architectural terra cotta or stone trimmings; that no roof sign shall be erected or maintained; that any signs erected shall be confined to within the unrestricted use area of the building; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

## AREA FIXED

(415-26-BZ)

The chairman presented and read a communication from Bernard Barnett, requesting the board to fix the area deemed affected and within which to obtain consents for the maintenance of a garage for three pleasure cars; premises 963 Putnam avenue, Brooklyn.

The following area was approved by the board:

Both sides of Putnam avenue, from a point 100 ft. east of Ralph avenue to a point 100 ft. west of Howard avenue.

Adjourned 1:30 p. m.

## THE RESOLUTION:

(243-26-A)

WHEREAS, The Kalbfleisch Corporation, for Bensonhurst Company, owner, filed, March 22, 1926, an order of the fire commissioner, affecting premises Nos. 82-96 White street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated February 18, 1926, reads (Order No. 90100-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch in buildings numbered 1, 2, 3, 4, 5 and 6, extending from cellar to roof, with necessary check valves and 2½-inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½-inch standard hose attached thereto."

WHEREAS, the premises consist of six frame buildings connected by doorways, one and two stories in height, 200 by 218 ft. over all, about 37,900 sq. ft. in area at 1st story, and 17,270 sq. ft. on 2nd story; OCCUPIED for purpose of manufacturing acids; and

WHEREAS, the appellant files plans showing seven fire hydrants on the streets surrounding the premises, two yard hydrants, two 2½-inch standpipes and one 2-in. standpipe with 50 ft. of hose at each connection, also 300 ft. of 2½-in. hose on a wheel carrier; the appellant further contends that the premises are provided with adequate fire protection;

WHEREAS, the business has been in existence for thirty years and there is but one and one-half years to go on existing lease.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height, area or dimension; that the use and occupancy throughout the premises shall be restricted to the ground story level and any use on the mezzanine story shall be discontinued forthwith, and that the existing auxiliary standpipe equipment shall be maintained in good work-order; and *granted* for temporary period not extending beyond May 1, 1928, *on condition* that the premises be vacated and the present use discontinued on or before date.

26-A.  
APPELLANT—Ballard Oil Equipment Co., for Drayton Realty Corporation, owner.

SUBJECT—Appeal from order of the fire commissioner. PREMISES AFFECTED—2873 Bainbridge avenue, The Bronx.

APPEARANCES—  
For Appellant: David Kaufman.  
For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—  
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(164-26-A)

WHEREAS, David Kaufman, for Drayton Realty Corp., owner, filed February 26, 1926, an appeal from an order of the fire commissioner, affecting premises No. 2873 Bainbridge avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated April 13, 1926, reads (Order No. 33582-LC):

"4. Provide fuel oil pump or pumps of a type approved by Board of Standards and Appeals, as per Rule 11, Sec. a of the fuel oil rules."

and

WHEREAS, the building is frame, 2 stories and attic in height, 42 ft. by 56 ft. in area; OCCUPIED as a dwelling; and

WHEREAS, a fuel oil burning system has been installed consisting of a 1,100-gallon fuel oil storage tank, buried outside the premises, a Ballard Super Domestic Oil Burner, using grade "B" fuel oil, a Teesdale Automatic Booster Pump and the necessary valves and piping to make a complete installation; and

WHEREAS, appellant requests a temporary permit, pending the approval, of the pump, by the board.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the fuel oil burning equipment throughout is installed and maintained in accordance with the fuel oil rules of the board of standards and appeals, and that the suction line shall be provided with check valve and such other devices as required by the rules, and on *further condition* that the operation of plant shall be restricted to domestic fuel oil equipment with grade B fuel oil.

214-25-A.

APPELLANT—A. Spencer Feld, for Rose Shapanka, owner.

SUBJECT—Appeal from order of fire commissioner (previously dismissed).

PREMISES AFFECTED—307 East 170th street, The Bronx.

APPEARANCES—

For Appellant: A. Spencer Feld.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—  
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle ..... 4

THE RESOLUTION:

(217-25-A)

WHEREAS, A. Spencer Feld, for Nathan Kozlow, owner, February 24, 1925, an appeal from an order of the fire commissioner affecting premises 317 East 170th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated December 1, 1924, No. 26255-LC, reads:

"1. Discontinue the maintenance of a garage on these premises."

WHEREAS, the building is non-fireproof, three stories and in height, 25 ft. by 70 ft. in area. OCCUPIED: first story, store; second and third stories, dwellings—the portion of the cellar being occupied as a garage for cars; and

WHEREAS, this appeal was dismissed for lack of prosecution October 9, 1925, and restored to calendar on June 1926; and

WHEREAS, appellant contends that the two-car private garage is entirely cut off from the rest of the building by 8 in. brick wall; that the ceiling is covered with fireproofing material and that entrance to the garage can only be made from the outside of the building, and that there is a party wall fire escape on the second and third stories;

WHEREAS, there is a certificate of occupancy in force for the building, issued by the superintendent of buildings, issued February 11, 1925;

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the premises above the store occupied shall not be occupied by more than two (2) families; the garage shall be separated from the boiler room by an unpierced 8 in. brick wall, and that the ceiling of the garage portion of the structure shall be fire-retarded and be stopped at the angles formed by the ceiling and the walls; and *further granted on condition* that a party fire escape shall be provided at the second and third levels, connecting with premises directly adjoining, and the occupancy of the garage shall be limited to two automobiles of the pleasure car type, the property of owner or occupant of the premises, and that there be no gasoline storage equipment installed or maintained on the premises.

26-A.

PELLANT—I. Tannenbaum Son & Co., for 469 Broome Street, Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—473-475 Broome street, Manhattan.

APPEARANCES—

For Appellant: Curt Hengsbach, Harry J. Sondheim.

For Administration: Inspectors Carroll and Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(114-23-A)

WHEREAS, I. Tannenbaum Son & Co., for 469 Broome Street, Inc., owner, filed, January 27, 1923, an appeal with the board of appeals from an order of the fire commissioner, affecting premises Nos. 473-475 Broome street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 24, 1923, reads:

"1. Provide a tank for sprinkler system of at least 5,000 gallons capacity on the roof and place and support same as per section 20, ch. 12, Code of Ordinances."

and

WHEREAS, the building is non-fireproof, six stories and basement in height, 50 ft. by 58 ft. in area; OCCUPIED as a tenant factory, divided into two (2) sections, EQUIPPED with a standpipe system with a 6,200 gallon gravity tank on the roof and a 5,000 gallon pressure tank in a pent house on the roof; and

WHEREAS, this appeal was denied by the board at its meeting March 20, 1923, and appellant, through their attorney, requested a reopening of the case; and case was reopened June 15, 1926; and

WHEREAS, the appellant requests that the present installations be accepted.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the existing sprinkler system shall be maintained as now cross-connected, so long as conditions remain substantially unchanged, and that the building shall not be increased in height or area.

479-26-A.

PELLANT—Florence E. Corson, owner.

SUBJECT—Appeal from order of superintendent of buildings.

PREMISES AFFECTED—243 80th street, Brooklyn.

APPEARANCES—

For Appellant: Florence E. Corson, Bayard Corson.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin ..... 5  
Absent ..... 0

THE RESOLUTION:

(479-26-A)

WHEREAS, Florence E. Corson, owner, filed, May 27, 1926, an appeal from an order of the superintendent of buildings affecting premises 243 80th street, Borough of Brooklyn; and

WHEREAS, the order of the superintendent of buildings, dated March 22, 1926, reads:

"You are required to take some action toward having this wall made safe and secure at once.

"Lot. 62-Block 5978.

"The wall and premises to which this notice refers are situated on the West of the lot on the north side

# MINUTES

of 80th St. 340 ft. W. 3rd Ave. commencing about . . . . . feet from the corner of . . . . . and known as Number 243 80th St., said building being retaining wall story building, about . . . . . feet front . . . . . feet rear, 40 ft. long and 6 feet high, and occupied or intended to be occupied as a retaining wall and located in the Borough of Brooklyn, in The City of New York.

"A violation of, or failure to comply with this notice, is a misdemeanor.

"Should you fail to comply with this notice within ten days after the service thereof you will incur a further penalty of Two hundred and Fifty Dollars.

"You are hereby required to remove said violation forthwith or legal proceedings will be commenced against you.";

and

WHEREAS, the building is of frame construction, 2½ stories in height, erected upon a lot 50 ft. by 100 ft. in depth; OCCUPIED as a private dwelling; the grade of the lot at rear on the westerly lot line is about 6 ft. higher than the grade of the lot adjoining directly at west, the two grades converge towards the front meeting a common level at the buliding line; there is an unsafe retaining wall dividing the two premises, erected for the purpose of supporting the earth on the premises of the higher level; and

WHEREAS, the appellant contends that her lot is on the higher level and conforms with the street regulations; that her lot is graded up from the street at the rate of two inches in ten feet (measured normal to the line of curb); on the other hand, the premises adjoining at the west is far below the legal grade; furthermore, that under such conditions she is not responsible for its upkeep;

Resolved, that the order of the superintendent of buildings be and it hereby is affirmed, and the appeal be and it hereby is denied.

## BUILDING ZONE CASES

240-26-BZ.

APPLICANT—A. J. Simberg, for Anna Shulman, owner.  
SUBJECT—Application (re: decision of the superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a building for store purposes.

PREMISES AFFECTED—1661 St. Nicholas avenue, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to September 14, 1926, at 10 A. M., on request of applicant.

820-25-BZ.

APPLICANT—John J. O'Connor on behalf of Washington Improvement Corp., owner.

SUBJECT—Application for modification (re: decision of superintendent of buildings) to permit in a residence district the erection and maintenance of a building to be used for store and theatre purposes (reopened March 9, 1926, to present request for modification of resolution previously adopted).

PREMISES AFFECTED—1714-1726 Kings Highway, Brooklyn.

APPEARANCES—

For Applicant: John J. O'Connor.

For Opposition: E. T. Murdoch.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin	4
Negative: Chairman Walsh	1
Absent	0

## THE RESOLUTION:

(820-25-BZ)

WHEREAS, John J. O'Connor, for Washington Improvement Corporation, owner, filed, August 10, 1925, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a building to be used for store and theatre purposes, premises 1714-26 Kings highway, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kings highway is in a business district; East 18th street is in a residence district; and East 17th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings rendered August 6, 1925, reads:

"Proposition contrary to the Zone Resolution. A

II, Sec. 3.

"The erection of a theatre extending into a residence district."

and

WHEREAS, the proposed building is of fireproof construction, two stories in height, with a frontage of 108.15 ft. and a depth of 170.59 ft. and 129.40 ft., irregular, to be occupied as stores and theatre; and

WHEREAS, the following resolution was adopted by the board on January 12, 1926:

"Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the occupancy of the premises for a picture theatre building and business use shall be restricted to and not exceed a depth of 129 ft. southerly from the corner formed by the intersection of Kings highway and East 18th street; the rear wall running parallel with Kings highway; that there shall be an opening from the theatre structure on the East 18th street front of any nature or description other than doors required by the building code as emergency exits, which doors shall remain closed at all times; that there shall be a return brick pier of not less than 12 in. on Kings highway at the corner formed by the intersection of East 18th street and Kings highway; that the remaining parcel of this property, approximately 41 ft., more or less, fronting on East 18th street shall be developed for conforming use, private dwelling, and said structure shall be erected at the same time as the proposed movie picture theatre, and the frame and roof shall be completed before the first tier of beams of the theatre is stalled; that there shall be no advertising, billboards or signs or display of any nature or description permitted on the East 18th street front of said proposed theatre structure; that the street frontage shall be finished with face brick or natural stone, with architectural terra cotta or stone trimmings; that the exterior of the southerly wall shall be finished in light-colored brick; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months."

and

WHEREAS, the applicant now requests a modification of this resolution as to the depth of the building; and

WHEREAS, the board deemed that applicant was entitled to relief under Section 7-c in that the use boundary divides the property into two different zones, and under Section 21, due to the angular shape of the lot, it would be a hardship to be deprived of the use as requested, cause a smaller area could not be profitably utilized;

Resolved, that the board of standards and appeals hereby make a variation in the application of the use district regulations of the building zone resolution, and

# MINUTES

the application be and it hereby is *granted on condition* that the use and structure shall be restricted to the conduct of motion picture theatre, other than stores on the Kings Highway front; that the structure shall be limited to two stories in height—auditorium and balcony only; that the extension on the 18th street front shall not exceed a depth of 150 ft. southerly from the corner, formed by the intersection of Kings Highway and East 18th street; that the rear and side courts as required by article 25 of the building code, shall be provided within the property lines of the premises before us on appeal; that there shall be no opening from the theatre structure on East 18th street front, other than doorways required by the building code as emergency exits, which doors shall remain closed at all times; that the East 18th street wall shall be returned on Kings Highway for a distance westerly of not less than 16 in., formed by the corner of Kings Highway and East 18th street; that the adjoining property to the south now occupied for private residence and dwelling shall be so maintained, in the same ownership of the plot adjoining to the north and under appeal; that there shall be no advertising, bill-boards or signs of any nature or description displayed or permitted on the East 18th street front of these premises; that the exterior of the street front walls shall be finished with face brick or natural stone with architectural terra cotta or stone trimmings; that the exterior of the rear southerly wall shall be finished in light-colored face brick; that the occupancy capacity of the balcony shall be limited to such area as required exits therefrom can be provided direct to Kings Highway; that there shall be no exterior fire escape erected or permitted on the 18th street front of structure; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months; and that a return of drawings shall be made to this board for approval before submission to the superintendent of buildings for his consideration.

3-26-BZ.

APPLICANT—Hugh Mulligan, for 353 Lexington Avenue Corp., owner.

SUBJECT—Application (re: decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the alteration and change of occupancy in part from residence use to business use.

PREMISES AFFECTED—349-353 Lexington avenue, Manhattan.

Connell, Holland and Guilfoyle and Deputy

Chief Martin ..... 5

Absent ..... 0

THE RESOLUTION:

(198-26-BZ)

WHEREAS, Hugh Mulligan, for 353 Lexington Avenue Corporation, owner, filed, March 9, 1926, an application, under the building zone resolution, to permit in a residence district the alteration and change of occupancy in part from residence to business use, premises 349-353 Lexington avenue, Manhattan; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Lexington avenue, East 40th street, and East 39th street are in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered February 24, 1926, reads (Alt. 336/26):

"1. Proposed building is unlawful as building is located in residence district—Section 3, Building Zone Resolution."

and

WHEREAS, the existing building is of fireproof construction, fifteen stories in height, with a frontage of 55 ft. 6 in., and a depth of 87 ft., to be occupied as restaurant and doctors' offices and apartments; and

WHEREAS, the board deemed that the applicant was not entitled to relief under section 21, in that this building was erected with conforming uses, and furthermore that it is not the owner or operator of the premises who makes this application but simply an occupant of a very small area, which he desires to turn into a business use.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

THE RESOLUTION:

(388-26-BZ)

WHEREAS, William F. Doyle, for Waldman Bros., owner, filed, May 6, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station (previously denied), premises 1551-1555 Coney Island avenue, Brooklyn; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Coney Island avenue is in a business district; avenue "L" is in a residence district; and East 12th street is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered May 5, 1926, Applic. 1056-1926, reads:

"1. A gasoline service station may not be permitted in a business district, appeal may be taken to the Board of Appeals."

and

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 20 ft., and a depth of 60 ft., to be occupied as office and individual garages and it is proposed to bury two 550 gallon gasoline storage tanks and erect two pumps for the purpose of maintaining a gasoline service station; and

WHEREAS, the board deemed that the applicant was not entitled to consideration, in that he did not substantiate his basis of appeal under Section 21.

Resolved, that the decision of the fire commissioner be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

THE RESOLUTION:

(595-25-BZ)

WHEREAS, John J. Dunnigan, for Marie Carberry, owner, filed, June 10, 1925, an application, under the building zone resolution, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles, premises west side of 3rd avenue, 80.74 ft. south of East 182nd street, Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 3rd avenue is in an unrestricted district; and Bathgate avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 7, 1925, reads:

"Erection of proposed garage in unrestricted district, extending into a business district, is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 60.55 ft., and a depth of 200 ft., to be occupied as a garage for the storage of more than 5 motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7-c and 21 for the reason that the lot was in single ownership previous to July 25, 1916, and that the major portion of lot being in unrestricted district, which renders it unsuited for any other purpose.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the extension shall be restricted to the same height as the main building, namely, one story above grade; that the rear and gable walls shall be unpierced throughout their entire height and length; that a 45-degree interior iron stairs shall be provided at rear of building to scuttle in roof; that no skylight shall be erected within 20 ft. of the rear wall; that the conditions of the original resolution otherwise shall be stipulated as part of this variation; and that all permits necessary for the prosecution of the work shall be obtained within ninety days and the work involved completed within six months from the date of this action.

WHEREAS, William F. Doyle, for 1375-1383 Broadway Corporation (99-year lessee), owner, filed, May 6, 1926, an application, under the building zone resolution, to permit in a two-times height district the erection and maintenance of the street wall to a height in excess of the height limit prescribed by the zone resolution; premises 1375-1383 Broadway and 121-133 West 37th street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Broadway, 38th street and 37th street are in business use and two-times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 29, 1926, re: N. B. 190-1926:

"1. Portion of building situated over 150 ft. from Broadway is of unlawful height—Art. III, Building Zone Resolution.";

and

WHEREAS, the proposed building is of fireproof construction, 24 stories in height, with a frontage of 104 ft., and a depth of 195 ft., irregular, to be occupied as stores, lofts, offices and showrooms; and it is proposed to erect the street walls of the building 200 ft. in height; such height is in accordance with the zone resolution on Broadway also along West 37th street for a distance of 150 ft. from Broadway; the remaining 45 ft. 10 7/8 in. length of street wall on 37th street is limited to 120 ft. in height by the zone resolution; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of zone resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* only so far as the street walls on both fronts are affected; that the street walls above the two-times height restriction shall set back in accordance with the requirements of the building zone resolution; that the building otherwise shall comply with the requirements of the zoning resolution in all respects; the exterior finish of the exposed surface of the return of the westerly gable shall be finished with face brick, same as street front, and with architectural terra cotta, laid out in panel effect of two-tone brick, substantially in harmony with the finish of the set back gable return of the building to the west; that a return of the gable design or treatment shall be made to this board before July 27th, 1926, for approval; that the trim of any window

THE RESOLUTION:

(332-26-BZ)

WHEREAS, John J. Dunnigan, for John C. Gaffney, owner, filed, April 16, 1926, an application, under the building zone resolution, to permit in a business district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 3617 Bainbridge avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that both Jerome avenue and Bainbridge avenue are in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 9, 1926, reads: (N. B. 780-26):

"1. Erection of proposed garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.";

WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 74.08

and a depth of 99 ft. (irregular), to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant substantiated basis of appeal under section 7-c, in that there existed

still exists a public stable, with permit, still in force, same block, as verified by letter submitted from health

department; and under section 21 in that the surrounding conforming uses supports the contention as to the prop-

under appeal being improvable for development for filling purposes.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use dis-

regulations of the building zone resolution, and that application be and it hereby is granted on condition that

building shall not exceed a two-story structure in height

grade; that there shall be no cellar other than that

required for the accommodation of the heating apparatus,

approximately 20 ft. square at front of Bainbridge ave-

that the building shall be erected fireproof throughout;

yard of not less than 10 ft. deep provided at the

of the 2nd story for the full width on the 78 ft. gable

that this offset shall be glazed with wire glass in

metal frame; that an automatic louver ventilator shall be provided fixed to the rear wall of the 2nd story at this offset; that there shall be no signs other than one fixed, projecting electric sign, indicating the name and title of garage; that the rear and gable walls otherwise shall be unpierced throughout the entire height and length; that any skylights installed in the roof of 2nd story shall be glazed with plain glass protected with wire guards above and below; that the gasoline storage equipment shall be located approximately at the street front, northerly of the center door; that the front wall shall be finished with face brick with architectural terra cotta or stone trimmings; that the start of any ramp runway shall set back from street front not less than 15 ft.; and that all permits necessary for the prosecution of the work shall be obtained within nine months and the work completed within eighteen months.

THE RESOLUTION:

(1154-25-BZ)

WHEREAS, Gardiner Conroy, for Fogel-Hirsh Building Company, owner, filed, November 9, 1925, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building for business occupancy on the first story; premises 8502-8512 Bay Parkway, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 85th street is a residence district; Bay Parkway is a residence district; and 86th street is a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 24, 1925, reads:

"Stores on first floor of proposed six story tenement house to be located in a residence district is contrary to Art. II, Sec. 3 of the Zone Resolution."

and

WHEREAS, the proposed building is of non-fireproof construction, six stories in height, with a frontage of 100 ft., and a depth of 100 ft., to be occupied as stores and living apartments; and

WHEREAS, the proposed building is to be 6 stories in height for use and occupancy as a tenement house; and

WHEREAS, 50% of the street front between the intersecting streets are already designated on the zone maps as business use district; and

WHEREAS, immediately abutting this property to the southwest there is an existing business building.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* only so far as it affects the 1st story street front on Bay Parkway (22nd avenue), for a depth approximately not exceeding 53 ft. *on condition* that remainder of these premises throughout shall be restricted and maintained with conforming residential uses; the elevation on 22nd avenue front, other than the store show windows, finished in face brick and architectural terra cotta; that there shall be no openings of any nature or description from store area to the 85th street side of structure; that the street wall of 85th street frontage shall be returned on 22nd avenue front for a distance of not less than 16 in.; that the business use on the 1st story shall be restricted to retail mercantile stores' use and occupancy no part of store use to be occupied for meat market, fish store or delicatessen store; that there shall be no advertising signs erected or displayed of any nature or description on any portion of building on 85th street front nor on 22nd avenue front, other than lettering on plate glass show windows of the stores; that the store use shall be separated from the apartment use by approved masonry wall at the rear; that return drawing shall be submitted to the board, showing layout of store floor before submitting same to superintendent of buildings for consideration; that all permits necessary for the prosecution of the work shall be obtained within nine months and the work completed within eighteen months from the date of this action.

311-26-BZ.

APPLICANT—Harry M. Sushan, for Katinka Petersen, owner.

SUBJECT—Application (re: decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the extension in height for an additional story of a one-story motor vehicle repair shop.

PREMISES AFFECTED—746 4th avenue, Brooklyn.

APPEARANCES—

For Applicant: Harry M. Sushan, Wilmot Moorehouse.

For Opposition: Robert L. Jagocki.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin ..... 4

Negative ..... 1

Absent ..... 0

THE RESOLUTION:

(311-26-BZ)

WHEREAS, Harry M. Sushan, for Katinka Petersen, owner, filed, April 10, 1926, an application, under the building zone resolution, to permit in a business district, extension in height of an additional story of a one-story motor vehicle repair shop; premises 746 4th avenue, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

# MINUTES

WHEREAS, the use district maps accompanying the building zone resolution show that 4th avenue is in a business district; 24th street, west of 4th avenue, is in an unrestricted district; and 25th street, west of 4th avenue, is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 5, 1926, reads (Applic. No. 13690-1925):

"Proposition as to extending present building in area—and use as to occupancy, contrary to Art. 2, Section 6, Par. 6 of Zone Resolution.  
"Therefore application denied.";

WHEREAS, it is proposed to extend the building one additional story in height, with a frontage of 40 ft. 3¾ in., a depth of 60 ft., to be occupied as a motor vehicle repair shop on the 1st and 2nd story; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship in view of the character of the neighborhood and proximity of unrestricted district at the rear, which rendered his property unsuited for other use.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* only so far as it affects the extension of building one additional story in height *on condition* that a rear yard of not less than 10 ft. in depth for the entire width of property at the level of 2nd story shall be maintained; that the rear windows of the additional story shall be equipped with fixed steel sash with not more than one ventilator to each opening; that the use of 2nd story shall be restricted to repairs of manual operation; that no machinery other than ½ H. P. portable drill shall be used in the conduct of business on 2nd story; that the gable walls of additional story at rear shall be unpierced throughout the entire height and length; that the finish of the front shall be of same material and design as the existing 1st story; and all permits shall be obtained within nine months and building completed within one year from date of this action.

Adjourned 8.20 P. M.

WILLIAM J. O'GORMAN, *Secretary*.

# MINUTES

## \* CORRECTION

The minutes of the meeting of the board of standards and appeals, held June 15, 1926, as they appeared in Bulletin 25, Vol. XI, are hereby corrected to read as follows:

APPLICANT—William F. Doyle, for Benj. Sobol, owner.  
SUBJECT—Application (re: decision of fire commissioner), under sections 21 and 7a of the building zone resolution, to permit in a business district the extension and enlargement of an existing gasoline service station.

PLACES AFFECTED—Southeast corner of East 168th street and Jerome avenue, The Bronx.

SECURITIES—

For Applicant: William F. Doyle.

For Opposition: D. Hollander, Bertha Friedman.  
ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(95-26-BZ)

WHEREAS, William F. Doyle, for Benj. Sobol, owner, filed, January 1, 1926, an application, under the building zone resolution, to permit in a business district the extension and enlargement of an existing gasoline service station; prem-

*Correction—Words "fire commissioner" substituted for "superintendent of buildings" in line 14 of resolution.*

ises southeast corner of East 168th street and Jerome avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 168th street, Jerome avenue and River avenue are in a business district; and

WHEREAS, the decision of the fire commissioner, rendered January 28, 1926, Applic. 29-1926, reads:

"1. The extension of a gasoline system beyond that previously permitted in a business district, is denied.  
Appeal may be taken to the Board of Appeals.";

and

WHEREAS, it is proposed to bury six gasoline tanks, 550 gallons each, and erect six new pumps, in addition to a new office building, one story in height, 25 ft. by 15 ft. in area; the entire premises to be occupied as a gasoline service station; and

WHEREAS, the board deemed that applicant was entitled to the variation under sections 21 and 7a of the building zone resolution on the ground that the proposed extension is incidental to the gasoline station existing on part of the plot so used prior to the amendment of the zone resolution prohibiting gas stations.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that any additional pumps installed shall be located on the Jerome avenue frontage; and that all permits required shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

## FORMS FOR NOTICES TO PROPERTY OWNERS

Applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such as are not to be supplied by this office.  
Applicant is entitled only to one copy of Form 13A, fully filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice date for the hearing in his case, and that the failure to receive such notice is no excuse for not appear.

*Fifth*, That the business of the board is to dispose all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of the appellant or petitioner to file necessary data by any other method of delay.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building,  
Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, July 27, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 14, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

SUBJECT—Appeal from orders of fire commissioner.  
PREMISES AFFECTED—31-33 Pine street, Manhattan.

APPEARANCES—

For Appellant: Joseph L. Hernon.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon

Kenlon	5
Negative	0
Absent	0

### THE RESOLUTION:

(335-26-A)

WHEREAS, Joseph L. Hernon, for Adling Corporation, Codi Corporation and Neptune Realty Company, owners, filed, April 17, 1926, an appeal from an order of the fire commissioner affecting premises 31-33 Pine street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 29, 1926, Order No. 93147-F, reads:

"1. Replace the missing and defective shutters with proper iron shutters at all openings in the exterior wall

above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at south, east and west sides of building, or other approved protection, as per Sec. 375, Art. 18, Ch. 5, of the Code of Ordinances.";

and

WHEREAS, the building is fireproof, 5 stories (68 ft.) in height, 50 feet by 87 feet (irregular) in area; OCCUPIED as an office building, approximately 155 persons above the 1st story; and

WHEREAS, there are six windows in the south wall on each story above the 1st story within 13 feet of openings in a neighboring building to the south; ten windows in the east wall on each story above the 1st story within 8 feet of the openings in a neighboring building to the east and two windows in the west wall on each story above the 1st story within 16 ft. 6 in. of neighboring buildings to the west; and

WHEREAS, appellant contends that the building in question is fireproof; that housekeeping conditions are good and that at night the building is under the supervision of a watchman.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted only so far as it affects windows in the easterly gable wall of the interior court.

357-26-A.

APPELLANT—Second United Cities Realty Corporation, owner.

SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—140 Nassau street, Manhattan.

APPEARANCES—

For Appellant: Alfred J. Talley.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon

Negative	0
Absent	0

### THE RESOLUTION:

(357-26-A)

WHEREAS, Second United Cities Realty Corporation, owner, filed, April 23, 1926, an appeal from an order of the fire commissioner affecting premises 140 Nassau street, Borough of Manhattan; and

WHEREAS, the order No. 87295-F of the fire commissioner rendered November 27, 1925, reads:

"1. Provide approved fireproof windows, with metal kalameined frames, glazed with wired glass for all openings in the exterior wall above the 1st story, which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at east side of building or other approved protection as per Section 375, Article 18, Chapter 5 of the Code of Ordinances.";

and

WHEREAS, the building is fireproof, 14 stories in height, 85 ft. 3½ in. by 69 ft. 6½ in. in area; OCCUPIED as an office building, about 50 persons on each floor; and

WHEREAS, the appellant claims that there are 64 windows on the east side of the building affected by the fire department's order; that the building causing the exposure at east is fireproof and has no skylights in the roof except those of elevator, stair-hall and a small room on top story which itself is fireproof; that there is no fire hazard; furthermore

# MINUTES

are three windows on each of the 6th, 7th and 8th now provided with iron shutters.  
*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as it affects the windows in rear court, at northeast corner of the structure.

-A.

APPELLANT—Cornell Utilities Co., Inc., for Abraham Monson, owner.

SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—408 Concord avenue, The Bronx.

APPEARANCES—

For Appellant: John J. Cox.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(381-26-A)

WHEREAS, Cornell Utilities Company, Inc., for Abraham Monson, owner, filed, May 1, 1926, an appeal from a decision of the fire commissioner affecting premises 408 Concord avenue, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered April 3, 1926, Alteration Application No. 2306-1925, reads:

"1. The use of Grade B Fuel Oil is not permitted in commercial plants and residences of more than two families unless the room in which equipment is used is cut off from rest of building by fireproof partitions, ceilings and floors. Such rooms must also have direct entrance from street only and be adequately vented to outer air."

WHEREAS, the building is fireproof, one story and basement, height, 50 ft. by 100 ft. in area; OCCUPIED as a workshop, 10 persons; the boiler room being located in part of the basement; and

WHEREAS, a fuel oil burning system (using grade B fuel oil) has been installed, consisting of a 1,065-gallon fuel oil tank, a 55-gallon auxiliary tank, a NoKol Automatic Oil burner and the necessary valves and piping to make a complete installation; and

WHEREAS, appellant contends that the installation complies with the fuel oil rules in all respects, excepting as to the boiler room having a direct entrance to street only and strict compliance with the rules in this respect would cause a great hardship and requests the acceptance of the same on conditions.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* for use with grade "B" fuel oil on condition that the building shall be not increased in height, area or dimension at the present use and occupancy shall remain substantially unchanged; that the equipment shall be installed, maintained and operated in accordance with the rules for grade "B" fuel oil installation; and *granted* as to the boiler room on condition that the door opening on platform from boiler room to street be maintained as shown in this appeal and that a double-hung, fireproof window shall be installed in the rear wall of boiler room, opening to the outer air; and that the soffit of the stairs from the basement story to 1st story shall be covered with cement mortar on expanded metal lath.

385-26-A.

APPELLANT—Samuel Rosenblum, for Ella Waxenberg, owner.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—2598-2604 Atlantic avenue and 88 Sheffield avenue, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(385-26-A)

WHEREAS, Samuel Rosenblum, for Ella Waxenberg, owner, filed, May 4, 1926, an appeal from an order of the fire commissioner affecting premises 2598-2604 Atlantic avenue and 88 Sheffield avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 3, 1926, Order No. 92362-F, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof with necessary check valves and 2½-inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building is non-fireproof, 2 stories (25 ft. 7 in.) in height, on Atlantic avenue front, the remainder of the premises being one story (12 ft. 5 in.) in height; L shape, having a frontage of 75 ft. 8 in. on Atlantic avenue; 25 feet on Sheffield avenue and a depth of 133 ft., a total area of approximately 11,000 sq. ft.; OCCUPIED: Sheffield avenue front, manufacture of proprietary drugs (hydrogen peroxide, iodine, etc.) and the rest of the building used as stores and as pickle works, approximately 15 persons in entire premises; 2nd story, Atlantic avenue front, offices and salesrooms, vacant at present; and

WHEREAS, appellant contends that the building faces on two street fronts; that it is low in height, that the area of the building is subdivided into smaller units, and contends further that there are city fire hydrants in the immediate vicinity.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the opening in the 8-inch concrete wall, subdividing the Sheffield avenue wing, shall be equipped with approved, automatic fire doors; that the building shall be not increased in height, area or dimension; and *granted* so long as the present occupancy and use shall remain unchanged.

386-26-A.

APPELLANT—Jacob Lubroth, Inc., for Arc Building Co., Inc., owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—8823 avenue L, Brooklyn.

APPEARANCES—

For Appellant: Jacob Lubroth.

ACTION OF BOARD—Appeal denied.

THE VOTE—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Absent .....	0

# MINUTES

## THE RESOLUTION:

(386-26-A)

WHEREAS, Jacob Lubroth, Inc., architect, for the Arc Building Company, owner, filed, May 4, 1926, an appeal from a decision of the superintendent of buildings affecting premises 8823 Avenue L, Borough of Brooklyn; and

WHEREAS, the decision of the superintendent of buildings, rendered April 19, 1926, in acting on Application No. 5808-1926, reads:

"Construction—Proposition contrary to Sec. 473 of the building code and therefore denied."; and

WHEREAS, the building is frame, 2 stories in height, 20 ft. by 75 ft. in area; OCCUPIED: 1st story, stores; 2nd story, dwelling; and

WHEREAS, appellant contends that the building is located on the corner of East 89th street and Avenue L, that owing to narrow width of lot—20 ft.—the building was designed to be erected on the lot line with space between studs brick filled, but in lieu of brick filling the building has been covered on the outside with metal lath and cement stucco, and that there would be hardship if the owner was compelled to reconstruct his building, there being but small space between buildings and the mistake in construction having been made by the contractor without knowledge of owner.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

1296-25-A.

APPELLANT—Croker National Fire Prevention Engineering Company, for Famous Players Lasky Corp., lessee.

SUBJECT—Appeal from order and decision of fire commissioner.

PREMISES AFFECTED—N.S. of Pierce avenue, from 6th to 7th avenues, L. I. City, Borough of Queens.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(1296-25-A)

WHEREAS, Croker National Fire Prev. Eng. Co., for Seneca Holding Co., owner, filed, December 15, 1925, an appeal from an order of the fire commissioner, also a decision of the fire commissioner, affecting premises 6th and Pierce avenues, Borough of Queens; and

WHEREAS, the order and decision of the fire commissioner, respectively read (Order No. 97964-C):

"1. Surrender to the bearer Fire Department Permit No. 124710, issued September 24, 1924, to expire November 24, 1925, authorizing the storage of 200,000 ft. motion picture film in the motion picture business conducted by you at the above location as it is revoked for the reason that the safe conduct of your business requires that you comply with the following:

"3. Provide an approved metal cabinet in splicing room in studio building to properly store film awaiting examination.

"4. Discontinue the use of 3 metal cabinets now used for the storage of film in cutting room No. 215 as these cabinets are not of an approved type."

(Alt. N. B. No. 730-25)

"1. Proposed alterations are in conflict with Sect. 241, subdivision F, and Section 243 of Chapter 10, Code of Ordinances, City of New York, and Calendar 1926, 592-22-A of the Board of Appeals.";

and

WHEREAS, the building is fireproof, 2 stories, mezzanine and basement in height, 200 ft. 2½ in. by 288 ft. 6 in. area. OCCUPIED: basement, carpenter shop, machine shop, restaurant, 75 persons; 1st floor, general offices; stage, carpenter shop, receiving department and project room, 300 persons; mezzanine, general offices, still department, paint shop, projecting rooms, 25 persons; 2nd floor, offices, dressing rooms, cutting rooms, projecting rooms, 25 persons; and

WHEREAS, appellant contends that item 3 of order 97964-C applies to room 219, as shown upon the plans; that the metal cabinets in question were approved by the fire department, the same being installed in conformity with resolution of Cal. No. 592-22-A; and proposes to subdivide the existing cutting rooms at the southeast portion of 2nd story and proposes to equip each room with four separate cabinets each sprinklered and separately vented to outer air; each cabinet to store fifty containers.

Resolved, that the order of the fire commissioner 97964-C, items 3 and 4, be and it hereby is *affirmed* and appeal as to these items be and it hereby is *denied*; that decision of the fire commissioner, re Alt. 730-1925, item 1 be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the walls of the proposed divisions of existing splicing and cutting rooms at southerly end of the 2nd story on the 7th avenue front shall be constructed of approved fireproof material as indicated on plans filed in this appeal; that an approved exterior iron fire-escape shall be erected, embracing all openings from the cutting and splicing rooms on 7th avenue front southerly end; that iron steps shall be provided from floor to the level of sills, or the windows placed at floor level; that an exit opening from each room to fire escape shall be provided with casement, fireproof doorways, open out; and on further condition that the stipulations as set forth by this board under resolution in Cal. No. 592-22 shall be complied with and maintained.

393-26-A.

APPELLANT—Tiffany Studios, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—S.W. corner of Kingsland avenue and Luydig place, Corona, Borough of Queens.

APPEARANCES—

For Appellant: R. K. McMaster.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

## THE RESOLUTION:

(393-26-A)

WHEREAS, Tiffany Studios, owner, filed, May 6, 1926, an appeal from an order of the fire commissioner affecting premises southwest corner of Kingsland avenue and Luydig place, Corona, Borough of Queens; and

WHEREAS, the order of the fire commissioner, March 15, 1926, Order No. 91726-F, reads:

"1. Install a standpipe system with risers four inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof,

# MINUTES

necessary check valves and 2½-inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.”;

WHEREAS, the building is non-fireproof, part frame; basement, one and two stories in height; 200 ft. by 270 ft., irregular, about 34,000 sq. ft. in area; OCCUPIED: basement, plating, 25 persons; 1st story, machine shop, 110 persons; 2nd story, machine shop, 100 persons; and

WHEREAS, the appellant contends that the area of the building is divided by fire walls into four sub-areas, A, B, C and D, each less than 10,000 sq. ft.; that all openings connecting the sub-areas are provided with standard fire doors on both sides of the wall, except the one opening between areas C and D, which is provided with one standard fire door; furthermore, that the areas B and C are provided with 2½-inch standpipe, also two fire hydrants are maintained in the yard.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building group as now sublet shall not be increased in height, area or dimension; that the indicated horizontal openings shall be equipped with closing, fireproof doors; that all outlets of the existing standpipe system shall be provided with not less than 100 ft. of approved hose; and *granted* so long as the operation, maintenance and occupancy remain unchanged.

THE RESOLUTION:

(1161-25-A)

WHEREAS, Croker National Fire Prev. Eng. Co., for Market Managing and Operating Company, owner, filed January 10, 1925, an appeal from an order of the fire commissioner, affecting premises 848-52 Washington street, Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 25, 1925, Order No. 83804-F, reads:

“1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at rear of building, or other approved protection, as per Section 375, Article 18, Chapter 5 of the Code of Ordinances.”;

WHEREAS, the building is non-fireproof, 5 stories in height, 52 ft. by 50 ft. in area; OCCUPIED: 1st story, carpenter shop, 15 persons; 2nd story, carpenter shop, 5 persons; 3rd story, storage, 12 persons; 4th story, shipping, 4 persons; 5th story, manufacture of cake products, 8 persons; and

WHEREAS, the appellant contends that the exposure at the rear of the building caused by a one-story building and the side windows of the building adjoining at north; that the building in question is provided with two party-wall fire escapes on the rear

connecting with the adjoining building at either side, the window openings on the fire escape at north side in both buildings are fireproof; the appellant proposes to also fireproof the windows which open on to the fire escapes at the south side.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

66-26-A.

APPELLANT—William F. Doyle, for Anable Avenue Factory Corporation, owner.

SUBJECT—Application for reopening—modification of resolution—appeal from order of the fire commissioner.

PREMISES AFFECTED—E.S. of Pearson street, 280 feet north of Creek street, L. I. City, Borough of Queens.

APPEARANCES—

For Appellant: William F. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(66-26-A)

WHEREAS, William Higginson, for Anable Avenue Factory Corporation, owner, filed, January 25, 1926, an appeal from an order of the fire commissioner, affecting premises east side Pearson street, 280 ft. north of Creek street, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated January 5, 1926, reads:

“Order No. 88586-F—

“Install a standpipe system with risers 4 in. in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½-inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½-inch standard hose attached thereto.”;

and

WHEREAS, the building is fireproof, 4 stories (54 ft. 2 in.) in height, 240 ft. by 88 ft.; 21,120 sq. ft. in area; OCCUPIED: 1st story, storage of plumbing supplies; 2nd, 3rd and 4th stories, vacant, proposed future occupancy, factory; and

WHEREAS, the appellant contends that the building is equipped with an automatic sprinkler system; that the building is fireproof and provided with five stairways; and

WHEREAS, the original appeal was denied by the board April 27, 1926, reopened July 6, 1926, for the purpose of modifying the resolution; and

WHEREAS, the appellant now proposes to provide such auxiliary appliances as the board sees fit to indicate; furthermore, the appellant contends that in addition to the contentions in the original appeal, the building is provided with a fire alarm system.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height, area or dimension; that there shall be no extra hazardous occupancy as determined by the fire commissioner, and *granted* so long as the present equipment and protection shall be maintained in accordance with the rules of the board.

## BUILDING ZONE CASES.

69-26-A.

APPELLANT—James V. Scully, owner.

SUBJECT—Application for reopening—reconsideration—appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—3517 91st street, Jackson Heights, Borough of Queens.

APPEARANCES—None.

ACTION OF BOARD—Chairman read request to reopen and statement of facts. Appeal reopened and granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN AND GRANT ON CONDITION—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon	4
Negative: Commissioner Connell	1
Absent	0

THE RESOLUTION:

(69-26-A)

WHEREAS, Albert H. Stines, for James V. Scully, owner, filed, January 26, 1926, an appeal from a decision of the superintendent of buildings, affecting premises 3517 91st street, Jackson Heights, Borough of Queens; and

WHEREAS, the decision of the superintendent of buildings, dated January 18, 1926, reads:

"Replying to your communication of May 19, 1925, wish to advise that an examination of the premises indicates that your building is of frame construction more than 20 feet high. It cannot, therefore, be used as a sanatorium. The building code requires that a building to be used as a sanatorium must be of fireproof construction."

and

WHEREAS, the building is frame, 2 stories and attic (27 ft. 10 in.) in height, 22 ft. by 62 ft. in area; OCCUPIED: as a sanatorium for 6 patients, and as living quarters for owner and nurses; and

WHEREAS, appellant contends that the 2nd story of the premises, which is 12 ft. 10 in. above the curb level, is the only part of the building wherein patients will be received and treated; and

WHEREAS, this appeal was denied by the board at its meeting June 16, 1926, for a sanatorium on the 2nd story and reopened by vote of the board, July 20, 1926.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *modified* and the appeal be and it hereby is *granted on condition* that the use and occupancy of the first story (which shall not exceed a height of 12 ft. 10 in. above the sidewalk level) for convalescent and recuperative patients, shall be under the supervision of resident trained nurse; that the remainder of the premises above the first story shall be restricted to the family dwelling, occupancy and house service of the owner of the premises; that the cellar throughout shall be fire-retarded with double thickness of one-quarter inch plaster board, staggered and exposed joints to be plaster filled; that the cellar ceiling and walls shall be fire stopped and all stairs from the cellar to the first story shall be enclosed in fire-retarding material, with self-closing metal covered door at the lower level; that there shall be a direct exit from the cellar to the exterior; that there shall be an exterior opening of window or door provided from each room on the first story to the outer air; that the entire plot shall have no occupancy other than this single building, 22 ft. by 46 ft., and that this building shall not be extended in height, area or dimension; that an open and unincumbered yard, entirely surrounding the house, shall be maintained; that the first story of this building shall not be occupied as herein permitted until all the conditions herein required are complied with; and that all permits required shall be obtained within sixty days.

## THE RESOLUTION:

(1223-25-BZ)

WHEREAS, William F. Doyle, for Morris Levine, owner,  
filed, November 24, 1925, an application, under the building  
zone resolution, to permit, partly in a residence district  
and partly in a business district, the alteration of a build-  
ing and its conversion into a garage for the storage of more  
than five motor vehicles; premises 174-184 Vanderbilt ave-  
nue, Brooklyn; and

WHEREAS, a public hearing was held on this application  
by the board of standards and appeals, at its regular meet-  
ing, July 20, 1926, after due notice by publication in the  
Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the build-  
ing zone resolution show that Vanderbilt avenue is in a  
business district; Clermont avenue—north of a point 100 ft.  
north of Willoughby avenue is in a business district and  
that Clermont avenue—south of a point 100 ft. north of  
Willoughby avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings,  
rendered September 18, 1925, reads:

"Proposed public garage in a business and partly  
residence district is contrary to Sections 3 and 4 of Art.  
II of Building Zone Resolution.";

and

WHEREAS, the existing building is of non-fireproof con-  
struction, one story (36 ft.) in height, with a frontage of  
123 ft. and a depth of 200 ft.; to be occupied as a garage  
for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that, in view of the existing  
use of abutting premises maintaining and housing a great  
number of horses and the existing non-conforming use of  
the premises in question, the applicant was entitled to relief  
under section 21 of the building zone resolution on the  
ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does  
hereby *make a variation* in the application of the use dis-  
trict regulations of the building zone resolution and that  
the application be and it hereby is *granted on condition* that  
the existing wood frame construction of the roof shall be  
razed and demolished; that the building shall be recon-  
structed fireproof, with a roof of flat design and construc-  
tion; that the building as erected shall not exceed a one-  
story structure in height above sidewalk grade; that the  
building shall be subdivided approximately in half by a  
cross wall of approved masonry, with not less than three  
openings therein to accommodate vehicular communication  
in either part; that the openings therein shall be equipped  
with automatic, self-closing, sliding fire doors; that the  
Clermont avenue front shall be restricted to but one vehicu-  
lar opening to be used and maintained for emergency exit  
only; that any other openings on the Clermont avenue front  
shall be restricted to windows, the sills of which shall be  
not less than five feet above sidewalk level; that any gaso-  
line storage equipment installed shall be located on the Van-  
derbilt avenue front of the structure at the street wall;  
that there shall be no signs of any nature or description on  
the Clermont avenue front, and no advertising display or  
signs on the Vanderbilt avenue front, other than one elec-  
tric projecting sign indicating the name and title of the  
garage; that the front elevations or exposed surface of the  
street elevations shall be finished in face brick, with archi-  
tectural terra cotta or stone trimmings; that the gable walls  
shall be unpierced throughout their entire height and length;  
that a return drawing shall be made to this board of the  
proposed elevation, which shall be of attractive architec-  
tural design, incorporating a parapet wall at the street  
front of substantial height, in proportion to the front, to  
balance the architectural design; that there shall be in-  
stalled in each section of the building not less than five  
skylights, glazed with plain glass, protected with wire guards

# MINUTES

above and below; that no skylight so installed shall be within 20 ft. of the southerly gable wall, and that a standpipe connection at both street fronts, connected to the street main shall be installed, with sufficient hose to cover the entire floor area of each section; that all required permits shall be obtained within nine months and the work completed within eighteen months from the date of this action.

## RESOLUTION:

(208-26-BZ)

WHEREAS, Belefreed Garage Corporation, for Fannie T. Tinton, owner, filed, March 11, 1926, an application, under building zone resolution, to permit in a residence district the alteration and extension of an existing garage for the storage of more than five (5) motor vehicles; premises 1038-1040 Forest avenue, Borough of The Bronx; and WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, July 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and WHEREAS, the use district maps accompanying the building zone resolution show that Forest avenue is in a residence

district; 165th street is in a business district and that Tinton avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 11, 1926, reads:

"Your request for a certificate of occupancy of the premises No. 1038-1040 Forest avenue, Bronx, as a public garage is hereby denied as the premises are located in a residence district as established by the Building Zone Resolution, and the front extension to the existing garage on the rear of premises was never approved for garage uses.";

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 50 ft. and a depth of 170 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the rear portion of the existing building has been used as a garage since prior to July 25, 1916; the front portion of the building (size, 50 ft. by 87 ft. 8 in.) was erected in 1922 under a permit from superintendent of buildings, to be used as chauffeur's room and club room exclusively; and

WHEREAS, applicant supported his basis of appeal by filing more than 80% of consents of affected property owners, in compliance with requirements of section 7-g and the board deemed that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension and shall remain a one-story structure, with no cellar other than for the accommodation of the boiler and heating apparatus at the front of the premises; that the interior shall be fire-retarded throughout in accordance with the rules of the board of standards and appeals; that any skylight installed shall be glazed with plain glass protected above and below with wire guards; that a sprinkler system with direct street connection shall be installed and maintained; that a standpipe outlet with direct connection to city main shall be installed immediately inside the street wall with not less than 125 ft. of hose; that there shall be no signs erected or maintained on the premises, other than a single flat wall sign inserted in the panel of parapet; that there shall be not more than one 550-gallon gasoline storage tank installed on the premises, located at the street front of the building; and all permits required shall be obtained within ninety days and the work completed within six months from the date of this action.

## THE RESOLUTION:

(463-26-BZ)

WHEREAS, C. A. Sandblom, for Van Vyck Realty Corp., owner, filed, May 24, 1926, an application, under the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a store and theatre building; premises 13408-13420 Liberty avenue, Woodhaven, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Liberty avenue is in a business district; 135th street is in a residence district and that 134th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 5, 1926, reads (N. B. 5035-26):

"1. Erection of building for theatres and stores extending into residential district is prohibited by Zone Law. Not examined further.";

and

WHEREAS, the proposed building is of fireproof construction, two stories in height, with a frontage of 150 ft. 5¾ in. and a depth of 109 ft. 10¾ in. and 121 ft. 9 in. irregular; to be occupied as a store and theatre; extending into the residence district a maximum distance of 21 ft. 9 inches; and

WHEREAS, applicant established his basis of appeal under section 7-b of the building zone resolution and the board deemed that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that

the application be and it hereby is *granted on condition* that the building be restricted to a one-story structure in height with a stadium balcony; that the building shall be erected in accordance with the requirements of article 25 of the building code; that the exterior finish of the wall on the 135th street front shall be of face brick with architectural terra cotta or stone trimmings, with no door opening that any permits required shall be obtained within six months and the building completed within eighteen months from the date of this action, and that a return of the proposed elevation on the 135th street front shall be submitted to this board for approval.

## THE RESOLUTION:

(116-26-S)

WHEREAS, Edward P. Doyle, for Waite & Bartlett, owner, filed, February 11, 1926, a petition for variation from requirements of the labor law as cited in an order of fire commissioner, affecting premises 53 Jackson avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated December 22, 1925, No. 88647-LD, reads:

"1. Remove the substandard fire escapes 1 on the east side of Jackson avenue and one on the west side, Fifth street or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals, adopted May 9th, 1924.

"Note: Among the defects noted are the following:

"Windows on course not fireproof or self-closing.

"No drop ladders in guides from lowest balcony to ground.

"Connecting stairways 65 degrees.

"2. Extend both interior stairways to roof, as per section 271 of the Labor Law."

WHEREAS, the building is non-fireproof, 3 stories in height, frontage on 5th street, 127 ft. frontage on Jackson avenue by 114 ft., triangular in plan; OCCUPIED: cellar, manufacture of transformers, 3 persons; 1st story, machine shop, 6 persons; 2nd story, assembling, 7 persons; 3rd story, machine shop, 9 persons; EXITS: two interior wooden stairways, extending from the 1st story to top story, enclosed in fireproof partitions with wooden doors at openings; sub-standard fire escapes, one on each street front of building, having nonfireproof openings along the course of, extending from second story to the first story by drop ladder to sidewalk; roofs of adjoining buildings: 10 ft. lower at west; and

WHEREAS, the petitioner proposes to provide a ladder to roof in roof from top story; provide 60-degree stairs on roof to sub-standard fire escapes, also signs marked "This is an exit" at all openings to the sub-standard fire escapes; the petitioner contends that the two sub-standard fire escapes are structurally strong; that they would aid the person in entering the building in case of fire.

WHEREAS, that the board of standards and appeals does not make a variation from the requirements of the labor law and the petition be and it hereby is granted as to item 1

on condition that the existing fire escapes shall be provided with a 60-degree connecting stairs, that a goose-neck ladder in guides shall be provided from top balconies to roof; that a counter-balanced drop ladder in guides shall be provided from lowest balconies to ground; that the windows on course of fire escape on 2nd story on Jackson avenue front shall be made fireproof and self-closing; as to item 2 granted on condition that the stair on Jackson avenue front shall be enclosed at top story with fire-retarding partitions and self-closing, fireproof door at opening; that a fixed, double-rung ladder shall be provided within this stair enclosure to scuttle in roof; and on further condition that the building shall not be increased in height or area; and granted only so long as occupancy, use and operation shall remain unchanged.

261-26-S.

PETITIONER—Thomas Sheffield, for Louis Goldstein, owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—27-29 Broadway and 1-7 Dunham place, Brooklyn.

## PEARANCES—

For Petitioner: Thomas Sheffield.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(261-26-S)

WHEREAS, Thomas Sheffield, for Louis Goldstein, owner, filed, March 26, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises 27-9 Broadway and 1-7 Dunham place, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 10, 1924, Order No. 69681-LD, reads:

"3. Arrange the fire escapes on the south and west sides of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. See note.

"Note: Among the defects noted are the following:

"Windows on course not fireproof, self-closing. No connecting stairways. No counter-balanced stairway from lowest balcony to ground."

and

WHEREAS, the building is non-fireproof, 4 stories in height, 25 ft. by 30 ft. and 55 ft., irregular in depth; OCCUPIED for the purpose of upholstery; 1st story, 1 person; 2nd story, 3 persons; 3rd story, 1 person; 4th story, vacant; EXITS: an interior wooden stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; one fire escape on the front and one fire escape on the rear of the building, having fireproof openings along the course thereof, the rear fire escape extending from top story to the second story balcony, with a 60-degree stairs leading to yard of adjoining premises at south; ROOFS of adjoining buildings; 10 ft. lower than premises in question; and

WHEREAS, the petitioner contends that he has complied with all the items of the order, except as to egress from the termination of rear fire escapes; that he has provided a 60-degree stairs leading from the termination of rear fire

# MINUTES

escape to yard of premises adjoining at south, where egress may be had through hallway of No. 23 Broadway to the street; furthermore, the petitioner has filed a letter of consent, signed by the owner of such adjoining premises permitting the use as an exit in case of fire.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects egress from termination of rear fire escape *on condition* that goose-neck ladder shall be provided from top story balcony to roof; that a fixed, iron stairway of not more than 60-degree, shall be provided from 2nd story balcony to open yard of adjoining premises to the rear, with egress therefrom through the passageway of the premises to the south, direct to Broadway; and that the certified consent of the adjoining owner to the rear, for egress to said property, shall be filed with the fire department.

292-26-S.

PETITIONER—Lawrence Scacchetti, for 230 West 39th Street Corp., owner.

THE RESOLUTION—

(292-26-S)

WHEREAS, Lawrence Scacchetti, for 230 West 39th Street Corporation, owner, filed April 6, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 230-232 West 39th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated March 19, 1926, reads (N. B., Applic. 7-1926):

"This amendment is disapproved with the following objection:

"Fireproof windows should comply with Sections 264-7 of Labor Law.";

and

WHEREAS, the proposed building is fireproof, 16 stories in height, 40 ft. 8 in. by 98 ft. 8½ in. in area; OCCUPIED: as a factory building, about 60 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use ¼-in. plate glass in windows on the street front, the maximum size, 1st story, 5 ft. 8 in. by 6 ft. 4 in.; 2nd story, 7 ft. 9 in. by 4 ft. 9 in.; the petitioner contends that this petition is made for the purpose of omitting muntin bars on store windows limiting the glass area to 720 sq. in.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the window openings on street front of lower 1st and 2nd stories, *on condition* that the openings shall be equipped with metal frames and sash, glazed with ¼-in. polished glass; and that the requirements of the labor law shall be complied with in all other respects.

306-26-S.

PETITIONER—John J. Gilmartin, for Ganadeen Realty Corporation, owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—64-70 West 36th street, Manhattan.

APPEARANCES—

For Petitioner: None.

For Administration: Inspector Maher of fire department.

THE RESOLUTION:

(306-26-S)

WHEREAS, John J. Gilmartin, for Ganadeen Realty Corporation, owner, filed, April 9, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 64-70 West 36th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 9, 1926, reads (Order No. 89551-LD):

"Inspection shows the following to be necessary to make the above premises comply with the requirements of the Labor Law.

"1. Remove Cigar Stand in main hall on 1st story, Rule 5, Board of Standards and Appeals, adopted July 29, 1924, and Section 272 of the Labor Law.";

and

WHEREAS, the building is fireproof, sixteen stories in height, 100 ft. by 98 ft. in area at 1st story and 100 ft. by 89 ft. 5 in. in area above. OCCUPIED: First story, store; upper stories, offices, show rooms and 25% manufacturing; 160 persons per story. Petitioner occupying a portion of the main hallway for a cigar stand. EQUIPPED with sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, petitioner contends that the cigar stand is not in the line of travel from the stairs to the street; that the hallway is 12 ft. wide at the cigar stand and contends further, that, owing to the incombustible nature of goods sold that there is no hazard.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* on condition that the area of the foyer hall shall not be decreased and that the stand shall not be changed from present location, and that there shall be no open flame maintained and that a clearance of not less than 12 ft. shall be maintained between the counter and the enclosure of the stair hall.

313-26-S.

PETITIONER—Samuel Rosenblum, for E. Katz, lessor of 14th floor.

SUBJECT—Variation of the labor law as cited in order of superintendent of buildings.

PREMISES AFFECTED—58-64 West 40th street (14th floor), Manhattan.

## THE RESOLUTION:

(313-26-S)

WHEREAS, Samuel Rosenblum, for E. Katz Special Advertising Agency, lessee, filed, April 13, 1926, a petition for variation from the requirements of the labor law, as cited in order of the superintendent of buildings, affecting premises Nos. 58-64 West 40th street (14th floor only), Borough of Manhattan; and

WHEREAS, the order of the superintendent of buildings, dated March 2, 1926, reads (Order No. 971-1926):

"You are hereby directed to remove combustible partitions forthwith."

WHEREAS, the building is fireproof, sixteen stories in height, 74 ft. by 98 ft., 9 in. in area at 1st story and 74 ft. by 7 ft., 11 in. in area above; OCCUPIED as offices, show rooms and 25% manufacturing, approximately 500 persons on the 1st story, petitioner occupying the 14th story, as advertising agency, 30 persons; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in roof partitions with fireproof doors at openings; and

WHEREAS, petitioner contends that no manufacturing is on the premises under consideration; that the partitions merely enclose the executive offices; that the upper portion of the partitions are constructed of glass and requests that these partitions be permitted to remain as at the present conditions of occupancy and use are maintained.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, so far as it affects the partitions of the executive offices of the front of the building, 14th floor, on condition, that no manufacturing shall be maintained on any portion of the 14th floor and that the partitions shall be removed on or before the expiration of the existing lease, February 1st,

25-S.  
PETITIONER—Croker National Fire Prevention Engineering Co., for Shapiro Candy Manufacturing Co., lessee.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—11-13 Emerson place, Brooklyn.

## THE RESOLUTION:

(1074-25-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for Hattie Shapiro, owner, filed, October 20, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 11-13 Emerson Place, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 2, 1925, reads (Order No. 82576-LD):

"1. Extend the interior stairway at the northeast corner of building from 2nd to 1st story and provide and

maintain a continuous safe and unobstructed passageway of at least the same width as the stairway leading to the street from the termination of said stairway as per Section 271 of the Labor Law.

"2. Remove the substandard fire escape located in the interior court or reconstruct same as per Section 274 of the Labor Law and Rule 3, Board of Standards and Appeals, adopted May 9th, 1924.

"NOTE:—Among the defects noted are the following: Windows on course not fireproof self-closing. No 60 degree connecting stairway. No stairway from top balcony to roof. Structurally unsafe. No safe egress from termination.";

and

WHEREAS, the building is non-fireproof, 4 stories (47 feet) in height, 50 feet by 129 feet, 6 inches in area. OCCUPIED: 1st story, shipping, 2 persons; 2nd story, packing candy, 30 persons; 3rd story, candy manufacturing, 12 persons; 4th story, shoe manufacturing, 55 persons. EQUIPPED with a sprinkler system. EXITS: An interior wooden stairway at the southeast side of the building, extending from the 1st story to top story; enclosed in wood board partitions with wooden doors at openings; and also, an interior wooden stairway at the north center of the building, extending from the roof to the 2nd story; thence to the 2nd story balcony of the sub-standard fire escape (in the inner court), and by means of iron stairway to yard. EGRESS from inner court yard by means of door, in the west wall of court, to street. ROOFS of adjoining buildings, 3 stories lower; and

WHEREAS, petitioner proposes to remove that portion of the sub-standard fire escape (on the north wall of the court) above the 2nd story balcony and requests the acceptance of the existing means of exits.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to item 1, on condition, that a door at 2nd story opening out to the 45 degree exterior iron stairs in the courtyard shall be provided with unobstructed egress from the termination of said iron stairs to the front and rear through the first story to the street and yard, and granted, as to item 2, on condition, that the existing fire escape shall be made structurally safe and that connecting 60 degree stairs shall be provided with gooseneck ladder from the top story balcony to roof and a drop ladder in guides from the lowest balcony to ground with unobstructed egress as above, and that the occupancy and use remain otherwise unchanged.

316-26-S.

PETITIONER—Samuel Rosenblum, for Mary C. Morrison, owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—17 East 55th street, Manhattan.

## THE RESOLUTION:

(316-26-S)

WHEREAS, Samuel Rosenblum, for Mary C. Morrison, owner, filed, April 13, 1926, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises 17 East 55th street, Borough of Manhattan; and

# MINUTES

WHEREAS, the decision of the superintendent of buildings, rendered March 17, 1926, reads:

"3. Provide safe fireproof passageway from termination of rear fire escape. Windows above 3rd floor must be fireproof, self-closing.

"4. Extend interior stairway to roof and enclose same."

and

WHEREAS, the building is non-fireproof, 5 stories in height, 25 ft. by 95 ft., 5 in. in area at 1st story and 25 ft. by 90 ft., 5 in. in area above. OCCUPIED: First story, dressmaking, 25 persons; 2nd story, show room and offices, 15 persons; 3rd story, light manufacturing, 20 persons and also dwelling; 4th story and 5th story, dwelling. EXITS: An interior wooden stairway, extending from the 1st story to top story (with iron ladder to scuttle in roof); enclosed in fire-resisting partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof (excepting on the 4th and 5th stories), extending from the roof to the yard; with EGRESS from the termination of the fire escape by means of an opening to the yard at the west and also by means of a fire escape stair which connects with the fire escape of the building to the east; ROOFS of adjoining buildings, to east, 6 ft. higher; to west, 4 ft. higher; and

WHEREAS, petitioner contends that under the former modification the factory occupancy was only on the ground floor and that no second means of egress was necessary above; that it is proposed to provide—by means of the fire escape, as proposed—a secondary means of exit and petitioner requests the acceptance of same.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to item 3, only so far as it affects the egress from the termination of the fire escape and the fire-proofing of the windows of the 2 upper stories now occupied as dwellings, on condition that egress shall be provided at yard level in the rear from the termination of the fire escape to the 3 adjoining properties, to the east, west, and north through open yards with egress therefrom through plain glass windows to the street and from premises at the east by iron stairway to the rear exterior fire escape of same, and granted, as to item 4, on condition, that a fixed double-rung iron ladder shall be provided in the enclosure within the stair hall of the top story and that any door thereto shall be removed and discontinued, and on the further condition that the conditions adopted by this board under the resolution of Cal. No. 391-25-S, in other respects, shall be also included as conditions of this resolution and that both shall be jointly maintained.

336-26-S.

PETITIONER—Victor Mayer, for Varick Charlton Corporation, owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—171-177 Varick street and 59-69 Charlton street, Manhattan.

APPEARANCES—

For Petitioner: Victor Mayer.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative ..... 0

Absent: Commissioner Guilfoyle ..... 1

THE RESOLUTION:

(336-26-S)

WHEREAS, Victor Mayer, for Varick Charlton Corporation, owner, filed, April 17, 1926, a petition for variation

from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 171-177 Varick street, and Nos. 59-69 Charlton street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings dated February 27, 1926, reads (N.B.-Applic. 728-25):

"This amendment is disapproved with the following objection:

"8. Glazing of windows for stores on 1st floor shall comply with Section 264 of Labor Law."

and

WHEREAS, the building is fireproof, 10 stories in height, 75 ft. by 150 ft. in area; OCCUPIED as a factory building about 80 persons on each story; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use plate glass windows on street front at 1st story, the maximum size 6 ft. by 9 ft.; the petitioner contends that by dividing the glass into smaller lights would mar the architectural design and interfere with the renting of the stores.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only, so far as it affects the windows on the front of building on the 1st story, on condition, that the openings shall be provided with approved metal frames, glazed with ¼ in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(374-26-S)

WHEREAS, Croker National Fire Prevention Engineer-  
ing Company, for Nathan Abend, owner, filed, April 28,  
1926, a petition for variation from the requirements of the  
labor law, as cited in an order of the fire commissioner,  
affecting premises No. 207 Canal street, Borough of Man-  
hattan; and

WHEREAS, the order of the fire commissioner, dated  
August 27, 1925, reads (Order No. 84281-LD):

"1. Arrange the fire escape on the rear of the build-  
ing and the openings leading thereto and the windows  
opening on the course thereof so that same are in com-  
pliance with the provisions of Sections 273 and 274 of  
the Labor Law and the rules of the Board of Stand-  
ards and Appeals.

"Among the defects noted on this fire escape are the  
following: No stairway from lowest balcony to ground.  
No safe passageway to the street from the termination.

"2. Extend the interior stairway at the west side  
of building to the roof, as per Section 271 of the Labor  
Law.

"3. Enclose the interior stairway at west side of  
building serving as a required means of exit, on all  
sides with partitions of fire resisting material extend-  
ing continuously from the floor of the 1st story to  
under side of floor above including any exposed stair  
soffits, landing and passageways, openings shall be pro-  
vided with approved self-closing fire doors, constructed  
as per Section 271 of the Labor Law and Rule 2 of  
the Board of Standards and Appeals adopted July 29th,  
1924.";

and

WHEREAS, the building is non-fireproof, 5 stories in  
height, 26 ft., 4 in. by 64 ft. in area at 1st story and 26  
ft., 4 in. by 54 ft. in area above. OCCUPIED: 1st floor,  
lunchroom; 2nd floor, screw machine products, 2 persons;  
3rd floor, vacant, to be occupied; 4th floor, manufacturing  
metal buttons, 2 persons; 5th floor, storage of metal buttons.  
EXITS: An interior wooden stairway, extending from the  
1st story to top story (with ladder to scuttle in roof); en-  
closed in wooden partitions with wooden doors at open-  
ings; a fire escape on the rear of the building, having fire-  
proof openings along the course thereof, extending from  
main roof to the 1st story extension roof (there being party  
wall balconies on the 3rd and 4th stories); with EGRESS  
from the termination of the fire escape by means of ad-  
joining extension roofs; and by stairs from same leading  
to yard, thence by passageway to Mulberry street. ROOFS  
of adjoining buildings, at same level; and

WHEREAS, petitioner, as to item 3 (enclosing interior  
stairway), proposes to cover the hall side of the partition  
with 1/2 in. plaster board and 26 gauge metal and also to  
cover the exposed portion of the stair enclosure in the  
store (lunch room) side in a similar manner; and requests  
the acceptance of the other means of egress.

*Resolved*, that the board of standards and appeals does  
hereby *make a variation* from the requirements of the  
labor law, and that the petition be and it hereby is *granted*  
as to item 1, only so far as it affects egress from the  
termination of the lowest balcony, *on condition*, that the  
balcony shall be connected by iron platform and stairs to  
the roof of the 1st story extension of the premises to the

# MINUTES

north, with egress therefrom through bulkhead door to No. 109 Mulberry street; and *granted*, as to item 2, *on condition* that a fixed double-rung iron ladder to the scuttle in the roof shall be provided in the top story hall enclosure; and *granted*, as to item 3, only so far as it affects the store side, where not now covered with store fixtures, and only so long as conditions as to occupancy and use otherwise remain unchanged.

378-26-S.

PETITIONER—Edward P. Doyle, for Rhinelander Real Estate Company, owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—171 Sixth avenue, Manhattan.

APPEARANCES—

For Petitioner: Edward P. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(378-26-S)

WHEREAS, Edward P. Doyle, for Rhinelander Real Estate Co., owner, filed, April 29, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises No. 171 Sixth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated March 31, 1926, reads:

"In answer to your letter of March 3, 1926, we beg to state that the following objections exist to the issuance of Certificate of Occupancy for above premises:

"1—The interior wood stairs will have to be extended to roof;

"2—Stairs should be enclosed by fire resisting partitions;

"4—No acceptable 2nd means of exit as required by the Labor Law.";

and

WHEREAS, the building is non-fireproof, 4 stories in height, 49 ft. by 75 ft., irregular in area; separated into two sections by a fore and aft brick wall. OCCUPIED: 1st story, stores; 2nd story (north) manufacturing furrier, 5 persons; (south) cloaks and suits, 13 persons; 3rd story (north), manufacturing furrier, 5 persons; (south) furrier, 10 persons; 4th story (north), engraver, 2 persons; (south) cloaks and suits, 10 persons. EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to top story, with ladder to scuttle in roof, enclosed in wooden partitions with metal clad doors at openings; two fire escapes on the rear of the building, both having fireproof openings along the course thereof, both extending from the main roof to the roof of the 1st story extension; with EGRESS from the termination of the fire escape by means of adjoining one story extension roofs. ROOFS of adjoining buildings: To west 2 ft., 6 in. lower; to north, same level; and

WHEREAS, petitioner contends, in view of the light occupancy, that the existing means of egress are adequate; and

WHEREAS, petitioner withdrew item 3 of petition; and

WHEREAS, the board in acting on these same premises under Cal. No. 224-23-S, had substantially the same matter of petition before them and granted same under condition.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the

labor law, and that the petition be and it hereby is *granted* as to items 1, 2 and 4 *on condition* that the variation recommended in the action of the board of review of the fire department on July 2, 1918, shall be complied with; that certified copy of such action of the board of review shall be filed with the superintendent of buildings; and *on further condition* that the occupancy shall not exceed 25 persons above 2nd story.

1162-25-S.

PETITIONER—Croker National Fire Prevention Engineering Company, for Market Managing and Operating Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—848-852 Washington street, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(1162-25-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for Market Managing and Operating Company, owner, filed, November 10, 1925, a petition for variation from the requirements of the labor law as cited in a order of the fire commissioner, affecting premises 848-852 Washington street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 15, 1925, No. 83803-LD, reads:

"2—Arrange the fire escape at north westerly corner of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 230 and 274 of the Board of Standards and Appeals, and carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE—Defects—No fireproof passageway from termination to street, rusted, requires painting.

"3—Extend the interior stairway at north side of building to roof, as per Section 271 of the Labor Law.

"NOTE:—Plans for all structural changes should be filed in the Bureau of Buildings as required by Chapter 503, Laws of 1916.";

and

WHEREAS, the building is non-fireproof, five stories in height, 52 ft. by 50 ft. in area. OCCUPIED: 1st story, 15 persons; 2nd story, carpenter shop, 5 persons; 3rd story, storage, 12 persons; 4th story, shipping, 4 persons; 5th story, manufacture of cake products, 8 persons. EXITS: An interior wooden stairway, extending from 1st story to top story, enclosed in wooden partitions with wooden doors at openings; a sub-standard fire escape on rear-south and a fire escape on the rear-north end of building, having fireproof openings along the course thereof extending from roof to the yard level, with EGRESS from the termination of the fire escape through adjoining building at west to the street; ROOFS of adjoining buildings: same level at north and south; and

WHEREAS, the petitioner contends as to item 2, that fire escapes in question are party wall fire escapes, access may be had to adjoining building at north on 2nd floor; that egress from the termination of fire escapes may

# MINUTES

also be had through the one story building adjoining at west, thence to 13th street; furthermore, the petitioner aims that the sub-standard fire escapes at rear south end of building connect with the fire escape of adjoining building at south, through which egress may also be had to 12th street; the petitioner contends as to item 3, that there are three means of exit from each story of the building.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* as to item 2, only so far as it affects egress from the termination of the fire escape, *on condition*, that the yard shall be maintained opened, with unobstructed egress therefrom through plain glass door to the adjoining premises fronting on East 13th street, and *granted*, as to item 3, *on condition* that a fixed double-rung iron ladder shall be provided in the top story hall enclosure to a scuttle in the roof, and *on further condition* that occupancy shall not be increased.

25-26-S.

PETITIONER—Croker National Fire Prevention Engineering Company, for Market Managing & Operating Co., Inc., lessee.

THE RESOLUTION:

(295-26-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for Market Managing and Operating Company, lessee, filed, April 6, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises 442 West 13th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 21, 1925, No. 88567-LD, reads:

"1—Arrange the fire escape on the south side of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Sections 271 of the Labor Law.

"NOTE:—Among the defects noted on this fire escape are the following: Windows opening on course on 3rd story not fireproof nor self-closing. Fireproof windows on course not self-closing. No safe passageway to the street from the termination.

"2—Extend the interior stairway at the north side of building to the roof, as per Section 271 of the Labor Law. SEE NOTE.

"3—Enclose the interior stairway north side of building, serving as a required means of exit, with partitions of fire resisting material extending continuously from the floor of the 2nd story to the underside of the 4th floor, including any exposed stair soffits, landings and passageways, openings shall be provided with approved self-closing fire doors constructed as per Section 271

of the Labor Law and Rule 2 of the Board of Standards and Appeals revised and adopted July 29th, 1924, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 5 stories in height, 84 ft., 6 in. by 52 ft., 6 in. in area. OCCUPIED: 1st story, stores; 2nd and 3rd stories, manufacture of paper boxes, 15 persons; 4th story, manufacturing of jewelry boxes, 10 persons; 5th story, pattern making, 8 persons. EXITS: An interior wooden stairway, extending from the 1st story to top story, enclosed in wooden partitions with wooden doors at openings; a fire escape on the south side of the building, having fireproof openings along the course thereof, extending from roof to the bottom of the northerly interior court, with EGRESS from the termination of the fire escape by means of plain glass windows of the building adjoining at north; ROOFS of adjoining buildings, 2 stories lower at west; same level at south; and

WHEREAS, the petitioner proposes to comply with item 1, except as to egress from the termination of fire escapes which may be had through adjoining building at north and which is provided with plain glass windows; as to item 2, the petitioner contends that the fire escapes at south side extend to the roof, and, furthermore, he proposes to erect a double-rung iron ladder in hallway to a roof scuttle; as to item 3, the petitioner contends that the occupancy of paper box manufacture which is the cause of this violation will be discontinued after May 1, 1927, at which time the lease expires.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* as to item 1, only so far as it affects egress from the termination of the party wall fire escape, *on condition* that egress from the termination of fire escape shall be maintained with unobstructed egress through door with plain glass panel, to the premises adjoining at the west to 13th street; and *granted*, as to item 2, *on condition*, that a fixed double-rung iron ladder shall be provided from the top story hall to the scuttle in the roof, and only so long as conditions as to occupancy and use shall remain unchanged; and *denied* as to item 3.

THE RESOLUTION:

(379-26-S)

WHEREAS, James H. Browning, for Topping Brothers, owner, filed, April 30, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 159 Varick street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 25, 1925, reads (Order No. 85586-LD):

"1. Arrange the doors leading to the stairway at north easterly side of building on all stories upon which

# MINUTES

five or more persons are employed, so as to open outwardly without obstructing the stairway, as per Section 271 of the Labor Law.”;

and

WHEREAS, the building is fireproof, 7 stories in height, 125 ft. by 100 ft. in area. OCCUPIED: Cellar storage of hardware, 4 persons; 1st story, storage of hardware, 40 persons; 2nd story, storage of hardware, 4 persons; 3rd story, storage of hardware, 3 persons; 4th story, printing, 33 persons; 5th story, printing, 30 persons; 6th story, printing, 28 persons; 7th story, printing, with 30 persons; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, each enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, petitioner contends that the order applies to the sliding door located on the 1st story at the south side of the northwesterly (Varick street) stairway; that this present 3 ft., 8 in. wide door is equipped with fusible links and is hung on a slanting rail; that no manufacturing is done on this story and that the existing means of egress are adequate.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION:

(413-26-S)

WHEREAS, Samuel Rosenblum, for E. M. Tamblyn, lessee, filed, May 12, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 113 East 30th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 6, 1926, reads (Order No. 90738-LD):

“1. Provide an outside iron balcony fire escape on front of building with balconies 4 ft. in width connected by stairways not less than 22 in. wide, placed at an incline of not more than 45 degrees, extending from the ground to the highest story, constructed as per Sec. 273, of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Sec. 271 of the Labor Law.

“2. Extend the interior stairway at the west side of building to the roof, as per Sec. 271 of the Labor Law.”;

and

WHEREAS, the building is non-fireproof, 4 stories in height, 18 ft., 10 in. by 80 ft. in area at 1st and 2nd stories and 18 ft. by 60 ft. in area above. OCCUPIED: 1st story, office and salesroom of gifts, 5 persons; 2nd story, dressmaker (living apartments and some sewing), 3 persons; 3rd story, dwelling (3 persons); 4th story, manufacturing novelty gifts, 9 persons. EXITS: An interior non-fireproof

stairway, extending from the 1st story to top story; closed in lath and plaster partitions with wooden door openings; a proposed 60 degree fire escape on the front of the building, having fireproof openings along the corner thereof, extending from the top story (with goose ladder to roof) to the 2nd story balcony with counter-weighted drop ladder in guides to street; ROOFS of joining buildings, to west, 11 ft. lower, to east, 1 ft. high and

WHEREAS, petitioner requests, in view of the light occupancy of the premises, the acceptance of the proposed escape and proposes to install an iron ladder to scuttle in lieu of extending the stairs to roof.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of labor law, and that the petition be and it hereby is granted on condition, that an exterior fire escape shall be provided on the front of the building, with connecting stairs, more than 60 degrees, and a counter-balanced drop ladder in guides from the lowest balcony to the street; granted as to item 2, on condition, that a fixed double-iron ladder shall be provided within the enclosure from top story to the scuttle in the roof, and only so long as conditions as to occupancy and use otherwise remain substantially unchanged.

THE RESOLUTION:

(480-26-S)

WHEREAS, William F. Doyle, for Central Zone Corporation, owner, filed, May 27, 1926, a petition for variation from the requirements of the Labor Law, as cited in decision of the superintendent of buildings, affecting premises 15-19 East 33rd street and 18-22 East 34th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings rendered May 21, 1926, reads:

“Relative to application for Certificate of Occupancy for the above premises we beg to advise you that the inspection shows the area of glass in all exterior windows on all floors exceeds 720 square inches per floor. Application for Certificate of Occupancy is therefore disapproved.”;

and

WHEREAS, the building is fireproof, 20 stories in height, 80 ft. frontage on East 33rd street and 75 ft. frontage on East 34th street by 197 ft., 6 in. in area; OCCUPIED: an office building, 25 per cent manufacturing; EQUIPPED with a sprinkler system. EXITS: An interior fireproof stairway extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings

# MINUTES

WHEREAS, the petitioner contends that the windows on two street fronts are glazed with plain glass, the maximum size on 1st story, 8 ft. by 15 ft.; 2nd story, 6 ft. by 12 ft.; 3rd and 4th stories, 6 ft. by 4 ft.; upper stories, 6 ft. by 4 ft. sq. in. in area; that the building is used for light manufacturing to the extent of 25 per cent only; that the building complies with the labor law in all other respects. *Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, *on condition*, that any industrial factory occupancy shall be limited to 10 per cent of the entire floor area and shall be restricted to light industrial needle work and shall be further limited to such portion of the building above the 12th story setback, and *on condition* that the requirements of the labor law shall be complied with in all other respects.

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin ..... 5  
Absent ..... 0

RESOLUTION:

(486-26-S)

WHEREAS, Schreiber, Collins, Myers & Buchter, for Broadway-Thirtieth Street Corporation, lessee, filed, May 1926, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises 22 East 55th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated April 29, 1926, reads:

"Relative to application for Certificate of Occupancy for above premises, our records show that the building is non-fireproof erected under New Building Application 116-1920 for use as offices and showrooms. To use the building for factory the building must comply with Section 270 of the Labor Law which requires that the building be fireproof construction.";

WHEREAS, the building is non-fireproof, seven stories in height, 20 ft. by 80 ft. in area at 1st story and 70 ft. in area above. OCCUPIED: 1st story, 2nd (mezzanine) story, beauty parlor, 6 persons; 3rd, manufacturer of coats, 15 persons; 4th story, manufacture of suits, 13 persons; 5th story, manufacture of garments, 3 persons; 6th story, dressmaking, 7 persons; 7th story, importer, 3 persons. EXITS: An interior fireproof stairway, extending from the 1st story to roof, and in fireproof partitions with fireproof doors at each floor; ROOFS of adjoining buildings, 16 ft. lower at same level at east; and

WHEREAS, the petitioner proposes to provide a fire escape from the rear of the building in accordance with the requirements of the labor law, except as to egress to the street; proposed fire escape will connect with the fire escape at the second and third stories of the building

adjoining at east, thence through fire passage to the street; the petitioner also proposes to install a sprinkler system, fire alarm system and conduct fire drills; furthermore, the petitioner contends that the building was erected prior to 1913; that the building has been leased as a tenant factory for long terms under a misapprehension of the class of building.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

241-17-S.

PETITIONER—William Barthman, owner.

SUBJECT—Application for reopening—modification of resolution—re variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—174 Broadway and 1 Maiden Lane, Manhattan.

APPEARANCES—

For Petitioner: William C. Barthman.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and modified.

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(241-17-S)

WHEREAS, Robert C. Greinert, manager, D. A. Cushman Realty Corporation, owner, filed, February 21, 1917, a request for an amendment to the resolution adopted August 24, 1916, under Cal. No. 50-16-S, to change the time limit for compliance with department of labor orders from May 1st, 1917, to May 15, 1917, premises No. 1 Maiden Lane; and

WHEREAS, this request was denied by the board at its meeting Mar. 8, 1917, and petitioner complied with the resolution under Cal. No. 50-16-S, and removed factory occupancy; and

WHEREAS, present owner William Barthman, requests a reopening of the case and permission to maintain a factory occupancy on the 11th floor.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is *granted* so far as it affects the rear room on the 11th story, in the same ownership as the operator of the jewelry store on the street grade, for use and occupancy of jewelers for the readjustment and minor repairs of jewelry purchased in the owner's store on same premises (1st story), *on condition* that iron steps shall be provided from the workshop of No. 176 Broadway, such opening to be provided with a casement door, opening out with egress therefrom to the interior stairs on that building.

APPLIANCES SUBMITTED FOR APPROVAL.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO FUEL OIL RULES.

(217-21-SR)

(598-19-SR)

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Monday, July 30, 1926, at 10 a. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules. Matter in *italics* is new. Matter in [ ] is old matter removed.

### Article 1. Definition.

The term "fuel oil" under these rules includes any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and fuel oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

#### Grade A Fuel Oil Shall Include:

Fuel oil used for fuel purposes under these rules which show a minimum flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

#### Grade B Fuel Oil Shall Include:

Fuel oil used for fuel purposes under these rules which show a minimum flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

### [Rule 33.] Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial buildings, a Certificate of Qualification will be required as provided in Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow tile of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have no entrance from the street only, and shall be adequately ventilated direct to the outer air.

(a) No person, firm, company or corporation shall violate the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

### [GRADE A FUEL OIL.]

#### Manner of Storage for [Grade A] Fuel Oil.

Fuel oil, to be used for [commercial] heating and power purposes, shall be at all times contained in metal tanks without openings or connections through the tops of the tanks.

#### General Location of Tanks for [Grade A] Fuel Oil.

In all *except* fireproof buildings fuel oil storage tanks shall be buried below the floor of the lowest story

in the manner required for tanks outside of the building or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of wall separating building from subway and, if practical, tanks shall be placed in a lower position than the roadbed of subway.

### Rule 4A. Location and Capacity of Tanks for the Storage of Grade A Fuel Oil.

#### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space surrounding the tank formed by the enclosure walls and roof shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is adequately ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

#### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried below a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Section 1 (g) and (h).

[(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.]

[(c) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.]

#### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# PUBLIC HEARING

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above grounds, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

## Rule 4B [19.] Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, *unless an approved anti syphon valve is used*, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Material and Construction of Tanks for the Storage of [Grade A] Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Same shall be free

from physical imperfections, such as, laminations, cracks etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. shell and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should the owner desire to use flat heads, these flat heads must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

### Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality before mentioned for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles at the builder's option.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will support the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of (6) inches center to center on these members.

(f) When structural reinforcing members are used together with braces, in order to reduce the effective length, the braces shall not be stressed higher than ten thousand (9,000) pounds per square inch taken on minimum net section.

(g) If structural members are omitted and the sides of the tank are braced entirely by means of rods or these members should not be spaced greater than twenty-four (24) inches center to center in all directions. Unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch taken in the minimum net section.

(h) The fastening between these members at the sides of the tank must in all cases be such that it will develop the full net sections of the bars; in other words, the bar will break before the connection will let go.

### Section 3. Vertical Storage Tanks Located Outside of Buildings Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality before mentioned for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of

# PUBLIC HEARING

thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

t equals head pressure at bottom of ring under condition.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (50,000 pounds per square inch).

E equals efficiency of vertical joint in ring under condition (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

Roof plates shall have single riveted water tight and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate shall be designed, with proper efficiency to meet requirements in above formula for shell plates.

In all cases, steel tanks for the storage of fuel shall be built metal to metal. No filler of any kind shall be permitted.

Rule 20 (a) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this section except that tanks of a capacity of over 60 gallons and less than 550 gallons may be constructed of steel not less than 1/16 inch in thickness.

20 (b) Auxiliary supply tanks of 60 gallons or less may be constructed of brass, copper, steel or iron of not less than No. 14 U. S. Gauge.

## Section 4. Welding.

Where welding is to be used for a part or for the whole of the tank, the tank shall be fabricated as required under this section.

All welded seams of plates shall be lapped or butt jointed.

If the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight metal to metal before welding and kept tight together during welding.

Both inside and outside welds shall be of full penetration fillet.

If a butt joint is used, it shall be of the 90 deg. V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

All heads shall be flanged, the straight part of the flange being not less than as follows:

For 3/16 inch heads, 1 3/4 inch flange.

For 1/4 inch heads, 2 inch flange.

For 5/16 inch heads, 2 inch flange.

For 3/8 inch heads, 2 1/4 inch flange.

For heads over 120 inches diameter the flange shall be 1/2 inch in length by one-half inch for each increase in diameter of 2 feet.

When heads are set into the shell, they shall be a close fit and the shell shall fit the head closely all around.

If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

If the heads are butt welded to the shell, the head shall be reinforced to a total thickness of at least one and one-half times the shell thickness.

For tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-half of the shell thickness.

For tanks of 1,100 gallon capacity the head welds shall be of the double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

Where tanks are made up of two or more rings of longitudinal joints of adjacent sections shall be welded.

At no point of a butt girth joint shall the plates on one side be offset with the sheet on the other side by more than one-half of the thickness of the plate.

Girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, in which they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 6. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half (1 1/2) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth (1/4) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; masonry or impervious reinforced concrete. Earthwork embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half (1 1/2) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

### Section 2. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half (1/2) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit, there shall be kept ready for use, a hand fire extinguisher of not less than two (2) quarts capacity suitable for extinguishing oil fires.

## Rule 7. Tests of Tanks for the Storage of [Grade A] Fuel Oil.

### Section 1. Inside of Buildings or Outside Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks,

# PUBLIC HEARING

shall withstand after being set in place, a hydrostatic *or oil* test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic *or oil* pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic *or oil* test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

## Section 2. Horizontal Tanks Outside Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic *or oil* test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

## Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

## Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 to 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for [Grade A] Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as possible, without sags, and, except as provided in Rule 11-e, shall be laid so that where practicable pipes shall pitch toward the supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted. *Except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.*

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. Hose shall be no longer than necessary.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The minimum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic *or oil* pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than the supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of a pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in. in the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) Where pressure systems are used an automatic by-pass valve of size equivalent to that of the discharge shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

### Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through the building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) Fill pipe shall be provided with a trap or sump carried within four (4) inches of the lowest point of the tank.

(d) Fill pipe shall be made up with screw threaded flanged fittings and shall be oil tight and securely in place.

### Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without a drain and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend below the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be connected into a main header. Connections to the header shall not be less than one foot above the level of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be secured to the aggregate area of vent pipes connected to the tanks. The main vent pipe and header shall be of an area not less than the aggregate area of vent pipes connected to the tanks.

(c) Vent openings shall be screened by 40 mesh galvanized wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation.

# PUBLIC HEARING

shall be not less than two (2) inches in diameter tanks over 1,100 gallons capacity, and in no case less than one and one-quarter (1¼) inches in diameter.

Vent pipes shall be provided with weather hoods and terminate outside the building above the surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stair or fire escape, nor shall vent pipes be placed in or on dumb-waiter shafts, or in an enclosed court. If compelled, because of structural conditions, the vent outlet shall be higher than twelve (12) feet above the fill box, and if the fill lines are connected to tanks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and parallel the fill line and terminate in the fill box with a threaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow into the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the burner or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

Heating coils to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of water coils thermostatically controlled and the oil shall not be heated above one hundred and forty degrees Fahrenheit.

## Section 9. Valves and Control of Flow for Grade A Fuel Oil.

Control valves at the burners shall be of a sub-type, provided with a stuffing box of liberal size having a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the burner. The use of packing which may be affected by heat is prohibited.

A shut-off valve shall be provided in discharge lines near each pump; in discharge line between each tank as near the tank as practicable, and in lines near each burner.

## Section 10. Oil Level Indicating Device for Grade A Fuel Oil.

A well or gauging device shall be installed and so arranged as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept closed when not in use.

## Section 11. Pumps for Grade A Fuel Oil.

Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

Pumps shall be installed in duplicate where fire fighting equipment is dependent on the use of fuel for heating or steam.

Pumps located in the same room where burners are located shall be provided with a remote control. Pumps used in connection with outside above ground storage tanks shall be located outside embankments, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

Pumps may be located below the top of the oil tank or tanks where heavy oil is used having a flash point not more than eighteen (18) degrees Baume

and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 11B. [Rule 24.] Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11A (a).

## Rule 12. Burners for [Grade A] Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. *In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.*

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer walls with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Other Than Domestic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of qualification from the Police Commissioner. A certificate of qualification will be required of each person who is directly in charge of the operation of the plant during each shift.

## Rule 16. Installation.

No fuel oil system shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil system shall be submitted to the Fire Commissioner, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## [Rule 17. Systems Prohibited Where Grade A Fuel Oil Is Used.

Systems fed by gravity or force systems are prohibited.]

## [GRADE B FUEL OIL.]

## [Rule 18. Manner of Storage for Grade B Fuel Oil.

Fuel oil to be used for domestic heating purposes where stored, shall be at all times contained in closed metal tanks.]

## [Rule 19. Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal

# PUBLIC HEARING

outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

## 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.]

### [Rule 20. Material and Construction of Tanks for Grade B Fuel Oil.

(a) Tanks shall be constructed in accordance with the requirements of Rule 5, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

(b) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.]

### [Rule 21. Tests of Tanks for the Storage of Grade B Fuel Oil.

All storage tanks located inside of buildings, either on or below the lowest floor level, or outside buried tanks, shall withstand a hydrostatic test for at least 30 minutes, of not less than twenty-five (25) pounds per square inch and shall show no leaks.]

### Rule 17. [22.] Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frame or cradle and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

### [Rule 23. Oil Level Indicating Device for Grade B Fuel Oil.

Gauging devices or test wells, the breakage of which would permit the escape of oil or vapor within the building, shall be prohibited. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

### [Rule 24. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11 (a).]

### [Rule 25. Piping for Grade B Fuel Oil.

#### Section 1. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel. Supply pipe shall be not less than one-fourth (1/4) inch in diameter, iron pipe size.

All piping shall be buried so far as it is practicable.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire retarding materials. Hose shall be no longer than necessary.

#### Section 2. Tests.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

#### Section 3. Fill Pipes.

See Rule 8, Section 5—(a), (b), (c) and (d).

#### Section 4. Vent Pipes.

See Rule 8, Section 6—(a), (b), (c), (d) and (e).

#### Section 5. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.]

### Rule 18. [26.] Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided for each burner and in the discharge line from each storage tank.

[(b) See Rule 9 (a) for construction of valves.]

(b) [(c)] A remote or thermostatic control for shutting off the supply of oil to the burners shall be provided.

(c) [(d)] An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the discharge line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-combustible materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent of the maximum working pressure.

### [Rule 27. Burners for Grade B Fuel Oil.

Burners shall be of a recognized standard type approved by the Board of Standards and Appeals and shall be equipped with an overflow attachment so arranged as to shut off the flow of oil to prevent flooding.]

### Rule 19. [28.] Pilot Light.

Automatic systems unless electrically ignited shall be designed that the flame cannot be extinguished by operation of the automatic control valve and a [A] pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not be easily extinguished.

### Rule 20. [29.] Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices originally designed for use of fuel other than oil shall not be used in connection with oil burners unless the space in which vapors might collect are adequately ventilated and if used shall be of such construction as to withstand the maximum temperature of which the oil burner in use is capable.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be installed in a smoke pipe or flue.

### Rule 21. [30.] Fire Protection in Domestic Installations.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) Any woodwork, wooden lath and plaster, or other combustible material within four (4) feet of the sides or back or eight (8) feet from the front of the furnace shall be covered with approved plaster or other approved incombustible material. Above the furnace there shall be constructed a ceiling consisting of plaster board covered with 26 U. S. gauge sheet metal or three-fourths (3/4) of an inch of Portland cement on metal lath; said ceiling shall extend four (4) feet beyond the sides and back and eight (8) feet from the front.

(c) Near the furnace, and so located as to be convenient for use in emergency, there shall be installed a hand fire extinguisher of an approved type for use on oil fires.

### [Rule 31. Instruction Cards.]

See Rule 14.

### [Rule 32. Installation.]

See Rule 16.

# PUBLIC HEARING

## Rule 33. Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial plants, a Certificate of Qualification will be required as per Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately ventilated direct to the outer air.]

## Rule 22. [34.] Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by

gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 23. [35.] Use of Grade A or Grade B Fuel Oil.

(a) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

(b) These Rules shall not apply to gas companies in the storage or use of fuel oil in the manufacture of illuminating gas for public use.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(d) These Rules shall take effect immediately.

# CONCRETE RULES

## USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

Hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights being the amount of lime which may be incorporated in each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First,* That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second,* That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third,* That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in offices of the board and of the further publication of calendars in the daily press.

*Fourth,* That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth,* That the business of the board is to dispose of all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Municipal Building, Rooms 1001 to 1015.

Phone—Worth 0184.

Hours—9 a. m. to 4 p. m. Saturdays, 9 a. m. to noon.

Communications should be addressed to the chairman of the board.

**CONTENTS**

Issue of the Bulletin contains, in the order given—

Index.

Call of Clerk's Calendar.

Trial Calendar.

Cases in Building Zone Cases.

Minutes of Regular Meeting, July 27, 1926, at 10 a. m.

Minutes of Regular Meeting, July 27, 1926, at 2 p. m.

Minutes of Special Meeting, July 30, 1926.

Press Report.

**PUBLIC HEARINGS.**

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

**HOURS FOR CONSULTATION.**

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

**CALL OF CLERK'S CALENDAR.**

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 14, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 21, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

**NOTICE TO APPELLANTS AND PETITIONERS.**

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

**WILLIAM E. WALSH, Chairman.**

## NOTICE.

Notice is hereby given that the board of standards appeals will hold no hearings during the month of August. The next regular meeting of the board of standards and appeals will be held on September 1, 1926, at 10 a. m. and that the next Clerk's Calendar will be held on the same date at 2 p. m.

The office will be open as usual for the filing of appeals, applications and petitions, also for consultations and other business.

## CALL OF CLERK'S CALENDAR

**TUESDAY SEPTEMBER 14, 1926, AT 2 P.**

*Building Zone Cases.*

453-26-BZ.	APPLICANT—John J. Dunnigan, for Pasquale owner.
PREMISES—460-468 Southern Boulevard, The Bronx.	APPLICATION, under sections 7c and 21 of the building zone resolution,
TO PERMIT in a business district extending from the unrestricted district the erection and maintenance of a factory building.	
478-26-BZ.	APPLICANT—Victor C. Farrar, for Baker, Evans Inc., owner.
PREMISES—102 East 40th street, Manhattan.	APPLICATION, under section 21 of the building zone resolution,
TO PERMIT in a residence district the change of use, of a building, from a conforming residential business use on the first story.	

199-26-BZ.	APPLICANT—William F. Doyle, for Hyman Green, owner.
PREMISES—Southwest corner of Forest Parkway and Ruth place, Queens.	

# CALENDAR

PLICATION, under sections 7c and 21 of the building zone resolution,  
 PERMIT in a "F" area district extending from a "C" area district, the erection and maintenance of a tenement house, with the area of lot occupied, yard and courts designed as required by the zone resolution for a "C" area district (previously denied).

26-BZ.  
 PLICANT—Charles DiSapio, for 29th Street Market, Inc., owner.  
 EMISES—206-208 East 29th street, Manhattan.  
 PLICATION, under section 21 of the building zone resolution,  
 PERMIT in a business district the maintenance of a portion of a building as a poultry slaughter house.

SEPTEMBER 14, 1926, 10 A. M.

*Appeals from Administrative Orders.*

25-A—61 West 55th street, Manhattan.  
 25-A—370 West 31st street, Manhattan.  
 26-A—59 Pearl street, Brooklyn.  
 26-A—130-136 West 124th street, Manhattan.  
 26-A—1423-1435 Atlantic avenue, Brooklyn.  
 26-A—176-178 Hope street and 131-133 Union avenue, Brooklyn.  
 26-A—215 Dupont street and 40-50 Paidge avenue, Brooklyn.  
 26-A—638 54th street, Brooklyn.  
 26-A—34 35th street, Brooklyn.  
 26-A—253-263 West 72nd street, Manhattan.  
 26-A—3402-3406 Park avenue, The Bronx.  
 26-A—6600 Metropolitan avenue, Middle Village, Borough of Queens.

*Building Zone Applications.*

NOTICE IS HEREBY GIVEN by the board of standard appeals of a public hearing under the provisions of building zone resolution, *Tuesday morning*, September 14, 1926, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:

0. 361-26-BZ—Application, April 23, 1926, under section 21 of the building zone resolution, of Otto Henschel, applicant, on behalf of Ralph Crisci, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 2263-2275 East 18th street, Brooklyn.

0. 1425-24-BZ—Application, May 11, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Charles Milgrim, owner, to permit in a residence district the maintenance of a factory use of an existing building (previously denied by the board); premises 231 West 74th street Manhattan.

0. 1083-25-BZ—Application, October 23, 1925, under section 21 of the building zone resolution, of Joseph Zicarelli, owner, to permit in a residence district and "B" area district the erection and maintenance of a rear extension, covering more than 40 per cent of the area of the yard space required by the zone resolution; premises 51 West 11th street, Manhattan.

CAL. NO. 17-26-BZ—Application, January 6, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of John Welz, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 168-190 East 98th street, Brooklyn.

CAL. NO. 240-26-BZ—Application, March 20, 1926, under sections 7c and 21 of the building zone resolution, of A. J. Simberg, architect, on behalf of Anna Shulman, owner, to permit in a residence district extending from a business district the erection and maintenance of a building for store purposes; premises 1661 St. Nicholas avenue, northwest corner of Fairview avenue, Manhattan.

CAL. NO. 272-26-BZ—Application, March 31, 1926, under section 21 of the building zone resolution, of William F. Regan, consulting engineer, on behalf of Beardsley Realty Company, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 553-563 Atlantic avenue, Brooklyn.

CAL. NO. 450-26-BZ—Application, May 20, 1926, under section 7c of the building zone resolution, of A. F. Gilbert, architect, on behalf of Manufacturers Trust Company, owner, to permit in a residence district extending from a business district the erection and maintenance of a business building; premises 1696 Myrtle avenue and 1679 Cornelia street, Ridgewood, Borough of Queens.

CAL. NO. 533-26-BZ—Application, June 9, 1926, under sections 7c and 21 of the building zone resolution, of John W. Clancy, applicant, on behalf of Mary E. Bird, owner, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 2337 Hoffman street, The Bronx.

CAL. NO. 267-26-BZ—Application, March 29, 1926, under sections 7e and 21 of the building zone resolution, of Coonley and Grindel, applicants and owners, to permit in a business district the change of occupancy of an existing building from a motion picture theatre to a garage for the storage of more than five (5) motor vehicles and also to a motor vehicle repair shop; premises 1094 Castleton avenue and 13 Caroline street, West New Brighton, Richmond.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon

Negative	5
Absent	0

THE RESOLUTION:

(60-26-A)

WHEREAS, the foregoing appellant has filed with the board of standards and appeals an appeal from an order affecting the premises in question; and

WHEREAS, the appellant has failed to complete his papers though duly notified to do so;

Resolved, that the foregoing appeal be and it hereby is dismissed for lack of prosecution.

1206-25-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Lubraa Oil Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—147 Lombardy street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on conditions—As specified in resolution.

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon

Negative	5
Absent	0

(1206-25-A)

WHEREAS, Croker National Fire Prev. Eng. Co., Lubraa Oil Corp., owner, filed November 20, 1925, appeal from an order of the fire commissioner, affecting premises No. 147 Lombardy street, Borough of Brooklyn and

WHEREAS, the order of the fire commissioner, dated January 22, 1925, reads (Order No. 97081-LC):

"With reference to your application for a permit to store lubricating oil at the above premises, I regret to inform you that I am without power to grant such a permit for the reason that Section 110, Chapter Code of Ordinances provides that no permit shall be issued for the manufacture, refining or distilling of petroleum products, shale oil or coal tar, including lubricating oil and greases.

"You are, therefore, ordered to discontinue the manufacture, refining or distilling of petroleum products, shale oil or coal tar, including lubricating oil and greases."

and

WHEREAS, the premises consist of a plot of ground having a frontage of approximately 90 ft. on Lombardy street, 110 ft. on Anthony street and a depth of 200 ft., upon which is located the plant used for compounding oils of the Lubraa Oil Corporation, consisting of a corrugated iron compounding building, one story in height, 20 ft. by 106 ft. in area, a boiler house, office, several oil pumps and oil storage tanks (a total storage of 50,000 gallons), 5 persons employed on the premises; and

WHEREAS, appellant contends that the work done on the premises consists of compounding and blending oils intended for the lubrication of machinery; that the oils have an average not less than 350 degrees F. in flash point; that the plant is isolated from other buildings; that all heating is done by steam and contends, further, that the operation of the plant does not conflict with section 110 of chapter 10 of the Code of Ordinances.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted for a period of two years so long as the condition and layout of the premises shall remain substantially unchanged; and on condition that the flashpoint of the oil used, stored and maintained on the premises shall be not less than 350 degrees F.

429-26-A.

APPELLANT—William F. Doyle, for Emmar Apartment Co., owner.

SUBJECT—Appeal from decisions of fire commissioner and superintendent of buildings.

PREMISES AFFECTED—306-310 West 52nd street, Manhattan.

APPEARANCES—

For Appellant: William F. Doyle.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal denied.

## E VOTE TO GRANT—

Affirmative: Commissioners Holland and Guilfoyle .....	2
Negative: Chairman Walsh, Commissioner Connell and Chief Kenlon .....	3
Absent .....	0

## THE RESOLUTION:

(429-26-A)

WHEREAS, William F. Doyle, for Enimar Amusement Company, owner, filed, May 18, 1926, an appeal from the decision of the fire commissioner and superintendent of buildings, affecting premises 306-10 West 52nd street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered May 6, 1926, reads:

"1. Provide sprinkler system installed in accordance with regulations of the Board of Standards and Appeals.

"2. Provide a standpipe system installed in accordance with regulations of the Board of Standards and Appeals."

Decision of the superintendent of buildings, rendered May 19, 1926, reads:

"1. Building must be fireproof construction.

"2. Entrance vestibule and rooms over same must be separated from auditorium by walls to fireproof material.

"3. Open courts 8 ft. wide must be provided on each side of auditorium with two emergency exits to outside courts from both sides of orchestra and balcony.

"4. Fire escapes must be provided in required open courts embracing the exits from balcony to said courts.

"5. Wall separating dressing rooms from stage and partitions dividing dressing rooms must be constructed of fireproof material and all doors in said walls must be fireproof.

"6. A brick wall extending 4 ft. above roof must separate the auditorium from stage.

"7. A fireproof curtain capable of withstanding a temperature of not less than 1,700 degrees F. for a period of 45 minutes must be provided in proscenium opening."

WHEREAS, the building is non-fireproof, 2 stories (40 ft.) in height, 75 ft. by 100 ft. (7,500 sq. ft.) in area; OCCUPIED as a theatre, seating 300 persons in the auditorium and balcony; and

WHEREAS, the appellant proposes to provide seats for 500 persons; the appellant contends that the building covers 10,000 sq. ft. in area, and has only an auditorium and balcony.

Resolved, that the decisions of the fire commissioner and superintendent of buildings be and they hereby are affirmed, and the appeal be and it hereby is denied.

A. APPELLANT—William J. Gorman, for Richey, Brown & Donald, Inc., owner.

SUBJECT—Appeal from order of fire commissioner. PREMISES AFFECTED—2101 Flushing avenue, Maspeth, Borough of Queens.

APPEARANCES— For Appellant: William J. Gorman. For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## VOTE

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(218-26-A)

WHEREAS, William J. Gorman, for Richey, Brown & Donald, Inc., owner, filed, March 15, 1926, an appeal from an order of the fire commissioner, affecting premises No. 2101 Flushing avenue, Maspeth, Borough of Queens; and WHEREAS, the order of the fire commissioner, dated February 1, 1926, reads (Order No. 89363-F):

"1. Install a standpipe system with risers 4 in. in diameter for Foundry Building No. 2, including building No. 3, tested to withstand a pressure of 300 lbs. per sq. in., extending from cellar to roof, with necessary check valves and 2½-inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building is frame, one story (37 ft.) in height, 98 ft. 9 in. by 499 ft. 6 in. in area, including, also, a frame 2-story (37 ft.) in height extension (at the northwest), 162 ft. by 59 ft. 6 in. in area. A total area of approximately 57,000 sq. ft. OCCUPIED as a foundry, steel window sash and machine shop, 110 persons in entire premises; and

WHEREAS, appellant contends that the materials used and manufactured on the premises are non-hazardous; that there are only two open flames (blacksmith's forges) on the premises; that there are located throughout the premises hand fire extinguishers and water buckets; that the building is low in height and readily accessible to the fire department in the event of fire.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted only so long as the present use and operation of the business conducted on the premises remains substantially unchanged; on condition that the buildings shall be not increased in height or dimension; and that all portable fire extinguishers and fire buckets, as required by the fire commissioner, shall be installed and distributed throughout the premises.

238-26-A.

APPELLANT—Perry Winston, for Sea Gate Sisterhood, owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—West side of West 23rd street, 100 ft. north of Mermaid avenue, Brooklyn.

APPEARANCES—

For Appellant: William Fox, Perry Winston.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(238-26-A)

WHEREAS, Perry Winston, for Sea Gate Sisterhood, owner, filed, March 20, 1926, an appeal from a decision of the superintendent of buildings, affecting premises on the west side of West 23rd street, 100 ft. north of Mermaid avenue, Borough of Brooklyn; and

WHEREAS, the decision of the superintendent of buildings, rendered December 7, 1925, reads:

"Comply with original permit—limiting the height of non-fireproof public building to 40 ft. Permission to extend it to 42 ft. denied as contrary to Section 72-b.";

and

WHEREAS, the building is non-fireproof, 3 stories and basement (42 ft.) in height, 29 ft. by 104 ft. in area; OCCUPIED as a school—basement, lavatories; 1st story,

# MINUTES

auditorium, 250 seats; 2nd story, 5 classrooms, 80 students; 3rd story, 5 classrooms, 80 students; and

WHEREAS, the appellant has erected the school building 42 ft. in height instead of 40 ft. in height as originally approved by the superintendent of buildings; and

WHEREAS, the appellant contends that the building is outside the fire limits; that the small increase in height of the building does not cause any further fire hazard; that there is no heating plant within the building.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be limited to three stories above grade; that no story above the second tier of beams shall exceed a height of 10 ft. in the clear; that the building shall not be increased in height, area or dimension; and that all exits required by law shall be provided and maintained.

276-26-A.

APPELLANT—Robert Teichman, for Estate of Sol. M. Swartz, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—121-123 Greene street, Manhattan.

APPEARANCES—

For Appellant: Thomas A. Williams, Robert Teichman.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners	
Connell, Holland and Guilfoyle and Chief	
Kenlon .....	5
Negative .....	0

THE RESOLUTION:

(276-26-A)

WHEREAS, Robert Teichman, for Estate of Sol. M. Swartz, owner, filed, April 3, 1926, an appeal from an order of the fire commissioner, affecting premises 121-23 Greene street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 31, 1926, No. 88992-F, reads:

"Provide a separate and distinct system of AUTOMATIC SPRINKLERS throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals, May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919."

and

WHEREAS, the building is non-fireproof, 6 stories (85 ft.) in height, 50 ft. by 92 ft. in area at 1st story and 50 ft. by 35 ft. in area above; OCCUPIED: 1st story, cellar and sub-cellar, storage of furniture, 2 persons; 2nd story, vacant; 3rd story, show rooms, 4 persons; 4th story, hat block manufacture, 16 persons; 5th story, vacant; and

WHEREAS, the appellant contends that he was informed that the order was filed on account of the occupancy for the manufacture of dolls, on the 2nd, 3rd, 5th and 6th stories; that the objectionable occupancy for doll manufacture has been vacated; that due to the financial condition of the estate, it would be an unnecessary hardship to be forced to comply with the order at the present time.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the business deemed hazardous by the fire department throughout the building, the cause and basis of this order, shall be discontinued on or about September 15, 1926.

THE RESOLUTION:

(342-26-A)

WHEREAS, 125th Street Baths, Inc., lessee, filed, April 19, 1926, an appeal from orders of the fire commissioner affecting premises 149 West 125th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated March 18, 1926, read:

Order No. 92819-F—

"1. Comply with one of the following alternatives required by Section 21, Chapter 12, Code of Ordinances:

(a) Provide a watchman who shall visit every portion of the premises and install an approved system of time detectors to properly record the movements of the watchman, or (b) Provide an approved automatic thermostatic fire alarm system to cover all portions of the premises, this equipment shall be local in character and shall be connected to the interior fire alarm system installed in the lodging house.

"If the automatic thermostatic fire alarm system (required by alternative b) is installed all work shall be done in accordance with the regulations of the Fire Department and plans in duplicate showing the location and number of thermostatic devices shall be filed with and approved by the Fire Department before work of installation may be commenced."

Order No. 92820-F—

"1. Install an adequate interior electric fire alarm system in accordance with the attached approved plan. Sec. 21, Ch. 12, Code of Ordinances."

and

WHEREAS, the building is non-fireproof, 4 stories and basement in height, 25 ft. frontage on 125th street, extending 199 ft. 10 in. through the block, with 95 ft. frontage on 126th street (about 11,990 sq. ft.) in area; OCCUPIED for the purpose of Russian and Turkish baths; basins, pools, hot rooms and lockers; 1st story, offices, dormitories and restaurant; 2nd, 3rd and 4th stories, dormitories and rooms; and

WHEREAS, the appellant claims that he has provided pails, extinguishers and hose throughout the building; and there are 15 employees continually on duty at all times; furthermore, the appellant contends that he has operated the public baths on these premises during the past 2 years without having a fire.

*Resolved*, that the orders of the fire commissioner be and they hereby are *modified*, and the appeal be and it hereby is *granted* only so long as the use and operation of the premises remain unchanged.

RESOLUTION:

(409-26-A)

REAS, Croker National Fire Prev. Eng. Co., for the  
ville Lumber Co., owner, filed, May 11, 1926, an  
from the order of the fire commissioner, affecting  
769-783 Rockaway avenue, Borough of Brooklyn,

REAS, the order of the fire commissioner No. 51874-F,  
December 13, 1923, reads:

1. Provide a fire pump of not less than 1,000 gallons  
minute capacity, suctioning from a tank or pump  
at least 30,000 gallons capacity as per rule 37  
adopted by the Board of Standards and Appeals of  
20, 1923.

2. Provide a sufficient number of hydrants in yard,  
to be not more than 250 ft. distant from each  
with hose attached as per rule 37 adopted by the  
Board of Standards and Appeals, July 20, 1923.

3. Provide one monitor nozzle with remote control  
as per rule 37, adopted by the Board of Standards and  
Appeals.”;

AS, the premises consists of a plot 150 ft. by 200  
00 sq. ft. in area), containing 3 attached brick  
(stable, garage and office)—two are one story  
and two stories in height, 25 ft. by 100 ft. over all,  
frame sheds and lumber piles, with avenues 12 to  
width; OCCUPIED as a lumber yard; and  
AS, the appellant contends as to item 1 that inas-  
the premises is only 30,000 sq. ft. in area, a fire  
not required under the rules; as to item 2, there  
hydrant on each of the three street fronts; that  
no point in the lumber yard more than 250 ft.  
ty hydrant; as to item 3, that fire buckets and  
been provided throughout the premises; further-  
there is a watchman constantly on the prem-

that the order of the fire commissioner be and  
is *modified* and the appeal be and it hereby is  
on condition that the business shall be confined  
to the plot, 150 ft. deep on Rockaway avenue and  
street; that the open driveways not less than  
width, as indicated on the plans in this appeal,  
be maintained; that no lumber pile shall exceed  
15 feet; and that all fire casks, as required  
by the commissioner, shall be distributed and main-  
tained throughout the premises.

ANT—Frank Glanz, for Preferred Utilities  
Co., Inc., present owner.

—Application for reopening, modification of  
resolution (re: appeal from decision of fire com-  
missioner).

S AFFECTED—Southeast corner of Third  
and Creek street, L. I. City, Borough of  
Queens.

NCES—

Appellant: Frank Glanz.

OF BOARD—Appeal reopened and modifica-  
tion denied.

THE VOTE TO REOPEN AND MODIFY—

Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners  
Connell and Holland and Chief Kenlon 4  
Absent: Commissioner Guilfoyle ..... 1

THE RESOLUTION:

(1450-21-A)

WHEREAS, Samuel Rosenblum, consulting engineer, for  
Joseph H. Parker, owner, filed, November 23, 1921, an  
appeal with the board of appeals, from a decision of the fire  
commissioner, affecting premises southeast corner of Third  
and Creek streets, Long Island City, Queens; and

WHEREAS, the decision of the fire commissioner, dated  
November 10, 1921, in acting on N. B. Application No.  
1331-21, reads:

“2. Tanks must be buried 2 ft. below the lowest  
level within 10 ft.

“3. Tanks must be encased in 12 in. stone concrete.  
Show on plans. Concrete encasing tanks must be sep-  
arate and be independent of the foundation walls of  
the building.

“4. Concrete around tanks may not serve as a foun-  
dation for column supporting roof.”;

and

WHEREAS, the premises consist of a plot of ground, fac-  
ing on Creek and Third streets, used as an oil storage plant,  
upon which there is an existing one story metal building  
and on which the appellant proposes to erect a one story  
non-fireproof building, 42 ft. by 37 ft. in area, under this  
building, on a pile foundation, are to be installed four tanks  
for the storage of gasoline, these tanks being partly en-  
cased in concrete with the top of the tanks one foot above  
ground level, the tanks each having a capacity of 15,000  
gallons, the foundation walls of the building and columns  
supporting the roof of the proposed building to rest on the  
concrete bed enclosing the tanks; and

WHEREAS, appellant states that it is impossible to sink  
the tanks any lower due to tide conditions and that it  
would be a hardship to drive additional piles for the foun-  
dation walls of the building; and

WHEREAS, this appeal was granted by the board at its  
meeting December 27, 1921, by the adoption of the follow-  
ing resolution:

“Resolved, that the decision of the fire commissioner  
be and it hereby is *modified* and the appeal be and it  
hereby is *granted*, on condition that a wall 3 feet in  
height be erected surrounding the tanks above grade,  
and that the space above the tanks to the underside of  
the floor be filled in solidly with tamped earth or fill,  
that a concrete floor be installed, and that the building  
above these tanks be not increased at any time to a  
height exceeding that now shown on the plans, namely,  
in actual story height 11 ft. 8 in., or 15 ft. 8 in. above  
grade.”;

and

WHEREAS, appellant requests a modification of this res-  
olution to permit the erection of a wooden loading plat-  
form, the relocation of the office and the use of one 4 in.  
fill line instead of two 3 in. fill lines.

Resolved, that the request for modification be and it  
hereby is *denied* and the resolution as of December 27,  
1921, be and it hereby is *affirmed*.

Negative: Chairman Walsh .....  
Absent .....

## THE RESOLUTION:

(333-26-BZ)

WHEREAS, John J. Dunnigan, for Lichtenstein and Bernstein, owners, filed, April 16, 1926, an application, under the building zone resolution, to permit in a business district the extension of an existing wet wash laundry building; premises 1882 Crotona avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting July 27, 1926, after due notice by publication in Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Crotona avenue is in a business district; East 176th street is in a residence district; and that Fairmount place is in a residence district;

WHEREAS, the decision of the superintendent of buildings, rendered April 16, 1926, reads:

"Your application of April 13th, 1926, for a certificate of occupancy of the building at No. 1882 Crotona avenue, Bronx, converting the use of premises from a store to a wet wash laundry is hereby disapproved as the premises are located in a business district and the proposed use as a wet wash laundry is prohibited by the provisions of the building zone resolution."

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 30 ft. 10 in. and a depth of 90 ft. 4 in., and

# MINUTES

WHEREAS, the proposed extension is of non-fireproof construction, one story in height, with a frontage of 26 ft. in. and a depth of 90 ft. 4 in.; to be occupied as a wet laundry; and

WHEREAS, the board deemed that the applicant substantiated his basis of appeal under section 21 in that the existing laundry existed prior to July, 1916.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the premises, as extended, shall not exceed a one-story structure in height above grade; that the use of proposed extension shall be limited and restricted to the operation and conduct of ironing work only, separated from the existing laundry use by a wall of approved masonry, with more than one opening therein, protected with an approved automatic fire door; and that all permits required for the use, operation and conduct of laundry on the premises shall be obtained within 90 days.

6-BZ.

APPLICANT—David Falconer, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7e of the building zone resolution, to permit in a business district the alteration and extension of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—183-185 Patterson avenue, Astoria, Borough of Queens.

APPEARANCES—

For Applicant: David Falconer.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners	
Connell, Holland and Guilfoyle and Chief	
Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(245-26-BZ)

WHEREAS, David Falconer, owner, filed, March 23, 1926, application, under the building zone resolution, to permit in business district the alteration and extension of a garage for the storage of more than five motor vehicles; premises 183-185 Patterson avenue, Astoria, Borough of Queens; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, July 27, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Patterson avenue is in a business district; Van Alst avenue is in a business district and Patterson avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 15, 1926, Alt. 697-1926, reads:

"The extension of a garage for more than five motor vehicles in business district is prohibited by the Law."

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 50 ft. and a depth of 120 ft.; and

WHEREAS, the proposed rear extension is of non-fireproof construction, one story in height, with a frontage of 50 ft. and a depth of 15 ft.; and to be occupied as a garage for more than five motor vehicles; and

WHEREAS, the board deemed that the applicant substantiated his basis of appeal under Section 7e, in that there

existed a stable for more than five horses in July, 1916, and the board deemed that it would be a hardship if owner were not permitted to extend the present garage as the strip of ground at rear could not be used to any practical advantage for any other purpose.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted only so far as it affects the rear of the building, on condition that the proposed extension shall not exceed a one-story structure in height nor a depth of 15 ft. by a width of 50 ft., opening on alley at rear of building on public right-of-way; that the existing structure shall be not increased otherwise in height or area; that the conditions of the original resolution, granted by this board under Cal. No. 1003-24-BZ, shall be complied with in all respects; and that any permits required shall be obtained within 90 days and any work entailed thereby shall be completed within six months from the date of this action.

1157-25-BZ.

APPLICANT—William F. Doyle, for Milef Realty Corporation, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a 1½ times height district the erection of the street walls of a building to a height exceeding the limit set by the building zone resolution.

PREMISES AFFECTED—306-308 West 38th street, Manhattan.

APPEARANCES—

For Applicant: William F. Doyle.

THE RESOLUTION:

(1157-25-BZ)

WHEREAS, William F. Doyle, for Milef Realty Corporation, owner, filed, November 10, 1925, an application, under the building zone resolution, to permit in a 1½ times height district the erection of the street walls of a proposed building to a height exceeding the limit set by the building zone resolution; premises 306-308 West 38th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, July 27, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 38th street is in a 1½ times height district, and that the west side of 8th avenue between 37th street and 38th street is in a 1½ times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 5, 1925 (N. B. App. No. 551-25), reads:

"1. Building is a one and one-half times district and may not exceed 90 ft. in height without lawful setbacks (Section 8-c of the Zoning Resolution)."; and

WHEREAS, the proposed building, to be occupied for lofts, offices and showrooms, is to be fireproof, 14 stories (160 ft.) in height, 50 ft. by 98 ft. 9 in. in area; West 38th street is 60 ft. in width—and the allowable height of the street walls of the proposed building (without setback), based on width of street and excess height of buildings adjoin-

# MINUTES

ing, is 140 ft. It is proposed to carry the street walls of the building (without setback) to a height of 160 ft.; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* only so far as it affects the front elevation without a setback to a height not exceeding 150 ft., on condition that the requirements of the building zone resolution shall be complied with in all other respects; and that any permits required shall be obtained within nine months and the building completed within eighteen months from the date of this action.

352-26-BZ.

APPLICANT—Thomas O'Rourke Gallagher, for Julbert Building Corporation, owner.

## THE RESOLUTION:

(372-26-BZ)

WHEREAS, Fred C. and Lillian Hulbert, owners, filed, April 28, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline selling station; premises southwest corner of Pouillion avenue and Hylan boulevard, Annadale, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 27, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Pouillion avenue is in a business district; Hylan boulevard is in a business district and that South 4th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 22, 1926, reads:

"Your application No. N. B. 501-1926 for the installation of gasoline tanks on the southeast corner of Hylan boulevard and Pouillion avenue, Annadale, is hereby disapproved, being contrary to Zoning Resolution (gasoline station in business zone).";

WHEREAS, the premises consist of an irregular plot of ground, having a frontage of 130 ft. on Hylan boulevard and 182 ft. on Pouillion avenue, upon which it is proposed to erect a gasoline selling station, consisting of a 24 ft. by 12 ft., 2-story frame dwelling, a 12 ft. by 18 ft. garage for two cars and two 550-gallon storage tanks and pumps;

WHEREAS, the board deemed that the applicant did not substantiate his basis of appeal under section 21 and therefore was not entitled to consideration.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

-26-BZ.

APPLICANT—William F. Doyle, for David Skolkin, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7c and 21 of the building zone resolution to permit in a residence district extending from a business district the erection and maintenance of a theatre, store and office building.

PREMISES AFFECTED—Southwest corner of 87th street and Jamaica avenue, Jamaica, Borough of Queens.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: Mrs. Minnie Dittrich.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(414-26-BZ)

WHEREAS, William F. Doyle, for David Skolkin, owner, May 13, 1926, an application, under the building zone resolution, to permit in a residence district, extending from business district, the erection and maintenance of a theatre, store and office building; premises southwest corner of 87th street and Jamaica avenue, Jamaica, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 27, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jamaica avenue is in a business district; 87th street is in a residence district and that 88th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 11, 1926, reads (N. B. 6663-26):

"1. The erection of a theatre in a business district extending into a residential district is contrary to zone resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction; two stories in height, with a frontage of 101.83 ft. and a depth of 150 ft. and 170 ft. irregular; to be occupied as a theatre, store and office building; the theatre structure extending approximately 68 ft. into the residence district; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7-c in that the plot is divided by a use district boundary line; and under section 21 for the reason that the extension into the residence district would not injure the neighborhood and he had consents from 17 owners in the area affected.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure shall not exceed in depth a distance of 150 ft. from the corner formed by the intersection of the southerly side of Jamaica avenue and the westerly side of 87th street; that the building shall be constructed in accordance with section 25 of article 5 of the Code of Ordinances; that there shall be no store or business display on the 87th street front, other than the return of the plate glass show window of the corner store; that there shall be no openings on the 87th street front other than those required for emergency and service exits of the theatre; that the exterior wall of the 87th street elevation shall be finished with face brick and architectural terra cotta or stone trimmings; that there shall be no signs on the 87th street front; that the theatre building shall not exceed a height of an auditorium and balcony construction; and that any permits required shall be obtained within nine months and the building completed within eighteen months from the date of this action.

of more than five motor vehicles; premises 181 Delancey street and 54-62 Attorney street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 27, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Delancey street is in a business and unrestricted district; Attorney street is in a business district and that Ridge street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 10, 1926, N. B. 232-1926, reads:

"1. Location of proposed garage in a business district is contrary to Art. II, Section 4 of the Zoning Resolution.";

and  
WHEREAS, the proposed building is to be of non-fireproof construction, basement and one story in height, with a frontage of 100 ft. and a depth of 100 ft., to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to consideration under section 7-e, in that part of the premises under appeal has been used as a stable since July, 1915, verified to by letter from health department.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the structure shall not exceed a building two stories in height above grade and shall be constructed fireproof throughout; that the southerly and easterly gable walls shall be unpierced throughout their entire height and length; that there shall be no opening on Attorney street other than an emergency exit, not exceeding a width of 3 ft. 8 in.; that there shall be no other openings on Attorney street on the 1st story level other than windows, the sills of which shall be not less than 5 ft. 6 in. above sidewalk grade; that no skylights shall be incorporated in the roof of this structure within 25 ft. of the southerly or easterly gable walls; that any skylights installed shall be glazed with plain glass, protected with wire guards above and below; that any single gasoline storage tank installed shall not exceed a capacity of 550 gallons and shall be located at the extreme front of building, at the Delancey street front; and that all permits required shall be obtained within nine months and the building completed within eighteen months from the date of this action.

## THE RESOLUTION:

(543-26-BZ)

WHEREAS, Henry B. Saltman, owner, filed, June 1926, an application, under the building zone resolution permit in a business district, extending from an unrestricted district, the erection and maintenance of a line service station; premises southwest corner of Queens boulevard and Yellowstone avenue, Forest Hills Terrace, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 27, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Queens boulevard is in a business district; Yellowstone avenue is in a business district and that Gerard place is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 1, 1926, No. 2042-1926, reads:

"1. Contrary to the Building Zone Resolution that a gasoline station may not be erected in a business district.";

and

WHEREAS, the premises consist of an irregular plot of ground on which it is proposed to bury gasoline storage tanks and erect 9 pumps and an office building of non-fireproof construction, one story in height, with a frontage of 52 ft. and a depth of 26 ft.; the entire premises to be occupied as a gasoline service station; and

WHEREAS, the board deemed that applicant substantially satisfied his basis of appeal under sections 7-c and 21 and was entitled to consideration, in that the premises are designated by two use district designations.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that any tanks installed in conjunction with the use of the premises as a gasoline selling station shall be located entirely within the property lines; that the pumps for the supply of vehicles in transit shall be located sufficiently back from the building line so as not to require the service of vehicles on the property within the premises; that all permits required shall be obtained within nine months and the work involved therein shall be completed within eighteen months.

588-26-BZ.

APPLICANT—Winter and Wilkes, Inc., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7c, 7d and 21 of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a building occupied in part for business and office purposes.

PREMISES AFFECTED—150 West 59th street and 145 West 58th street, Manhattan.

## THE RESOLUTION:

(588-26-BZ)

WHEREAS, Winter & Wilkes, Inc., owner, filed, June 1926, an application, under the building zone resolution permit in a residence district the erection and maintenance

# MINUTES

of a building occupied in part for business and office purposes; premises 150 West 59th street and 145 West 58th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 27, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 59th street is in a residence district; West 58th street is in a business district and that 7th avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 1, 1926, N. B. 300-1926, reads:

"1. Proposed business and office use unlawful in a residence district. Art. II, Building Zone Resolution."

WHEREAS, the proposed building is to be of fireproof construction, 39 stories on 59th street and 13 stories on 58th street in height, with a frontage of 108 ft. 6 in. and a depth of 200 ft. 10 in.; to be occupied in the 59th street for doctor's and dentist's offices and in the 58th street for apartments; and

WHEREAS, the board deemed that applicant was entitled to consideration, in that he substantiated his basis of appeal, under section 21 of the building zone resolution; and

WHEREAS, the conduct of a doctor's professional practice is not prohibited in residence use districts, the variation of the zoning resolution for this building for use exclusively of doctors' offices is within the purview of adjustment under the specific proviso that this variation shall not be judged a precedent for the invasion of this street by business building or use.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted as to the use, occupancy and operation of the Central Park South or street portion of the property for a depth of 100 ft. wholly therefrom, within the residence use area district, on condition that the building use and occupancy shall be restricted and limited exclusively to doctors' offices of medical and dental profession in the practice of their profession; that the requirements of the building zone resolution shall be complied with in all other respects as to height, area and use; that the street wall on the 59th street front shall not be erected in excess of 200 ft. on building line, without setback; that there shall be no signs, display or advertising of any nature or description permitted on any part of the building on the 59th street front; and that all permits required shall be obtained within six months and the building completed within eighteen months from the date of this action.

1349-24-BZ.

APPLICANT—Olcott, Olcott & Glass, for James Everard's Breweries, owner.

SUBJECT—Application (re: decision of superintendent of buildings), to permit under section 7e of the building zone resolution, in a business district the alteration and extension of a garage for the storage of more than five (5) motor vehicles (previously before the board).

PREMISES AFFECTED—5-15 East 133rd street, Manhattan.

APPEARANCES—

For Applicant: B. A. Moynahan.

For Opposition: None.

ACTION OF BOARD—Application to modify granted.

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief

Kenlon . . . . . 5

Negative . . . . . 0

Absent . . . . . 0

## THE RESOLUTION:

(1349-24-BZ)

WHEREAS, Olcott, Olcott & Glass, for James Everard's Breweries, owner, filed, November 29, 1924, an application, under the building zone resolution, to permit in a business district the alteration and extension of a garage for the storage of more than five motor vehicles; premises 5-15 East 133rd street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, January 13, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 133rd street and Fifth avenue are business districts and East 134th street is an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 31, 1924, in acting on Alteration Application 2532-24, reads:

"(1). Garage prohibited in a business district."

and

WHEREAS, the existing garage is non-fireproof, three stories in height, 52 ft. 2 in. by 94 ft. 1 in. in area; it is proposed to alter and extend this garage by the addition of a non-fireproof building, 2 stories in height and 47 ft. 10 in. by 94 ft. 1 in. in area and to use the entire premises as a garage for the storage of more than five motor vehicles; and

WHEREAS, there existed on this street between the intersecting streets on July 25, 1916, a garage for the storage of more than 5 motor vehicles; and

WHEREAS, this application was granted by the board, January 13, 1925, reopened July 20, 1926, for the purpose of amendment, applicant having through error quoted the premises as Nos. 9-13 instead of Nos. 5-13 East 133rd street; and

WHEREAS, an error was made in the original application, when premises was cited as 9-15 East 133rd street instead of 5-15 East 133rd street.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted so far as it affects the entire premises as varied by this board under Cal. No. 1349-24-BZ and that the stipulations of said resolution, to wit:

"That the building be limited in height to two stories; that the easterly gable wall be unpierced throughout its entire height and length; that the front elevation shall be finished in face brick or cement concrete stucco, with architectural terra cotta or stone trimmings; and that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action." shall be complied with.

900-25-BZ.

APPLICANT—William F. Doyle, for Dornhage Realty Corp., owner.

SUBJECT—Application for reopening, interpretation of resolution (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit the extension from a business district into a residence district of a proposed building to be used as a theatre and also as stores.

PREMISES AFFECTED—Southeast corner of Jerome avenue and E. 199th street, The Bronx.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application reopened and resolution modified.

## THE VOTE TO REOPEN AND MODIFY RESOLUTION—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and Chief  
Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

### THE RESOLUTION:

(900-25-BZ)

WHEREAS, William F. Doyle, for Dornhage Realty Corporation, owner, filed, September 3, 1925, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed building to be used as a theatre and also as stores; premises southeast corner of Jerome avenue and East 199th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 29, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue is in a business district; that Grand Concourse is in a residence district; and that East 199th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 1, 1925, reads:

"1. Proposed erection of theatre building in business district extending into a residence district is contrary to provisions of the Building Zone Resolution.";

and

WHEREAS, the building as originally proposed was to be of fireproof construction, one story (45 ft.) in height, with a frontage of 246 ft. on Jerome avenue and 192.43 ft. on East 199th street; to be occupied as a theatre and also as stores; it is now proposed to eliminate the theatre and erect an apartment house with stores in the first story, extending into the residence district; and

WHEREAS, the board concluded that there would be practical difficulty and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution; and

WHEREAS, the board, on December 29, 1925, granted a variation permitting the erection of a theatre and store use extending from a business into a residence district, stipulating therein that the building be restricted in height to a one story building; and

WHEREAS, application has been made for the substitution of a tenement house use permissible in a residence district, instead of the theatre use.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted only so far as it affects the first or street story for retail mercantile store use within the residence use area; on condition, that any advertising display within the residence use district shall be confined to the plate glass show windows of the store front; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months.

1289-23-BZ.

APPLICANT—W. F. Kenworth, for the Laemmle Building Corp., owner.

SUBJECT—Application for reopening, extension of time, (re: decision of superintendent of buildings), to permit in a business district extending into a residence district, the erection and maintenance of a theatre and business building.

PREMISES AFFECTED—4515 New Utrecht avenue, Brooklyn.

APPEARANCES—

For Applicant: Weier Steinbrink, W. F. Kenworth.

For Opposition: None.

ACTION OF BOARD—Application reopened and extension of time granted.

## THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners

Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

### THE RESOLUTION:

(1289-23-BZ)

WHEREAS, Samuel Gardstein, for Abclur Realty Company, owner, filed, November 12, 1923, an application, under the building zone resolution, to permit the extension from a business district into a residence district of a proposed theatre and business building; premises 4515 New Utrecht avenue, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, January 22, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that New Utrecht avenue is in a business district and 45th and 46th streets are residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered October 24, 1923, in acting on App. No. 1289-23, reads:

"Denied—Proposition contrary to the Zone Resolution, Art. II, Sec. 3. Extending a business use into a residential district.";

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 112 ft. 2 in. and a depth of 136 ft. 10 in. at south and 202 ft. 10 in. at north, to be occupied as theatre and stores; and

WHEREAS, under the provisions of section 7, subdivision C, the board is empowered to act; and

WHEREAS, the application was granted by the board of standards and appeals, at its meeting, January 22, 1924, on certain conditions; the present architect requested a modification of these conditions as to time limit.

Resolved, that the board of standards and appeals hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the northerly gable wall be unpierced throughout its entire height and length; that any openings to the northerly side rear of the building, be limited to two emergency exits; that the open court to the rear be enclosed in a brick wall not less than 8 ft. in height; the use of building be restricted to a motion picture theatre with stores on New Utrecht avenue front; that there shall be no advertising signs or billboards displayed or exposed on the 46th street side beyond 25 ft. from New Utrecht avenue front;

Resolved, further, that all permits necessary for prosecution of the work shall be obtained within 60 days and the building erected within nine months from the date of this action, July 27, 1926.

287-24-BZ.

APPLICANT—David G. McConnell, for Bayie Realty Company, Inc., owner.

SUBJECT—Application for reopening, modification of resolution (re: decision of superintendent of buildings), to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—524 Jackson avenue, Bronx.

APPEARANCES—

## THE RESOLUTION:

(287-24-BZ)

WHEREAS, David McConnell, for Bayie Realty Co., Inc., owner, filed, February 25, 1924, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 524 Jackson avenue, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 27, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and WHEREAS, the use district maps accompanying the building zone resolution show that Jackson and Concord avenues are business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered January 25, 1924, in acting on N. B. App. No. 24, reads:

"Erection of proposed garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution."

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 41 ft. on Jackson avenue and 33 ft. on Concord avenue and a depth of 200 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, this application was denied by the board at its meeting, October 14, 1924, and reopened December 9, 1924, by vote of the board; and

WHEREAS, there existed on this street, Jackson avenue, between the intersecting streets, on July 25, 1916, a stable for more than five horses; and

WHEREAS, this application was granted by the board of standards and appeals at its meeting, June 27, 1925, on certain conditions and applicant requested an interpretation of these conditions as to the height of the building and an extension of time to complete the work; and

WHEREAS, there is a difference of approximately 12 ft. grade of streets.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that application be and it hereby is granted on condition that the structure be limited in height to one story above grade on both street fronts; that the gable walls shall be pierced throughout their entire height and length; that there shall be no roof signs of any nature or description on the structure; that there shall be no advertising display, bill-boards or signs permitted on the street front of the building, other than one electric sign indicating the title of the garage; that the front elevation shall be finished in face brick, with architectural terra cotta or stone trimmings; that any gasoline storage equipment installed shall be located at the Jackson avenue front of premises; that all permits necessary for the prosecution of the work shall be obtained within nine months and building completed within eighteen months from the date of this action, July 27, 1926.

THE RESOLUTION:

(1046-24-BZ)

WHEREAS, Thomas F. Martin, owner, filed, December 9, 1924, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises north side of Second street, 170 ft. 9 in. east of Fourth avenue, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 2, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show Fourth avenue, east side, is a business district; Fourth avenue, west side, is an unrestricted district and Second street is a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 17, 1924, in acting on App. No. 14940-24, reads:

"Public garage in a business district contrary to Art. II, Par. No. 4 of the zone resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, one story in height, with a frontage of 200 ft. and a depth of 100 ft., to be occupied as a garage for the storage of more than five (5) motor vehicles; and

WHEREAS, applicant established his basis of appeal under section 7-g by filing 82 per cent of consents by affected property owners, and the board deemed that the application should be granted under such conditions as would safeguard affected property; and

WHEREAS, the board of standards and appeals, under date of June 2, 1925, granted a variation in the application of the use district regulations affecting the entire premises, reading:

"Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure be limited in height to a one-story building, erected fireproof; that the rear and gable walls shall be unpierced throughout their entire height and length; that the garage area be subdivided, substantially in half, by a wall of approved masonry, any openings therein to be equipped with approved fireproof doors; that any skylights installed shall be glazed with plain glass equipped with wire guards above and below; that the front elevation shall be finished in face brick, panel design, with architectural terra cotta or stone trimmings; that there shall be no roof sign maintained and no advertising on the premises, other than one projecting electric sign, indicating the title of the garage;

that all permits necessary for the prosecution of work shall be obtained within nine months and building completed within eighteen months from date of this action."

and

WHEREAS, it appears that the premises have been sold and a portion sold and on this portion a non-fireproof garage has been erected in violation of conditions imposed in the resolution of June 2, 1925.

Resolved, that the board of standards and appeals hereby rescind the action of the board of appeals of June 2, 1926, and that the variation granted be and it hereby be null and void.

820-25-BZ.

APPLICANT—John J. O'Connor, for Washington Improvement Corp., owner.

SUBJECT—Application for reopening, modification of decision of superintendent of buildings), to permit in a residence district the erection and maintenance of a building to be used for office and theatre purposes.

PREMISES AFFECTED—1714-1726 Kings Highway, Brooklyn.

APPEARANCES—

For Applicant: John J. O'Connor.  
For Opposition: None.

ACTION OF BOARD—Application reopened and modification granted.

THE VOTE TO REOPEN AND AMEND—

Affirmative: Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative: Chairman Walsh .....	0
Absent .....	0

THE RESOLUTION:

(820-25-BZ)

WHEREAS, John J. O'Connor, for Washington Improvement Corporation, owner, filed, August 10, 1925, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a building to be used for office and theatre purposes; premises 1714-26 Kings Highway, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals;

WHEREAS, the use district maps accompanying the building zone resolution show that Kings Highway is in a business district; East 18th street is in a residence district; East 17th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 6, 1925, reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

"The erection of a theatre extending into a residential district."

and

WHEREAS, the proposed building is of fireproof construction, two stories in height, with a frontage of 108 ft. and a depth of 170.59 ft. and 129.40 ft., irregular, occupied as stores and theatre; and

WHEREAS, the following resolution was adopted by the board on January 2, 1926:

"Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the occupancy of the premises for office picture theatre building and business use shall be restricted to and not exceed a depth of 129 ft. from the corner formed by the intersection of Kings Highway and East 18th street; the rear wall shall be parallel with Kings Highway; that there shall be no advertising on the premises, other than one projecting electric sign, indicating the title of the building;

# MINUTES

no opening from the theatre structure on the East 18th street front of any nature or description other than doorways required by the building code as emergency exits, which doors shall remain closed at all times; that there shall be a return brick pier of not less than 12 in. on Kings highway at the corner formed by the intersection of East 18th street and Kings highway; that the remaining parcel of this property, approximately 41 ft., more or less, fronting on East 18th street, shall be developed for conforming use, private dwelling, and said structure shall be erected at the same time as the proposed motion picture theatre, and the frame and roof shall be enclosed before the first tier of beams of the theatre is installed; that there shall be no advertising, billboards, signs or display of any nature or description permitted on the East 18th street front of said proposed theatre structure; that the street frontage shall be finished in face brick or natural stone, with architectural terra cotta or stone trimmings; that the exterior of the rear (southerly) wall shall be finished in light-colored face brick; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months.";

WHEREAS, the applicant now requests a modification of resolution as to the depth of the building; and requests a date of July 27, 1926, a further modification as to setbacks on the East 18th street front; and

WHEREAS, the board deemed that applicant was entitled relief under section 7-c in that the use boundary line divides the property into two different zones, and under section 21, due to the angular shape of the lot, it would be a hardship to be deprived of the use as requested, because a smaller area could not be profitably utilized.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building and structure shall be restricted to the conduct of motion picture theatre, other than stores on the Kings highway front; that the structure shall be limited to two stories in height—auditorium and balcony only; that the building on the 18th street front shall not exceed a depth of 12 ft. southerly from the corner, formed by the intersection of Kings highway and East 18th street; that the building shall be provided within the property lines of the premises before us on appeal; that there shall be no building from the theatre structure on East 18th street other than doorways required by the building code as emergency exits, which doors shall remain closed at all times; that the East 18th street wall shall be returned on Kings highway for a distance westerly of not less than 16 ft. to the corner formed by the intersection of Kings Highway and East 18th street; that the adjoining property to the building now occupied for private residence and dwelling shall be maintained, in the same ownership of the plot adjoining the north and under appeal; that there shall be no advertising, bill-boards or signs of any nature or description permitted on the East 18th street front of these buildings; that the exterior of the street front walls shall be

finished with face brick or natural stone with architectural terra cotta or stone trimmings; that the exterior of the rear southerly wall shall be finished in light-colored face brick, and any exterior iron balcony for the accommodation of exits from the balcony shall be restricted to an ornamental balcony, not extending beyond the business use area on the 18th street front, with egress therefrom within the building by an enclosed fireproof unpierced stairway enclosure, with egress at the termination direct to the street front on 18th street; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months; and that a return of drawings shall be made to this board for approval before submission to the superintendent of buildings for his consideration.

## APPROVAL OF PLANS

### THE RESOLUTION:

(1152-25-S)

WHEREAS, Harold F. Smith, for 5 Great Jones Street Co., Inc., owner, filed, November 9, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises at 5 Great Jones street, Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 4, 1925, reads (Order No. 79133-LD):

"1. Arrange the fire escape on the front of the building, and the openings leading thereto and the windows opening on the course thereof so that they are in compliance with the provisions of Sec. 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law (see note).

"Among the defects noted are the following: (1) Windows on course not self closing. (2) No fire escape on the 2nd floor. (3) No counterbalanced stairs from lowest balcony to ground."

and

WHEREAS, the building is non-fireproof, five stories high, in height, 25 ft. 6 in. by 91 ft. in area up to 3rd story and 25 ft. 6 in. by 52 ft. in area at 4th and 5th stories. OCCUPIED: First story, doctor's office; 2nd story, carpenter shop, 5 persons; 3rd story, offices, 5 persons; 4th story, manufacture of jewelry boxes, 5 persons; 5th story, manufacture of hats, 5 persons. EXITS: Interior wooden stairway, extending from the 1st to the top story, enclosed in non-fireproof partitions with doors at openings, a fire escape on the front of the building, having fireproof openings along the course thereof extending from top story to the 3rd story; a corridor from 3rd story balcony to fire escapes on adjoining buildings; ROOFS of adjoining buildings, same level as 30 ft. higher at east; and

WHEREAS, the petitioner claims that the state labor department issued orders against these premises in 1911, then the orders were rescinded, and the building was used as a tenant factory by the superintendent of buildings; furthermore, that the occupancy was greater in 1911 than it is at present; and

WHEREAS, the labor department, on January 2, 1926,

# MINUTES

jurisdiction of labor law matters at that time, did and afterwards dismiss of record order known as 1632" in reference to the fire escape on the front building.

*Resolved*, that the board of standards and appeals does *make a variation* from the requirements of the law and that the petition be and it hereby is *granted*, in view of the action of the labor department, *on condition* that casement doors be provided to the fire-balconies on the two upper stories, and that the occupancy remain unchanged.

PETITIONER—Joseph Martine, for Elk-Fried Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

RESOLUTION:

(193-26-S)

WHEREAS, Joseph Martine, for Elk-Fried Co., owner, filed, March 16, 1926, a petition for variation from the requirements of the labor law, as cited in the decision of superintendent of buildings, affecting premises 915-19 Broadway, Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated March 6, 1926, re: certificate of occupancy, reads: "Before a permanent Certificate of Occupancy can be issued on the above premises the windows on the Broadway and 21st Street fronts must be made to comply with Section 264 of the Labor Law as to area of glass.";

WHEREAS, the building is fireproof, twenty stories in height, 22 ft. 3 in. by 128 ft. in area. OCCUPIED: First story, manufacturing on upper stories; EQUIPPED with sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with doors at openings; and

WHEREAS, the petitioner has used lights of glass exceeding square inches in area in all windows on both street fronts the maximum size at 1st story, 9 ft. by 10 ft.; 2nd story, 7 ft. by 9 ft.; 4th to 20th stories, inclusive, 1 ft. by 3 ft. 6 in.

*Resolved*, that the board of standards and appeals does *make a variation* from the requirements of the law and that the petition be and it hereby is *granted* only so far as it affects the windows on the street fronts on the three lower stories, and one double window on the 4th story, at the intersection of Broadway and 21st street, *on condition*, that the openings shall be provided with approved metal frames and sash, glazed with polished plate glass and that the requirements of the law shall be complied with in all other respects.

251-26-S.

PETITIONER—John J. Gilmartin, for Harkin Realty Corporation, owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—167 West 29th street, Manhattan.

APPEARANCES—

THE RESOLUTION:

(251-26-S)

WHEREAS, John J. Gilmartin, for Harkin Realty Corporation, owner, filed, March 24, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises No. 167 West 29th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated March 22, 1926, reads:

"Fire escapes must conform with Section 273, Labor Law. Stairs must be set at an angle of 45 degrees and counter-balanced stair from lowest balcony to street must be provided.";

and

WHEREAS, the building is non-fireproof, three stories in height, 23 ft. by 100 ft. in area at 1st story and 23 ft. by 90 ft. in area above. OCCUPIED: First story, restaurant; 2nd story, furrier, 10 persons; 3rd story, furrier, 10 persons. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in fire resisting partitions with fireproof doors at openings; a proposed 60 degree fire escape on the front of the building, having fireproof openings along the course thereof, extending from the top story to the 2nd story balcony, with drop ladder in guides to street; ROOFS of adjoining buildings, west 5 ft. higher, to east, 10 ft. higher; and

WHEREAS, petitioner contends that a 45 degree fire escape would cross the entire front of the premises.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is *granted* only so far as it affects the connecting stairs of the fire escape on the front of the building, *on condition*, that the angle of connecting stairs shall not be greater than sixty degrees; that the fire escape shall comply with the requirements of the labor law in all other respects; that a counter-balanced ladder in guides shall be provided from the lowest balcony, and the labor law complied with in all other respects; that the building shall not be increased in height.

## THE RESOLUTION:

(329-26-S)

WHEREAS, Schwartz & Gross, for Siljour Realty Corporation, owner, filed, April 16, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 531-535 Eighth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated March 15, 1926, reads (N. B. 535-25):

"13. All windows must comply with Section 264 of the Labor Law and with Rule No. 503 of the Industrial Code.";

and

WHEREAS, the building is fireproof, twenty stories in height, 74 ft. by 100 ft. in area at 1st story and 74 ft. by 88 ft. in area above. OCCUPIED: First story, stores; upper stories, offices, show rooms and manufacturing, 120 persons per story; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the 1st, 2nd and 3rd stories, in the street wall of the building, glazed with  $\frac{1}{4}$  in. plate glass; the maximum area of the glass being, 1st story, 8 ft. by 9 ft.; 2nd and 3rd stories, 5 ft. by 10 ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law, as to the area of the glass, would destroy the intended use of the lowest three stories and would, also, affect the architectural appearance of the premises.

*Resolved*, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted only so far as it affects the windows on the front of the building, on the three lower stories, on condition, that the openings be equipped with approved metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the labor law be complied with in all other respects.

WHEREAS, the decision of the superintendent of buildings, dated April 7, 1926, reads:

"Answering your letter of April 2, 1926, we beg to advise you that the following objections must be complied with before the Certificate can be issued.

\* \* \* \* \*

"Cellar of building does not conform with the Labor Law for factory use in that exit facilities are not adequate."

and

WHEREAS, the building is non-fireproof, five stories and cellar in height, 25 ft. by 120 ft. in area at 1st story and 25 ft. by 64 ft. 8 in. in area above. OCCUPIED: First story, store and the remainder of the building by one tenant, newspaper publisher; cellar, press room, mailing and storage, 8 persons; 50 persons above the 1st story. EXITS: An interior fireproof stairway, extending from the 1st story to roof; enclosed in fire-resisting partitions with fireproof doors at openings; a 60 degree fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the top story balcony to the roof of the 1st story extension; with EGRESS from the termination of the fire escape by means of iron stairs leading to a window in the 1st story of 32 Union Square. ROOFS of adjoining buildings: To north, 5 stories higher; to south, 1 story higher; and

WHEREAS, petitioner contends that the exit from the cellar consists of an interior fireproof stairs leading to hall of 1st story with direct egress to street and proposes to install an iron stair with platform in the rear court connecting the cellar story with the store on the 1st story.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is *granted on condition* that the ceiling of the cellar be fire-retarded throughout with double thickness of plaster boards, staggered joints, plaster filled; that an exterior iron stairs, with balcony at the first story level, shall be provided at the rear of the building from the level of the yard to the roof of the first story extension; that an exterior stairs shall be provided from the level of the basement story to the first story store which shall be maintained open and clear without any partitions or subdivisions therein; and that the variation be granted only so long as conditions of use and occupancy remain unchanged.

## THE RESOLUTION:

(383-26-S)

WHEREAS, Jacob Reisberg, for Zion Realty Company, owner, filed, May 3, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises 36 West 17th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 25, 1926 (Order No. 91649-LD), reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building, by constructing a fireproof passageway with an unobstructed width of at least three feet throughout, leading to the street, \* \* \*";

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 100 ft. in area at 1st story and 25 ft. by 80 ft. in area above. OCCUPIED: First story, store (lunch room); upper stories, tenant factories (clothing manufacturers), 85 persons above the 1st story; EQUIPPED with a fire alarm signal system. EXITS: An interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the main roof to the roof of the one story extension; with EGRESS from the termination of the fire escape by means of a fixed iron stairway leading to the fire escape balcony at the 3rd story of No. 34 West 17th street, a fireproof building under same ownership as building under consideration; ROOFS of adjoining buildings, to east, 50 ft. higher; to west, 10 ft. higher; and

WHEREAS, petitioner requests the acceptance of the existing means of egress from the termination of the fire escape.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is *granted on condition* that the fire escape balcony at the second story level be extended to the east with a connecting iron bridge, not less than two feet wide, connecting with the fire escape of the adjoining premises to the east; with iron stairs at an angle of not greater than sixty degrees; that the fire escape on the rear of the adjoining premises to the rear be extended to include plain glass opening at the extreme easterly end and that this variation be granted only so long as conditions of use and occupancy remain unchanged.

384-26-S.

PETITIONER—Gronenberg & Leuchtag, for Lanabel Realty Co., owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—521-525 Sixth avenue and 103-107 West 31st street, Manhattan.

APPEARANCES—

For Petitioner: Emanuel M. Cohen.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

## THE RESOLUTION:

(384-26-S)

WHEREAS, Herman Gronenberg, of Gronenberg and Leuchtag, for Lanabel Realty Company, owner, filed, May

3, 1926, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises 521-525 Sixth avenue, and 103-107 West 31st street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings rendered April 21, 1926 (N. B. No. 639-1925), reads:

"No. 19. Lights may not exceed 720 square inches in area and not more than 48 in. in any dimension. (Section 264-7 of Labor Law and Rule 503 of Industrial Code).";

and

WHEREAS, the building is fireproof, 25 stories in height, 98 ft. 9 in. by 100 ft. in area. OCCUPIED: First story, stores; upper stories, offices, show rooms and 25 per cent manufacturing, approximately 150 persons per story. EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are windows on the 1st, 2nd and 3rd stories, on both street fronts of the building; the windows in question are arranged partially stationary and partially pivoted, glazed with 1/4 in. thick plate glass in fireproof frames; the area of the glass varying in area from 4 ft. in. by 6 ft. 4 in. to 9 ft. 2 in. by 6 ft. 4 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would detract from the architectural appearance of the building and would, also, destroy the intended use of the lower three stories.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is *granted* only so far as it affects the windows on the street front on the three lower stories, *on condition*, that the openings be equipped with approved metal frames and sash, glazed with 1/4 in. polished plate glass; and that the requirements of the labor law shall be complied with in all other respects.

## THE RESOLUTION:

(387-26-S)

WHEREAS, Samuel Rosenblum, for J. Ehrlich and Sons, lessees, filed, May 4, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises 350 Sixth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 5, 1925, No. 86724-LD, reads:

"1. Arrange the fire escape at the east side of building \* \* \*

"Note:—Among the defects noted on this fire escape are the following: Windows on course not fireproof, not self-closing. No stairway from lowest balcony ground. No stairway from top balcony to roof.

# MINUTES

"2. Extend the interior stairway at the south side of building to the roof, as per Section 271 of the Labor Law.";

WHEREAS, the building is non-fireproof, 3 stories in height, 24 ft. 8 in. by 59 ft. in area at 1st story and 24 ft. by 40 ft. in area above. OCCUPIED: First story, 10 persons; 2nd story, embroideries, 10 persons; 3rd story, fur- nishings, 5 persons. EXITS: An interior non-fireproof stair- way extending from the 1st story to top story (with iron door to scuttle in roof); enclosed in lath and plaster partitions with wood and glass doors at openings; a fire escape on the rear of the building, having unprotected openings along the course thereof, extending from the top of the building to the roof of the one-story extension; with EGRESS at the termination of the fire escape by means of ad- joining extension roofs; ROOFS of adjoining buildings, same height; and

WHEREAS, petitioner requests, in view of the small area of the light occupancy of the premises, the acceptance of the existing means of exit; and

WHEREAS, the ceiling of the first story extension is covered throughout.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted as to order 86724-LD, item 1, only so far as it relates to egress from the termination of the fire escape, that is from the termination of the fire escape to the east, and south over a one-story extension of substantially same level, shall be provided through plain glass open- ings and granted as to item 2, on condition, that a fixed, run- g, iron ladder be provided from the stair hall to the scuttle in the roof; and that the build- ing shall not be increased in height, and this variation is granted so long as conditions of use and occupancy remain unchanged.

PETITIONER—E. S. Willard & Company on behalf of Louis E. Lahens, trustee for owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—535 West Broadway, Man- hattan.

REPRESENTATION—

For Petitioner: Arthur C. Bang.

For Administration: Inspector Maher of fire de- partment.

ORDER OF BOARD—Petition granted on condition.

Connell, Holland and Guilfoyle and	
Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

RESOLUTION:

(70-18-S)

WHEREAS, E. S. Willard & Company, on behalf of Louis Lahens, trustee, for owner, filed, January 5, 1918, a petition, with the board of standards and appeals, for an order of section 79-b, labor law, as cited in fire department order No. 73381-LD, affecting premises 535 West Broadway, Manhattan; and

WHEREAS, the order, dated December 11, 1917, from which relief is sought, reads:

1. Arrange the fire escape on west side of build- ing and the openings leading thereto and the windows opening on the course thereof, so that the same are in compliance with the provisions of sections 79-B-4 and 79-B-5 of the Labor Law.

Among the defects noted on this fire escape are the following: Windows on course not self-closing. Do

not permit of an unobstructed opening of 3 feet by 3 feet. Stairs are not 60 degrees. No stairway from the lowest balcony to ground.";

and

WHEREAS, the building is non-fireproof, four stories high, 25 ft. by 100 ft. in area; OCCUPIED as a factory, by the National Noodle Company, with factory work in the lower three stories and storage in fourth story, and not more than nine employees in the building, the tenant's lease having 8½ years still to run; that the means of egress consist of: (a) One interior stairway on the southerly side, extending from first story to roof, enclosed in wood partitions covered with galvanized sheet iron, and metal covered doors at openings; (b) A fire escape on the front or westerly side, consisting of balconies extending the entire width of building and embracing three windows on each story above first, with connecting stairs at an angle of 70 degrees and drop ladder from lowest balcony to street, windows along course of same being fireproof, but not automatic closing; (c) A 70 degree fire escape on the northerly side at the rear, consisting of balconies embrac- ing three windows in each story above the first, with drop ladder to yard, from which there is access to adjoining yard and the windows along course of fire escape; that the building adjoining to the north and south are approxi- mately 20 ft. higher than the building in question; and

WHEREAS, it further appears that the building was pre- viously occupied as a lodging house, and the fire escapes were altered at that time to meet the requirements of the city departments having jurisdiction; and

WHEREAS, this petition was granted by the board at its meeting October 24, 1918, on condition that the occupancy does not exceed ten persons above the first story; and

WHEREAS, it appears that the fire escapes on the north side of the building have been removed, and an order has been issued by the fire commissioner, reading:

"1. Arrange the fire escape on the west side of building \* \* \*.

"NOTE:—Among the defects noted on this fire escape are the following: No 60 degree stairs con- necting balconies. Fire proof windows opening on course not self-closing. No counter-balanced stairway from the lowest balcony to ground.

\* \* \* \* \*

"Maintain fire escape on west side of building at northerly side at rear, so as to be structurally safe and properly painted, as per text of resolution of Board of Standards and Appeals, Cal. 70-18-S.

"NOTE:—Among the defects noted on this fire es- cape at north side of building is as follows: Floor slats of balconies not securely fastened. Railings and closing balconies corroded and unsafe. Needs paint- ing.";

and

WHEREAS, petitioner contends he has complied with the alternative order.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted on condition that an iron stairs, of not greater than 60 degree angle, be provided, and a drop ladder in guides be provided from the lowest balcony to the ground; that a casement sash, opening out, be provided on the course of each balcony fire escape; that the occupancy shall not exceed ten persons above the first story; and that the building shall not be increased in height.

258-26-S.

## THE RESOLUTION:

(258-26-S)

WHEREAS, Rudolf Ludwig, for Henry B. Cohen, owner, filed, March 25, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 243 East 35th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 16, 1925, reads (Order No. 88244-LD):

"1. Extend the interior stairway at the west side of building to the roof as per Section 271 of the Labor Law. See NOTE.

"3. Enclose the interior stairway at west side of building serving as a required means of exit on all sides with partitions of fire resisting material extending continuously from the floor of the cellar to the underside of the 2nd floor including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors, constructed as per Section 271 of the Labor Law and Rule 2 of the Board of Standards and Appeals adopted July 29th, 1924, or carry out a proper alternative method of complying with Section 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 4 stories in height, 25 ft. by 95 ft. 6 in. in area. OCCUPIED: First story, upholsterer, 3 persons; 2nd story, decorator's shop, 10 persons; 3rd story, manufacture of novelties, 8 persons; 4th story, manufacture of weather strips, 10 persons. EXITS: An interior wooden stairway, extending from the 1st story to top story, enclosed in wooden partitions with wooden doors at openings; a sub-standard fire escape on the rear of the building, a standard fire escape on the front of the building, having fireproof openings along the course thereof, extending from second story to the top story, a gooseneck ladder to roof, and a counter-balanced stairs to sidewalk; ROOFS of adjoining buildings, same level at east; one story lower at west; and

WHEREAS, the petitioner proposes to provide a 60 degree iron stairway leading from top story to the roof scuttle; the petitioner further contends that he has just installed a new standard fire escape on the front of the building; that the exits are now adequate for the small area and occupancy of the building,

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted as to Order No. 88244-LD, item 1 thereof, on condition, that a fixed, double-rung iron ladder be provided from the stair enclosure on top story to the scuttle in roof; and denied as to item 3 of said order.

## THE RESOLUTION:

(280-26-S)

WHEREAS, William F. Regan, for B. & J. Auto Co., owner, filed, April 3, 1926, an appeal from an order of the fire commissioner, affecting premises 142-144 Clifton place, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated October 2, 1925, reads:

"Provide additional required means of exit from 2nd story of the building, remote from the existing stairway, preferably located at the west side of building, in accordance with the requirements of Rule 2 of the Board of Standards and Appeals, adopted July 29th, 1924."

and

WHEREAS, the building is non-fireproof, 2 stories in height, 40 ft. by 80 ft. in area at 1st story and 40 ft. by 48 ft. in area above; OCCUPIED for the manufacture of automobile springs and machine shop; 1st story, 10 persons; 2nd story, 1 person. EXITS: An interior wooden stairway, extending from the 1st story to 2nd story, enclosed in non-fireproof partitions with wooden doors at openings; ROOFS of adjoining buildings, same level at east; one story lower at west; and

WHEREAS, the petitioner proposes to provide an additional exit by installing a fireproof door at rear of 1st story leading to roof of 1st story extension and a neck ladder from roof of 1st story extension down to adjoining yard level at west.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted on condition that iron steps be provided from rear of the second story extension, with egress from extension roof, by fixed, vertical, gooseneck iron ladder to the yard of the premises to the west, with egress from through plain glass windows to Clifton place; that the building shall not be increased in height or area; and that this variation is granted only so long as conditions of use and occupancy remain substantially unchanged.

requirements of the labor law, as cited in orders of the commissioner, affecting premises Nos. 24-26 East 13th Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated number 28, 1925, reads (Order No. 31813-LC):

"You are hereby notified that an inspection of premises 24-26 East 13th Street, Manhattan, used for the storage and use of chemicals, etc., shows that the following must be done before permit requested by you can be issued:

"3. Owner of building must comply with Fire Department orders.

"Order No. 80787-LD. Issued June 25th, 1925.

"1. Arrange iron bars on windows on rear side of 1st story so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purposes of egress, as per Section 272 of the Labor Law.

"Order No. 81070-LD. Issued June 26th, 1925.

"1. Remove the substandard fire escape on the east side of the building or reconstruct same as per Section 4 of the Labor Law, etc.";

WHEREAS, the building is non-fireproof, 6 stories in height, 49 ft. 2 3/4 in. by 103 ft., irregular, in area. OCCUPIED: Basement, 1st, 2nd and 3rd stories, photographic plates; 4th story, bookbinders; 5th story, manufacture of glass; 6th story, engravers on brass; 50 persons on the first story; EQUIPPED with a sprinkler system and fire alarm signal system. EXITS: An interior stairway, extending from the 1st story to top story; enclosed in fire-retarding partitions with fireproof doors at openings; a sub-standard fire escape on the east side of building and also a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from roof to the yard; with egress from the building by means of open alley to street; ROOFS of adjoining buildings, approximately 40 ft. lower; and

WHEREAS, there are iron bars on 5 windows in the rear of the 1st story; and

WHEREAS, petitioner contends that the bars have been removed from some of the windows in question and that the means of exit are now afforded; that there are no other means of exit not including the sub-standard fire escape; that the quantity of flash light powder has been increased to 10 pounds and that a metal receptacle has been added for same.

WHEREAS, the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted as to item 1 of order No. 81070-LD, on condition that the windows on the course of this fire escape be made fireproof; and denied as to item 1 of order No. 80787-LD.

## THE RESOLUTION:

(11-26-S)

WHEREAS, Samuel Rosenblum, for Charles and Victor Goldstein, owners, filed January 4, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 8 1/2-12 Jones street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 13, 1925, reads (Order No. 78095-LD):

"1. Enclose the interior stairway at the front of building serving as a required means of exit and the landings, platforms and passageways connecting therewith, etc.";

and

WHEREAS, the building is non-fireproof, six stories in height, 75 ft. by 85 ft. in area. OCCUPIED: A portion of the 6th story for the manufacture of paper boxes and the remainder of the premises, by one tenant, for the manufacture of toys and also wash boards, a varying occupancy on each story, but the total not to exceed 100 persons above the 1st story; EQUIPPED with a sprinkler system and a standpipe system. EXITS: An interior wooden stairway, extending from the 1st story to top story (with iron ladder to scuttle in roof); enclosed in wood studs, lath and plaster partitions, covered on the loft side with 26 gauge metal with fireproof doors at openings; two fire escapes on the front of the building, both having fireproof openings along the course thereof, and both extending from the top story balcony (gooseneck ladder to roof) to the 2nd story balcony with counter-balanced stairs to street. ROOFS of adjoining buildings, to east and west are one story lower; and

WHEREAS, petitioner contends that a similar order was acted upon by the board of review of the fire department, and accepted as having been complied with after certain work was done; and requests the acceptance of the stairway enclosure in view of the facts that the building is protected with a sprinkler system and equipped with three exits; and

WHEREAS, this case was denied by the board at the meeting held on April 27, 1926, and reopened by the vote of the board on June 29, 1926; and

WHEREAS, petitioner proposes to cover the stair side of the partition with 26 gauge metal (the loft side of the partition being at present similarly covered), and proposes, further, to limit the occupancy of any story to not over 18 persons; and

WHEREAS, the building is equipped with an approved sprinkler system in addition to a standpipe system; and there are two sixty-degree fire escapes, separate and distinct from each other, on the front of the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted only so far as it affects the loft side of the stair hall enclosure, on condition, that the existing lath and plaster enclosure on the loft side be covered with metal, and that the stair side shall be fire-retarded in accordance with the rules of the board of standards and appeals; that the occupancy of the three upper floors shall not exceed 18 persons per floor, and shall not exceed 10 persons on each of the lower two stories.

THE RESOLUTION:

(325-26-S)

WHEREAS, Arthur Werner, for Morris Katz, owner, filed, April 16, 1926, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises No. 831 Third avenue, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated May 12, 1925, read (Order No. 77015-LD):

"1. Arrange the fire escape at rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. (See Note)

"1. Windows on course not fireproof, self-closing.  
2. Connecting stairs not 60 degree. 3. Does not extend to roof. 4. No counter-balanced stairs provided at 2nd story balcony to ground and 5. No direct egress to street from lower termination of the fire escape.

"2. Enclose interior stairway at south side of building in partition of fire resisting material on 3rd story, as per rule 3 of the Board of Standards and Appeals, adopted July 29, 1924.

"3. Extend the interior stairway at the south side of building to the roof, as per Sec. 271 of the Labor Law."

(Order No. 77016-LD)

"1. Provide exit signs, letters to be at least 8 in. in height, at all means of egress with a red light over all such exits for use in time of darkness, as per Section 272 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, 4 stories in height, 35 ft. by 65 ft. in area at 1st and 2nd stories and 35 ft. by 55 ft. in area above. OCCUPIED: Cellar, storage of furniture frames and shipping room, no occupancy; 1st story, dry goods store; 2nd story, show room, no occupancy; 3rd story, upholstery, 4 persons; 4th story, draperies, 10 persons. EXITS: An interior wooden stairway, extending from the 1st story to top story (with iron ladder to scuttle in roof); enclosed in wooden partitions with wooden doors at openings; a fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from the top story balcony to the roof of the 2nd story extension; with EGRESS from the termination of the fire escape by means of a single rung ladder leading to yard of premises to the east. ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner proposes to provide a 60 degree fire escape (having fireproof openings on the 3rd and 4th stories) on the front of the building, extending from the top story to the 2nd story balcony, with counter-balanced stair to street; proposes to remove the fire escape on the rear of the building and to install a 45 degree iron stairway, 24 in. wide, leading from the top story to a counter-balanced scuttle in the roof.

Resolved, that the orders of the fire commissioner be and they hereby are affirmed and that the petition be and it hereby is denied.

401-26-S.

PETITIONER—Croker National Fire Prevention Eng. Co., for 105 West 27th street Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—105 West 27th street, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspected Maher of department.

ACTION OF BOARD—Petition granted on conditions—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Deputy Chief Martin .....	
Negative .....	
Absent: Commissioner Connell .....	

THE RESOLUTION:

(401-26-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for 105 West 27th Street Co., Inc., owner, filed, May 8, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises 105 West 27th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 9, 1925, No. 88536-LD, reads:

"1. Provide safe and unobstructed egress from lower termination of the fire escape at rear of building, by constructing a fireproof passageway with unobstructed width of at least 3 feet throughout, opening to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street as per Section 273 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, four stories in height, 20 ft. by 93 ft. 9 in. in area at 1st story and 20 ft. by 81 ft. in area above. OCCUPIED: First story, 4 persons; 2nd story, tailor, 3 persons; 3rd story, furrier, 3 persons; 4th story, furrier, 5 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in fire retarding partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from roof to the roof of 1st story extension, stairway from roof of 1st story extension to yard, with no legal means of egress to street; ROOFS of adjoining buildings, 8 stories higher at west; same level at east; and

WHEREAS, the petitioner contends that the existing fire escape from termination of rear fire escapes is adequate; that the roof of 1st story extension is level with roof of 1st story extension of building adjoining at east and 3 feet higher than the roof of a similar extension at west; that the petitioner may be had to street through the adjoining buildings; and, furthermore, at the foot of the stairs leading to yard there is a door opening into the rear of No. 106 West 28th street through which egress may be had to the street.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted only so far as it affects egress from the termination of the rear fire escape, on condition, that egress at level be maintained through plain glass door opening from premises at the rear; that the iron platform connecting the fire escape with the roof of the first story extension to the east and north be maintained; that the occupancy of the stairs not exceed the legal capacity of the stairs; and that the variation is granted so long as conditions remain substantially unchanged.

411-26-S.

PETITIONER—Charles H. Gillespie, for Mitchell & Co., lessee.

# MINUTES

**SUBJECT**—Variation of the labor law as cited in orders of fire commissioner.

**PLACES AFFECTED**—32 West 58th street, Manhattan.

**APPEARANCES**—

For Petitioner: Sidney L. Strauss.

For Administration: Inspector Maher of fire department.

**ACTION OF BOARD**—Petition denied.

**VOTE TO GRANT**—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners Holland and Guilfoyle and Deputy Chief Martin ..... 4

Absent: Commissioner Connell ..... 1

**THE RESOLUTION:**

(411-26-S)

**WHEREAS**, Charles H. Gillespie, for Mitchell Kennerly, filed, May 11, 1926, a petition for variation from requirements of the labor law as cited in orders of the commissioner, affecting premises 32 West 58th street, City of Manhattan; and

**WHEREAS**, the orders of the fire commissioner, dated May 13, 1926, read:

Order No. 94163-LD—

"1. Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Secs. 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Sec. 273 of the Labor Law. Among the defects noted on this fire escape are the following: No openings 2 ft. 6 in. leading to balconies. Windows on course not fireproof nor self-closing. No stairway from top balcony to roof. No screened to a height of 4 ft. 6 in. from steps to sills of openings to balconies. No 60 degree stairways connecting balconies. No stairway from lowest balcony to ground. No safe egress to the street from the lower termination of fire escape.

Enclose the interior stairway at the east side of building serving as a required means of exit, and the landings, platforms, and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from 1st story to 3rd story above the roof, constructed as per Sec. 271 of the Labor Law."

Order No. 94164-LD—

"Provide exit signs, letters to be at least 8 in. in height, at all means of egress with a red light over such exits for use in time of darkness, as per Sec. 273 of the Labor Law."

**WHEREAS**, the building is non-fireproof, 6 stories in area 5 ft. by 100 ft. 5 in. in area at 1st story and 25 ft. by 25 ft. in area above; **OCCUPIED**: 1st story, store, 2 persons; 2nd story, office, 3 persons; 3rd story, living room, 4 persons; 4th story, millinery, 10 persons; 5th and 6th

stories, living apartments; **EXITS**: an interior wooden stairway, extending from the 1st story to roof, enclosed in non-fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from top story to the 3rd story balcony and 45 degree stairs leading to roof of 1st story extension, with no legal means of egress to the street; **ROOFS** of adjoining buildings: same level at east and west; and

**WHEREAS**, the petitioner proposes to extend rear fire escape up to the roof by a 45 degree stairs; the petitioner claims that all openings leading to stair enclosure are fireproof; that the roof of 1st story extension is connected with the rear fire escapes of premises adjoining at south through which egress may be had to 57th street; the petitioner contends that exit Order No. 576-23 issued by the bureau of buildings has been complied with; that the present exits are adequate; that due to the occupancy and character of this building, it would be unnecessary to provide exit signs as called for by Order No. 94164-LD.

**Resolved**, that the orders of fire commissioner be and they hereby are *affirmed* and that the petition be and it hereby is *denied*.

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Resolved Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion originally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a permitted use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea failure to receive such notice is no excuse for neglect appear.

*Fifth*, That the business of the board is to dispose all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

Municipal Building, Rooms 1001 to 1015.

NE—WORTH 0184.

HOURS—9 a. m. to 4 p. m. Saturdays, 9 a. m. to noon.

Communications should be addressed to the chairman of the board.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

THE LIBRARY OF THE  
UNIVERSITY OF ILLINOIS  
AUG 14 1926

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 14, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 21, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connected with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, September 14, 1926*, at 10 o'clock, in Room 1013, Municipal Building on the following matters:

no. 361-26-BZ—Application, April 23, 1926, under section 21 of the building zone resolution, of Otto Henschel, applicant, on behalf of Ralph Crisci, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 2263-2275 East 18th street, Brooklyn.

no. 1425-24-BZ—Application, May 11, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Charles Milgrim, owner, to permit in a residence district the maintenance of a factory use of an existing building (previously denied by the board); premises 231 West 74th street, Manhattan.

no. 1083-25-BZ—Application, October 23, 1925, under section 21 of the building zone resolution, of Joseph Zicarelli, owner, to permit in a residence district and "B" area district the erection and maintenance of a rear extension, covering more than 40 per cent of the area of the yard space required by the zone resolution; premises 51 West 11th street, Manhattan.

no. 17-26-BZ—Application, January 6, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of John Welz, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 168-190 East 98th street, Brooklyn.

no. 240-26-BZ—Application, March 20, 1926, under sections 7c and 21 of the building zone resolution, of A. J. Simberg, architect, on behalf of Anna Shulman, owner, to permit in a residence district extending from a business district the erection and maintenance of a building for store purposes; premises 1661 St. Nicholas avenue, northwest corner of Fairview avenue, Manhattan.

no. 272-26-BZ—Application, March 31, 1926, under section 21 of the building zone resolution, of William F. Regan, consulting engineer, on behalf of Beardsley Realty Company, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 553-563 Atlantic avenue, Brooklyn.

no. 450-26-BZ—Application, May 20, 1926, under section 7c of the building zone resolution, of A. F. Gilbert, architect, on behalf of Manufacturers Trust Company, owner, to permit in a residence district extending from a business district the erection and maintenance of a business building; premises 1696 Myrtle avenue

and 1679 Cornelia street, Ridgewood, Borough of Queens.

CAL. NO. 533-26-BZ—Application, June 9, 1926, under sections 7c and 21 of the building zone resolution, of John W. Clancy, applicant, on behalf of Mary E. Bird, owner, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 2337 Hoffman street, The Bronx.

CAL. NO. 267-26-BZ—Application, March 29, 1926, under sections 7e and 21 of the building zone resolution, of Coonley and Grindel, applicants and owners, to permit in a business district the change of occupancy of an existing building from a motion picture theatre to a garage for the storage of more than five (5) motor vehicles and also to a motor vehicle repair shop; premises 1094 Castleton avenue and 13 Caroline street, West New Brighton, Richmond.

WILLIAM E. WALSH, *Chairman.*

# RULES

## ENCLOSURE OF FACTORY STAIRWAYS

(410-24-SR)

mentary to Labor Law, § 271; originally adopted by the Industrial Commission August 28, 1913, and effective October 1, 1913, amended November 18, 1915; and readopted February 10, 1916, effective March 16; revised and adopted by the Board of Standards Appeals July 29, 1924.

1.—Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty-five persons employed above the second story, all interior stairways, serving as required means of exit, and the platforms and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest landing of the stairway in accordance with the following:

Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
Stairways Enclosed			
Stairways Enclosed	Stairways Enclosed		
Stairways Enclosed	Stairway Enclosed	Stairways Enclosed	

Term "contents" as used above means articles, goods, and merchandise, packed, stored, manufactured or in process of manufacture.

Term "combustible" as used above means articles, wares or merchandise which will burn or support combustion.

Term "sprinkler" as used above means an automatic sprinkler equipment installed and maintained in good working order on each floor.

Term "story" as used above means that part of a building between any floor and the floor or roof next above the first story is that part of a building which extends more than 50 per cent above the floor below and the roof above the curb or average grade level.

The stairway extends to the top floor of the building; such partitions shall extend to the under side of the roof boarding. That portion of the under side of the beams within the stair enclosure shall be covered with fire-resisting material, except in buildings with roofs of combustible material, in which case the partitions shall extend to the under side of the roof.

The stairway is required to extend to the roof, and the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof, or louvres or ventilators, or exterior windows with fireproof sections at the top floor.

Openings in such partitions shall be provided with self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material at least four inches thick unless the partition extends to the floor bottom.

Horizontal exit, as defined in section 267 of the Labor Law, shall be accepted as a compliance with this rule where the sides of the fire wall or walls are occupied by the same occupant.

—Where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amount specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy.

The interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

### Rule 3.—Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which shall lead from every floor above or below grade shall lead to or open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law. Except that exit door shall be a fire door, with substantial steps to the sills properly secured when sill is more than 8 inches above the floor level; and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

Rule 4.—Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

### Rule 5.—Storage of Combustible Material About Factory Stairways.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication of the posting of the calendars on the bulletin board offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of to receive such notice is no excuse for neglect to

*Fifth*, That the business of the board is to dispose of cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of appellant or petitioner to file necessary data, or by any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

#### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF THE CLERK'S CALENDAR

*THE LIBRARY OF THE UNIVERSITY OF ILLINOIS*  
The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 14, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

Next subsequent Call of the Calendar will be on Tuesday, September 21, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

# CALENDAR

## *Building Zone Applications.*

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, September 14, 1926*, at 10 o'clock, in Room 1013, Municipal Building on the following matters:

no. 361-26-BZ—Application, April 23, 1926, under section 21 of the building zone resolution, of Otto Henschel, applicant, on behalf of Ralph Crisci, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 2263-2275 East 18th street, Brooklyn.

no. 1425-24-BZ—Application, May 11, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Charles Milgrim, owner, to permit in a residence district the maintenance of a factory use of an existing building (previously denied by the board); premises 231 West 74th street Manhattan.

no. 1083-25-BZ—Application, October 23, 1925, under section 21 of the building zone resolution, of Joseph Zicarelli, owner, to permit in a residence district and "B" area district the erection and maintenance of a rear extension, covering more than 40 per cent of the area of the yard space required by the zone resolution; premises 51 West 11th street, Manhattan.

no. 17-26-BZ—Application, January 6, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of John Welz, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 168-190 East 98th street, Brooklyn.

no. 240-26-BZ—Application, March 20, 1926, under sections 7c and 21 of the building zone resolution, of A. J. Simberg, architect, on behalf of Anna Shulman, owner, to permit in a residence district extending from a business district the erection and maintenance of a building for store purposes; premises 1661 St. Nicholas avenue, northwest corner of Fairview avenue, Manhattan.

no. 272-26-BZ—Application, March 31, 1926, under section 21 of the building zone resolution, of William F. Regan, consulting engineer, on behalf of Beardsley Realty Company, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 553-563 Atlantic avenue, Brooklyn.

no. 450-26-BZ—Application, May 20, 1926, under section 7c of the building zone resolution, of A. F. Gilbert, architect, on behalf of Manufacturers Trust Company, owner, to permit in a residence district extending from a business district the erection and maintenance of a business building; premises 1696 Myrtle avenue

and 1679 Cornelia street, Ridgewood, Borough of Queens.

CAL. NO. 533-26-BZ—Application, June 9, 1926, under sections 7c and 21 of the building zone resolution, of John W. Clancy, applicant, on behalf of Mary E. Bird, owner, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 2337 Hoffman street, The Bronx.

CAL. NO. 267-26-BZ—Application, March 29, 1926, under sections 7e and 21 of the building zone resolution, of Coonley and Grindel, applicants and owners, to permit in a business district the change of occupancy of an existing building from a motion picture theatre to a garage for the storage of more than five (5) motor vehicles and also to a motor vehicle repair shop; premises 1094 Castleton avenue and 13 Caroline street, West New Brighton, Richmond.

WILLIAM E. WALSH, *Chairman.*

SEPTEMBER 14, 1926, 2 P. M.

## *Building Zone Application.*

ICE IS HEREBY GIVEN by the board of standard appeals of a public hearing under the provisions building zone resolution, *Tuesday morning, Sep-28, 1926*, at 10 o'clock, in Room 1013, Municipal, on the following matter:

CAL. NO. 845-25-BZ—Application, August 19, 1925, under sections 7c and 21 of the building zone resolution, of John J. Dunnigan, applicant, on behalf of Walter Eveleth, owner, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises northeast corner of Inwood avenue and Macombs road, The Bronx.

WILLIAM E. WALSH, *Chairman.*

SEPTEMBER 28, 1926, 2 P. M.

## *Petitions for Variations.*

- 497-26-S—34 East 30th street, Manhattan.
- 500-26-S—440 Fulton street, Brooklyn.
- 501-26-S—130 West 45th street, Manhattan.
- 281-26-S—22-26 Tenth avenue, Manhattan.
- 446-26-S—58-64 West 40th street, Manhattan.
- 447-26-S—58-64 West 40th street, Manhattan.
- 448-26-S—58-64 West 40th street, Manhattan.
- 511-26-S—440-448 Ninth avenue and 336-378 West 35th street, Manhattan.
- 523-26-S—347 East 102nd street and 1981-1985 First avenue, Manhattan.

## *Appliances Submitted for Approval*

- 534-26-SA—Socony Industrial Type "A" Burner, approval of.
- 560-26-SA—Franklin Domestic Oil Burner, approval of.

# RULES

## ENCLOSURE OF FACTORY STAIRWAYS

(410-24-SR)

Supplementary to Labor Law, § 271; originally adopted by the Industrial Commission August 28, 1913, and effective October 1, 1913, amended November 18, 1915; revised and readopted February 10, 1916, effective March 1, 1916; revised and adopted by the Board of Standards Appeals July 29, 1924.

Section 1.—Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty persons employed above the second story, all interior stairways, serving as required means of exit, and the stairs, platforms and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest landing of the stairway in accordance with the following rules:

Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
Stairways Enclosed			
Stairways Enclosed	Stairways Enclosed		
Stairways Enclosed	Stairways Enclosed	Stairways Enclosed	

Term "contents" as used above means articles, goods, and merchandise, packed, stored, manufactured or in process of manufacture.

Term "combustible" as used above means articles, wares or merchandise which will burn or support combustion.

Term "sprinkler" as used above means an adequate automatic sprinkler equipment installed and maintained in good working order on each floor.

Term "story" as used above means that part of a building between any floor and the floor or roof next above the first story is that part of a building which contains more than 50 per cent above the floor below and the floor next above the curb or average grade level.

Where the stairway extends to the top floor of the building, such partitions shall extend to the under side of the roof boarding. That portion of the under side of the beams within the stair enclosure shall be covered with fire-resisting material, except in buildings with roofs of non-combustible material, in which case the partitions shall extend to the under side of the roof.

Where the stairway is required to extend to the roof, the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof, or by louvres or ventilators, or exterior windows with fireproof sections at the top floor.

All openings in such partitions shall be provided with self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material at least four inches thick unless the partition extends to the cellar bottom.

A horizontal exit, as defined in section 267 of the Labor Law, shall be accepted as a compliance with this rule where the sides of the fire wall or walls are occupied by the same factory floor by the same occupant.

Section 2.—Where there are occupancies on any story or part of a story involving the storage or use below the top story of the building, and exceeding the amount specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy.

The interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

### Rule 3.—Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which shall lead to or open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law. Except that exit door shall be a fire door, with substantial steps to the sills properly secured when sill is more than 8 inches above the floor level; and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

Rule 4.—Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

### Rule 5.—Storage of Combustible Material About Factory Stairways.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication of the posting of the calendars on the bulletin board, offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative body in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of appellant or petitioner to file necessary data, or by any other method of delay.

ress Report.

#### PUBLIC HEARINGS. AUG 30 1926

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 14, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 21, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connected with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of stand-  
 and appeals of a public hearing under the provisions  
 of the building zone resolution, *Tuesday morning*, Septem-  
 ber 14, 1926, at 10 o'clock, in Room 1013, Municipal Build-  
 ing on the following matters:

no. 361-26-BZ—Application, April 23, 1926, under sec-  
 tion 21 of the building zone resolution,  
 of Otto Henschel, applicant, on behalf  
 of Ralph Crisci, owner, to permit in  
 a business district the erection and  
 maintenance of a garage for the stor-  
 age of more than five (5) motor vehi-  
 cles; premises 2263-2275 East 18th  
 street, Brooklyn.

no. 1425-24-BZ—Application, May 11, 1926, under sec-  
 tion 21 of the building zone resolution,  
 of William F. Doyle, applicant, on be-  
 half of Charles Milgrim, owner, to per-  
 mit in a residence district the mainte-  
 nance of a factory use of an existing  
 building (previously denied by the  
 board); premises 231 West 74th street,  
 Manhattan.

no. 1083-25-BZ—Application, October 23, 1925, under  
 section 21 of the building zone resolution,  
 of Joseph Zicarelli, owner, to permit in  
 a residence district and "B" area dis-  
 trict the erection and maintenance of  
 a rear extension, covering more than  
 40 per cent of the area of the yard  
 space required by the zone resolution;  
 premises 51 West 11th street, Manhat-  
 tan.

no. 17-26-BZ—Application, January 6, 1926, under sec-  
 tion 21 of the building zone resolution,  
 of William F. Doyle, applicant, on be-  
 half of John Welz, owner, to permit  
 in a business district the erection and  
 maintenance of a garage for the stor-  
 age of more than five (5) motor vehi-  
 cles; premises 168-190 East 98th  
 street, Brooklyn.

no. 240-26-BZ—Application, March 20, 1926, under sec-  
 tions 7c and 21 of the building zone  
 resolution, of A. J. Simberg, architect,  
 on behalf of Anna Shulman, owner, to  
 permit in a residence district extend-  
 ing from a business district the erec-  
 tion and maintenance of a building for  
 store purposes; premises 1661 St. Nich-  
 olas avenue, northwest corner of Fair-  
 view avenue, Manhattan.

272-26-BZ—Application, March 31, 1926, under sec-  
 tion 21 of the building zone resolu-  
 tion, of William F. Regan, consult-  
 ing engineer, on behalf of Beardsley  
 Realty Company, owner, to permit in  
 a business district the erection and  
 maintenance of a gasoline service sta-  
 tion; premises 553-563 Atlantic avenue,  
 Brooklyn.

# RULES

## ENCLOSURE OF FACTORY STAIRWAYS

(410-24-SR)

Supplementary to Labor Law, § 271; originally adopted by the Industrial Commission August 28, 1913, and effective October 1, 1913, amended November 18, 1915; revised and readopted February 10, 1916, effective March 1, 1916; revised and adopted by the Board of Standards and Appeals July 29, 1924.

Section 1.—Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty persons employed above the second story, all interior stairways, serving as required means of exit, and the platforms, and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest landing of the stairway in accordance with the following table:

Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
Stairways Enclosed			
Stairways Enclosed	Stairways Enclosed		
Stairways Enclosed	Stairway Enclosed	Stairways Enclosed	

Term "contents" as used above means articles, goods, and merchandise, packed, stored, manufactured or in process of manufacture.

Term "combustible" as used above means articles, wares or merchandise which will burn or support combustion.

Term "sprinkler" as used above means an adequate automatic sprinkler equipment installed and maintained in good working order on each floor.

Term "story" as used above means that part of a building between any floor and the floor or roof next above the first story is that part of a building which is more than 50 per cent above the floor below and the roof above the curb or average grade level.

The stairway extends to the top floor of the building; such partitions shall extend to the under side of the roof boarding. That portion of the under side of the roof within the stair enclosure shall be covered with fire-resisting material, except in buildings with roofs of combustible material, in which case the partitions shall extend to the under side of the roof.

The stairway is required to extend to the roof, and the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof, or louvres or ventilators, or exterior windows with fireproof sections at the top floor.

Openings in such partitions shall be provided with self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material, at least four inches thick unless the partition extends to the cellar bottom.

A horizontal exit, as defined in section 267 of the Labor Law, shall be accepted as a compliance with this rule where the sides of the fire wall or walls are occupied by the same occupant.

Where there are occupancies on any story or part of a story involving the storage or use below the top story of the following materials and exceeding the amount specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy.

The interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

### Rule 3.—Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which shall lead from every floor above or below grade shall lead to or open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law. Except that exit door shall be a fire door, with substantial steps to the sills properly secured when sill is more than 8 inches above the floor level; and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

Rule 4.—Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

### Rule 5.—Storage of Combustible Material About Factory Stairways.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication of the posting of the calendars on the bulletin board offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of appellant or petitioner to file necessary data, or by any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

Municipal Building, Rooms 1001 to 1015.

Telephone—WORTH 0184.

Hours—9 a. m. to 4 p. m. Saturdays, 9 a. m. to noon.

Communications should be addressed to the chairman of the board.

### CONTENTS

Table of Contents of the Bulletin contains, in the order given—

Clerk's Calendar.

Special Calendar.

Cases in Building Zone Cases.

Special Calendar.

Annual Report.

#### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

#### HOURS FOR CONSULTATION.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 14, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 21, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman,

## Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning*, September 14, 1926, at 10 o'clock, in Room 1013, Municipal Building on the following matters:

no. 361-26-BZ—Application, April 23, 1926, under section 21 of the building zone resolution, of Otto Henschel, applicant, on behalf of Ralph Crisci, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 2263-2275 East 18th street, Brooklyn.

no. 1425-24-BZ—Application, May 11, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Charles Milgrim, owner, to permit in a residence district the maintenance of a factory use of an existing building (previously denied by the board); premises 231 West 74th street Manhattan.

no. 1083-25-BZ—Application, October 23, 1925, under section 21 of the building zone resolution, of Joseph Zicarelli, owner, to permit in a residence district and "B" area district the erection and maintenance of a rear extension, covering more than 40 per cent of the area of the yard space required by the zone resolution; premises 51 West 11th street, Manhattan.

no. 17-26-BZ—Application, January 6, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of John Welz, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 168-190 East 98th street, Brooklyn.

no. 240-26-BZ—Application, March 20, 1926, under sections 7c and 21 of the building zone resolution, of A. J. Simberg, architect, on behalf of Anna Shulman, owner, to permit in a residence district extending from a business district the erection and maintenance of a building for store purposes; premises 1661 St. Nicholas avenue, northwest corner of Fairview avenue, Manhattan.

no. 272-26-BZ—Application, March 31, 1926, under section 21 of the building zone resolution, of William F. Regan, consulting engineer, on behalf of Beardsley Realty Company, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 553-563 Atlantic avenue, Brooklyn.

no. 450-26-BZ—Application, May 20, 1926, under section 7c of the building zone resolution, of A. F. Gilbert, architect, on behalf of Manufacturers Trust Company,

owner, to permit in a residence district extending from a business district the erection and maintenance of a business building; premises 1696 Myrtle avenue and 1679 Cornelia street, Ridgewood, Borough of Queens.

CAL. NO. 533-26-BZ—Application, June 9, 1926, under sections 7c and 21 of the building zone resolution, of John W. Clancy, applicant, on behalf of Mary E. Bird, owner, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 2337 Hoffman street, The Bronx.

CAL. NO. 267-26-BZ—Application, March 29, 1926, under sections 7e and 21 of the building zone resolution, of Coonley and Grindel, applicants and owners, to permit in a business district the change of occupancy of an existing building from a motion picture theatre to a garage for the storage of more than five (5) motor vehicles and also to a motor vehicle repair shop; premises 1094 Castleton avenue and 13 Caroline street, West New Brighton, Richmond.

WILLIAM E. WALSH, *Chairman*.

217-21-SR—Fuel Oil Rules.

# CALENDAR

SEPTEMBER 28, 1926, 10 A. M.

## *Appeals from Administrative Orders.*

- 26-A—212 West 14th street, Manhattan.
- 26-A—2-8 Rector street, 56-66 Trinity place and 91-101 Greenwich street, Manhattan.
- 26-A—220-222 West 49th street, Manhattan.
- 26-A—278-292 Locust avenue, The Bronx.
- 26-A—71 North 6th street, Brooklyn.
- 26-A—202-220 Meserole avenue, 90-106 Jewell street and 59-61 Moultrie st., Brooklyn.
- 26-A—171 Thompson avenue, L. I. City, Queens.
- 26-A—54-56 Dey street, Manhattan.
- 26-A—1584-1586 Fulton street, Brooklyn.
- 26-A—692 Broadway, Manhattan.
- 26-A—3718-3728 14th avenue and 1363-1383 38th street, Brooklyn.
- 26-A—340 Hamilton street, L. I. City, Borough of Queens.
- 26-A—284 North 6th street, Brooklyn.
- 26-A—11-27 Ocean Parkway, Brooklyn.
- 26-A—437-453 East 56th st., Manhattan.

## *Building Zone Application.*

NICE IS HEREBY GIVEN by the board of standard appeals of a public hearing under the provisions of building zone resolution, Tuesday morning, September 28, 1926, at 10 o'clock, in Room 1013, Municipal Building, on the following matter:

CAL. NO. 845-25-BZ—Application, August 19, 1925, under sections 7c and 21 of the building zone resolution, of John J. Dunnigan, applicant, on behalf of Walter Eveleth, owner, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises northeast corner of Inwood avenue and Macombs road, The Bronx.

WILLIAM E. WALSH, *Chairman.*

SEPTEMBER 28, 1926, 2 P. M.

## *Petitions for Variations.*

- 497-26-S—34 East 30th street, Manhattan.
- 500-26-S—440 Fulton street, Brooklyn.
- 501-26-S—130 West 45th street, Manhattan.
- 281-26-S—22-26 Tenth avenue, Manhattan.
- 446-26-S—58-64 West 40th street, Manhattan.
- 447-26-S—58-64 West 40th street, Manhattan.
- 448-26-S—58-64 West 40th street, Manhattan.
- 511-26-S—440-448 Ninth avenue and 336-378 West 35th street, Manhattan.
- 523-26-S—347 East 102nd street and 1981-1985 First avenue, Manhattan.

## *Appliances Submitted for Approval*

- 534-26-SA—Socony Industrial Type "A" Burner, approval of.
- 560-26-SA—Franklin Domestic Oil Burner, approval of.

# RULES

## ENCLOSURE OF FACTORY STAIRWAYS

(410-24-SR)

Supplementary to Labor Law, § 271; originally adopted by the Industrial Commission August 28, 1913, and effective October 1, 1913, amended November 18, 1915; revised and readopted February 10, 1916, effective March 1, 1916; revised and adopted by the Board of Standards and Appeals July 29, 1924.

Section 1.—Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty persons employed above the second story, all interior stairways, serving as required means of exit, and the platforms, landings and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest landing of the stairway in accordance with the following table:

Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
Stairways Enclosed			
Stairways Enclosed	Stairways Enclosed		
Stairways Enclosed	Stairway Enclosed	Stairways Enclosed	

Term "contents" as used above means articles, goods, and merchandise, packed, stored, manufactured or in process of manufacture.

Term "combustible" as used above means articles, wares or merchandise which will burn or support combustion.

Term "sprinkler" as used above means an adequate automatic sprinkler equipment installed and maintained in good working order on each floor.

Term "story" as used above means that part of a building between any floor and the floor or roof next above the first story is that part of a building which extends more than 50 per cent above the floor below and the roof above the curb or average grade level.

Where the stairway extends to the top floor of the building, such partitions shall extend to the under side of the roof boarding. That portion of the under side of the roof beams within the stair enclosure shall be covered with fire-resisting material, except in buildings with roofs of combustible material, in which case the partitions shall extend up to the under side of the roof.

Where the stairway is required to extend to the roof, the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof, or by louvres or ventilators, or exterior windows with fireproof sections at the top floor.

Openings in such partitions shall be provided with fireproof self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material, at least four inches thick unless the partition extends to the cellar bottom.

A horizontal exit, as defined in section 267 of the Labor Law, shall be accepted as a compliance with this rule where the two sides of the fire wall or walls are occupied by the same factory floor by the same occupant.

Section 2.—Where there are occupancies on any story or part of a story involving the storage or use below the top story of the following materials and exceeding the amount specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy.

The interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

### Rule 3.—Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

Section 1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which shall lead to or open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law. Except that exit door shall be a fire door, with substantial steps to the sills properly secured when sill is more than 8 inches above the floor level; and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

Section 2. Rule 4.—Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

### Rule 5.—Storage of Combustible Material About Factory Stairways.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of an appellant or petitioner to file necessary data, or by any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

#### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 14, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 21, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connected with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

# RULES

## ENCLOSURE OF FACTORY STAIRWAYS

(410-24-SR)

mentary to Labor Law, § 271; originally adopted by the Industrial Commission August 28, 1913, and effective October 1, 1913, amended November 18, 1915; read and readopted February 10, 1916, effective March 16; revised and adopted by the Board of Standards Appeals July 29, 1924.

1.—Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty persons employed above the second story, all interior stairways, serving as required means of exit, and the platforms and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest landing of the stairway in accordance with the following:

Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
Stairways Enclosed			
Stairways Enclosed	Stairways Enclosed		
Stairways Enclosed	Stairway Enclosed	Stairways Enclosed	

Term "contents" as used above means articles, goods, and merchandise, packed, stored, manufactured or in process of manufacture.

Term "combustible" as used above means articles, wares or merchandise which will burn or support combustion.

Term "sprinkler" as used above means an automatic sprinkler equipment installed and maintained in good working order on each floor.

Term "story" as used above means that part of a building between any floor and the floor or roof next above the first story is that part of a building which is more than 50 per cent above the floor below and the roof above the curb or average grade level.

The stairway extends to the top floor of the building; such partitions shall extend to the under side of the floor of boarding. That portion of the under side of the floor within the stair enclosure shall be covered with fire-resisting material, except in buildings with roofs of combustible material, in which case the partitions shall extend to the under side of the roof.

The stairway is required to extend to the roof, and shall be so built as to form a bulkhead. The stair enclosure shall be ventilated by a skylight in the roof, or louvres or ventilators, or exterior windows with openings at the top floor.

Openings in such partitions shall be provided with self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material at least four inches thick unless the partition extends to the bottom.

Means of exit, as defined in section 267 of the Labor Law, shall be accepted as a compliance with this rule where the sides of the fire wall or walls are occupied by the same occupant.

Where there are occupancies on any story or part of a story involving the storage or use below the top story, the following materials and exceeding the amount specified in Rule 2 and there are more than 5 persons employed at any time above such occupancy.

The interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

### Rule 3.—Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which shall be provided from every floor above or below grade shall lead to or open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law. Except that exit door shall be a fire door, with substantial steps to the sills properly secured when sill is more than 8 inches above the floor level; and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

Rule 4.—Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

### Rule 5.—Storage of Combustible Material About Factory Stairways.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

Municipal Building, Rooms 1001 to 1015.

Phone—WORTH 0184.

HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to noon.

Communications should be addressed to the chairman of the board.

### CONTENTS

Issue of the Bulletin contains, in the order given—

et.

of Clerk's Calendar.

Trial Calendar.

es in Building Zone Cases.

ve Calendar.

e of Public Hearing

ss Report.

#### THE LIBRARY OF THE PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 14, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 21, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connected with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

### *Building Zone Applications*

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, Tuesday morning, September 21, 1926, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:

CAL. NO. 108-26-BZ—Application, February 5, 1926, under sections 7b and 21 of the building zone resolution, of Eugene De Rosa, architect, on behalf of Emerdyke Realty Corporation, owner, to permit the extension from a business district into a residence district of a proposed theatre building; premises 4915-4923 Broadway, Manhattan.

CAL. NO. 901-25-BZ—Application, June 22, 1926, under section 7g of the building zone resolution,

of McCooley and Conroy, applicant, on behalf of Hyman Morgenstern, to permit in a business district the erection and maintenance of a garage for storage of more than five (5) vehicles (previously before the board of appeals, premises 1305-1309 Gates avenue, Brooklyn).

CAL. NO. 244-26-BZ—Application, March 22, 1926, under section 7g of the building zone resolution, of Edward L. Larkin, architect, on behalf of Rexburg Realty Corporation, owner, to permit in a residence district the erection and maintenance of a storage building; premises 285 West 170th street, The Bronx.

CAL. NO. 441-26-BZ—Application, May 19, 1926, under sections 7e and 21 of the building zone resolution, of Morris Whinston, architect, on behalf of Owen Realty Corporation, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 5074 Broadway and 4036-4050 West 4th avenue, Manhattan.

WILLIAM E. WALSH, Chairman.

## *Appeals from Administrative Orders.*

- 26-A—212 West 14th street, Manhattan.
- 26-A—2-8 Rector street, 56-66 Trinity place and 91-101 Greenwich street, Manhattan.
- 26-A—220-222 West 49th street, Manhattan.
- 26-A—278-292 Locust avenue, The Bronx.
- 26-A—71 North 6th street, Brooklyn.
- 26-A—202-220 Meserole avenue, 90-106 Jewell street and 59-61 Moultrie st., Brooklyn.
- 26-A—171 Thompson avenue, L. I. City, Queens.
- 26-A—54-56 Dey street, Manhattan.
- 26-A—1584-1586 Fulton street, Brooklyn.
- 26-A—692 Broadway, Manhattan.
- 26-A—3718-3728 14th avenue and 1363-1383 38th street, Brooklyn.
- 26-A—340 Hamilton street, L. I. City, Borough of Queens.
- 26-A—284 North 6th street, Brooklyn.
- 26-A—11-27 Ocean Parkway, Brooklyn.
- 26-A—437-453 East 56th st., Manhattan.

## *Building Zone Application.*

ICE IS HEREBY GIVEN by the board of standard appeals of a public hearing under the provisions building zone resolution, *Tuesday morning, September 28, 1926, at 10 o'clock, in Room 1013, Municipal Building, on the following matter:*

CAL. NO. 845-25-BZ—Application, August 19, 1925, under sections 7c and 21 of the building zone resolution, of John J. Dunnigan, applicant, on behalf of Walter Eveleth, owner, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises northeast corner of Inwood avenue and Macombs road, The Bronx.

WILLIAM E. WALSH, *Chairman.*

SEPTEMBER 28, 1926, 2 P. M.

## *Petitions for Variations.*

- 497-26-S—34 East 30th street, Manhattan.
- 500-26-S—440 Fulton street, Brooklyn.
- 501-26-S—130 West 45th street, Manhattan.
- 281-26-S—22-26 Tenth avenue, Manhattan.
- 446-26-S—58-64 West 40th street, Manhattan.
- 447-26-S—58-64 West 40th street, Manhattan.
- 448-26-S—58-64 West 40th street, Manhattan.
- 511-26-S—440-448 Ninth avenue and 336-378 West 35th street, Manhattan.
- 523-26-S—347 East 102nd street and 1981-1985 First avenue, Manhattan.

## *Appliances Submitted for Approval*

- 534-26-SA—Socony Industrial Type "A" Burner, approval of.
- 560-26-SA—Franklin Domestic Oil Burner, approval of.

# RULES

## ENCLOSURE OF FACTORY STAIRWAYS

(410-24-SR)

Supplementary to Labor Law, § 271; originally adopted by the Industrial Commission August 28, 1913, and effective October 1, 1913, amended November 18, 1915; revised and readopted February 10, 1916, effective March 1, 1916; revised and adopted by the Board of Standards and Appeals July 29, 1924.

Rule 1.—Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty persons employed above the second story, all interior stairways, serving as required means of exit, and the landings, platforms and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest part of the stairway in accordance with the following schedule:

Number of stories	Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
Five	Stairways Enclosed			
Four	Stairways Enclosed	Stairways Enclosed		
Three	Stairways Enclosed	Stairways Enclosed	Stairways Enclosed	

The term "contents" as used above means articles, goods, wares and merchandise, packed, stored, manufactured or in the process of manufacture.

The term "combustible" as used above means articles, wares or merchandise which will burn or support combustion.

The term "sprinkler" as used above means an adequate automatic sprinkler equipment installed and maintained in good working order on each floor.

The term "story" as used above means that part of a building between any floor and the floor or roof next above;—the first story is that part of a building which is more than 50 per cent above the floor below and the next above the curb or average grade level.

Where the stairway extends to the top floor of the building, such partitions shall extend to the under side of the roof boarding. That portion of the under side of the roof beams within the stair enclosure shall be covered with fire resisting material, except in buildings with roofs of non-combustible material, in which case the partitions shall stop at the under side of the roof.

Where the stairway is required to extend to the roof, the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof with louvres or ventilators, or exterior windows with opening sections at the top floor.

Openings in such partitions shall be provided with approved self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material at least four inches thick unless the partition extends to the cellar bottom.

A horizontal exit, as defined in section 267 of the Labor Law, will be accepted as a compliance with this rule when both sides of the fire wall or walls are occupied by the same factory floor by the same occupant.

Rule 2.—Where there are occupancies on any story or part of a story involving the storage or use below the top story of the following materials and exceeding the amount specified, and there are more than 5 persons employed at manufacturing above such occupancy.

The interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

### Rule 3.—Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which from every floor above or below grade shall lead to or open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law. Except that exit door shall be a fire door, with substantial steps to the sills properly secured when sill is more than 8 inches above the floor level; and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

Rule 4.—Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

### Rule 5.—Storage of Combustible Material About Factory Stairways.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO RULES GOVERNING FIRE EXTINGUISHING APPLIANCES— SPRINKLER SYSTEMS.

[77-25-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the Board of Standards and Appeals on Friday, September 17, 1926, at 10 a. m., Room 1013, Municipal Building, on proposed amendments to Rules for Fire Extinguishing Appliances, Sprinkler Rules.

Matter in brackets [ ] to be omitted. Matter in *italics* is new.

*General Requirements.* The rules contained herein cover the general details of a sprinkler equipment only. Before an equipment is installed or before a present equipment is remodeled, complete working plans should be submitted for approval to Fire Department.

These plans shall be drawn to an indicated scale; give correct address and points of compass; show sectional elevations of the building; and the essential features of the construction, viz., size, location and direction of joists, timbers or other structural members. They shall also indicate the location and size of water supplies, connecting pipes, feed mains and risers, gate, check, alarm and dry-pipe valves, as well as the location, spacing, number and type of sprinklers.

Upon approval of preliminary plans such number of sets of clean, corrected plans on cloth as the Fire Commissioner may require, not exceeding three (3), shall be filed for final approval of the Fire Commissioner. A certified copy of the approved plans shall be forwarded to the Bureau of Buildings by the Bureau of Fire Prevention. Such application and specification forms as may be prescribed by the Fire Commissioner shall accompany preliminary plans. If a standpipe (fire line) equipment is provided throughout the building, the plans shall include a note to that effect.

When entirely completed in accordance with the approved plans and as per test herein provided for, application shall be made to the Bureau of Fire Prevention for inspection of the completed installation. When the sprinkler equipment is approved the applicant will be so advised in writing by the Bureau of Fire Prevention.

All sprinkler equipments shall be installed in a thoroughly workmanlike manner.

Rule 1. Definition of Automatic Extinguisher Systems. Automatic extinguisher systems shall consist of a system of piping connected to one or more acceptable sources of water supply, or other extinguishing medium, provided with distributing devices so arranged and located as to discharge and diffuse automatically under the action of heat an effective stream or spray over every part of the interior of the building area in which a fire may start or to which it may be communicated.

Rule 2. Classification of Sprinkler Systems. For the purpose of these rules, sprinkler systems shall be classified as:

(a) Automatic Wet Pipe Systems, in which all pipes and sprinkler heads are at all times filled with water;

(b) Automatic Dry Pipe Systems, in which the pipes and sprinkler heads are filled with air, either compressed or at atmospheric pressure, and the water supply is operated by a Dry Pipe Valve as defined in Rule 27 of these Rules.

(c) Non-Automatic Systems, in which all pipes and sprinkler heads are maintained dry with a fire department connection for water supply.

Thermostatic fire alarm with direct connection to Central Office or Fire Department Headquarters shall be provided in connection with all non-automatic sprinkler systems.

Rules 3. Approved Devices. Automatic Sprinklers and accessory appliances shall include all devices approved as such by the Bureau of Standards, Washington, D. C.; by the Underwriters' Laboratories, Inc., of Chicago; by the Associated Factory Mutual Laboratories of Boston; and all devices which meet the tests prescribed by the Board of Standards and Appeals.

Rule 4. Water Supply. Approved sources of water supply shall be classified as Automatic and Auxiliary.

(a) Automatic Sources shall include the Gravity Tank, the Pressure Tank, [and] the Public Water System, and the Automatic Electric Fire Pump, installed as required under the provisions of Rule 8, hereinafter provided.

b) Auxiliary Sources shall include the non-automatic Fire Pump and the Fire Department Connection.

Rule 5. Gravity Tank. Gravity tanks shall contain available quantity of water sufficient to supply twenty-per cent (25%) of the number of sprinkler heads in average protected fire area for twenty (20) minutes, but not less than 5,000 gallons; and the bottom of the tank shall have an elevation of not less than twenty (20) feet above the highest line of sprinklers below the main roof. Where the area of a pent house exceeds 2,500 sq. ft. the bottom of the tank shall be required to be not less than 20 feet above the highest line of sprinklers below the pent house roof, but where a pent house contains only pressure tanks this rule will not apply.

Where a tank capacity in excess of [25,000] 30,000 gallons is required by this rule, the amount of water to be provided in excess of [25,000] 30,000 gallons shall be specified by the Board of Standards and Appeals, except that tanks of unlimited capacities are supported on structures together independent of buildings.

The tank shall be filled through a fixed pipe, independent of the sprinkler piping, not less than two inches in size, discharging into the top of the tank through a by-pass not less than two (2) inches in diameter around the check valve in the discharge pipe, providing the supply is of sufficient pressure to fill the tank. The water supply and connections shall be capable of supplying the tank at a rate of not less than sixty-five gallons per minute.

The filling pipe shall be carried up inside a frost-proof casing and may extend through tank bottom to discharge at top of tank above full water level. The portion of the inside tank must be of brass or copper or other non-corrosive material.

Tanks shall not be fed through sprinkler lines.

The sprinkler and standpipe tanks may be fed from a common source of supply, either a pump or a direct water main connection, provided that there are separate feed mains from the basement or lowest story and a check valve in each feed line in a pump or engine room.

The overflow pipe shall be not less than two (2) inches in diameter for tanks up to 30,000 gallons capacity and not less than three (3) inches in diameter for larger tanks. The top of the overflow pipe shall be three (3) inches below the top of the staves in wooden tanks and one inch from the top in steel tanks. The pipe may extend through the bottom of tank provided the portion inside tank is of brass or copper or other non-corrosive metal without joints or it may extend through side of tank. Tanks over roofs overflow pipes shall terminate not less than twenty-four (24) inches above roof and shall be with a 90 degree elbow.

The discharge, heating or filling pipes where exposed to the weather shall be protected from freezing by a frost-proof covering which may be of three layers of one (1") hair felt interspersed with building paper well wrapped and secured and covered with canvas well painted and frost-proof boxing as specified by the National Board of Fire Underwriters.

Easy access to top of each tank shall be provided by means of a steel gooseneck ladder substantially constructed and rigidly braced, the top of which shall not tip out from the vertical at any point.

Tanks above roofs shall be constructed according to requirements of the Building Code and supporting

# PUBLIC HEARING

shall be approved by the Superintendent of Buildings. If not enclosed and exposed to the weather shall be covered with a double roof of acceptable construction consisting of a tight flat cover of matched boards and above that a conical roof which shall be covered with an approved roofing.

Where a gravity tank may supply both sprinklers and hydrants it shall not be of less than 30,000 gallons capacity and located on a structure altogether independent of buildings and the bottom shall not be less than 75 feet above ground level, and not less than 20 feet above the highest line of sprinklers below the main roof of the highest building in a group of buildings.

6. Pressure Tank. Pressure tanks shall contain sufficient water to supply twelve and one-half per cent (12½%) of the number of sprinklers in the average protected fire area for twenty (20) minutes, but not less than 3,000 gallons of water for a wet pipe system supplemented by an auxiliary water supply, and not less than 5,000 gallons of water for a dry-pipe system. No tank shall have a capacity greater than 9,000 gallons. A tank shall be kept two-thirds (2/3) full of water and a pressure of seventy-five (75) pounds per square inch and shall be so proportioned and located that a pressure of not less than fifteen (15) pounds per square inch be available on the highest line of sprinklers below main roof when all the water has been discharged from tank.

The tank shall be placed either on the roof or in the lowest sprinklered story.]

Pressure tank or tanks shall not be located below the line of sprinklers supplied by tank or tanks.

Where [a tank] the total capacity of the pressure tank is in excess of [25,000] 30,000 gallons as required by code, the amount of water to be provided in excess of [25,000] 30,000 gallons shall be specified by the Board of Fire and Appeals.

Water shall be supplied through a fixed pipe, independent of the sprinkler piping, not less than [two] one and one-half (1½) inches in size [with a one and one-half (1½) inch connection to the tank], or through a pipe not less than [two (2)] one and one-half (1½) inches in size around the check valve in the discharge pipe and the supply is of sufficient pressure to fill the tank. Water supply and connections shall be capable of supplying the tank at a rate of not less than sixty-five (65) gallons per minute without reducing the pressure in the tank. The tank shall have a fixed metallic horizontal line at the end opposite the glass gauge, or other acceptable device to indicate the level of the water when the tank is full.

Air compressor shall be of sufficient capacity to maintain the air pressure at the average rate of one pound in two minutes in each pressure tank.

7. Public Water System. Direct connection to city water supply shall be capable of furnishing water at not less than fifteen (15) pounds per square inch static pressure at the highest line of sprinklers on the main roof.

In accordance with the requirements of the Department of Water Supply, Gas and Electricity, the size of each connection shall be as large as that of the main riser and not less than four (4) inches, and shall have a convenient accessible control valve fixed to it at, or near, the riser, when possible, still further away from the riser.

The control valve shall be fitted with a frost-proof box, not less than four (4) feet nor more than six (6) feet below the curb, with a fixed stem leading to a compartment at the level of the sidewalk. The cover shall be bolted to the casing and so marked as to be quickly located and to the purpose of the valve. The valve shall be of the lifting pattern, operated by a special socket approved by the department of water supply, and connected to electricity.

Where it is impractical to install a control valve box at the curb because of a vault under the sidewalk and within 18" thereof, the control valve may be located in the water supply connection at a point not more than two (2) feet from the point of entry into a vault.

Where a water meter is required in the water supply connection to an automatic sprinkler equipment, it shall be of a type which allows free flow of water and approved by the Department of Water Supply, Gas and Electricity, or a type of fire line meter which has been specifically approved by the Fire Commissioner for use in connection with fire extinguishing equipment.

Evidence establishing the fact that water supply conditions and pressures are as may be required shall be submitted to the Fire Department.

Rule 8. Fire Pump. An automatic electric fire pump shall be as an automatic source of water supply is one approved for such use and controlled by an approved automatic controlling device, which shall be adjusted to maintain not less than 15 pounds water pressure at the highest sprinkler below main roof and in pent houses over 2,500 sq. ft., as provided in Rule 5. And shall receive water supply only from a direct connection to the city water main.

As auxiliary sources of water supply steam or electric standard fire pumps shall receive water supply from a suction tank, a direct connection to the city water main or other approved sources capable of supplying the pump at its rated capacity for sixty (60) minutes. The rated capacity of the pump shall be not less than five hundred (500) gallons per minute, and shall be sufficient to supply twenty-five per cent (25%) of the number of sprinklers in the average protected fire area.

The pump shall be located in a room of fireproof construction, properly ventilated, lighted and drained, enclosed in eight (8) inch brick or concrete walls with approved fire doors at openings and with fireproof floor and ceiling construction. If located in the lowest story of the building, the pump shall be placed on a foundation not less than one (1) foot in height. The pump room shall be readily accessible with safe egress for the attendant.

A reliable source of energy for driving the pump shall be provided. For steam pumps, provision shall be made for sufficient steam power to operate the pumps at full rated capacity, and a steam pressure of not less than fifty (50) pounds shall be maintained at the pump at all times. Where there is more than one boiler, the pipes and valves shall be so arranged to permit the cutting out of any one boiler without interrupting the steam supply to the pump from the other boilers. The boiler room shall be cut off from the remainder of the building by fireproof floor and wall construction with approved fire doors at all openings.

Electrical energy from a public service plant shall be acceptable as a source of energy for driving electric fire pumps. When local power plants supply the energy for operating electric pumps, two motor generator units shall be provided, or one generator unit supplemented by a public service break-down switch. Local electric power plants shall be located in rooms of fireproof construction with approved fire doors at openings.

Rule 9. Sprinkler Discharge. For the purpose of computing the capacity of water supplies, standard one-half (½) inch sprinkler heads shall be assumed to have an average discharge of twenty (20) gallons per minute, and the discharge of larger heads shall be computed proportionately in the ratio of the areas of their respective orifices.

Rule 10. Fire Area. A fire area is any floor space enclosed on all sides by exterior walls or fire walls or a combination of both. The number of sprinklers in the average protected fire area shall be determined by the number of sprinklered stories in such section. In

# PUBLIC HEARING

determining the required capacity of water supplies, the number of sprinklers in the average protected fire area need not include those located in low positions, such as under benches, low shelves, closets and platforms and between cars in car barns.

Rule 11. Fire Department Connection. All automatic sprinkler systems shall be provided with at least one two-way Siamese connection on each street front of the building for connection to the fire department hose. Buildings fronting on only one street shall be provided with at least two Siamese connections when the street frontage of building exceeds [one hundred and fifty (150)] *two hundred (200) feet [in width].*

*Where buildings have frontages on more than one street there shall be a fire department connection on each street front where frontage is not continuous but in all cases where more than one fire department connection is required they shall be located as the Fire Commissioner may direct and shall not be grouped.*

All Siamese hose connections hereafter installed, except those on piers or warehouses intended for fire boat use, shall be three (3) inches in size. Fire boat connections shall be three and one-half (3½) inches in size. All hose connections shall be female, with standard fire department threads.

The inlets shall be placed at least eighteen (18) inches and not more than two (2) feet above the sidewalk, in a horizontal position accessible to the fire department, and shall be provided with a four (4) inch discharge connecting with a four (4) inch pipe to the sprinkler system for three (3) inch fire department connection and with a six (6) inch discharge outlet and six (6) inch pipe for three and one-half (3½) inch fire boat connection. Each inlet shall be provided with a clapper valve machined to a true face.

Each Siamese connection shall be designated by raised letters at least one (1) inch in size, cast in the fitting in a clear and prominent manner and reading for the service designated, viz.: "Base. Spkr.," etc., as the case may be. If the entire building is sprinklered, the fitting shall be marked "Auto. Spkr."

*Siamese hose connections may project through a street wall not more than twelve (12) inches beyond the building line except that where there is an angle formed by the street wall and a check piece or the base of a column, pilaster or ornamental projection, they may be so located that no part extends more than fifteen (15) inches from either side of such angle in accordance with the provisions of the Building Code.*

In each fire department connection there shall be an approved straightway check valve installed in a horizontal position, unless suitably designed for vertical position, and the piping shall be arranged to drain between the check valve and the outside siamese coupling by either a ball drip having a one-half (½) inch pipe connection and one-half (½) inch orifice and a bronze ball of proper size, or by a three-quarter (¾) inch drip connection, with plugged valve attached, and when necessary arranged to drain to a sewer. A drain connection may be tapped into the body of check valve only when located in a horizontal position.

Rule 12. Automatic Sprinkler Systems. Automatic sprinkler systems shall be classified as:

- (a) One Source Systems, supplied with water from any one of the automatic sources; and
- (b) Two Source Systems, supplied with water from a combination of any two of the automatic sources; two pressure tanks with a total water capacity twice that required for a one source supply; direct connection to the city water supply on two different streets, so located that the closing of the controlling valve on one main will not eliminate the main on the other street; or a direct connection to the city water supply and one of the auxiliary sources provided the water supply main is at least six (6) inches in size, the main is fed both

ways and a two (2) inch test pipe at the top of sprinkler riser shows a flowing pressure of fifteen pounds per square inch between the hours of six to six p. m.

*A gravity tank and pressure tank, or a gravity tank and one of the automatic sources of pressure tanks having a total water capacity for one source supply may be considered as a two-source supply where the occupancy of the building does not conflict with Rules 38, 39 and 40 hereinafter provided for.*

Rule 13. Sprinkler Spacing. Sprinkler head lines shall be spaced as herein provided:

Mill Construction. Under mill ceiling (smooth plank and timber construction, 5 to 12 foot bays) line of sprinklers shall be placed in the center of bay and the distance between the heads on each line shall not exceed the following:

- (a) For Standard one-half (½) inch heads—
  - 8 feet in 12 foot bays;
  - 9 feet in 11 foot bays;
  - 10 feet in 10 foot bays;
  - 11 feet in 9 foot bays;
  - 12 feet in 5 to 8 foot bays;
- (b) For Conran\* one (1) inch heads—
  - 20 feet in 5 to 12 foot bays.
- (c) For Conran\* one and one-quarter (1¼) inch heads—
  - 25 feet in 5 to 12 foot bays.
- (d) Vaults used for the storage of nitro-cellulose products and vaults used for the storage of flammable motion picture films shall have standard one-half (½) inch head for each cubic foot of available storage space, or one (1) inch Conran\* head for each 250 cubic feet of available storage space.

Measurements shall be taken from center to center of timbers.

Ceilings of modified mill construction having less than three (3) feet wide shall be treated as joist construction and sprinkler heads and lines spaced accordingly.

Bay timbers spaced three (3) feet or more apart, but less than five (5) feet on centers, will require special ruling by the administrative official having jurisdiction.

Joisted Construction. Under open finish joist construction ceilings, floor, decks and roofs, the sprinkler lines shall be run at right angles to the joists and heads "Staggered spaced" so that heads on one line be opposite a point half way between heads on the next line.

- (a) For Standard one-half (½) inch heads the distance between lines of sprinklers shall not exceed ten (10) feet and the distance between heads on each line shall not exceed eight (8) feet, the end heads on alternate lines being not more than two (2) feet from wall or partition. In all cases where such bays are over eleven and one-half (11½) feet wide, two or more lines of sprinklers shall be installed in each bay as required by the rules for

\*Wherever the term "Conran head" is used in these Rules, it is to be taken as meaning either a head of the type tested and approved by the Fire Department, or one that has passed similar test.

# PUBLIC HEARING

Where girders and joists are flush at the bottom, heads shall be spaced according to the general rule.

(b) For Conran\* one (1) inch heads the distance between adjacent lines shall not exceed twenty (20) feet and the distance between the heads on each line shall not exceed sixteen (16) feet, the end heads on alternate lines being spaced not more than four (4) feet from wall or partition. Where girders project below the under side of joists and divide the ceiling into bays not exceeding twenty (20) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty (20) feet in width at least two (2) lines shall be installed in each bay and in no case shall the distance between adjacent lines exceed twenty (20) feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads the distance between adjacent lines shall not exceed twenty-five (25) feet and the distance between the head on each line shall not exceed twenty (20) feet, the end head on alternate lines being spaced not more than five (5) feet from wall or partition. Where girders project below the under side of joists and divide the ceiling into bays not exceeding twenty-five (25) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty-five (25) feet in width at least two (2) lines shall be installed in each bay, and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

**Smooth Finish, Sheathed or Plastered Ceilings.** Under smooth finish, sheathed or plastered ceilings, in bays six (6) feet wide and over (measurements to be taken from center of timber, girder or other projection or support forming the bay), sprinkler heads and lines shall be spaced as follows:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twelve (12) feet in width, and the distance between the heads on each line shall not exceed the following:

- 8 feet in 12 foot bays;
- 9 feet in 11 foot bays;
- 10 feet in 6 to 10 foot bays.

Bays in excess of twelve (12) feet in width and less than twenty-three (23) feet in width, shall contain at least two (2) lines of sprinklers; bays twenty-three (23) feet in width or over shall have the lines therein not over (10) feet apart. In bays in excess of twelve (12) feet in width, not more than one hundred (100) square feet of ceiling area shall be allotted to any single head.

(b) For Conran\* one (1) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty (20) feet in width, and the distance between the heads on each line shall not exceed twenty (20) feet. Bays in excess of twenty (20) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty (20) feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty-five (25) feet in width and the distance between the heads on each line shall not exceed twenty-five (25) feet. Bays in excess of twenty-five (25) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

**Fireproof Construction.** The rules of slow-burning construction shall apply as far as practicable. The rules may be modified, however, the intent being to arrange the spacing of heads to protect the contents rather than the ceilings; but in no case shall the distance between a head on one line and a head on an adjacent line exceed the following:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads, 12 feet.

(b) For Conran one (1) inch heads, 20 feet.

(c) For Conran one and one-quarter ( $1\frac{1}{4}$ ) inch heads, 25 feet.

**Distance From Walls.** The distance from wall or partition to the first head on a sprinkler line shall not exceed one-half the allowable distance between the heads on such line. Additional heads may be required in the narrow pockets formed by bay timbers or beams and wall. Where beams, girders, columns, walls, partitions or other obstructions prevent the effective discharge of water, additional heads shall be installed to effectively sprinkle the area.

**Vertical Shafts.** In vertical shafts having inflammable sides, heads shall be provided within the shaft in addition to the head or heads at the tops of shafts, as follows:

(a) One standard one-half ( $\frac{1}{2}$ ) inch head for each 200 square feet of inflammable surface.

(b) One Conran\* one (1) inch head for each 400 square feet of inflammable surface.

(c) One Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch head for each 500 square feet of inflammable surface.

Such head or heads shall be installed at each floor when practicable, and always when shaft is trapped. Where practicable, heads shall be "staggered" at the alternate floor levels, particularly when only one head is installed at each floor level.

**Pitched Roofs.** Under a pitched roof sloping more steeply than one (1) foot in three (3) feet, heads shall be located in peak of roof, and those on either side of the peak shall be spaced according to the foregoing requirements. The distance between heads shall be measured on a line parallel with the roof. Where the roof meets the side wall or the floor line, the heads shall be placed not more than the following distance from such intersection:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $3\frac{1}{2}$  feet.

(b) For Conran\* one (1) inch heads, 7 feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $8\frac{1}{2}$  feet.

Heads spaced not to exceed the following distance each way from the peak of roof, measured on a line parallel with the roof, may be used in lieu of heads located in peak of roof:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $2\frac{1}{2}$  feet.

(b) For Conran\* one (1) inch heads, 5 feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $6\frac{1}{4}$  feet.

In sawtooth roof construction, the end heads on the branch line shall be spaced not to exceed the following distance from the peak of the sawtooth:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $2\frac{1}{2}$  feet.

(b) For Conran\* one (1) inch heads, 5 feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $6\frac{1}{4}$  feet.

**Special Locations and Variations.** In special locations, such as over electric generating, power and transforming apparatus, over their controlling devices and switchboards, where water from the fire extinguishing equipment would be detrimental, the sprinkler lines and heads may be omitted at the discretion of the administrative official having jurisdiction, and when in his judgment a slight variation of this rule of spacing is desirable to effect a more efficient distribution of water for fire extinguishing purposes, the sprinkler lines and heads shall be spaced as he may direct.

**Rule 14. Sprinkler Position.** All sprinkler heads shall be located, wherever possible, in an upright position on top of the pipes, except that sprinkler heads on automatic wet pipe systems may be pendant on concealed piping and when construction or occupancy of a room or enclosure makes it preferable.

(a) Where standard one-half ( $\frac{1}{2}$ ) inch heads are installed sprinkler deflectors shall be parallel to ceilings, roofs or the

# PUBLIC HEARING

incline of stairs, but when installed in the peak of a pitched roof they shall be horizontal. Distance of deflectors from ceilings of mill or other smooth construction, or bottom of joists of open joist construction, shall be not less than three (3) inches nor more than ten (10) inches.

In fireproof buildings, the distance between deflectors and panel ceilings shall not exceed fifteen (15) inches.

Not less than eighteen (18) inches effective clear space shall be left below the sprinkler heads, so that they may discharge an unbroken spray blanket from sprinkler to sprinkler and sides of room when in operation. Any stock piles, racks or other obstructions interfering with such action shall not be permitted. *Sprinkler system piping shall not be used for the support of stock, clothing, etc.*

(b) Where Conran\* heads are installed, the top of head shall be located the same distance below joists or ceiling as specified for deflectors in paragraph (a) of this rule; except that when heads are located under pitched roofs of piers or similar structures, they shall in general be installed in the upright position (not normal to slope of roof) and three (3) feet vertically below the underside of roof. When the administrative official having jurisdiction deems a variation of this rule advisable to obtain a more efficient distribution of water, the heads shall be located with respect to joists or ceiling, as he may direct.

Rule 15. Pipe Sizes. The number of heads on a given size pipe in one fire area in any story shall not exceed the following:

(a) For standard one-half (1/2) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
3/4 inch	1 head
1	2 heads
1 1/4	3 "
1 1/2	5 "
2	10 "
2 1/2	20 "
3	36 "
3 1/2	55 "
4	80 "
5	140 "
6	200 "
7	300 "
8	420 "

(b) For Conran\* one (1) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
1 inch	1 head
1 1/4	2 heads
1 1/2	3 "
2	4 "
2 1/2	6 "
3	9 "
4	18 "
5	34 "
6	51 "
7	75 "
8	105 "

(c) For Conran\* one and one-quarter (1 1/4) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
1 1/4 inch	1 head
1 1/2	2 heads
2	3 "
2 1/2	4 "
3	6 "
4	12 "
5	21 "
6	40 "
7	60 "
8	84 "

When it is desired to use pipe of larger size than eight (8) inches in diameter, special ruling will be required by the administrative official having jurisdiction as to the permissibility of its use and the number of heads that may be fed thereby.

Where practicable, it is desirable to arrange the piping so that the number of heads on a branch line will not exceed eight.

When the piping is arranged on the "gridiron" plan, the permissible number of heads may be doubled, provided the feed main is of the size indicated in the schedule for the total number of heads.

Where feed mains supply branch lines of only two heads each, the conditions approach those of long single line. Such feed mains shall usually be centrally supplied when there are over eight (8) or ten (10) branch lines. Branch lines up to fourteen (14) in number may be fed from end provided a two and one-half (2 1/2) inch pipe does not supply more than sixteen (16) standard one-half (1/2) inch heads in lieu of twenty (20).

Buildings having slatted floors, or large unprotected floor openings without approved stops, shall be treated as one room with reference to the pipe sizes, and the feed main shall be of sufficient size to accommodate the number of heads called for. Larger pipe sizes than are allowed in the schedule for a given number of heads may be required wherever the construction or conditions introduce unusually long runs of feed mains or conditions introduce unusually long runs of feed mains or many angles. Buildings with blind attics with unprotected openings to floor below, may be piped from the system on the ceiling of floor below, provided pipe size schedule is not overloaded on sizes three (3) inches or under.

Rule 16. Feed Mains. The size of feed mains shall be less than the size of riser and shall be arranged to run direct as possible from source of water supply to riser.

Feed mains for stair or other towers without approved stops between floors, when piped on independent riser, shall be of sufficient size to accommodate the total number of sprinklers in such tower.

Rule 17. Risers. There shall be one or more separate risers in each building and in each section of the building divided by fire walls. Risers shall be arranged to provide "Center Central" or "Side Central" supply to feed mains. Each riser shall be of sufficient size to supply all the heads on said riser in one story, according to the schedule of pipe sizes in Rule 15.

In buildings of fireproof construction, and for the purposes of this rule, a blank wall, or one in which the openings are protected by standard fire doors, may be considered as a fire wall, if of equivalent construction.

If the conditions warrant, special permission will be granted allowing the heads in a fire section of small area to be fed from the risers in another section, provided the total number of heads in such area does not exceed the following number per floor:

(a) For standard one-half (1/2) inch heads, 48.

(b) For Conran\* one (1) inch heads, 12.

(c) For Conran\* one and one-quarter (1 1/4) inch heads, 8.

Risers shall not be located close to windows, properly protected from mechanical injury and freezing and shall be properly supported on foundations and by floor plates, clamps, couplings or hangers.

No connections, such as for sill cocks, house service hose outlets, shall be made with a sprinkler system or any part thereof.

Where gravity and pressure tanks feed through a common discharge pipe or "dead riser" to the foot of a riser and an air lock is likely to develop the discharge pipe of the gravity tank shall connect with the discharge pipe, or "dead riser" forty (40) feet below the bottom of the pressure tank.

# PUBLIC HEARING

Rule 18. Pipes and Fittings. All pipe shall be full-weight standard wrought iron or steel threaded pipe, well reamed and screwed up tight into fittings without reducing the throatway. Fittings shall be standard cast iron fittings, and shall be long turn pattern on feed mains and risers.

Such fittings shall be designed and guaranteed for a working pressure of 150 pounds per square inch and must be capable of withstanding a hydrostatic test pressure of 750 pounds per square inch without failure.

All pipe shall be secured to the ceiling, walls and other parts of the building with standard steel, wrought or malleable iron hangers.

Extra heavy fittings shall be employed where the normal pressure in the pipe system exceeds one hundred and fifty (150) pounds per square inch, and shall be designed for a working pressure of 250 pounds per square inch and be capable of withstanding a hydrostatic test pressure of 1,250 pounds per square inch without failure.

All underground pipe shall comply with the specifications for cast iron pipe of the American Water Works Association.

Rule 19. Protection of Pipes and Sprinklers. When exposed to moisture, sprinkler pipes and hangers shall be protected against corrosion whenever found necessary by thoroughly cleaning the pipe of all scale and grease and painting with a coat of red lead and linseed oil paint or other suitable moisture resistive paint. When exposed to chemicals, the pipe and fittings shall be coated with graphite or other approved chemical resistive paint. Care shall be taken not to paint the sprinkler heads.

Supply pipes of risers in low basements or low spaces and ground floors exposed to frost, shall be properly protected by a masonry or wood enclosure, properly heated, or with mineral wool, sawdust or tar mixed with granular cork, extending below bottom of pipe and through the flooring of ground floor, or the pipe shall be protected with three alternate layers of one-inch hair felt and build-up paper or by other approved method. When of wood, enclosure shall be constructed double with a layer of paper between the two thicknesses of wood.

Where risers, drains, heating pipes, etc., pass through concrete floors or partitions, they shall be protected with a metal sleeve or be grouted with cement mortar.

Where sprinklers are exposed to corrosion, the heads shall be protected with an approved hermetically sealed cover, or with an approved wax coating.

Rule 20. Drainage. All sprinkler pipe and fittings shall be installed so that they can be thoroughly drained, and where practicable, all piping shall be arranged to drain at main drips.

Supply or drip pipes shall be so arranged as not to expose any part of the sprinkler system to frost, and shall be connected, either by check valves or other means, so that they will not [overthrow] overflow domestic service or connections to the same sewer or house drain, or if through the wall and exposed to the weather, they shall be fitted with hoods or down-turned elbows.

Pipes, pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet, shall be installed:

- At the base of the main riser;
- At each alarm valve;
- At each dry-pipe valve;
- At each gravity tank;
- At each pressure tank;
- At each fire department connection;
- At each floor, if independent floor control valves are used;

At each supply main, when the water in the same can be removed through any of the above drains. Such valves shall be installed with controlling valves so that flow may be made to determine if the water supplies connections from yard mains to the inside of the build-

ing are in order without causing water damage or overflowing service connections to the same house drain. Any such drain shall be not less than two (2) inches in size except that drains at independent floor valves [may be one and one-quarter ( $1\frac{1}{4}$ ) inches in size] shall be not less than 1 inch in size where floor valves are not over  $2\frac{1}{2}$  inches in size and  $1\frac{1}{4}$  inches where floor valves are larger, and connected to a main drain riser of not less than  $1\frac{1}{2}$  inches in size. The drain at the main riser shall discharge into a cone or sight drain, or if carried through the wall and exposed to the weather, it shall be fitted with a hood or down-turned elbow.

At an alarm valve at the top of a riser in a down-fed system a drain shall not be required.

At each gravity or pressure tank erected above roof of a building there shall be a 4-inch valved drain connection so arranged as to discharge on roof of building. And where a tank is on a separate structure altogether independent of buildings drain connection to be arranged to discharge at ground level.

On automatic wet pipe systems, the horizontal branch pipes shall be pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet to drain towards the sources of supply with drip valves at the low points.

On automatic dry-pipe systems, branch pipes shall be pitched at least one-half ( $\frac{1}{2}$ ) inch in ten (10) feet.

Rule 21. Test Pipe. [On] In all wet-pipe automatic sprinkler systems a test pipe of not less than  $\frac{3}{4}$  inch in diameter shall be connected directly with each [riser] system but shall be connected to a pipe of not less than  $1\frac{3}{4}$  inches in diameter in upper story and arranged to discharge, through a  $\frac{1}{2}$ -inch brass outlet, preferably to a point where it can readily be seen. With long runs or many angles, size of test pipe [shall] should be increased to one (1) inch or larger. Controlling valve should be located at a sufficient distance from where the test pipe passes through the wall of the building so as to reduce to a minimum the chance of freezing of water in test pipe.

In all dry-pipe automatic sprinkler systems a  $\frac{3}{4}$ -inch inspector's test pipe shall be installed at the end of the most distant branch line and fitted with a  $\frac{3}{4}$ -inch shut-off valve stopped with a brass plug.

Rule 22. Pressure Gauges. A four and one-half ( $4\frac{1}{2}$ ) inch double-spring Bourdon pressure gauge shall be provided in all automatic sprinkler systems as follows:

- Above dry-pipe valves;
- Below dry-pipe valves;
- At the pressure tank;
- At the air compressor;
- Above the alarm valve;
- Below the alarm valve; and

In the connections from city water supply.

Provision may be made for taking the pressure both above and below the alarm valve and the dry-pipe valve with only one gauge at each valve.

A gauge shall not be required at an alarm valve located at the top of a riser in a down-fed system.

Gauge connections shall be taken from the supply main or riser and not from the two-inch drain or test pipe.

Gauges shall be installed in a suitable place protected from freezing and be controlled by a valve with arrangements for draining. A plugged outlet, not less than one-quarter ( $\frac{1}{4}$ ) inch in size, shall be located between each valve and gauge for purpose of installing the inspector's gauge.

Rule 23. Valves. All valves two (2) inches in diameter and under shall be of brass or bronze, or other approved [non-corrodible] non-corrosive material. Valves over two (2) inches in diameter shall be of brass, or bronze or iron body, brass mounted, or of other approved [non-corrodible] non-corrosive material.

All sidewalk Siamese inlet valves, caps and chains shall be of galvanized cast iron or other approved [non-corrodible] non-corrosive material.

# PUBLIC HEARING

All gate valves shall be solid or double wedge disc, sufficing box pattern with hand wheel, outside screw and yoke, or other approved indicator pattern.

All check valves shall be approved straight way regrinding pattern, so built that the clappers may be readily removed for repairs.

Rule 24. Water Supply Gate Valves. The piping connecting each source of water supply with the sprinkler system shall be provided with a gate valve of the outside screw and yoke type, sealed open and tagged to designate its purpose, so located as to control **each source of water** supply except that from fire department hose connections. All such gate valves shall be located within the building where easily visible and readily accessible and as close as possible to the supply inlet.

Rule 25. Water Supply Check Valves. The piping connecting each source of water supply with the sprinkler system, including fire department connections, shall be provided with a check valve.

On two-source systems, check valves shall have a gate valve on each side to permit repair of check without shutting off both supplies, except that where the two sources of supply consist of tanks located above the highest line of sprinklers, a gate valve need only be provided on the downstream side of each check valve.

Rule 26. Control Valves. All automatic sprinkler systems shall be provided with a **main control or shutoff valve** arranged to be readily accessible and sealed in the open position; except that when the sprinkler system is fed from water supplies on the roof of the building, independent and readily accessible floor control valves, sealed in the open position, may be installed.

When not more than ten (10) standard one-half ( $\frac{1}{2}$ ) inch sprinkler heads or three (3) Conran\* heads in any automatic wet pipe system are exposed to cold and subject to freezing, shutoff valves may be provided to discontinue the water supply to such heads between November 1 and April 1. A greater number of heads than specified above, located in places which cannot be properly heated, shall be controlled by an automatic dry-pipe valve.

Rule 27. Dry-Pipe Valves. A dry-pipe valve shall be taken to mean a valve automatically controlling the water supply of the sprinkler system in such a manner that under normal conditions its piping system beyond the valve is maintained dry, but in the event of **fire, the valve automatically** releases the water into the sprinkler system, for fire extinguishing purposes.

Dry-pipe valves shall, for the purpose of these rules, be classified as follows:

Type A, in which the valve is actuated by the release of compressed air in the sprinkler piping system, due to the opening of a sprinkler head; and

Type B, in which the valve is actuated by an approved trip under electric control of an approved automatic thermostatic fire alarm system.

Dry-pipe valves shall be located as near as practicable to the sprinkler system in an enclosed and accessible place protected from mechanical injury and freezing.

*When anti-columning pipes are used, they shall be either lead lined or of brass.*

Automatic wet-pipe sprinkler systems in which only twenty-five (25) per cent of the heads are required to be maintained dry for protection from freezing, shall have only such heads under dry-pipe valve control.

(a) When "Type A" valve is installed, the air pressure in sprinkler systems under such dry-pipe valve control shall not exceed forty (40) pounds per square inch, nor be permitted to fall below twenty-five (25) pounds per square inch, nor shall it be less than one-sixth ( $\frac{1}{6}$ ) of the water pressure in any case.

The air compressor shall have a capacity of not less than eleven (11) cubic feet per minute and the air supply for the pump shall be taken, if possible, from a room containing dry air, or it shall be passed through a **drying chamber** containing calcium chloride, in order to avoid the introduction of moisture into the system.

The air pressure on such dry-pipe systems shall be maintained throughout the year.

Not more than the following number of heads shall be controlled by one "Type A" dry-pipe valve:

- (a) For standard one-half ( $\frac{1}{2}$ ) inch heads .....40.
- (b) For Conran\* one (1) inch heads .....10.
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads 6.

*Where equipped with an approved quick-opening device the following number of heads may be controlled by one "Type A" dry-pipe valve:*

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....80.
- (b) For Conran\* one (1) inch heads .....20.
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads 12.

(b) When "Type B" valve is installed the actuating alarm system shall be designed to operate at a temperature lower than that required to open the sprinkler heads, and all connections between the alarm system and the dry-pipe valve shall be adequately protected against injury of any kind.

When required by the administrative official having jurisdiction, the dead end of every feed main in such dry-pipe system shall be provided with an air relief valve or vent so constructed as to be normally open in order to permit the free escape of air from the system, but to close automatically against the escape of water.

Not more than the following number of heads shall be controlled by one "Type B" dry-pipe valve:

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....5.
- (b) For Conran\* one (1) inch heads .....1.
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads. 1.

Rule 28. Alarm Valve. All automatic wet pipe sprinkler systems shall be equipped with an alarm valve so constructed that a flow of water through a one-half ( $\frac{1}{2}$ ) inch orifice will operate an electric or mechanical gong.

Dry pipe valves shall be equipped with a reliable device to give either an electrical or mechanical alarm.

Rule 29. High and Low Water and Pressure Alarm. Gravity tanks shall be equipped with a device to indicate when the water falls below or rises above the normal level of the tank, with an indicator or alarm located in the engineer's room near the pump.

All pressure tanks shall be equipped with a device to indicate when the pressure in the tank falls below seventy (70) or rises above eighty (80) pounds per square inch with an indicator or alarm located in the engineer's room [near the compressor].

Rule 30. Heating of Tanks. The water in all sprinkler tanks subject to freezing shall be protected by internal heating the water or enclosing the tank in a frost-proof house properly heated and lighted.

Rule 31. Concealed Pipe Systems. All pipe in concealed pipe systems shall be of standard full-weight wrought iron or steel, painted with two coats of protective paint, before and one after installation. Such pipe shall be installed in ducts or be encased in cement mortar and shall be inspected prior to concealment. When installed in concealed space between floor arches and ceiling, such pipe shall be supported by hangers and all pipe, fittings and hangers be protected with two coats of paint.

Rule 32. Preparation of Building. Floor or wall openings and other structural defects which prevent the banking up of heated air and retard the automatic action of sprinkler heads shall be provided with the necessary curbs, boards and draft stops to permit specific control of the fire by the local sprinklers.

Curtain boards shall project at least three (3) inches below the lowest sprinkler.

# PUBLIC HEARING

33. *Approval of Sprinkler System [Tests].* Before all automatic sprinkler systems, excluding the water supply tanks, shall be subjected after installation to a static pressure of a test of at least fifty (50) pounds per square inch in excess of that which will be normally maintained and observed in the sprinkler system, such test pressure, however, never to be less than one hundred and fifty (150) pounds per square inch in any part of the system.

pressure tanks shall be tested after erection to a test pressure of one and one-half (1½) times the working pressure. To prevent the possibility of serious water damage in case of a break, the pressure shall be maintained by a pump, the main controlling gate being meanwhile closed. Brine or other corrosive chemicals shall not be used for testing systems.

Automatic dry-pipe systems with "Type A" valve containing air pressure of forty (40) pounds per square inch when pumped up, be held for twenty-four (24) hours, without leaks stopped which allow a loss of pressure of over ten (10) pounds per square inch for the twenty-four (24) hours.

In case of automatic dry-pipe systems with different "Type A" valve, the valve shall be held off its seat during the test to prevent injuring the valve.

Automatic systems shall be tested after installation to a pressure of at least fifty (50) pounds per square inch in excess of the pressure necessary to reach the highest line of sprinkler.

Tests of installed systems shall be made by the contractor in the presence of the Fire Commissioner, or his authorized representative.

Piping, devices nor any portion of a newly constructed sprinkler system shall be covered up or permanently concealed until tested by the Bureau of Fire Prevention and Control, in writing, except piping passing through floors, partitions or beams for distances equal to the thickness of such floors, walls, partitions or beams.

34. *Non-fireproof Business Buildings.* Automatic sprinklers required in non-fireproof business buildings under the provisions of Chapter 5, Article 4, Section 72, Code of Ordinances, unless otherwise specifically provided in these rules shall consist of at least a One Source System.

35. *Dangerous or Hazardous Buildings.* Automatic sprinklers required in buildings having occupancies considered dangerous or hazardous by the Fire Commissioner shall consist of at least a one-source system unless otherwise specifically provided for in these rules.

36. *Factories and other Buildings.* Automatic sprinklers required in buildings under the provisions of the Code of Ordinances and the Labor Law shall consist of at least a One Source System.

37. *Theatre Buildings.* Automatic sprinklers required in theatre buildings under the provisions of Chapter 25, Section 524, Code of Ordinances, shall consist of at least a One Source System.

38. *Firework Storage.* Automatic sprinklers required in buildings in which fireworks are stored or sold under the provisions of Chapter 10, Article 6, Section 92, Code of Ordinances, shall consist of a Two Source System.

Rule [37] 39. *Nitro-Cellulose Products.* Automatic sprinklers as required in buildings in which nitro-cellulose products are stored under the provisions of Chapter 10, Article 19, Section 232, Code of Ordinances, shall consist of a system supplied from both approved gravity tank supply and an approved pressure tank supply, except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems, in conformity with the provisions of this rule as in force up to December 1, 1921.

*In buildings wherein are stored or handled only limited quantities of nitro-cellulose products, not exceeding 500 pounds, the automatic sprinklers may consist of a two source system as provided for in Rule 12.*

Rule [38] 40. *Inflammable Motion-Picture Films.* Automatic sprinklers, required in buildings in which inflammable motion-picture films are stored under the provisions of Chapter 10, Article 20, Section 241, Code of Ordinances, shall consist of a system supplied from both an approved gravity tank supply and an approved pressure tank supply except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems in conformity with the provisions of this rule as in force up to December 1st, 1921.

Rule [39] 41. *Existing Installations and Approvals.* Automatic extinguisher systems and devices heretofore approved and accepted by the authorities having jurisdiction shall not be required to conform to the provisions of these rules; and all such systems heretofore installed shall not be required to be altered to conform to these rules so long as the fire hazard due to construction and occupancy of the building is not increased or where substantial additions or extensions in height or area is made to the building when these rules shall apply if deemed advisable or necessary by the Fire Commissioner and the system after inspection is found to be in good working order.

Rule 42. *Communicating Openings.* When a building fully equipped with sprinklers communicates with another building not so equipped the openings must be protected by approved fire doors on both sides of the wall, one of which must be automatic.

Rule 43. *Maintenance Inspections.* Automatic sprinkler systems shall be inspected at least once a month by the person in charge of the building, or by other competent person employed by the owner, to see that all parts of the system are in perfect working order, and the fire department connection or connections, if any, ready for immediate use by the Fire Department. A detailed record of each inspection shall be kept for examination by a representative of the Fire Department.

There shall be kept available at all times in the premises a supply of extra sprinklers, never less than six (6), to replace promptly any fused or damaged sprinklers. And there shall be one or more employees instructed in the maintenance of sprinkler system.

Rule 44. *Open Sprinklers.* When open sprinklers are required for exposure protection by the Fire Department as specified in the Building Code they shall be installed in accordance with the rules of the National Board of Fire Underwriters. Plans for such installation to be filed with the Fire Department for approval.

## FORMS FOR NOTICES TO PROPERTY OWNERS

Applicants, under the building zone resolution, desire Form 13A, for notices to property owners, such forms not to be supplied by this office. Applicant is entitled only to one copy of Form 13A, which shall be filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication of the posting of the calendars on the bulletin board in offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of appellant or petitioner to file necessary data, or by any other method of delay.

Cases in Building Zone Cases.

Minutes of Regular Meeting, September 14, 1926, at 10 a. m.

Minutes of Regular Meeting, September 14, 1926, at 2 p. m.

Minutes of Special Meeting, September 17, 1926, at 10 a. m.

Conclusion.

Business Report.

## NOTICE

### POSTPONEMENT OF MEETINGS

NOTICE IS HEREBY GIVEN that the meetings of the board of standards and appeals, scheduled for the morning and afternoon of September 28, 1926, have been postponed to THURSDAY, SEPTEMBER 30, 1926, at 10 a. m. and 2 p. m. respectively.

WILLIAM J. O'GORMAN, Secretary.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 21, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, September 28, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## CALL OF CLERK'S CALENDAR TUESDAY, SEPTEMBER 21, 1926, at 2 P. M. *Building Zone Cases.*

**399-26-BZ.**  
**APPLICANT**—Abraham Farber, for Mrs. Bessie Sollar,  
owner.  
**PREMISES**—519 Saratoga avenue, Brooklyn.  
**APPLICATION**, under section 7a of the building zone reso-  
lution,  
**TO PERMIT** in a residence district the alteration and exten-  
sion of a building used for store purposes on the  
first story.

**517-26-BZ.**  
**APPLICANT**—Victor C. Farrar, for 40th Street and Park  
Avenue, Inc., owner.  
**PREMISES**—90-98 Park avenue, 38-40 East 40th street,  
Manhattan.  
**APPLICATION**, under section 21 of the building zone reso-  
lution,  
**TO PERMIT** in a residence district the erection and main-  
tenance of a building to be used for offices.

## SEPTEMBER 21, 1926, 10 A. M.

### *Appeals from Administrative Orders.*

576-26-A—253-263 West 72nd street, Manhattan.

## CALL OF CLERK'S CALENDAR

DAY, SEPTEMBER 28, 1926, AT 2 P. M.

### *Building Zone Cases.*

ANT—William F. Doyle, for The Debb Corporation, owner.  
ES—Southeast corner of Jerome avenue and East Cortlandt avenue, The Bronx.  
TION, under section 21 of the building zone resolution,  
IIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

NT—Hugh J. Sheeran, for New York Railways Corp., owner.  
S—1560-1564 Lexington avenue and 1311-1315 Park avenue, Manhattan.

APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a business district the alteration of an existing building and its maintenance as a garage for the storage of more than five (5) motor vehicles.

# MINUTES

2-25-A.  
**APPELLANT**—Cass Gilbert, for New York Life Insurance Co., owner.  
**SUBJECT**—Application for reopening, modification of resolution, re appeal from decision of the superintendent of buildings.  
**PREMISES AFFECTED**—Block bounded by 26th to 27th streets, 4th to Madison avenues, Manhattan.  
**APPEARANCES**—None.  
**ACTION OF BOARD**—Appeal reopened and resolution rescinded.

## THE VOTE TO REOPEN AND RESCIND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
 Negative ..... 0  
 Absent ..... 0

## THE RESOLUTION:

(742-25-A)

WHEREAS, Cass Gilbert, Inc., for New York Life Insurance Co., owner, filed, July 24, 1925, an appeal from a decision of the superintendent of buildings, affecting premises the block bounded by 26th to 27th streets, from Fourth Madison avenues, Manhattan; and  
 WHEREAS, the decision of the superintendent of buildings, No. 295-1924, rendered June 30, 1925, reads:  
 "10. Not more than two elevators may be placed in any one shaft. Section 373, Par. 13.";

WHEREAS, the proposed building is fireproof, 23 stories in height, 184 ft. by 388 ft.; OCCUPIED by offices, about 100 persons on each story; and

WHEREAS, plans and application, in part, proposing 12 shafts, each shaft to contain three elevators in common, were submitted to and disapproved by the superintendent of buildings; and

WHEREAS, this appeal was denied by the board November 1925; reopened by the board March 9, 1926; and

WHEREAS, the appellant now contends that each car will have a side emergency exit door, leading to adjacent car, in addition to the top exits; that the efficiency of a single elevator operating in a shaft would be greatly reduced, in case of fire, smoke, panic or accident; that it is possible to install two elevators in each shaft by increasing the size of the car, but this would not give the efficient service desired in a building of this magnitude; and

WHEREAS, this appeal was granted by the board at its meeting, April 20, 1926, with the following resolution:

"Resolved, that the decision of the superintendent of buildings be and it hereby is *modified* and the appeal be and it hereby is *granted on condition* that the elevators in any individual shaft shall be limited to three passenger cars, and that the elevator rules shall be complied with in all other respects.";

WHEREAS, appellant requests the rescindment of the resolution;

Resolved, that the board of standards and appeals does hereby rescind its resolution of April 20, 1926, and that the appeal be and it hereby is *dismissed*.

25-A.  
**APPELLANT**—John Schneider, owner.  
**SUBJECT**—Application for reopening, extension of permit, re appeal from decision of fire commissioner.  
**PREMISES AFFECTED**—147 12th avenue, Long Island City, Queens.  
**APPEARANCES**—  
 For Appellant: John Schneider.  
**ACTION OF BOARD**—Appeal reopened and permit extended.

## THE VOTE TO REOPEN AND EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
 Negative ..... 0  
 Absent ..... 0

## THE RESOLUTION:

(1182-25-A)

WHEREAS, J. Schneider, Sr., owner, filed, November 13, 1925, an appeal from a decision of the fire commissioner, affecting premises 147 Twelfth avenue, Long Island City, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, rendered November 5, 1925 (Alt. Applic. No. 2437-1925), reads:

"1. Burner must be of a type approved by Board of Standards and Appeals. Examination continued when additional information is received.";

and

WHEREAS, the building is of frame and glass sash construction, one story in height, 100 ft. by 100 ft. in area; OCCUPIED as a greenhouse; the appellant having installed an oil burning system, consisting of a 2,000-gallon storage tank, all necessary piping and valves in accordance with the fuel oil rules, except as to burners; and

WHEREAS, the appellant has submitted plans to the fire department, which were disapproved; and

WHEREAS, the appellant claims that he is using four burners, known as the "Strong, Carlisle & Hammond Burner," which is now before the board for its consideration under Calendar No. 1046-23-SA; the appellant requests a temporary permit to operate the fuel oil system, pending the approval of the burner; and

WHEREAS, this appeal was granted by the board at its meeting, March 9, 1926, and June 1, 1926, for a temporary period, and appellant requests an extension of time.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, for a temporary period of ninety days, subject to further examination and consideration of plans filed in the fire department.

1488-21-A.

**APPELLANT**—The Moto Meter Company, Inc., owner.  
**SUBJECT**—Application for reopening, modification of resolution, re appeal from order of fire commissioner.

**PREMISES AFFECTED**—15-21 Wilbur avenue, L. I. City, Queens.

**APPEARANCES**—

For Appellant: J. A. Nevin.

**ACTION OF BOARD**—Appeal reopened and resolution amended.

## THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
 Negative ..... 0  
 Absent ..... 0

## THE RESOLUTION:

(1488-21-A)

WHEREAS, The Moto Meter Company, Inc., filed, November 29, 1921, an appeal with the board of appeals from an order of the fire commissioner, affecting premises 15-21 Wilbur avenue, Long Island City, Queens; and

WHEREAS, the order of the fire commissioner, No. 25580-F, dated August 12, 1921, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire

# MINUTES

Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of  $2\frac{1}{2}$  inch standard hose attached thereto." \* \* \*;

and

WHEREAS, the building is of fireproof (concrete) construction, 5 stories (66 ft. 2 in.) in height, 95.8 $\frac{1}{4}$  ft. by 187 ft. in area, with sprinkler system installed; OCCUPIED, 1st story and part of basement, manufacture of gas and electrical fixtures, 75 employees, balance of building, manufacture of automobile accessories, the total number of employees about 200; and

WHEREAS, the appellant states that a watchman's service is maintained and general housekeeping conditions are good; and

WHEREAS, the board deemed that in view of the building being fireproof, 66 ft. in height and the use confined to the manufacture of metal fixtures and the assembly of automobile accessories, that the appeal should be granted; and

WHEREAS, the appeal was granted by the board of appeals at its meeting January 24, 1922, on certain conditions, and appellant requested a modification of these conditions as to occupancy.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified* and the appeal be and it hereby is *granted* so long as the free and uninterrupted courtway, at least 30 ft. wide, is maintained at the rear of the building, and that a 40-gallon portable chemical fire extinguisher on wheels be maintained on each floor; and *on the further condition* that the occupancy shall not exceed the legal occupancy based on the capacity of the exits provided, and in accordance with the certificate of occupancy issued by the superintendent of buildings.

1028-25-A.

APPELLANT—Philip J. Sinnott, for Caroline and Hannah Plant, owners.

SUBJECT—Appeal from order of the superintendent of buildings.

PREMISES AFFECTED—61 West 55th street, Manhattan.

APPEARANCES—

For Appellant: Philip J. Sinnott.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(1028-25-A)

WHEREAS, Philip J. Sinnott, for Caroline Plant, owner, filed, October 6, 1925, an appeal from an order of the superintendent of buildings affecting premises 61 West 55th street, Borough of Manhattan; and

WHEREAS, the order of the superintendent of buildings, dated July 20, 1925, Exit Order No. 161-1925, reads:

"You are hereby notified that the building situate on the front of the lot on the north side of West 55th Street, occupied as a mixed occupancy and known as Number 61 West 55th Street, in the Borough of Manhattan, in the City of New York, does not conform to Section 161 of the Building Code in the respects noted below:

"You are hereby directed to enclose the interior stairway at the west side of building in partitions of fire resisting material, partitions to be fire stopped between floor beams; also provide self-closing fireproof doors at all openings in stair enclosure, with kalamein trim, also make all fixed sash in stair enclosure, metal or kalamein frames and wire glass.";

and

WHEREAS, the building is non-fireproof, 4 stories and basement in height, 20 ft. by 60 ft. in area; OCCUPIED: basement, shoe store—2 persons; 1st and 2nd stories, dressmaking—3 persons; 3rd story, dwelling—6 persons; 4th story, dwelling—3 persons; and

WHEREAS, appellant contends that the building has had mixed occupancy since 1902; that the owner resides on premises; that there is no hazardous occupancy existing on the premises and that to comply with the order of the superintendent of buildings would be a hardship; and

WHEREAS, the Board of Appeals, under Cal. No. 1342-22-A, in passing on the use of the premises, resolved that the business use conducted on the premises on July 25, 1925, and prior thereto, by the owners, and still in their possession, be continued and granted same so long as said owners remained in possession of and dwelt in these premises, and have direct supervision over any business conducted on premises.

*Resolved*, that the order of the Superintendent of Buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that a balcony fire-escape not less than 3 ft. in width shall be provided on each floor on the rear westerly side, with a drop ladder in guides from the lowest balcony to yard level, with egress therefrom to the street in fence to adjoining premises; that the door to the rear on each floor leading to fire-escape shall be maintained unlocked and unfastened at all times; *granted* only so long as conditions as to occupancy and use shall remain unchanged; and that the conditions of the resolution of No. 1342-22-A shall be maintained, together with the condition of fire-escape as directed in foregoing resolution of date.

1348-25-A.

APPELLANT—Philip J. Sinnott, for Philip Rattner, owner.

SUBJECT—Appeal from order of the fire commissioner affecting premises 370 West 31st street, Manhattan.

APPEARANCES—

For Appellant: Philip J. Sinnott.

For Administration: Inspector Lynch of fire department

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(1348-25-A)

WHEREAS, Philip J. Sinnott, for Philip Rattner, owner, filed, December 29, 1925, an appeal from an order of the fire commissioner affecting premises 370 West 31st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 3, 1925, No. 31842-LC, reads:

"You are hereby notified that an inspection of premises—370 West 31st street, Manhattan, used for manufacture of inflammable mixture, shows that the following must be done before permit requested by can be issued:

"2. Provide an approved underground system for storing and handling all volatile inflammable oil. Section 131-4 Chapter 10, Code of Ordinances.

"3. Provide a separate compartment for the fuel tank, said compartment to be built upon suitable foundations, having the walls, floor and roof constructed of Portland cement concrete at least 6 inches thick, brick masonry with Portland cement mortar. The compartment to have self-closing fireproof door

# MINUTES

windows. Plans and specifications in duplicate must be filed with and approved by this Department before the above work may be commenced.

"6. Discontinue putting up inflammable mixtures in glass bottles larger than four ounce size or metal cans larger than one gallon.";

WHEREAS, the building is non-fireproof, one story in height, 20 ft. by 25 ft. in area; OCCUPIED for the bottling and canning of a cleaning fluid (composed of 50% benzine and 50% carbon tetra-chloride)—3 persons; and

WHEREAS, appellant contends that the ingredients are stored in a galvanized iron vat of 100 gallons capacity; that benzine is stored on the premises—upon the reception of 5-gallon iron drum of same, a mixture is immediately prepared and thereafter bottled or canned; and as to item 3, poses to provide a fire retarded compartment in lieu of compartment required by the order;

Resolved, that the order of the fire commissioner be and hereby is modified, and the appeal be and it hereby is granted on condition that at no time shall the quantity of benzine maintained on the premises exceed 50 gallons in an approved metal container, stored in an enclosure of four-inch terra cotta wall, the ceiling of which shall be fire retarded, ventilated to the outer air; that the mixing vat shall be located in a four-inch terra cotta enclosed room, situated at the southeasterly rear corner of the premises, the room to be ventilated to open air by means of a double-hung window; that the mixture manufactured on the premises shall be limited and restricted to carbon tetra-chloride and benzine, not exceeding 50% of either ingredient; that the mixture as compounded shall not be maintained in glass bottles in excess of 16 ozs. nor in metal cans greater capacity than one gallon; that the building shall not be increased in height, area or dimension; that the occupancy shall be restricted to this one single family; and that not less than four (4) 2½-gallon approved, portable fire extinguishers shall be provided and maintained in work-room.

RESOLUTION:

(431-26-A)  
WHEREAS, Croker National Fire Prevention Engineering Co., for Orphan Asylum Society of the City of Brooklyn, filed, May 18, 1926, an appeal from an order of the fire commissioner affecting premises 1423-1435 Atlantic Avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 27, 1925, Order No. 83124-F, reads:

1. Install a standpipe system with risers 4 inches diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, attics and roofs), placed within main stairway enclosure.";

WHEREAS, the building is non-fireproof, 4 stories (51' 0") in height, 257 ft. by 80 ft., about 13,000 sq. ft. in area; OCCUPIED by the Orphan Asylum Society of Brooklyn—170 children and 50 teachers; 1st story, living rooms; 2nd story, office and study rooms; 3rd story, dormitories; 4th story, not in use; and

WHEREAS, the appellant claims that the building is open on all sides, divided into three sections not exceeding 5,500 sq. ft. floor area to each section, the sections being separated by large automatic corrugated iron sliding doors, recessed into the wall; that there are four interior stairways and three outside iron stairways; that the building is equipped with a fire alarm system and fire drills are regularly conducted; that a watchman is kept on the premises all hours during the night; that fire buckets and fire extinguishers are provided on each story; furthermore, that there are seven city fire hydrants on the block which this property occupies;

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall not be increased in height, area or dimension; that the floor areas shall remain as now sub-divided, in three parts, by brick walls, openings from each area to be equipped with automatic sheet-iron doors, equipped with fusible links, maintained when not in operation in recess pockets; that the existing interior stairways shall be not decreased; that the entire premises shall be equipped with an approved fire alarm system and Central Office connection; that fire drills shall be maintained and regularly conducted; that a watchman service shall be maintained on the premises at all times; that such fire buckets and approved fire extinguishers as required by the Fire Department shall be maintained and distributed throughout the premises; and granted so long as conditions as to occupancy and use shall remain substantially unchanged.

432-26-A.  
APPELLANT—Croker National Fire Prevention Engineering Co., for C. W. Wohler, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—176-178 Hope street and 131-133 Union avenue, Brooklyn.

THE RESOLUTION:

(432-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for C. V. Wohlers, owner, filed, May 18, 1926, an appeal from an order of the fire commissioner affecting premises 176-178 Hope street and 131-133 Union avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 27, 1925, Order No. 83654-F, reads:

"1. Install an automatic dry pipe sprinkler system throughout building used for the storage and manufacture of paper boxes, having at least one source of water supply, arranged and equipped as provided in the rules for Fire Extinguishing Appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918 and January 21, 1919, effective February 17, 1919.";

and

# MINUTES

WHEREAS, the two buildings are non-fireproof, one and two stories in height, 50 ft. by 82 ft., 7 in. and 54 ft., 3 in., by 95 ft. in area, respectively; OCCUPIED, collectively, for the manufacture of paper boxes: 1st story, 5 persons; 2nd story, 40 persons; and

WHEREAS, the appellant claims that the two-story building (Nos. 176-178 Hope street) is divided into three sections by fire walls; that the one doorway connecting each section, also the one doorway at rear connecting the two buildings, are provided with an approved automatic fire door on each side of the fire walls; that the buildings face on two streets; that fire extinguishers, pails and water tanks are distributed throughout the premises; furthermore, that there are two fire hydrants immediately in front of these premises;

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height, area or dimension; that the cutting and storage of all paper-box material shall be confined to 1st story; that such fire extinguishers as pails, water tanks, etc., as required by the fire department, shall be distributed throughout the premises; that there shall be no open flame maintained on any portion of the floor where there is any manufacturing or storage of paper-box material; and that the existing floor fire areas shall be not increased.

347-26-A.

APPELLANT—Samuel Rosenblum, for Western Chair Co., owner.

SUBJECT—Appeal from order and decision of the fire commissioner.

PREMISES AFFECTED—215 Dupont street and 40-50 Paidge avenue, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon ..... 5

Negative ..... 0

THE RESOLUTION:

(347-26-A)

WHEREAS, Samuel Rosenblum, for Western Chair Co., owner, filed, April 21, 1926, an appeal from an order and decision of the fire commissioner, affecting premises No. 215 Dupont street and Nos. 40-50 Paidge avenue, Borough of Brooklyn; and

WHEREAS, the order and decision of the fire commissioner, dated March 8, 1926 and October 2, 1925, respectively, read:

(N. B. Application No. 2629-25)

"5. A 4" standpipe must be installed covering all areas of building. File plans showing details in conformity with rules of Board of Standards and Appeals."

(Order No. 85284-F)

"Install a standpipe system with risers 4" in diameter, etc.";

and

WHEREAS, the building is non-fireproof, 3 stories (36 ft. 6 in.) in height, 175 ft. by 80 ft., 1½ in. and 120 ft. irregular in depth, about 20,000 sq. ft. in area, divided by terra cotta partitions into three areas: 8,450, 4,400 and 6,970 sq. ft. each; OCCUPIED: for the storage of furniture and finishing of chairs, total of 18 persons; and

WHEREAS, the appellant contends that the building is equipped with an automatic sprinkler system, a fire alarm system and telegraphic connections with headquarters; and

WHEREAS, this appeal was denied by the board on July 29, 1926; reopened July 13, 1926 for the purpose of amendment; and

WHEREAS, the appellant now proposes to construct a fireproof ceiling over the garage, thereby entirely separating the garage from the remainder of the premises with fireproof construction; furthermore, the appellant contends that the garage is for the storage of not more than five cars owned by the occupant and used in the conduct of business.

*Resolved*, that the order and decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building be not increased in height, area or dimension; that the building shall be equipped throughout with an approved sprinkler system; that all horizontal openings within floor areas shall be equipped with self-closing, fireproof doors; that the garage use and occupancy shall be limited to five (5) automobiles in the ownership of the owner of the premises and limited to the conduct of his business; that the garage shall be located on the 1st story and shall be made fireproof throughout, with no opening other than from garage directly to street.

THE RESOLUTION:

(262-26-A)

WHEREAS, A. J. McManus, for John Chelkowski, owner, filed, March 26, 1926, an appeal from decision of the superintendent of buildings affecting premises 638 54th street, Borough of Brooklyn; and

WHEREAS, the decision of the superintendent of buildings rendered March 22, 1926, reads:

"Proposition contrary to Section 476—erection of story frame veranda to brick building located within the Fire limits—Therefore denied.";

and

WHEREAS, the building is non-fireproof, 2 stories (24 ft. 6 in.) in height, 20 ft. by 50 ft. in area—there being a two-story frame veranda erected on the rear of the building; OCCUPIED as a dwelling; and

WHEREAS, appellant contends that the veranda was erected upon the rear of the premises prior to the date of the amendment of the law regarding the establishment of fire limits; that the porch, as constructed, forms part of the building; that the removal would entail many changes in the walls and hardships would result if compelled to alter the premises to comply with the decision of the superintendent of buildings; and

WHEREAS, the balcony structure existed prior to the amendment of building code.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the balcony structure be not enclosed and maintained open; and that same shall not be increased in area or height.

RESOLUTION:

(481-26-A)

WHEREAS, Dodge & Morrison, for John G. Dolson, owner, May 27, 1926, an appeal from an order of the fire commissioner affecting premises 3402-3406 Park avenue, The Bronx; and

WHEREAS, the order of the fire commissioner, dated January 7, 1925, reads:

"1. Install a standpipe system with risers 4" in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation fire department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

WHEREAS, the building is non-fireproof, two stories (34 ft. in height and 50 ft. by 250 ft. (12,500 sq. ft.) in area; OCCUPIED: 1st story, laundry—20 persons; 2nd story, silk manufacturer—20 persons; and

WHEREAS, appellant contends that the area of the 2nd story is but 10,400 sq. ft.; that on the south side of the building there is a 10 foot driveway in a 20 ft. yard, along the length of the building and that the premises are protected by an approved wet sprinkler system supplied from the city main in Park avenue; there being also a Siamese front wall.

Resolved, that the order of the fire commissioner be and the same be modified, and the appeal be and it hereby is granted on condition that the building be not increased in area or dimension; that a ten-foot driveway shall be maintained at the southerly side; that the existing four-foot driveway shall be maintained on the northerly side; that an approved wet sprinkler system shall be maintained throughout the premises; and granted so long as occupancy and all remain unchanged.

**THE RESOLUTION:**

(809-24-BZ)

WHEREAS, Cass Gilbert, for New York Life Insurance Co., owner, filed, June 16, 1924, an application, under the building zone resolution, to permit in a business two times height district the erection of the street walls of a building to a height exceeding the limit set by the building zone resolution; premises block bounded by 26th street, 27th street, Fourth avenue and Madison avenue, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its special meeting, September 30, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that the premises are located in a business and two times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 4, 1924, in acting on N. B. Application No. 295-24, reads:

"2. The height of the building is excessive on the 26th and 27th street fronts—section 8, building zone resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, 21 stories (315 ft.) and 28 stories (400 ft.) in height, with a frontage of 184 ft. and a depth of 388 ft.; to be occupied as stores and offices, a portion of the street wall on the 26th and 27th street fronts not complying with the setback requirements of the building zone resolution; and

WHEREAS, the board decided that there would be hardship in preventing applicant from carrying out the design of the structure as proposed in harmony with architectural practice and in view of the fact that the proposed building sets back from the building line; and

WHEREAS, this application was granted by the board at its meeting, September 30, 1924, on certain conditions, and applicant requested a modification of the time limit imposed; and

WHEREAS, this application was granted by the board of appeals at its meeting May 26, 1925 with the following resolution:

"Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the requirements of the building zone resolution be complied with in all other respects; that all necessary permits for the prosecution of the work shall be obtained within nine (9) months from the date of this action and the erection of the building prosecuted to completion.";

and

WHEREAS, the applicant has requested the rescindment of this resolution.

Resolved, that the board of standards and appeals does hereby rescind the resolution adopted by the board of ap-

peals May 26, 1925 and that the application be and it hereby is dismissed.

1083-25-BZ.

**APPLICANT**—Joseph Zicarelli, owner.

**SUBJECT**—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in residence district and "B" area district the erection and maintenance of a rear extension, covering more than limited 40 per cent of the area of the yard space required by the zone resolution.

**PREMISES AFFECTED**—51 West 11th street, Manhattan.

**THE RESOLUTION:**

(1083-25-BZ)

WHEREAS, Joseph Zicarelli, owner, filed, October 23, 1925, an application, under the building zone resolution, to permit in a residence district and "B" area district, the erection and maintenance of a rear extension, covering more than limited 40 per cent of the area of the yard required by the building zone resolution. Premises 51 West 11th street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 11th street, West 12th street and Sixth avenue are in a residence use and "B" area district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 13, 1925, reads (App. No. 2669-24):

"12. Proposed construction within required yard area in a residence district is unlawful. Sixty per cent of required yard area must be maintained at curb line and not over 40% may extend 18' above curb line. Art. IV—Building Zone Resolution.";

and

WHEREAS, the existing building is of non-fireproof construction, 4 stories and basement in height, with a frontage of 24 ft. 0 in. and a depth of 56 ft. 0 in. to be occupied as offices and apartments. It is proposed to erect a two story rear extension in the yard, 20 ft. in height and covering 55 per cent of the yard space required in a "B" area district; the zone resolution permits the use of 40 per cent of the yard space up to a height of 18 ft. above curb line. The basement is to be occupied as physician's offices, apartments on upper stories; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed and that the application be and it hereby is denied.

Gilbert, for Manufacturers' Trust Co., owner, filed, May 20, 1926, an application, under the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a business building; premises 1696 Myrtle avenue and 1679 Cornelia street, Ridgewood, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Myrtle avenue is in a business district, Cypress avenue is in a business district and Cornelia street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 11, 1926 (plan No. 6672-1926) reads:

"Bank building extends into a residence district which is contrary to the Zone Resolution. Not further examined."

and

WHEREAS, the proposed building is to be of fireproof construction, 3 stories in height, with a frontage of 146 ft. 6 in. and a depth of 132 ft. 1½ in. to be occupied as a bank, the building extending approximately 32 ft. into the residence district; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7c of the building zone resolution, and to deny relief would entail practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the use and occupancy of the proposed building shall be restricted to the conduct of a public bank or trust company authorized under the state or national banking laws and that the requirements of the building zone resolution shall be complied with in all other respects; that the facades of the three street fronts shall be finished in limestone or face brick, substantially in compliance with design submitted on this appeal; that all permits required for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

533-26-BZ.

**APPLICANT**—John W. Clancy, for Mary E. Bird, owner.

**SUBJECT**—Application (re decision of the superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

## THE RESOLUTION:

(533-26-BZ)

WHEREAS, John W. Clancy, for Mary E. Bird, owner, filed, June 9, 1926, an application, under the building zone resolution, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 2337 Hoffman street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Hoffman street is business; East 184th street is unrestricted and business and Third avenue is unrestricted; and

WHEREAS, the decision of the superintendent of buildings, re N. B. 1392-1926, rendered June 4, 1926, reads:

"1. Erection of proposed garage for storage of more than five motor vehicles, located partly in a business district and partly in an unrestricted district, is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 50 ft. 0 in. and a depth of 100 ft. 0 in. to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7c and 21 of the building zone resolution and that it would entail practical difficulties and unnecessary hardship to require the carrying out of the strict letter of the law.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building be restricted to a one story structure above grade; that the rear and southerly gable walls shall be unpierced throughout their entire height and length; that any gasoline storage equipment installed shall be located wholly within the building; that the front elevation shall be finished in face brick with architectural terra cotta or stone trimmings; that there shall be no roof signs and no advertising on the front of the building other than one projecting electric sign indicating the title of the business conducted therein; that the roof shall be of flat design and construction; that any skylights installed shall be glazed with plain glass, protected with wire guards above and below; that any permits required shall be obtained within ninety days and the work completed within six months from the date of this action.

267-26-BZ.

APPLICANT—Coonley & Grindel, owners.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit in a business district the change of occupancy of an existing building from a motion picture theatre to a garage for the storage of more than five (5) motor vehicles and also to a motor vehicle repair shop.

PREMISES AFFECTED—1094 Castleton avenue and 13 Caroline street, West New Brighton, Richmond.

APPEARANCES—

For Applicant: Frederick Coonley.

For Opposition: L. W. Whittecomb.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE TO GRANT—

Affirmative: Chairman Walsh, Commissioner Connell, Holland and Guilfoyle .....

Negative .....

Absent: Chief Kenlon .....

## THE RESOLUTION:

(267-26-BZ)

WHEREAS, Coonley & Grindel, owner, filed, March 1926, an application, under the building zone resolution permit in a business district the change of occupancy of existing building from a motion picture theatre to a garage for the storage of more than five motor vehicles and a motor vehicle repair shop; premises 1094 Castleton avenue and 13 Caroline street, West New Brighton, Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Castleton avenue and Caroline street are in business district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 17, 1926, reads:

"Your request for a certificate of occupancy of Existing Building located at No. 1094 Castleton avenue and running through to No. 13 Caroline street, West New Brighton, so as to convert the use of this building from a Motion Picture Theatre to a Garage and Repair Shop for more than five automobiles is denied on the ground that the premises are located in a business district and such a conversion is contrary to the Building Zone Resolution.";

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 30 ft. 0 in. and a depth of 25 ft., occupied as a motion picture theatre; and it is proposed to change the occupancy to show rooms, garage and motor vehicle repair shop; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution and that it would entail practical difficulties and unnecessary hardship to require compliance with the strict letter of the law.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not be increased in height; that the Castleton avenue front, for a distance of not less than 10 feet in depth, shall be maintained for automobile display or show room use; that the entrance and exit for vehicle operation shall be maintained on Caroline avenue through the existing doorway therein; that the ceiling shall be maintained in accordance with the rules of the board of standards and appeals; that there shall be no gasoline storage equipment in excess of one single tank not exceeding 10 gallons, located on the Caroline avenue front; that there shall be no roof signs erected on the premises. That any permits necessary for the prosecution of the work shall be obtained in six months and the building completed within nine months from the date of this action.

## BOARD OF STANDARDS AND APPEALS

### REGULAR MEETING.

WEDNESDAY AFTERNOON, SEPTEMBER 14, 1926.  
Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon.

### PETITIONS FOR VARIATIONS

389-26-S.  
PETITIONER—Luke Flanagan, for Max Teitelbaum, owner.  
SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—21-23 Bleecker street, Manhattan.

### APPEARANCES—

For Petitioner: Margaret Flanagan.  
ACTION OF BOARD—Petition laid over to September 28, 1926, at 2 p. m., on request of petitioner.

390-26-S.  
PETITIONER—Anthony P. Allocca.  
SUBJECT—Application for reopening, reconsideration, re variation of labor law as cited in decision of department of health.

PREMISES AFFECTED—433-437 Metropolitan avenue, Brooklyn.

### APPEARANCES—None.

ACTION OF BOARD—Laid over to October 26, 1926, at 2 p. m.

391-26-S.  
PETITIONER—Necarsulmer & Lehlbach, for Boynton Furnace Co., lessee.

SUBJECT—Variation of the labor law as cited in order of the superintendent of buildings.

PREMISES AFFECTED—58-64 West 40th street, Manhattan.

### APPEARANCES—

For Petitioner: Edward Lehlbach.  
ACTION OF BOARD—Laid over to October 26, 1926, at 2 p. m., pending action of court.

392-26-S.  
PETITIONER—Necarsulmer & Lehlbach, for The Celluloid Company, lessee.

SUBJECT—Variation of the labor law as cited in order of the superintendent of buildings.

PREMISES AFFECTED—58-64 West 40th street, Manhattan.

### APPEARANCES—

For Petitioner: Edward Lehlbach.  
ACTION OF BOARD—Laid over to October 26, 1926, at 2 p. m., pending action of court.

393-26-S.  
PETITIONER—Necarsulmer & Lehlbach, for H. B. Lehman-Connor Co., Inc., lessee.

SUBJECT—Variation of the labor law as cited in order of the superintendent of buildings.

PREMISES AFFECTED—58-64 West 40th street, Manhattan.

### APPEARANCES—

For Petitioner: Edward Lehlbach.  
ACTION OF BOARD—Laid over to October 26, 1926, at 2 p. m., pending action of court.

394-26-S.  
PETITIONER—Necarsulmer & Lehlbach, for Davidson & Schwab, Inc., lessee.

SUBJECT—Variation of the labor law as cited in order of the superintendent of buildings.

PREMISES AFFECTED—58-64 West 40th street, Manhattan.

### APPEARANCES—

For Petitioner: Edward Lehlbach.  
ACTION OF BOARD—Laid over to October 26, 1926, at 2 p. m., pending action of court.

389-26-S.

PETITIONER—Samuel Rosenblum, for Royal Fur Coat Co., lessee of 15th floor.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—301-305 Seventh avenue, (15th floor), Manhattan.

### APPEARANCES—

For Petitioner: Samuel Rosenblum.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to October 26, 1926, at 2 p. m., pending action of court.

390-26-S.

PETITIONER—Samuel Rosenblum, for Weinstein and Kupersmith, lessees of 6th floor.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—301-305 Seventh avenue, (6th floor), Manhattan.

### APPEARANCES—

For Petitioner: Samuel Rosenblum.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to October 26, 1926, at 2 p. m., pending action of court.

391-26-S.

PETITIONER—Samuel Rosenblum, for Kanik & Greenberg, lessees of 4th floor front.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—301-305 Seventh avenue, (4th floor front), Manhattan.

## THE RESOLUTION:

(1259-25-S)

WHEREAS, Philip Steigman, for Marcus Silberstein, owner, filed, December 7, 1925, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner affecting premises 188 South 1st street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated February 9, 1925, No. 72025-LD, reads:

"1. Provide an interior stairway at the east end of the building to serve as a required means of exit, extending from the 1st story to the 4th story, with a safe passageway to the street, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 4 stories in height, 37 ft. by 67 ft. in area at 1st story and 37 ft. by 40 ft. in area above; OCCUPIED: 1st story, stores; upper stories, tenant factory; 2nd story, 19 persons; 3rd story, 25 persons; 4th story, 20 persons; EQUIPPED with a fire alarm signal system; EXITS: an iron stairway, on the outside of the easterly wall of the building, extending from the roof and entering the building on the 1st story—with egress to street; enclosed in corrugated metal partitions covered on both sides with 1 in. cement plaster; with kalameined doors at openings; a fire escape on the Driggs avenue front of the building, with fireproof windows along the course thereof, extending from the top story to the 2nd story balcony, with counterbalanced stairway to street; and

WHEREAS, petitioner contends that a similar order was issued about a year ago; that certain work was done, a certificate of occupancy (filed in the case) was issued by the building department and also contends that the order was subsequently dismissed by the fire department.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and the petition be and it hereby is *granted on condition* that an enclosed iron stairs shall be provided at each of the two upper stories at the rear, connecting to the interior stair hall at the second story, with egress therefrom direct to the street, and that an approved labor law 60 degree fire escape shall be provided and maintained on the Driggs avenue front of the building, and that the building shall be not increased in height, area or dimension.

297-26-S.

PETITIONER—Ralph Redell, for L. H. Mace & Co., Inc., lessee.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner.

PREMISES AFFECTED—71-89 East 150th street, The Bronx.

## APPEARANCES—

For Petitioner: Ralph Redell.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners	
Connell, Holland and Guilfoyle and Chief	
Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(297-26-S)

WHEREAS, Ralph Redell, for L. H. Mace & Co., Inc., lessee, filed, April 7, 1926, a petition for variation from requirements of the labor law as cited in orders of the fire commissioner affecting premises 71-89 East 150th street, Borough of The Bronx; and

WHEREAS, the orders of the fire commissioner read:

Order No. 91786-LD, dated February 27, 1926:

"1. Remove the horizontal bridge on 3rd story maintain same structurally safe and properly paint rule 3, Board of Standards and Appeals, adopted May 9, 1924.

"2. Remove three substandard fire escapes, 2 on front and 1 on rear of the building or reconstruct same as per Sec. 274 of the Labor Law and rule 1, Board of Standards and Appeals adopted May 9, 1924. Among the defects noted are the following: Windows on course not fireproof, self-closing. No 60 degree connecting stairs. No drop ladder in guides from lowest balcony to ground. No stair to roof from balcony on rear fire escape."

Order No. 92641-LD, dated March 31, 1926:

"1. Arrange bars on windows on east and south sides of cellar so as to be readily movable or removable from both sides in such manner as to afford the free unobstructed use of such windows for purposes of egress as per Section 272 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 3 stories and basement in height, 197 ft. by 37 ft. and 152 ft., irregular in depth; consisting of three wings (east, west and south wings); the east and west wings are connected at 3rd story level by an enclosed bridge spanning across a large courtyard about 90 ft. in width; OCCUPIED for the manufacture of refrigerators; basement, rough mill and tin shop, 45 persons; 1st story, finishing mill, 35 persons; 2nd story, assembling, 30 persons; 3rd story, painting, 40 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an interior wooden stairway in each wing extending from the 1st story to top story in east wing; stairway extends to roof in south and west wings); closed in wooden partitions with wooden doors at openings; two standard fire escapes, one on Cromwell avenue and one on north side of east wing; three substandard fire escapes, one on north side of south wing and two on east 150th street front of the building, having non-fireproof openings along the course thereof, extending from 1st story to the top story; no adjoining building; and

WHEREAS, the petitioner claims that there are 11 barred windows on the south side of basement and 2 barred windows on the east side of basement affected by Order No. 92641-LD; furthermore, the petitioner contends that would require extensive alteration to comply with the order of the fire commissioner; that the City of New York appears as owner of the premises in question; that the petitioner is merely the lessee of the property, and feels that it is incumbent upon the owner of the property to make whatever changes are required by law.

*Resolved*, that the board of standards and appeals hereby *make a variation* from the requirements of the labor law, and the petition be and it hereby is *granted as to item 1* of order No. 91786-LD, *on condition* that the fire escapes be painted and made structurally safe and that the fire escapes shall be equipped with 60 degree connecting stairs with drop ladder in guides to the ground; and that the petition as to item 2, order No. 91786-LD and as to item 3, order No. 92641-LD, be and it hereby is *denied*.

405-26-S.

PETITIONER—Crocker National Fire Prevention Engineering Co., for 507-511 West 26th Street Co., owner.

**RESOLUTION:**

(405-26-S)

WHEREAS, Croker National Fire Prevention Engineering or 507-511 West 26th Street Co., Inc., owner, filed, 10, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner affecting premises 507-511 West 26th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 26, Order No. 93420-LD, reads:

"1. Remove the substandard fire escape on the rear of the building or reconstruct same to conform with Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals amended May 9th, 1924. Among the defects noted on this fire escape are the following: No stairway from top balcony to roof. No fireway or drop ladder in guides from lowest balcony ground. Must be maintained structurally safe and properly painted. No sign of any character shall be placed at openings to same.

2. Provide egress to the street from the stairway on the east side of the building by means of a passage-enclosed in fire resisting material, as per Section 270 of the Labor Law.

3. Reduce the area of wire glass in partitions, enclosing stairway at the east and west sides of building on all stories so that no single pane of glass exceeds 360 square inches and not more than 720 square inches on one story, as per Section 271 of the Labor Law and Rule 505 of the Industrial Code as amended by Board of Standards and Appeals, amended 1923."

WHEREAS, the building is fireproof, 6 stories in height, 44 ft. by 98 ft. 9 in., in area at 1st story and 67 ft. by 92 ft. in area above; OCCUPIED: cellar, storage and grease; 1st story, shipping, 3 persons; 2nd story, storage of cabinets, 4 persons; 3rd and 4th stories, storage of furniture, 5 persons on 3rd and 6 persons on 4th; 5th and 6th stories, storage of rags, 3 persons on each story; EXITS: two interior iron stairways, one from the 1st story to top story (westerly stairway to roof), enclosed in fireproof partitions with doors at openings, egress from easterly stairway through open passageway in 1st story to street, discharging doorway to street being 17 ft., a sub-standard fire door on the rear of the building, having fireproof opening the course thereof, extending from top story to 2nd story balcony, with gooseneck ladder from top balcony to roof. ROOFS of adjoining buildings: 20 ft. at east; 35 ft. lower at west; the building being equipped with a standpipe system; and

WHEREAS, the petitioner proposes to extend the rear 2nd story escape balcony to the east side lot line, provide a drop ladder in guides to reach the yard level of building (No. 505 West 26th street) through passage to the street may be had by means of a doorway on the 1st story to 26th street; the petitioner

claims that there are two wire glass panels in each stair-hall enclosure on each story, each containing two lights of glass, the maximum size light being 710 sq. in.; it is proposed to subdivide these lights so that no single light will exceed 360 sq. in.; as to item 2, the petitioner contends that there will be two adequate means of egress provided in addition to the easterly stairway.

*Resolved*, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and hereby is granted as to item 1, order No. 93420-LD, on condition that the balcony fire escape at the second story level shall be extended easterly to gable wall with drop ladder in guides therefrom to the yard of the adjoining premises, with egress through open hallway direct to the street; and granted as to item 2, on condition that the partition enclosing the office space on the first story shall be fire-retarded with fire proof door in any opening; and as to item 3, on condition, that no additional glass openings shall be installed and that the existing glass panels shall be subdivided in areas not exceeding 360 sq. in. in any light; and granted only so long as conditions as to use and occupancy remain substantially unchanged.

417-26-S.

**PETITIONER**—Isaac Menline, for Garment Center Capitol, Inc., owner.

**SUBJECT**—Variation of the labor law as cited in order of the fire commissioner.

**PREMISES AFFECTED**—500-504 Seventh avenue, 201-219 West 37th street and 214-226 West 38th street, Manhattan.

**APPEARANCES**—

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5

Absent ..... 0

**THE RESOLUTION:**

(417-26-S)

WHEREAS, Isaac Menline, for Garment Center Capitol, Inc., owner, filed, May 13, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner affecting premises 500-504 Seventh avenue, 201-219 West 37th street and 214-226 West 38th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 13, 1924, No. 64743-LD, reads:

"4. Enclose the interior stairway leading from cellar to 1st story in 216-224 West 38th street portion of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides, with partitions of fireproof material extending continuously from the cellar to the first story, as per Section 270 of the Labor Law.

"5. Enclose the elevator shaft extending from the cellar to the 1st story in 216-224 West 38th street, portion of the building, with partitions of fireproof materials as per Section 270 of the Labor Law.

"6. Enclose the two open interior stairways located in the 37th street portion of the building extending from the cellar to the 1st story, and the landings, platforms and passageways connecting therewith on all sides, with partitions of fireproof material, as per Section 270 of the Labor Law.

"7. Enclose the escalator located in the 37th street portion of the building extending from the cellar to

# MINUTES

the 1st story, with partitions of fireproof material as per Section 270 of the Labor Law.”;

and

WHEREAS, the building is fireproof, 17 stories in height, irregular in area, having a front of 275 ft. on West 37th street, 116 ft. on West 38th street and a depth of 197 ft.; OCCUPIED: basement, storage and shipping, 210 persons; 1st story, stores, 200 persons; 2nd to 9th stories, factories, 660 persons; 10th to 17th stories, factories, 590 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: five interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, petitioner contends that the order requires the enclosure in the cellars of the two stores of the constructions indicated on the plans as follows:

“Stairway “B” and the Elevator “D” in the north, (38th Street) cellar, also the stairway “E” and the package slide “H” (called a stairway in the order) and the belt conveyor “G” (called escalator in the order) in the south (37th Street) cellar; and further contends that

“1. The original plans of this building showed, in the north cellar, a stairway, marked “A” leading from the cellar to the store, unenclosed, and it was constructed as approved. The tenant of this space had this stairway removed to its present location “B” to permit of a better arrangement of his own storage. There is another stairway from the cellar, leading to the exit corridor on the first floor. There are never more than about 8 persons employed in this cellar.

“2. The plans of the building indicated an elevator from the cellar to the first floor at the location marked “C” on the plan. This elevator was to have a five feet, 2 inches, by 5’ 8” well opening. The tenant found this location not satisfactory and had the elevator at “D” installed. This is a sidewalk type elevator. The opening in the floor is 5’ by 6’.

“3. In the south store cellar there is the stairway “E” leading to the store above, installed as called for by the approved New Building Plans and altered in no particular since. There is another stairway, stair No. 5, leading to the exit corridor of the building. There are not more than 12 persons employed in this cellar at any time.

“4. The original plans of the building, as approved, contemplated the installation at the location “F” of an elevator from cellar to store with a well 5’ 2” by 5’ 8”. This elevator has never been installed.

“Instead of the elevator “F” which would have been too slow for the tenant’s use in handling a large volume of small parcels he had installed the belt conveyor “G” and the parcel slide “H”.

“5. The belt conveyor “G” is a small one leading from the cellar to the store and requiring a well opening two feet, 6 inches, by six feet, which is almost completely closed by the conveyor and its framework. The motor is located on the first floor at the end of the conveyor and it is never operated except when the persons loading and unloading are present.

“6. The package slide “H” is a steel stair construction upon the treads of which two boards are laid to make a slide. It has a well opening 2’ 4” by 9’ 6”. None of the above constructions are enclosed, and petitioner respectfully asks this Board to permit the constructions to remain as constructed upon the grounds that to enclose them will very greatly interfere with their practical use.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the petition be and it hereby is denied.

1298-25-S.

THE RESOLUTION:

(1298-25-S)

WHEREAS, Philip Freshman, for Ellanar Realty Co., owner, filed, December 15, 1925, a petition for variation of the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 599-603 Fifth avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, (Order No. 75720-LD):

“1. Enclose the interior stairway at the south east end of building serving as a required means of exit and the landings, platforms and passageway connecting therewith on all sides in partitions of fire resisting material extending from cellar to and including the bulkhead on the roof as per 271 LL and rule 1 Board of Standards and Appeals.

“3. Provide an outside iron balcony fire escape at the rear of No. 599a building with balconies 4’ in width connected by stairways not less than 22” wide, placed at an incline of not more than 45 degrees extending from ground to roof, constructed as per section 2 of the labor law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Section 271 of the Labor Law.

“5. Extend interior stairway at No. 599a from 1st story to roof as per 271 of the Labor Law.”;

and

WHEREAS, the building is non-fireproof, 4 stories (40 ft.) in height, 54 ft. 6 in. by 75 ft., irregular in area, divided into sub-sections by fore and aft brick walls; OCCUPIED: 1st story, stores; 2nd story, dwelling for one family; 3rd story, also factory, 20 persons in factory; 4th story, dwelling for one family and also factory, 20 persons in factory; 5th story, factory, 45 persons. EXITS: an interior non-fireproof stairway (at the southeast portion of the premises) extending from the 1st story to top story (with fixed iron doors to scuttle in roof); enclosed in metal lath and plaster partitions with kalameined doors at openings; and also a wooden stairway (at the northerly wall of the building) extending from the 1st to 3rd story, a fire escape on the rear of building, having fireproof openings along the course thereof extending from the top story balcony (with gooseneck connection to roof) to the yard; with EGRESS from the terminus of the fire escape by means of an iron connection from 2nd story balcony—across the one story extension to the south—to a sliding drop ladder leading to Pratt Avenue. Also, a regulation fire escape on the Pratt Avenue front of the building, with fireproof openings along the course thereof, extending from the top story to the 2nd story balcony—with counter-balanced stairs to the roof. ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner proposes to comply with item 3, as to item 3, it is proposed to erect an iron runway from the second story fire escape balcony to the roof

# MINUTES

e story brick extension of premises adjoining to the  
uth; and proposes to install at the south side of this ex-  
sion a drop ladder, in guides, leading to Prospect avenue;  
d proposes, further, to extend the existing fire escape  
lcony on the 2nd and 3rd stories of No. 599a so as to  
clude the northerly window in premises No. 601 Fifth  
venue. As to item 5, petitioner requests the acceptance of  
e existing stairway, in view of the small occupancy of  
premises.

*Resolved*, that the board of standards and appeals does  
hereby *make a variation* from the requirements of the labor  
law, and that the petition be and hereby is *granted*, as to  
item 3, Order No. 75720-LD, on condition that a 60 degree  
fire escape shall be provided at the rear of No. 599 with  
consoles at the second, third and fourth stories with con-  
necting bridge to roof of building at the south with drop  
ladder in guides to Prospect avenue; and *denied* as to  
item 5.

-26-S.  
PETITIONER—Venetian Realty & Construction Co.,  
Inc., owner.

SUBJECT—Variation of the labor law as cited in order  
of the fire commissioner.

PREMISES AFFECTED—552-564 West Broadway,  
Manhattan.

THE RESOLUTION:

(338-26-S)

WHEREAS, Venetian Realty and Construction Co., Inc.,  
owner, filed, April 17, 1926, a petition for variation from the  
requirements of the labor law as cited in an order of the  
fire commissioner affecting premises 552 to 564 West Broad-  
way, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated Jan-  
uary 5, 1926, No. 89291-LD, reads:

"2. Arrange the doors leading to the stairway at the  
west side of building on all stories so as to open out-  
wardly without obstructing the stairway as per Section  
271 of the Labor Law."

WHEREAS, the building is fireproof, 10 stories in height,  
105 feet by 118 feet in area; OCCUPIED as a tenant factory—  
25 persons on each story; EQUIPPED with a fire  
alarm signal system; EXITS: an interior fireproof stairway,  
extending from the 1st story to roof, enclosed in fireproof  
partitions with fireproof doors at openings; a horizontal exit  
through westerly wall on each story; ROOFS of adjoining  
buildings: 45 ft. lower at west; 75 ft. lower at south;

WHEREAS, the petitioner contends that the present fire-  
proof self-closing sliding doors were installed under the  
provisions of the labor department; that there is not enough  
space to provide doors to swing outwardly without obstruct-  
ing the narrow hallway.

*Resolved*, that the order of the fire commissioner be and  
hereby is *affirmed*, and that the petition be and it hereby  
is *denied*.

THE RESOLUTION:

(1342-25-S)

WHEREAS, The Vulcan Rail and Construction Company,  
owner, filed, December 28, 1925, a petition for variation  
from the requirements of the labor law as cited in an order  
of the fire commissioner affecting premises on the south  
side of Grand street, 460 ft. west of Garrison avenue (rear  
building), Maspeth, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated June  
2, 1925, Order No. 78886-LD, reads:

"1. Arrange both interior stairways to be not less  
than 44 inches in width, as per Sec. 270 of the labor  
law."

and

WHEREAS, the building is non-fireproof, 2 stories in height,  
105 feet by 118 feet in area; OCCUPIED; 1st story, manu-  
facture of printing inks, 20 persons; 2nd story, stock rooms,  
5 persons; EQUIPPED with a fire alarm signal system;  
EXITS; two interior fireproof stairways, extending from  
the first story to roof, enclosed in fireproof partitions with  
fireproof doors at openings; ROOFS of adjoining buildings:  
one story lower at north; and

WHEREAS, the petitioner contends that the minimum width  
of stairways is 42 inches; that the distance between the hand-  
rail and opposite wall is 45 3/4 inches; that the stairways in  
all other respects comply with the labor law; furthermore,  
that there only five men working regularly on the 2nd story;

*Resolved*, that the board of standards and appeals does  
hereby *make a variation* from the requirements of the labor  
law and that the petition be and it hereby is *granted on con-  
dition* that the building shall be not increased in height,  
area or dimension and that the occupancy shall not exceed  
five (5) persons above the first story.

## THE RESOLUTION:

(10-25-S)

WHEREAS, Century Ribbon Mills, Inc., for John G. Dolson, owner, filed, January 5, 1925, a petition, with the board of standards and appeals, for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 3402-3406 Park avenue, The Bronx; and

WHEREAS, the order of the fire commissioner, dated December 16, 1924, reads:

"1. Arrange bars on windows on 2nd story, east and north side, so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purpose of egress, as per Section 272 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, two stories in height, 51 ft. by 227 ft. in area, having one-story extension at the rear, there being two windows in the northerly wall and four windows in the easterly wall of the 2nd story covered by fixed iron bars. OCCUPIED: 1st story, laundry; 2nd story by petitioner for the manufacture of silk ribbons, approximately 35 persons above the 1st story; EQUIPPED with a sprinkler system. EXITS: An exterior fireproof stairway at the northerly side of the premises, extending from the street to 2nd story, and a fire escape on the northerly side of the building, extending from 2nd story to alley, with direct egress to street; and

WHEREAS, petitioner contends that the bars were installed at the instance of the Insurance Rating Bureau and that the removal of these bars would deprive petitioner of all protection under insurance policies, and contends further that ample means of egress are provided by the stairways and the many other windows; and

WHEREAS, the petition was granted by the board at its meeting May 10, 1925, on certain conditions and petitioner requests a modification as to basement window.

*Resolved*, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects the openings in the rear, easterly wall of the building; and one single transom over the exterior opening or doorway in the north wall, 2nd story.

749-25-S.

PETITIONER—Margaret Murphy Drew, for Helen A. Wissman, owner.

SUBJECT—Application for reopening, amendment of resolution, re variation of requirements of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—732 Broadway, Manhattan.

APPEARANCES—

For Petitioner: Mrs. Margaret Murphy Drew.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioner's Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(749-25-S)

WHEREAS, Margaret Murphy Drew, for Helen A. Wissman, owner, filed, July 17, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 732 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated 18, 1925, reads (Order No. 76550-LD):

"1. Enclose the interior stairway serving as a required means of exit with partitions of fire resisting material from floor of first story to the underside of the 2nd story, including any exposed soffits, landings, passageways. Openings shall be provided with approved self-closing fire doors as per Rule 2 of the Board Standards and Appeals adopted July 29, 1924.";

and

WHEREAS, the building is non-fireproof, four stories in height, 24 ft. by 126 ft. in area at 1st story, 24 ft. by 56 ft. in area above at 2nd story, and 24 ft. by 56 ft. in area above. OCCUPIED: 1st story, restaurant; 2nd story, offices and stock, 9 persons; 3rd story, manufacturing shops, 9 persons; 4th story, manufacturing caps, 5 persons. EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the first story to top story; enclosed in lath and plaster partitions, wooden doors at openings; a fire escape on the rear of building, having fire proof openings along the course thereof, extending from roof to the roof of the 2nd story extension, thence to roof of 1st story extension; with EGRESS from the roof of 1st story extension to the 2nd story by wall fire escape on the rear of the building adjoining at north. ROOFS of adjoining buildings 16 ft. higher at north; 16 ft. higher at south; and

WHEREAS, the petitioner contends that the stair enclosure at 1st story is covered with hard wood frames, plate glass mirrors, and that to comply with the order would mean the suspension of business; in consideration of small occupancy he requests that the board accept the existing exits without change; and

WHEREAS, the petition was granted by the board at its meeting December 22, 1925, on certain conditions and petitioner requests a modification of these conditions as to occupancy.

*Resolved*, that the board of standards and appeals hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects the stairs on the 1st story, on condition that the soffit of the stairs and stair side of stairway enclosing partition in the first story shall be fire-resisting in accordance with the rules of the board of standards and appeals; that the occupancy of the building shall not exceed 25 persons above the 2nd story and that the stipulation of calendar number 418-22-S be complied with and maintained.

## THE RESOLUTION:

(727-18-S)

WHEREAS, the Royal Baking Company, filed, May 16, 1917, petition, with the board of standards and appeals, for variation of section 79-b, labor law, as cited in order of the fire commissioner, No. 59383-LD, affecting premises 21-25 Morton street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner reads: "Provide an outside iron balcony fire escape on the easterly end of north side of building with balconies 4 ft. in width connected by stairways not less than 22 inches wide, placed at an incline of not more than 45 degrees extending from ground to roof, constructed as per Section 79B-4 of the Labor Law, or carry out a proper alternative method of complying with the requirements of Section 79B-1 of the Labor Law."

WHEREAS, the building is non-fireproof, heavy mill construction, seven stories high, 72 ft. by 83 ft. in area; OCCUPIED for receiving and shipping in first story, 2 men employed; storage in second story, no employees; manufacturing in third story, 29 persons employed; manufacturing in fourth story, 5 persons employed; manufacturing in fifth story, 2 persons employed; storage in sixth story, no persons employed; manufacturing and storage in seventh story, 4 persons employed, a total of 40 persons employed above first floor; EQUIPPED with a sprinkler system and a fire alarm system; the means of egress consisting of: (a) an interior stairway, extending from first story to roof, used in brick partitions with fire doors at the openings; (b) a fire escape on the Morton street front, consisting of balconies connected by 60-degree stairs, with non-fireproof windows along course of fire escape; (c) a similar fire escape in the rear, with drop ladder to yard and egress to adjoining yards of buildings on Push street, with non-fireproof windows along course of fire escape; (d) a horizontal iron bridge in second story to building adjoining at rear; (e) a horizontal exit by door in second, two in third story in each of the fourth and fifth stories to building adjoining at the side, these exits being near the stairway;

WHEREAS, this petition was granted by the board at its meeting, November 26, 1918, on certain conditions and petitioner requests a modification of these conditions as to occupancy;

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is *granted on condition* that the existing fire escapes shall be made to conform to the requirements of the board for sub-standard fire escapes, and *on further condition* that the occupancy shall not exceed the legal allowance for an interior stairway, together with the allowance for a sprinkler system.

5-S.

## THE RESOLUTION:

(938-22-SA)

WHEREAS, the Fuel Oil Burner Corp., filed, September 26, 1922, a petition with the board of standards and appeals, for approval of their device known as Johnson Improved Rotary Fuel Oil Burner; and

WHEREAS, a committee of the board inspected this burner in operation at 3180 Broadway, Manhattan, and reported as follows:

*To the Board of Standards and Appeals:*

A Committee of the Board, consisting of Chairman Walsh, Fire Chief Kenlon, Mr. Holland and Mr. Boulton, visited the premises 3180 Broadway, Manhattan, on December 28, 1922, in the matter of the above petition for approval of the Johnson Rotary Fuel Oil Burner, and have to report:

This burner was installed in an oil burning equipment on a cast iron, low pressure boiler, and inspected in actual service operation under working conditions.

The Committee recommends the approval of this burner for use in oil burning operation, where plants are equipped in accordance with the fuel oil rules of the Board of Standards and Appeals, as to mechanical and structural requirements, on condition only that such plants shall be operated by a licensed engineer or licensed operator, pursuant to Rule 20 of the Fuel Oil Rules.

and

WHEREAS, this device was approved by the board at its meeting February 20, 1923, with pump and burner as a unit and petitioner requests a modification of the resolution.

*Resolved*, that the board of standards and appeals does hereby *approve* the device known as the Johnson Improved Rotary Fuel Oil Burner and pump for use in fuel oil burning equipments in accordance with the recommendations of the committee of the board with the understanding "that the pump in the Johnson burner need not necessarily be an integral part of the equipment so long as the installation complies with the resolution in all respects."

# MINUTES

### \*CORRECTION.

Minutes of the meeting of the board of standards and held Tuesday afternoon, July 20, 1926, as they appear in Bulletin No. 30, Vol. XI are hereby corrected to as follows:

### RESOLUTION:

(413-26-S)

WHEREAS, Samuel Rosenblum, for E. M. Tamblyn, lessee, May 12, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the commissioner, affecting premises No. 113 East 30th Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 6, 1926, reads (Order No. 90738-LD):

1. Provide an outside iron balcony fire escape on front of building with balconies 4 ft. in width connected by stairways not less than 22 in. wide, placed on an incline of not more than 45 degrees, extending from the ground to the highest story, constructed as per Sec. 273, of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Sec. 271 of the Labor Law.

2. Extend the interior stairway at the west side of building to the roof, as per Sec. 271 of the Labor Law.

Correction—Word fireproof changed to non-fireproof in

WHEREAS, the building is non-fireproof, 4 stories in height, 18 ft. 10 in. by 80 ft. in area at 1st and 2nd stories and 18 ft. by 60 ft. in area above. OCCUPIED: 1st story, office and saleroom of gifts, 3 persons; 2nd story, dressmaker (living apartments and some sewing), 3 persons; 3rd story, dwelling (3 persons); 4th story, manufacturing novelty gifts, 9 persons. EXITS: An interior non-fireproof stairway, extending from the 1st story to top story; enclosed in lath and plaster partitions with wooden doors at openings; a proposed 60 degree fire escape on the front of the building, having non-fireproof openings along the course thereof, extending from the top story (with gooseneck ladder to roof) to the 2nd story balcony with counter-weighted drop ladder in guides to street; ROOFS of adjoining buildings, to west, 11 ft. lower, to east, 1 ft. higher; and

WHEREAS, petitioner requests, in view of the light occupancy of the premises, the acceptance of the proposed fire escape and proposes to install an iron ladder to scuttle in lieu of extending the stairs to roof.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition, that an exterior fire escape shall be provided on the front of the building, with connecting stairs, not more than 60 degrees, and a counter-balanced drop ladder in guides from the lowest balcony to the street; and granted as to item 2, on condition, that a fixed double-rung iron ladder shall be provided within the enclosure from the top story to the scuttle in the roof, and only so long as conditions as to occupancy and use otherwise remain substantially unchanged.

# CONCRETE RULES

## USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 1926, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete shall not be prohibited when used in accordance with the conditions hereinafter set forth.

Hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights being the amount of lime which may be incorporated in a ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication of the posting of the calendars on the bulletin board of the offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose cases promptly, for the reason that the pendency appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of appellant or petitioner to file necessary data, or by any other method of delay.

### NOTICE

#### POSTPONEMENT OF MEETINGS

NOTICE IS HEREBY GIVEN that the meetings of the board of standards and appeals, scheduled for the morning and afternoon of September 28, 1926, have been postponed to THURSDAY, SEPTEMBER 30, 1926, at 10 a. m. and 2 p. m. respectively.

WILLIAM J. O'GORMAN, Secretary.

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, September 28, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, October 5, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

## THE RESOLUTION:

(576-26-A)

WHEREAS, David E. Kennedy, Inc., for 253-263 West  
Street Corp., owner, filed, June 24, 1926, an appeal from  
decision of the superintendent of buildings, affecting prem-  
ises 253-263 West 72nd street, Borough of Manhattan;

WHEREAS, the decision of the superintendent of buildings,  
dated June 9, 1926, reads:

"Replying to your letter of June 8, 1926, submitting  
sample of cork tile with request for approval of this  
material for general use for floor covering in buildings  
more than 150 feet high, you are advised that inasmuch  
as the Building Code requires the use of incombustible  
material for floor finish and trim in buildings of this  
height, your request for approval cannot be granted.";

WHEREAS, the building is fireproof, 22 stories (230 ft.  
in height, 125 ft. by 91 ft. in area; future occupancy:  
about 24 rooms on a story; and

WHEREAS, the appellant proposes to cover the floors of  
with 1/4 in. cork tile flooring; and has filed plans  
showing the cork tile on floors of all rooms except closets,  
bath rooms, also all public stairways and corridors;

WHEREAS, after making severe tests on the proposed cork  
tile the appellant contends that the use of cork tile flooring  
is a violation of the building code when laid in enclosed  
rooms; that it is not as combustible as linoleum,  
carpets or rugs in general use.

Resolved, that the decision of the superintendent of build-  
ings be and it hereby is *modified*, and the appeal be and it  
hereby is *granted on condition* that this proposed flooring  
material may be used in all rooms, other than the public cor-  
ridors, closets, pantries and stairhalls, additional to any and  
all construction, finish and surfacing required by the build-  
ing code; that all rooms shall be separated by partitions of  
fireproof construction, any openings therein to be  
closed with fireproof doors; and that all entrances to the  
rooms from the public corridors shall be equipped with  
closing, fireproof doors.

A.

APPELLANT—John J. Gilmartin, for Tremont Plumbing  
Supply Company, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—1887 Bathgate avenue, The  
Bronx.

## APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Maher of fire de-  
partment.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

## THE RESOLUTION:

(428-26-A)

WHEREAS, John J. Gilmartin, for Tremont Plumbing  
Supply Co., owner, filed, May 17, 1926, an appeal from an  
order of the fire commissioner affecting premises 1887 Bath-  
gate avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated  
December 29, 1925, Order No. 88456-F, reads:

"1. Install a standpipe system with risers 4" in  
diameter tested to withstand a pressure of 300 lbs. per  
square inch, extending from cellar to roof, with neces-  
sary check valves and 2 1/2 inch regulation Fire De-  
partment outlets on each story (including basements,  
cellars and roofs), placed within main stairway en-  
closure.";

and

WHEREAS, the building is non-fireproof, 2 stories (42 ft.)  
in height, 108 ft. by 129 ft. (approximately 13,000 sq. ft.) in  
area; OCCUPIED: 1st story, offices, shipping and stock  
room for plumbing supplies, 5 persons; 2nd story, stock-  
room for plumbing supplies, 1 person; and

WHEREAS, appellant contends that there are two large  
doors on the front of the building which make it readily  
accessible to the fire department; that the contents of the  
building—pipes, metal fixtures, bath tubs, etc.—are non-  
combustible and offer no fire hazard.

Resolved, that the order of the fire commissioner be and  
it hereby is *modified*, and the appeal be and it hereby is  
*granted on condition* that the building shall not be increased  
in height or area; and so long as the use and occupancy  
be restricted to the operation and storage of plumbers' sup-  
plies; and that such water pails and approved fire extin-  
guishers as may be ordered by the fire commissioner shall be  
installed and maintained.

436-26-A.

APPELLANT—Croker National Fire Prevention En-  
gineering Company, for Woman's Hospital of the  
State of New York, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—420-444 West 110th street and  
115-143 West 109th street, Manhattan.

## APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire de-  
partment.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE RESOLUTION:

(436-26-A)

WHEREAS, Croker National Fire Prevention Engineering  
Co., for Women's Hospital of the State of New York,  
owner, filed, May 18, 1926, an appeal from an order of the

# MINUTES

fire commissioner, affecting premises 420-444 West 110th street and 115-143 West 109th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, Order No. 86238-F, dated November 13, 1925, reads:

"1. Arrange the house water supply pipes so that same will connect with the tanks on the outside thereof, allowing 3,500 gallons for standpipe system and raise said tanks to 20 ft. above the outlets on the highest story, or provide a separate tank on roof of at least 3,500 gallons capacity for standpipe system, said tank to be elevated so that the bottoms will be not less than 20 ft. above the outlets on highest story;"

and

WHEREAS, the building is fireproof, 7 stories and basement (112 ft. 6 in.) in height, 244 ft. 2 in. by 48 ft. and 100 ft., irregular in depth (about 15,300 sq. ft. in area); OCCUPIED as a hospital for women: basement, machine shop, engine room and clinic, 35 persons; 1st story, offices and clinic, 25 persons; 2nd story, private rooms and wards, 51 persons; 3rd story, private rooms and nursery, 45 persons; 4th story, private rooms and wards, 85 persons; 5th story, wards and nurseries, 109 persons; 6th story, operating rooms, kitchen and dining rooms, 15 persons; 7th story, living rooms and sewing rooms, 24 persons; and

WHEREAS, the appellant claims that the building is provided with a standpipe system connected with two street water mains (one in 109th street, the other in 110th street); that each street main is fed both ways; that the water pressure in the street maintains a minimum pressure of 30 lbs. at the highest outlet; that four gravity tanks are provided in the attic, having a total capacity of 5,200 gallons and located 8 ft. above the highest outlet in the 7th story; that a Buffalo fire pump, also a Worthington Duplex steam pump, suctioning from a reserve tank of 1,300 gallons are located in the cellar, connected with the standpipe system; and

WHEREAS, the appellant proposes to divide the water supply by using two 1,300-gallon tanks now in the attic solely for the standpipe system.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that two or more of existing 1,300-gallon tanks shall be cross-connected and maintained separately and independently for the standpipe system and that any house supply connection shall be separated from the standpipe system; and that the system otherwise shall comply with the standpipe requirements in all respects.

439-26-A.

APPELLANT—Croker National Fire Prevention Engineering Company, for Port Morris Industrial Terminal Company, owner.

SUBJECT—Appeal from order of the fire commissioner. PREMISES AFFECTED—278-292 Locust avenue, The Bronx.

APPEARANCES—

For Appellant: Herman E. Horwood.

THE RESOLUTION:

(439-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Port Morris Industrial Terminal Co., owner, filed, May 18, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 278-292 Locust avenue, west building, Borough of Bronx; and

WHEREAS, the order of the fire commissioner, dated December 29, 1925, reads (Order No. 87948-F):

"1. Install a standpipe system with risers 4 inches in diameter in West Building tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, 2 stories (33 ft. 0 in.) in height, 113 ft. by 100 ft., 11,300 sq. ft. in area; OCCUPIED: 1st story, assembling automobile bodies, persons; 2nd story, storage of automobile bodies; and

WHEREAS, the appellant contends that the building is open on the north and south sides consisting of 50 per cent. glass; that there are doors along the entire depth of the building; that there are five fire hydrants located directly opposite these premises on Locust avenue also a city fire alarm box; that the inside area of the building is 10,878 sq. ft.; that the building has been used the same as at present since 1918; also that the occupancy is very small.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height or area; that there shall be no inflammable or volatile oils stored or maintained on the premises; that suitable fire pails or approved fire extinguishers as required by the fire commissioner shall be installed and maintained; and *granted* so long as the premises shall be restricted and limited to its present use and occupancy.

## THE RESOLUTION:

(896-25-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for William Wrigley, Jr., Co., owner, filed, September 3, 1925, an appeal from orders of the fire commissioner affecting premises 1389 Metropolitan avenue, Maspeth, Borough of Queens; and

WHEREAS, the orders of the fire commissioner, dated August 13, 1925, read:

Order No. 83448-F, affecting Buildings A-1, A-3 and B-1:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. \* \* \*

Order No. 83449-F, affecting Buildings T and U:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. \* \* \*

Order No. 83450-F, affecting Buildings T and U:

"1. Install an automatic dry pipe sprinkler system throughout both buildings, used for the storage and manufacture of paper boxes, having at least one source of water supply, arranged and equipped as provided in the Rules for Fire Extinguishing Appliances adopted by the Board of Standards and Appeals May 24th, 1917, as amended May 2nd, 1918, and January 21st, 1919, effective February 17th, 1919."

and

WHEREAS, the premises consists of a large plot of ground, containing several one-story, non-fireproof buildings, designated as A-1, A-3, B-1, T and U, covering 9,514, 7,728, 13,280, 20,000 and 10,440 sq. ft. in area, respectively; buildings T and U are connected by doorways, the other three located in a separate group are also connected by doorways; OCCUPIED, collectively, for the manufacture of chewing gum: A-1, storage, 10 persons; A-3, wrapping, 35 persons; B-1, mixing, 15 persons; T, storage, 3 persons; U, manufacture of paper boxes, 35 persons; and

WHEREAS, the appellant claims that all these buildings are one story in height; that buildings A-1 and A-3 are of fireproof construction; that the buildings are accessible from more than one side; that there are standard fire hydrants on the premises; that the openings between buildings T and U are provided with single fire doors.

*Resolved*, that the orders of the fire commissioner be and they hereby are *modified*, and the appeal as to Orders Nos. 83448 and 83449 be and it hereby is *granted on condition* that the standpipe system shall be supplied by means of 4-inch line connected to 6-inch underground header system and shall conform in all other respects to the rules of the board of standards and appeals; the appeal as to Order No. 83450 be and it hereby is *granted on condition* that the standpipe equipment as stipulated in foregoing action shall be installed; and that the paper box manufacturing shall be discontinued within thirty days from the date of this action.

THE RESOLUTION:

(404-26-A)

WHEREAS, Cohen and Siegel, for 507-511 West 26th Street Co., owner, filed, May 10, 1926, an appeal from an order of the fire commissioner affecting premises 507-511 West 26th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 5, 1926, Order No. 93423-F, reads:

"1. Provide a separate and distinct system of *AUTOMATIC SPRINKLERS* throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances accepted by the Board of Standards and Appeals, May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919."

and

WHEREAS, the building is fireproof, 6 stories (68 ft. in height, 67 ft. 9¾ in., by 98 ft. 9 in. in area at 1st story and 67 ft. 9¾ in., by 92 ft. in area above; OCCUPIED, cellar, storage of oil; 1st story, shipping, 2 persons; 2nd story, manufacture of steel cabinets, 4 persons; 3rd and 4th stories, manufacture of furniture, 5 persons on each story; 5th and 6th stories, storage of woolen rags, 3 persons on each story.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

491-26-A.

APPELLANT—Samuel Rosenblum, for J. Michaels, owner.

SUBJECT—Appeal from order of the fire commissioner. PREMISES AFFECTED—182-190 Smith street and 328 Warren street, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum and C. Michaels.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE RESOLUTION:

(491-26-A)

WHEREAS, Samuel Rosenblum, for J. Michaels, owner, filed, June 1, 1926, an appeal from an order of the fire commissioner affecting premises 182-190 Smith street and 328 Warren street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated May 5, 1926, Order No. 95158-F, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the premises consists of a group of one-story fireproof buildings used for furniture display, sale, and in part for cabinet making, 182-190 Smith street and 326-328 Warren street being 4 stories in height and by 100 ft. in area; No. 324 Warren street being 3 stories in height and by 100 ft. in area;

# MINUTES

eight and 25 ft. by 100 ft. in area; Nos. 320-322 Warren street being one story in height and 46 ft. by 100 ft. in area; No. 318 Warren street being one story in height and 46 ft. by 100 ft. in area; a total area of approximately 100 sq. ft.; and

WHEREAS, appellant contends that 318 Warren street is fully separated from the rest of the buildings by an unbroken brick wall and should not be included in the order; that each building is separated from the other buildings by double walls and the openings therein are protected by double roof, self-closing doors and that throughout the premises there are distributed chemical fire extinguishers, water buckets and water buckets.

Resolved, that the order of the fire commissioner be and it is hereby affirmed, and the appeal be and it hereby is denied.

THE RESOLUTION:

(498-26-A)

WHEREAS, Louis Bossert & Sons, Inc., for Estate of Louis Bossert, owner, filed, June 2, 1926, an appeal from an order of the fire commissioner affecting premises No. 1325 Grand street (Grand street and Newtown Creek), Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 28, 1926, Order No. 52675-F, reads:

"1. Provide a monitor nozzle in center of yard to be provided with fire pump, etc.

"2. Provide fire hydrant for every 20,000 square feet with hose equipment and not more than 250' between hydrants, etc.";

WHEREAS, the premises consist of a plot of ground having a frontage of 966 ft. on Grand street and a depth of 100 ft.; (fronting also on Newtown Creek and English street) upon which is located the lumber yard and mills of Louis Bossert & Sons, Inc.; consisting of several brick buildings and planing mills, an office, garage and also lumber piles; and

WHEREAS, appellant contends that all parts of the yard are available to the fire department; that the lumber is piled with plenty of aisle space—in the center of the yard there is a 50-ft. wide driveway; that the main buildings are protected by a sprinkler system; that throughout the premises there are several fire line outlets designated by large red circles; that 50 fire alarm boxes (15 being direct alarm boxes and 35 being headquarters) are distributed throughout the yard and that on the Grand street front there are city fire hydrants all along the entire plant.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is denied on condition that fire casks, each equipped with not less than six (6) water buckets shall be provided and installed at both ends of each gangway throughout the yard, and that the casks to be painted red and marked "FIRE" and to be protected from freezing in the winter; that a portable 40-lb. approved fire extinguisher shall be installed in each north and south gangway, located approximately in the

centre of each gangway—not less than three (3) such extinguishers to be installed, properly housed; and granted so long as conditions otherwise remain unchanged.

## BUILDING ZONE CASES.

108-26-BZ.

APPLICANT—Eugene De Rosa, for Emerdyke Realty Corporation, owner.

SUBJECT—Application (re: decision of the superintendent of buildings) under sections 7b and 21 of the building zone resolution, to permit the extension from a business district into a residence district of a proposed theatre building.

THE RESOLUTION:

(244-26-BZ)

WHEREAS, Edward L. Larkin, for Rexburg Realty Corp., owner, filed, March 22, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a store and theatre building, premises 285 East 170th street, Manhattan; and

# MINUTES

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 21, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 170th street is in a business district, College avenue is in a residence district and Morris avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 20, 1926 (N. B. 1792-23) reads:

"1. Erection of proposed theatre building in a business district, extending into a residence district is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, 2 stories in height, with a frontage of 185 ft. 0 in. and a depth of 185 ft. 6 in. and 194 ft. 7 in., irregular, to be occupied as stores and theatre building; and

WHEREAS, the applicant has filed 96 per cent. of consents of an area usually common to the application of section 7g, indicating consent of substantially all the property owners in interest within such area, and there being no objectors,

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the rear northerly wall be finished in light colored face brick; that there be no signs of any nature or description or advertising display maintained or exposed within the residence use area district; that there be no roof signs erected within 50 ft. of the residence use district line; that the exterior of the building on all street fronts shall be finished with face brick and architectural terra cotta or stone trimmings; that all permits required by law for the erection of the building, in accordance with the building code and other laws now in force, shall be obtained within nine months and the building completed within eighteen months from the date of this action.

441-26-BZ.

APPLICANT—Morris Whinston, for Owen Realty Co., owner.

SUBJECT—Application (re: decision of the superintendent of buildings) under sections 7e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—5060-74 Broadway and 4036-50 Tenth avenue, Manhattan.

THE RESOLUTION:

(441-26-BZ)

WHEREAS, Morris Whinston, for Owen Realty Co., owner, filed, March 19, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 5060-5074 Broadway and 4036-4050 Tenth avenue, 215th to 216th street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 21, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the build-

ing zone resolution show that Broadway, Tenth avenue and 215th and 216th streets are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered April 19, 1926, re N. B. 519-1925, which reads:

"3. Proposed garage in a business district is contrary to Sec. 4, Art. II of the Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story and cellar in height, with a frontage of 159 ft. 9½ in. and 154 ft. 2 in. and a depth of 97 ft. 9½ in. and 55 ft. 9¼ in. to be occupied as stores and garage and

WHEREAS, the board of estimate recommended the consideration of this matter by this board when an application was addressed to that board for a change of district designation; and

WHEREAS, the board deemed applicant entitled to relief and that it would entail practical difficulties and unnecessary hardship to require compliance with the strict letter of the zoning resolution.

*Resolved*, that the board of standards and appeals do hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that structure for mixed occupancy be permitted, not to exceed one story in height above grade; that variation of the zoning law be granted only so far as it affects the basement story below grade; that the remainder of the structure upon this site be restricted and limited to conforming use of a business district; that any vehicular entrance to the garage shall be restricted and limited to the Tenth avenue front of the property; that the floor construction of the first floor immediately above garage shall be fireproof throughout; that the garage area shall be ventilated direct to the open air by windows above grade on the Tenth avenue front; that the first story throughout and the Broadway front shall be restricted to conforming business use occupancy; that there shall be no garage sign erected maintained other than on the Tenth avenue front; that there shall be no gasoline storage equipment installed within the confines of this structure; that the exterior facing of the building on the four street fronts, other than the show windows of the stores, shall be of face brick, with architectural terra cotta or stone trimmings; that the garage portion of these premises shall be equipped with a one-source approved sprinkler system; that a return drawing shall be made to the board, in accordance with the conditions imposed, for approval, before submitting same to the superintendent of buildings for acceptance; and

*Resolved*, further, that all permits necessary for the prosecution of the work shall be obtained within 6 months and the work completed within one year from the date of this action.

## THE RESOLUTION:

(240-26-BZ)

WHEREAS, A. J. Simberg, for Anna Shulman, owner, filed, October 20, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building for store purposes; premises 1661 Nicholas avenue, Manhattan; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, September 21, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that St. Nicholas avenue is in a residential district; Fairview avenue is in a residence district; George avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 10, 1926 (N. B. 97-26) reads:

"1. The location of a business building partly in a residential district is prohibited by the Zoning Laws."

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 153 ft. and a depth of 12 ft. 6 in. and 14 ft. 6 in., irregular, occupied as a building for store purposes; and

WHEREAS, the board deemed that applicant was entitled to and that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict provisions of the building zone resolution.

*Resolved*, that the board of standards and appeals does *make a variation* in the application of the use district provisions of the building zone resolution and that the application be and it hereby is *granted*, only so far as it affects the first story or street level of that portion of the plot of the residence area, *on condition* that not less than a one-story building be erected within the residence area of the plot, the first story of which only shall be used for mercantile stores or business use, and the second story to be restricted to conforming dwelling use; that any advertising display shall be confined to the show windows of the store fronts; that all permits necessary for prosecution of the work shall be obtained within ninety days and the building completed within one year from the date of this action; and that a return drawing be made to this board for approval before submitting the same to the superintendent of buildings.

## THE RESOLUTION:

(1268-22-BZ)

WHEREAS, Philip J. Sinnott, attorney for Estate of John Cullen, Florence M. Reilly, executrix, owner, filed, October 26, 1922, an application, under the building zone resolution, to permit in an unrestricted district and partly in a business district the erection and maintenance of a garage for more than five motor vehicles; premises 331-335 East 107th street, 324-348 East 108th street, 2099-2103 First avenue, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, December 19, 1922, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that First avenue is an unrestricted district and 107th and 108th streets are business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered May 9, 1922, in acting on N. B. App. No. 154-22, reads:

"This amendment is disapproved with objection Nos. 1 and 2 repeated:

"1. Inasmuch as the premises are located partly in a business district, the erection of a building for use of occupancy as a public garage is prohibited by the Building Zone Resolution, Art. 2, Sec. 4. A public school is located on the same street between the same intersecting streets, therefore a garage is also prohibited by Section 20, Rules and Regulations of the Board of Standards and Appeals, Art. 5, Reconsideration denied."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 200 ft. on 108th street and 75 ft. on 107th street, 100 ft. 11 in. on First avenue and a depth of 200 ft.; to be occupied as a garage for more than five motor vehicles with stores on First avenue front; and

WHEREAS, there existed on the street between the intersecting streets on July 25, 1916, a stable for more than five horses and the board deemed that the school on 108th street would not be affected, in that there would be no entrance or exit to the garage on 108th street; and

WHEREAS, this application was granted by the board at its meeting, December 19, 1922, on certain conditions, which were modified as to time October 2, 1923, and applicant's representative now requests a modification as to fireproofing and area; and

WHEREAS, under date of October 2, 1923, the board of appeals adopted the following resolution.

*Resolved*, that the board of appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the garage structure be limited to a one-story building not exceeding a frontage of 75 ft. on 107th street and 100 ft. on 108th street; that the building shall be equipped with an approved one-source sprinkler system with 4 in. street main connections; that there be no openings, other than windows on 108th street, the sills to be not less than 6 ft. above the sidewalk level; and an emergency fire exit 3 ft. 8 in. wide by 7 ft. in height; that the rear and gable walls shall be unpierced throughout their entire height and length; that the front elevations on 108th street, 107th street and First avenue be finished in face brick, with architectural terra cotta or stone trimmings; that there shall be not more than two vehicular entrances on 107th street, not to exceed 11 ft. in width;

*Resolved, further*, that any permits necessary for the prosecution of the work shall be obtained within nine

# MINUTES

months and the work completed within eighteen months from the date of this action.”;

and

WHEREAS, applicant through his agent, Wm. F. Doyle, now requests a modification of this resolution to include in the area of building a triangular plot 75 ft. by 45 ft. by 8 ft. irregular.

Resolved, that the board of standards and appeals does hereby modify the foregoing resolution to include said plot on condition that the occupancy of this portion of the structure be restricted from live motor vehicle storage or use.

E RESOLUTION:

(429-25-BZ)

REAS, Samuel Gardstein, for Isabelle Weber, owner, April 21, 1925, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a residence building to be used for store purposes on the 1st story; premises 2374-2376 60th street, Brooklyn; and

REAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, October 9, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

REAS, the use district maps accompanying the building zone resolution show that 60th street is in a residence district; that Gravesend avenue is in a business district and that the road is in a residence district; the line of the business district intersecting the site of the proposed buildings;

REAS, the decision of the superintendent of buildings, rendered April 14, 1925, reads:

"Proposition contrary to the zone resolution, Art. II, Sec. 3. (The erection of stores partly in a residential district.)";

REAS, the proposed building is of non-fireproof construction, three stories in height, with a frontage of 40 ft. and a depth of 60 ft.; to be occupied as a residence building used for store purposes on the 1st story; and

REAS, applicant has established his basis of appeal under section 7-c of the building zone resolution, and the board deemed that it would be a hardship to deprive applicant of a reasonable use of his entire plot and that this case comes within the purview of section 21 of the building zone resolution; and

REAS, this application was granted by the board at its meeting, October 9, 1925, on certain conditions and applicant requested a modification of the time limit.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the ground floor of the building be restricted to mercantile stores or shops, not operating on Sundays; that there shall be no advertising signs other than the plate glass show windows; that the structure shall be restricted to conforming

residential use and occupancy; that all permits necessary for the prosecution of the work shall be obtained within ninety days and the building erected within seven months from the date of this action.

337-26-BZ.

APPLICANT—Arnold Lichtig, for Mosholu Building Corporation, owner.

SUBJECT—Application for reopening—amendment to resolution (re: decision of the superintendent of buildings, under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a building to be occupied for store purposes on the first story.

PREMISES AFFECTED—188-196 Audubon avenue, 550 West 175th street, Manhattan.

APPEARANCES—

For Applicant: Arnold Lichtig.

For Opposition—None.

ACTION OF BOARD—Application reopened and modification granted.

THE VOTE TO REOPEN AND MODIFY RESOLUTION—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle..... 4  
Negative: ..... 0  
Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(337-26-BZ)

WHEREAS, Arnold Lichtig, for Mosholu Building Corp., owner, filed, April 17, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building for store occupancy on 1st story; premises Nos. 188-196 Audubon avenue and 550 West 175th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 15, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Audubon avenue, West 174th street and West 175th street are all in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 29, 1926, reads:

"This amendment is disapproved with the following objections repeated:

"1. The proposed building of store is prohibited in a residential district. Zoning Resolution, Art. 2, Paragraph 2. Additional objection due to amendment.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, four stories in height, with a frontage of 145 ft. 8 in. at 1st story, 135 ft. 8 in. above, and a depth of 25 ft.; to be occupied as a building for store occupancy on 1st story and dwellings above; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship; and

WHEREAS, this application was granted by the board at its meeting, June 25, 1926, on certain conditions and applicant requested a modification of these conditions as to yard area.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only so far as it affects the occupancy of the 1st story for the use and conduct of retail mercantile stores, as permitted under section 4 of the building zone resolution, on condition that the entire remainder of the plot shall be restricted to conforming dwelling use of not less than three stories above said store; that the gable wall on the 175th street front

# MINUTES

shall be finished with face brick and architectural terra cotta or natural stone trimming; that the 175th street wall shall be returned on the Audubon avenue front for not less than 16 in.; that the westerly gable walls shall be unpierced for a depth of not less than 44 ft.; that a rear yard of not less than 4 ft., starting 44 ft. southerly from 175th street, shall be maintained open and unincumbered; that any advertising shall be restricted to the glass show windows of the stores; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

1225-25-BZ.

APPLICANT—William F. Doyle, for Harold J. Levine, owner.

SUBJECT—Application for reopening—extension of permit (re: decision of superintendent of buildings), under sections 7c and 21 of the building zone resolution, to permit in a residence district the erection of an apartment house with stores on first story.

PREMISES AFFECTED—2636-2656 Ocean avenue, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition—None.

ACTION OF BOARD—Application reopened, and time extended for six months, to obtain permits.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle..... 4

Negative: ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(1225-25-BZ)

WHEREAS, William F. Doyle, for Harold J. Levine, owner, filed, November 24, 1925, an application, under the building zone resolution, to permit in a residence and business district the erection of an apartment house with stores on the 1st story; premises 2636-2656 Ocean avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Ocean avenue is in a residence

district and East 19th street is in a business district;

WHEREAS, the decision of the superintendent of buildings, rendered November 21, 1925, reads:

"Proposition contrary to the Zone Resolution, A Sec. 3.

"The erection of an apartment house with stores in residential district.";

and

WHEREAS, the proposed building is of non-fireproof construction, four stories in height, with a frontage of 106 3/4 in. on Ocean avenue and 112 ft. 7 3/8 in. on Neck road, to be occupied as stores and apartment houses; and

WHEREAS, the board deemed that the applicant was entitled to relief under sections 7c and 21 of the building zone resolution, due to the surrounding and abutting conditions;

WHEREAS, this application was granted by the board at its meeting, March 23, 1926, on certain conditions and applicant requests a modification of the time limit.

Resolved, that the board of standards and appeals hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only so far as it affects the 1st story on the street front of Neck road, the proposed structure of conforming use, to be developed in conjunction with the erection and construction of a four (4) story apartment house; as to the use of the stores, specifically prohibiting the use and conduct of a fish store, meat market or delicatessen store, on condition that the store use shall be separated from the apartment house use of the 1st story by unpierced walls of approved masonry; that the Ocean avenue wall shall return on Neck road front with a brick pier of not less than 16 in. that there shall be no openings on the Ocean avenue from the corner store, other than two windows at the top of the stores, the sills of which shall be not less than 6 ft. above the sidewalk level; that the entire plot of land shall be maintained for conforming residential use and occupancy; that there shall be no signs erected on the premises; any advertising to be restricted to fixed lettering on the plate glass show windows of the store fronts; there shall be no produce or merchandise exposed or displayed on the exterior of the building; all permits necessary for the prosecution of the work shall be obtained within six (6) months and the building completed within one year from the date of this action.

Adjourned, 2 p. m.

THE RESOLUTION:

(435-26-S)

WHEREAS, Croker National Fire Prevention Engineering

# MINUTES

Co., for Leon J. Newman, et al., owner, filed, May 18, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 12 East 32nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 22, 1926, reads (Order No. 93125-LD):

"1. Provide safe and unobstructed egress from the lower termination of the exterior stairway at rear of building by constructing a fireproof enclosed passageway independent of other exit from the building and leading to the street or to an open area having communication with the street, as per Section 268 of the Labor Law."

and

WHEREAS, the building is fireproof, 8 stories in height, 22 ft. by 98 ft. 9 in. in area at 1st story and 22 ft. by 90 ft. in area above; OCCUPIED as a tenant factory: 1st story, store; 2nd story, dresses, 10 persons; 3rd story, vacant; 4th story, dresses, 4 persons; 5th, 6th and 7th stories, vacant; 8th story, dresses, 15 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior steel stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from roof to the 2nd story balcony with connecting stairs leading to yard of premises adjoining at south, and also a stairway connecting with the outside fireproof stairs on the adjoining building at southwest, there is no legal means of egress to street; ROOFS of adjoining buildings: 4 stories higher at west; 5 stories higher at east; and

WHEREAS, the petitioner contends that the floors now vacant will be occupied only for light manufacturing; that two good means of egress from the termination of rear fire escapes are maintained, one direct to 31st street through adjoining building at south, the other through adjoining building at southwest.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects egress from the termination of the fire escape on condition that the rear fire escape shall be continued to the yard of the adjoining premises to the rear with egress therefrom through plain glass window direct to 31st street and by means of iron stairs of exterior fire escape on the premises to the west, and that all lights of skylight in the rear of the premises, first story, shall be fixed, glazed with wire glass. Consent of owner of adjoining premises for exit to be filed with fire commissioner.

438-26-S.

PETITIONER—Samuel Rosenblum, for Bas Realty Corporation, owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—215 West 29th street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners	
Connell, Holland and Guilfoyle and Chief	
Kenlon .....	5
Negative: .....	0
Absent .....	0

THE RESOLUTION:

(438-26-S)

WHEREAS, Samuel Rosenblum, for Bas Realty Corp., owner, filed, May 18, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the

superintendent of buildings, affecting premises No. 215 West 29th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings dated May 12, 1926, reads:

"Relative to your application of April 15th, for Certificate of Occupancy for the above premises, are advised before your application can be approved will be necessary to provide a fireproof means of egress from termination of fire escape to street.

"Kindly give the matter your earliest attention.";

and

WHEREAS, the building is fireproof, 7 stories in height, 23 ft. by 94 ft. in area at 1st story and 23 ft. by 90 ft. in area above; OCCUPIED as a tenant factory for the manufacture of furs: 1st story, store; 2nd story, 7 persons; 3rd story, 8 persons; 4th story, 6 persons; 5th story, 13 persons; 6th story, 10 persons; 7th story, 18 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings, a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from roof to the 1st story landing balcony with no legal means of egress to the street; ROOFS of adjoining buildings: 4 stories lower at east and west; and

WHEREAS, the petitioner claims that the former access means of egress from the termination of rear fire escape has been cut off by the erection of a new building on premises adjoining at north; the petitioner contends that the 2nd and 3rd story balconies of the rear fire escapes extended and connect by means of a fireproof door with 2nd and 3rd stories of the building adjoining at west through which egress may be had direct to street; that the occupancy is very small and the exits are adequate.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects egress from the termination of the fire escape on the rear on condition that the rear fire escape shall be continued to include the first story, and that egress shall be provided from the second and third stories of said fire escape to fire escape of the adjoining premises at west, with egress therefrom to the adjoining building through an approved fire door which shall be maintained unlocked and unfastened during the occupancy of this building; that an affidavit of consent of the adjoining owner to the west of said premises shall be filed with the superintendent of buildings, and that the fire escape shall conform with the regulations in all other respects.

445-26-S.

PETITIONER—Samuel Rosenblum, for Third Avenue 105th Street Corporation, owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—1896-1898 Third avenue, Manhattan.

THE RESOLUTION:

(445-26-S)

WHEREAS, Samuel Rosenblum, for Third Avenue 105th Street Corp., owner, filed, May 19, 1926, a petition for variation from the requirements of the labor law, as cited in decision of the superintendent of buildings, affecting premises 1896-1898 Third avenue, Borough of Manhattan; and

# MINUTES

WHEREAS, the decision of the superintendent of buildings, May 17, 1926, reads:

"Answering your letter of May 11, 1926, relative to application for Certificate of Occupancy we beg to state that two exits must be provided remote from each other. \* \* \*";

WHEREAS, the building is non-fireproof, 2 stories in height, 10 ft. 10 in. by 100 ft. in area; OCCUPIED: 1st story, 3 persons; 2nd story, tailoring and dressmaking, 36 persons; STAIRWAYS: Two interior stairways, the stairway at west is of wood up to 2nd story and of wood from 2nd story to roof, enclosed in fire retarded partitions; the stairway at east is of wood extending from the 1st story to top story, enclosed in non-fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to prove a fire escape on the 105th street front of the building, taking in the windows of the three easterly rooms on the 2nd story, a oseneck ladder leading to the roof and a counter-balcony stairway to reach the sidewalk; the petitioner contends that light manufacturing will be limited to the front 105th story along 105th street, otherwise the building will be used for non-factory business purposes.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted only in as it affects the two means of egress from the second story on condition that a balcony fire escape shall be provided at the level of the second story to embrace at least one window in each room used for manufacturing purposes; the manufacturing area shall be limited to four rooms, indicated on the plans, for a depth of approximately 20 ft. along the 105th street front, and on condition that the law requirements shall be complied with in all other respects.

THE RESOLUTION:

(452-26-S)

WHEREAS, David M. Jones, for Estate of Elizabeth Dean, filed, May 20, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner affecting premises 11 East Houston street, Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 17, 1926, Order No. 95753-LD, reads:

"2. Extend the interior stairway at the west side of the building to the roof, as per Section 271 of the Labor Law."

"4. Enclose the interior stairway at the west side of the building serving as a required means of exit on all floors with partitions of fire resisting material extending continuously from the floor of the 1st story to the

underside of the floor above, including any exposed stair soffits, landings and passageways, openings shall be provided with approved, self-closing fire doors, constructed as per Section 271 of the Labor Law and Rule 2 of the Board of Standards and Appeals, adopted 7-29-24.";

and

WHEREAS, the building is non-fireproof, 4 stories in height, 25 ft. 5 in. by 77 ft. in area at 1st story, and 25 ft. 5 in. by 42 ft. 6 in. in area above; OCCUPIED: 1st story, restaurant, 5 persons, 2nd, 3rd and 4th stories, manufacture of hats, 6 persons on each story; EXITS: an interior wooden stairway, extending from the 1st story to top story, enclosed in stud and plastered partitions (except a small portion on the 2nd and 3rd stories, which is of wood), the 1st story is metal covered and tiled, with wooden doors at openings; a sub-standard fire escape on the rear of the building; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from top story to the first story landing balcony and counter-balcony stairs to sidewalk, a fixed iron ladder from closet in public hall on top story leading to the roof scuttle; ROOFS of adjoining buildings: 2 stories higher at west; same level at east; and

WHEREAS, as to item 2 and 4 to cover the soffit of stairs which is exposed on 1st story in the kitchen, with metal lath and plaster; to provide a kalamein door with wire glass panels leading from entrance hall to restaurant on 1st story; to permanently remove the door from closet on top story in public hall, which contains the fixed iron ladder leading to the roof scuttle; to provide a hook on inside of scuttle; and

WHEREAS, the petitioner contends that the entire ceiling of restaurant and the soffits of stairs are metal covered; that due to the small area of the building, the limited occupancy, and the proposed changes, the exit facilities will then be adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to Item 2, on condition that a fixed double-rung iron ladder shall be provided from the top story stairway hall to the scuttle in the roof; and that any door on the opening in top story ladder enclosure shall be removed; and denied as to Item 4.

THE RESOLUTION:

(461-26-S)

WHEREAS, Peoples Realty Co., owner, filed, May 22, 1926, a petition for variation from the requirements of the labor law as cited in order of the fire commissioner, affecting premises 35 West 31st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, Order No. 95065-LD, dated April 24, 1926, reads:

"1. Arrange the exterior screened stairway on the rear of building and the openings leading thereto so

# MINUTES

that same are in compliance with the provisions of Sec. 268 of Labor Law, or carry out a proper alternative method of complying with the requirements of Sec. 271 of Labor Law.

"Among the defects noted are the following:

"Windows on course not fireproof nor self-closing.

"No fire doors, at least 2 ft. by 6 ft. at floor level leading to balconies.

"No safe passageway leading to the street from termination independent of other exit from the building.

"Not screened with incombustible material.

"Tread is 8 in. in width; Riser 9 in.

"2. Enclose the interior stairway at west side of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material, extending continuously from the cellar to 3 ft. above the roof. \* \* \*

"Among the defects noted in present enclosure are the following:

"Non-fireproof doors leading to stairway.

"Doors do not open outwardly.

"Excessive wire glass in partition on all stories.";

and

WHEREAS, the building is fireproof, 11 stories in height, 30 ft. 4 in. by 88 ft. in area; OCCUPIED as a tenant factory, about 15 persons on each story; EQUIPPED with a fire alarm signal system; EXITS: An interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; an exterior screened stairway on the rear of the building, having fireproof openings along the course thereof, extending from 1st story to the roof, no legal means of egress to the street; ROOFS of adjoining buildings: 40 ft. higher at west; 25 ft. lower at east; and

WHEREAS, the petitioner proposes to connect the rear stairway with the exterior stairway on rear of the adjoining building Nos. 31-33 West 31st street, at 3rd story; to provide enclosing railings 4 ft. 6 in. in height and to provide interior stops from floor to sills of windows, opening to the exterior stairs; furthermore, to comply strictly with all other items in order; the petitioner contends that he also owns the adjoining building Nos. 31-33 West 31st street and that the exits as proposed will then be adequate.

*Resolved*, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects egress from the termination of the fire escape on condition that the lowest balcony at second story level shall be connected with the balcony of the regulation fire escape of premises adjoining, i.e. 31 West 31st street, also connecting to and with egress from tower platform of premises 37 West 31st street, and granted as to the existing treads and risers on condition that the fire escape otherwise complies with the labor law in all respects, and granted as to Item 2, only so far as the window in the first story corridor is concerned on condition that the opening be made stationary and glazed with  $\frac{1}{4}$  in. polished plate glass and that the order otherwise shall be complied with, and that an affidavit of consent as to the use of the fire escape of the adjoining premises, 31 West 31st street, shall be filed with the fire commissioner.

THE RESOLUTION:

(466-26-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for the Keystone Varnish Company, owner, on May 24, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 71-79 Otsego street, Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 17, 1926, Order No. 92867-LD, reads:

"1. Enclose the interior stairway serving as a required means of exit at the Sigourney and Otsego Street corner of building on all sides with partitions of fire-resisting material extending continuously from the lowest point of such stairway in the cellar to the ceiling of the first floor. Such enclosure shall lead directly to a door opening outwardly to the street. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices, constructed as per Rule 4 of the Board of Standards and Appeals, etc.

"2. Provide additional required means of exit from the second story of the enameling building at south side corner of plant in accordance with the requirements of Rule 3 of the Board of Standards and Appeals, etc.

"3. Enclose the interior stairway serving as a required means of exit at north sides of building on all sides with partitions of fire-resisting material extending continuously from the floor of the cellar to the under side of the floor of the first story. Such enclosure shall lead directly to a door opening to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices, in accordance with the requirements of Rule 3, Board of Standards and Appeals, etc.

"4. Provide additional required means of exit from the second story occupied as a filtering room in accordance with Rule 3, Board of Standards and Appeals, etc.

"5. Arrange both fire escapes in the interior courtyard on the south side of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Rule 3, Board of Standards and Appeals, etc. And the defects noted on these fire escapes are the following: Balconies are not 4 ft. in width. No fire doors leading to balconies. No gooseneck ladder leading to roof from balconies.";

and

WHEREAS, the premises consists of a group of buildings 175 ft. by 200 ft. over all, connected by doorways with fireproof self-closing and automatic sliding doors; building marked "A" on plans is non-fireproof, 2 stories in height, 40 ft. by 100 ft. in area at first story, and 40 ft. by 40 ft. in area above, 16 persons on 2nd story; building marked "B" on plans is non-fireproof, 2 stories in height, 20 ft. by 60 ft. in area, 13 persons on second story; building marked "C" on plans is non-fireproof, 2 stories in height, 20 ft. by 60 ft. in area, 2 persons on second story; building marked "E" on plans is of frame construction, 2 stories in height, 20 ft. by 40 ft. in area, 2 persons on second story; building "A" has an interior wooden stairway extending from first story to second story, enclosed with wooden partitions on the first story; building "B" has an exterior stairway at front from ground level to second story; building

# MINUTES

has an exterior stairway at front from ground to second story, a fire escape at rear of second story leading to roof adjoining building at north and a drop ladder from said roof to yard level; building "E" has an open wooden interior stairway from first to second stories; and

WHEREAS, the petitioner claims, as to items 1 and 3, that there is an opening in the party wall between buildings "A" and "B" at the cellar story, which is used as a cooperage for storage; there is also a ladder in the areaway leading up to ground level outside the building; that the exits are adequate; as to item 2, that building "E" has in addition to the interior stairway three doorways leading from the second story to the roofs of adjoining one-story buildings, one at west and two at east, a ladder from said roofs leading to yard level in each case, and that the exits are adequate; as to item 4, that building "C" has a stairway from second story leading to ground level at front and an exit from second story by means of a balcony to roof of adjoining building and ladder to yard open to street; that the exits are adequate; as to item 5, that the door leading from front exterior stairs at second story of building "B" is a fireproof swinging door, and that the door from building "B" to the roof is a fireproof sliding door; that there is no means of egress from the roofs of buildings "A", "B" and "C", which are all on the same level, that a gooseneck ladder is unnecessary.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to Item 5, only so far as it affects the existing exterior stairs, on condition that the stairs shall be maintained in a naturally safe; and denied as to Items 1, 2, 3 and 4.

6-S.

PETITIONER—Croker National Fire Prevention Engineering Company, for Benjamin Karp, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—85-87 Varet street, Brooklyn.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative: .....	0
Absent .....	0

THE RESOLUTION:

(467-26-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for Benjamin Karp, owner, filed, May 24, 1926, a petition for variation from the requirements of the labor law as cited in order of the fire commissioner, affecting premises 85-87 Varet street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 21, 1926, Order No. 89979-LD, reads:

"1. Enclose the interior stairway at the east side of the building with partitions of fire resisting material extending from cellar to the underside of the roof beams as per Sec. 271, etc.

"2. Arrange the fire escape on the front and rear of the building and the openings leading thereto and the windows opening on the course thereof so that same be in compliance with the provisions of Sections 273 and 274 of the Labor Law, etc., or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. Among the defects noted are the following: a. Windows on course not self-closing. b. Windows on course not fireproof on rear

fire escape. c. No fireproof passageway from termination of rear fire escape. d. Counterbalanced stairway and releasing device defective on front fire escape."

and

WHEREAS, the building is non-fireproof, five stories in height, 41 ft. 9 in. by 88 ft. 6 in. in area; OCCUPIED as a tenant factory; 1st story, store; 2nd story, underwear manufacture, 45 persons; 3rd story, underwear manufacture, 21 persons; 4th story, awning manufacture, 32 persons; 5th story, clothing manufacture, 44 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the first story to top story, enclosed in metal covered 2 in. by 4 in. stud wood sheathed partitions with wooden doors (metal covered on hall side) at openings; two fire escapes, one on the front and one on the rear of the building, having fireproof openings along the course thereof, the front fire escape extending from top story to the second story, with a counter-balanced stairs to the sidewalk and a gooseneck ladder to roof; the rear fire escape extending from roof to yard level, with no legal means of egress from the termination thereof; ROOFS of adjoining building two stories lower at east; vacant lot at west; and

WHEREAS, the petitioner proposes, as to item 1, to provide fireproof self-closing doors at all openings to the interior stairway; the petitioner further proposes to comply with all defects in item 2, except the required fireproof passageway from the foot of rear fire escapes, contending that the yard is open to adjoining yard at east, access to and through adjoining buildings at east by means of door or plain glass window to street.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to Item 2, only so far as it affects egress from the termination of the rear fire escapes, on condition that the fire escapes otherwise on the front and rear of the building shall comply with the labor law in all other respects and that egress from the termination of the fire escape at the rear shall be provided and maintained through open yard of the adjoining premises to the east, with egress therefrom through open hallway direct to the street; and denied as to Item 1.

283-26-S.

PETITIONER—John J. Gilmartin, for David Herstein, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—10 Washington place, Manhattan.

APPEARANCES—

For Petitioner: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

THE RESOLUTION:

(283-26-S)

WHEREAS, John J. Gilmartin, for David Herstein, owner, filed, April 5, 1926, a petition for a variation of the requirements of the labor law as cited in order of the fire commissioner, affecting premises 10 Washington Place, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 3, 1925, Order No. 81868-LD, reads:

"1. Provide an additional means of exit from the

MINUTES

cellar and sub-cellar, said exit to be located at the rear of building, remote from the existing stairway in accordance with Section 271 of the Labor Law.”; and

WHEREAS, the building is non-fireproof, 6 stories in height, 43 ft. by 90 ft. in area at first story and 43 ft. by 85 ft. in area above; OCCUPIED as a tenant factory; sub-cellar, storage, 2 persons; cellar, manufacture of hats, 8 persons; 1st story, offices, 15 persons; 2nd to 6th story, inclusive, manufacture of clothing, 20 persons on each story; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the sub-cellar to roof, enclosed in fire resisting partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to provide a second means of exit from cellar and sub-cellar by means of a double-rung iron ladder at front, extending up to the sidewalk and enclosed with fire-resisting partitions, with fireproof, self-closing doors at the openings.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that a 60-degree iron stairway shall be provided from the level of the sub-cellar at the rear with a balcony at both the cellar and first story levels, with a bridge from the first story balcony connecting to the premises at rear, Nos. 19-21 West 4th street; that an affidavit of consent from owner of premises to rear for the connecting bridge at the first story shall be filed with the fire commissioner.

444-26-S.

PETITIONER—Isaac Menline, for Arthur Brisbane, Lane Bryant, Inc., et. al., owners.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—24-30 West 39th street, Manhattan.

APPEARANCES—

For Petitioner: Isaac Menline.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT:

Affirmative	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Absent	0

THE RESOLUTION:

(444-26-S)

WHEREAS, Isaac Menline, for Arthur Brisbane, Lane Bryant, Inc., et al., owners, filed, May 19, 1926, a petition for variation from the requirements of the labor law as cited in decision of superintendent of buildings, affecting premises 24-30 West 39th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated December 18, 1924, re: Viol. 410-1924, reads:

“2. Stair enclosure of No. 24 should be fire retarded from the cellar to the roof.”;

and

WHEREAS, the building is non-fireproof, 5 stories in height, 88 ft. by 90 ft. 9 in. in area at first story, 88 ft. by 87 ft. 3 in. at second story, and 88 ft. by 62 ft. 2 in. in area above; above the first story the building is divided by an unpierced brick wall into two sections. OCCUPANCY of section Nos. 24-26 West 39th street, first story, store, 30 persons; 2nd to 5th story, inclusive, office, 30 persons on each story; section Nos. 28-30 West 39th street, 1st story, store, 30 persons; 2nd to 5th story, inclusive, factory use, 30 persons on each story; EQUIPPED with a fire alarm system. EXITS: Two interior wooden stairways, extending from

first story to roof (the easterly stairway in section Nos. 24-26) enclosed in non-fireproof partitions, with wooden doors at openings; the westerly stairway in section Nos. 28-30 is enclosed in fire-resisting partitions with fireproof doors at openings; two fire escapes on the rear of the building having non-fireproof openings along the course of the easterly stack on section Nos. 24-26, and fireproof openings along the course of the westerly stack on section Nos. 28-30, extending from the main roof to the roof of first story extension, with egress from the termination of the fire escapes by means of a connection to and through fireproof building, Nos. 21-23 West 38th street. ROOFS of adjoining buildings, same level at east; 9 stories higher at west; and

WHEREAS, the petitioner contends that as the stairway in section Nos. 24-26 West 39th street cannot serve any factory floor areas in the building, it comes within the provisions of Rule 3, subdivision b, for sub-standard fire escapes; furthermore, that the stairway conforms to the building code for office occupancy.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the petition be and it hereby is denied.

477-26-S.

PETITIONER—Joseph Mitchell, for Cannizzaro Holding Corporation, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—438 Broome street, Manhattan.

APPEARANCES—

For Petitioner: Joseph Mitchell.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative:	0
Absent	0

THE RESOLUTION:

(477-26-S)

WHEREAS, Joseph Mitchell, for Cannizzaro Holding Corporation, owner, filed, May 27, 1926, a petition for a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 438 Broome street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 26, 1926, reads:

“Order No. 93411-LD:

“1. Arrange the fire-escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

“Among the defects noted are the following:

“No stairway from lowest balcony to ground.

“No safe passageway to the street from the termination.

“2. Provide an additional required means of exit from the cellar and the 1st story, said exit to be located at the rear of the building in accordance with the provisions of Sections 271 of the Labor Law.”;

and

WHEREAS, the building is non-fireproof, 5 stories in height, 29 ft. 2 in. by 109 ft. in area at 1st story and 29 ft. 2 in. by 105 ft. in area above. OCCUPIED as follows: Basement, oil cloths and linoleum, 2 persons; 1st floor, oil cloths and linoleum, 5 persons; 2nd floor, oil cloths and linoleum,

# MINUTES

is; 3rd floor, oil cloths and linoleum, 4 persons; 4th floor, cigar manufacturing, 15 persons; 5th floor, cigar manufacturing, 20 persons. EQUIPPED with a fire alarm signal. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in fire retarded doors with fireproof doors at openings; a fire escape at rear of the building, having fireproof openings along course thereof, extending from the main roof to the roof of the 1st story extension, with EGRESS from the roof of the fire escape by means of an iron platform leading to adjoining roof to east. ROOFS of adjoining buildings, to west, same level; to east, 10 ft. lower; and WHEREAS, petitioner contends that the existing means of escape are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the law, and that the petition be and it hereby is granted on Item 1, only so far as it affects egress from the termination of the fire escape on condition that the fire escape be provided with a connecting bridge at the second level to the roof of the first story extension of the building to the east and that a 60 degree stairway shall be provided from the rear areaaway level with a balcony at the roof level, and that a 60-degree stairway shall be provided from the roof of the second story extension to the east; and as to Item 2 on condition that the iron stairway at rear, required under Item 1, shall be provided.

Special meetings as published in the Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, October 5, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Wednesday, October 13, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

THE RESOLUTION:

(841-25-A)

WHEREAS, George and Edward Blum, for Frederick Hussey Realty Company, owner, filed, August 18, 1925, appeal from a decision of the fire commissioner, affecting premises 449-459 Seventh avenue, 163-167 West 34th street and 160-166 West 35th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered June 12, 1925, reads:

"2. A building fronting on more than one street shall have at least one riser for each street front, per Rule No. 24, of the Rules of the Board of Standards and Appeals, adopted June 27th, 1922, amended July 20th, 1923, and Chapter 581, Article 28, paragraph 3, of the Code of Ordinances.";

and

WHEREAS, the building is fireproof, 16 stories in height, fronting 100 ft. 5 in. on Seventh avenue, 66 ft. on West 34th street, and 72 ft. on West 35th street; about 19,000 sq. ft. in area; OCCUPIED as offices; 25 per cent for manufacturing purposes; about 160 persons on each story; and

WHEREAS, this appeal was denied by the board at its meeting, December 1, 1925, and appellant, through its representative, Samuel Rosenblum, requested a reopening of the case, which request was granted by vote of the board; and

WHEREAS, it is now contended that the building is equipped with two standpipes, one in the stairway enclosure and one in the corridor near the elevators and appellant contends that there would be hardship in making the owner remove this standpipe as its present location was due to the standpipe being formerly designed for this location and changed by objection by building department and contends, further, that the area of the building is less than 20,000 sq. ft.; and

WHEREAS, this appeal was denied by the board at its meeting on December 1, 1925; reopened and again denied on May 18, 1926, and the appellant, through its representative, Samuel Rosenblum, requested a reopening of the case which request was granted by vote of the board; and

WHEREAS, it is now contended that the building is equipped with two standpipes—one in the stairway enclosure and one in the corridor near the elevators; and that the location of this standpipe was due to the relocation of standpipe and proposes to provide 125 feet of hose on each floor and one standpipe riser; and

WHEREAS, the building is to be maintained exclusively for executive office use and occupancy, with no manufacturing of any nature or description in any portion of the premises

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted only so far as it affects the location of one standpipe in the public corridor additional to the regular standpipe in the southerly stairhall, on condition that the stairhall throughout shall be constructed of approved fireproof construction; that any openings therein shall be equipped with self-closing, fireproof doors; that a sign in red letters on white background shall be permanently fixed on the stair landing of northerly staircase on each story such sign describing the location of the northerly standpipe with arrows directing its position; that a ceiling sign with metal white background with red letters shall be hung in the corridor directly over the standpipe; that the building shall be equipped throughout with an approved two-story sprinkler system; that the standpipe equipment shall conform

# MINUTES

In the regulations in all other respects; and that the  
lets on each floor shall be equipped with sufficient hose  
cover all floors.

26-A.  
PELLANT—Edward P. Doyle, for Phillip Rhine-  
lander, owner.  
BJECT—Appeal from decision of the tenement house  
commissioner.  
EMISES AFFECTED—212 West 14th street, Man-  
hattan.  
PEARANCES—

For Appellant: Edward P. Doyle.  
TION OF BOARD—Appeal denied.

E VOTE—  
Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Deputy Chief Martin ..... 5  
Absent ..... 0

## RESOLUTION:

(455-26-A)

WHEREAS, Edward P. Doyle for Phillip Rhinelander,  
er, filed, May 21, 1926, an appeal from a decision of the  
ment house commissioner affecting premises 212 West  
street, Borough of Manhattan; and  
WHEREAS, the decision of the tenement house commis-  
sioner reads:

"Provide a gas shut off valve of approved design for  
the above building according to the provisions of the  
ordinance adopted Jan. 16, 1923, by the Board of Alder-  
men for the control of gas."

WHEREAS, the building is non-fireproof, 5 stories and  
in height, 25 ft. by 78 ft. in area; OCCUPIED as  
tenement house, with stores on the first story; and

WHEREAS, the appellant claims that the building is small,  
has no basement; that there is a gas shut off valve in  
t of the building on the sidewalk; furthermore, the  
llant contends that there is no danger from gas explo-  
or accumulation of gas in the cellar; that there is no  
ssity for the installation of a gas shut-off valve; and  
WHEREAS, there is an apartment, storeroom and boiler  
n in the cellar of these premises;

Resolved, that the decision of the tenement house com-  
missioner be and it hereby is *affirmed*, and the appeal be  
it hereby is *denied*.

## RESOLUTION:

(457-26-A)

WHEREAS, Clinton & Russell for Electric Bond & Share  
any, owner, filed May 21, 1926, an appeal from a  
on of the fire commissioner, affecting premises Nos.

2-8 Rector street; 56-66 Trinity place, and 91-101 Greenwich  
street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated  
May 8, 1926 (Alt. Applic. No. 783-26), reads:

- "1. Provide an 8" riser for the entire building with  
an 8" cross connection.
- "2. Provide two 3" x 3" x 6" siamese connections for  
each 8" riser.
- "3. Provide a gravity tank of at least 3,500 gallon fire  
reserve, 20 feet above the roof.
- "4. Provide an intermediate tank of at least 3,500  
gallons fire reserve, according to Rule No. 35."

and

WHEREAS, the building is fireproof, 23 stories (307 ft. 8  
in.) in height, 118 ft. 7 in. by 142 ft. in depth; OCCUPIED  
for office purposes; EQUIPPED with a standpipe system,  
consisting of a tank in the pipe gallery at top of the build-  
ing, two 6 in. rising standpipe lines with 6 in. cross connec-  
tions in pipe gallery and in the basement with 6 in. headers  
to 3 siamese connections (1 on each street front); the  
rising standpipe lines are encased in terra cotta shafts adja-  
cent to each stairway; and

WHEREAS, the appellant proposes to construct three addi-  
tional stories on top of the existing structure with extension  
of the fire extinguishing appliances; the appellant proposes  
in lieu of complying with the decision of the fire commis-  
sioner to extend the two 6 in. rising standpipe lines; to  
provide a 5,000 gallon pressure tank in the pent house at  
the top of the finished building, said tank is intended to  
serve the five top stories and the pipe gallery; to revise  
the existing tank in pipe gallery to capacity of 3,650 gallons  
and use it for the supply of standpipes below the 22nd story;  
to install 150 gallon per minute automatic electric pump in  
basement for filling purposes and a 4 stage electric pump  
of 750 gallons capacity, connected to the standpipe lines,  
also a 5,000 gallon suction tank connected with the street  
main; the appellant contends that literal compliance with  
objections of the fire department would require extensive  
work and would be costly;

Resolved, that the decision of the fire commissioner be  
and it hereby is *modified*, and the appeal as to Item 1 be and  
it hereby is *granted on condition* that the existing approved  
riser lines shall be not decreased in diameter for the addi-  
tional stories; that the existing riser lines shall be equipped  
on the cross-overs with emergency control valves, sealed open  
and properly marked to indicate their use; and that the  
standpipe equipment otherwise throughout the building shall  
comply with the rules in all respects; as to Items 2, 3 and  
4 the appeal be and it hereby is *denied*.

(459-26-A)

WHEREAS, David M. Jones for William W. Green, owner,  
filed May 21, 1926, an appeal from an order of the fire

# MINUTES

commissioner, affecting premises Nos. 220-22 West 49th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 22, 1926 (Order No. 94502-F), reads:

"1. Provide a tank on roof of at least 3,500 gallons capacity for the standpipe system, said tank to be so elevated that the bottom will be not less than 20 feet above the outlet in the highest story. Sec. 20, Ch. 12, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, 9 stories (102 ft.) in height, 40 ft. by 100 ft. 5 in. in area at the 1st story and 40 ft. by 92 ft. in area above; OCCUPIED as a hotel; basement, restaurant—11 rooms on each story above; equipped with 3 in. standpipe system; and

WHEREAS, the appellant claims that the building is provided with an enclosed tank on the roof, the bottom of which is 4 ft. above the highest outlet; that the building is equipped with an interior fire alarm system, and fire drills held; furthermore, the appellant proposes to provide an adequate number of approved fire extinguishers on the 9th story.

Resolved, that the order of the fire commissioner be and it hereby its affirmed, and the appeal be and it hereby is denied.

440-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Port Morris Industrial Terminal Co., owner.

SUBJECT—Appeal from order of the fire commissioner. PREMISES AFFECTED—278-292 Locust avenue, The Bronx.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition. CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin

Negative: 5  
Absent: 0

THE RESOLUTION:

(440-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Fort Morris Industrial Terminal Co., owner, filed, May 18, 1926, an appeal from an order of the fire commissioner affecting premises 278-292 Locust avenue, east building, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated December 29, 1925 (Order No. 87947-F), reads:

"1. Install a standpipe system with risers 4" in diameter in east building, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½" regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway and enclosure.";

and

WHEREAS, the building is non-fireproof, 2 stories (33 ft.) in height, 130 ft. by 100 ft. (12,500 sq. ft.) in area; OCCUPIED: 1st story, storage batteries and charging room, 10 persons; 2nd story, office and stockroom, 6 persons; and

WHEREAS, the appellant contends that there are 5 fire hydrants in front of the premises on Locust avenue, also a city fire alarm box; furthermore, that the building is open on three sides, with 50 per cent glass area along the south and east sides, giving easy access; the appellant contends that it would be a great hardship if compelled to install standpipes under the existing conditions.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby granted on condition that the building shall be not increased in height or area; that no inflammable or volatile oils shall be stored or maintained on the premises; that such buckets and other approved fire extinguishers as required by the fire commissioner shall be installed, distributed and maintained throughout the premises as directed; and granted only so long as the conditions as to the present occupancy and use shall remain unchanged.

THE RESOLUTION:

(492-26-A)

WHEREAS, Ira I. Slomon, owner, filed, June 1, 1926, appeal from a decision of the fire commissioner affecting premises 171 Thompson avenue, Long Island City, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, rendered May 6, 1926 (Alt. Applic. No. 2664-24), reads:

"2. Floors and roof must be portland cement concrete at least 6" thick or brick masonry 8" thick.";

and

WHEREAS, the building is of concrete construction, roof framing unprotected, one story in height, 20 ft. by 40 ft. in area; OCCUPIED for the manufacture of rubber cement, one person; and

WHEREAS, the appellant proposes to construct a No. 10 gauge metal roof on open steel trusses, in lieu of a concrete roof as required by law; to use the structure as a mixing room for the manufacture of inflammable mixture; the appellant contends that the roof he proposes is lighter weight and less dangerous in case of explosion than a concrete roof.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

## RESOLUTION:

(514-26-A)

WHEREAS, Croker National Fire Prevention Engineering for Charles Sussman, lessee, filed, June 5, 1926, an appeal from an order of the fire commissioner affecting premises 1584-1586 Fulton street, Borough of Brooklyn;

WHEREAS, the order of the fire commissioner (No. 514-26-F), reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at south and west sides of building, or other approved protection, as per Sec. 375, Article 18, Chapter 5 of the Code of Ordinances."

WHEREAS, the building is non-fireproof, 3 stories (43 ft.) in height, 40 ft. by 100 ft. in area; OCCUPIED: 1st story, manufacture of children's clothing, 23 persons; 2nd story, manufacture of children's clothing, 23 persons; 3rd story, ballroom; and

WHEREAS, the appellant contends that the exposure on the side is a one story building; the exposure on the south side is a two-story extension to a dwelling, and that there is no fire hazard; furthermore, the appellant contends that the building is 43 ft. in height (being only 3 ft. less of the limit where shutters would not be required); and

WHEREAS, there is a frame dwelling at the rear of these premises;

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

APPELLANT—John J. Gilmartin, for Phoenix Hermetic Company, owner.

## RESOLUTION:

(522-26-A)

WHEREAS, John J. Gilmartin, for Phoenix Hermetic Co., filed, June 8, 1926, an appeal from an order of the fire commissioner affecting premises 3718-3728 14th avenue and 1383 38th street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 1, 1926 (Order No. 75008-F), reads:

"Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with safety check valves and 2½ inch regulation Fire Department outlets on each story (including basements, attics and roofs), placed within main stairway enclosure. \* \* \*"

WHEREAS, the building is of reinforced concrete construction, 4 stories (60 ft.) in height, 116 ft. by 138 ft. 6 in., irregular in plan, about 17,500 sq. ft. in area; OCCUPIED for the purpose of manufacturing metal caps for jars; cellar, 25 persons; 1st story, 25 persons; 2nd story, 100 persons; 3rd story, 60 persons; 4th story, 50 persons; and

WHEREAS, the appellant claims that the building is equipped with an approved sprinkler system with a 35,000 gallon gravity tank and a 6,000 gallon pressure tank; that there is an interior fire alarm system installed with central office connections; furthermore, the appellant contends that the building is supervised by two watchmen, day and night; that the building faces three streets and in addition is open to yard at rear.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall be equipped throughout with an approved sprinkler system; and granted so long as the building shall be not increased in height or area; and that the use and occupancy of the premises for small metal products shall remain substantially unchanged.

Absent ..... 0

## THE RESOLUTION:

(525-26-A)

WHEREAS, National Rubber Cement Manufacturing Co., for I. M. Halpern, owner, filed, June 8, 1926, an appeal with the board of standards and appeal from an order of the fire commissioner, affecting premises 340 Hamilton street, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner (No. 98596-LC), reads:

"2. Provide glass bottles of a capacity not exceeding four ounces each, or metal cans of a capacity not exceeding one gallon each, the latter fitted with a screw top so made that the can will be air-tight when closed for inflammable mixtures.

"3. Submit a written statement to the fire department to the effect that label or can or bottle will bear the number of original permit or the number of Certificate of Approval."

and

WHEREAS, the building is non-fireproof, one story in height, 25 ft. by 50 ft. in area; OCCUPIED for the manufacture of rubber cement, 2 persons; and

WHEREAS, the appellant contends as to Item 2—that the present occupancy has been the same during the past eleven years; that the rubber cement is distributed in containers fitted with screw caps in cans of pint, quart, gallon and five-gallon sizes, and in steel drums of ten, fifteen and fifty-five-gallon sizes; furthermore, the appellant proposes to comply with Item 3 as soon as the new permit is issued.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

## THE RESOLUTION:

(529-26-A)

WHEREAS, William Porter, for Cornell Utilities Co., Inc., for Rapid Cutting Co., Inc., owner, filed, June 8, 1926, an appeal from a decision of the fire commissioner, affecting premises 284 North 6th street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered May 22, 1926 (Alt. Applic. No. 30-1926), reads:

"5. The use of grade B fuel oil is not permitted in commercial plants and residences of more than two families unless the room in which equipment is used is cut off from the rest of building by fireproof ceilings and floors. Such rooms must also have direct entrance from street only and be adequately vented direct to the outer air."

and

WHEREAS, the building is non-fireproof, one story in height, 100 ft. by 50 ft. in area; OCCUPIED for the manufacture of cardboard novelties, 20 persons; EQUIPPED with a fuel oil burning system consisting of a 500-gallon storage tank incased in concrete in the cellar, and a 55-gallon auxiliary tank on first story, connected by piping to an approved No-Kol oil burner; and

WHEREAS, the appellant claims that the fuel oil installation is separated from the rest of building by fireproof, self-closing doors; that the room is fireproof with the exception of the ceiling, which is of wooden beams, fire retarded with ½ in. gypsum boards; furthermore, the appellant contends that otherwise the fuel oil system complies with the rules of the board for the use of "B" oil; and

WHEREAS, during the presentation of the case at the hearing it was established that there is a vertical opening in the boiler room to the structure above.

*Resolved*, that the decision of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

## THE RESOLUTION:

(531-26-A)

WHEREAS, William F. Doyle, for Adolph Vogt, own filed, June 9, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 11-27 Ocean Parkway, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner (Order No. 89422-F), reads:

"1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 300 pounds per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation fire department outlets on each story including basements, cellars and roofs placed within main stairway enclosure

and

WHEREAS, the building is of frame construction, a partly of brick, 2 stories (30 ft.) in height, 161 ft. 3 in. 95 ft. and 170 ft. 5 in., irregular in depth at 1st story, 111 ft. 3 in. by 170 ft. 5 in. in depth at 2nd story; ab 21,600 sq. ft. in area at 1st story; OCCUPIED as a riding academy, reception hall, riding arena and stable for the accommodation of 100 horses; and

WHEREAS, the appellant claims that the main part floor spaces is used as a riding arena, the rest of floor space as a stable; the appellant contends that while the floor area exceeds the area prescribed for standpipe installation, occupancy does not warrant it; furthermore, that the building faces three streets and practically only one story height.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height, area or dimension; and *granted* so long as existing use and occupancy shall remain unchanged.

## THE RESOLUTION:

(539-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Estate of Robert Goellet, trustee, owner, filed, June 11, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 437-453 East 56th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 3, 1925 (Order No. 81580-F), reads:

"1. Provide a tank on roof of at least 3,500 gallons capacity for the standpipe system, said tank to be elevated that the bottom will be not less than 20 feet above the hose outlet of the highest story. Sec. 20-12, Code of Ordinances."

Order No. 81581-F:

# MINUTES

"2. Disconnect standpipe supply risers from sprinkler system. Sec. 20, Chapter 12, Code of Ordinances.";

WHEREAS, the building is fireproof, 4 stories (52 ft.) in height, 180 ft. by 78 ft. 1½ in., about 12,500 sq. ft. in area on 1st story and 11,675 sq. ft. in area above; OCCUPIED for the manufacture of automobile bodies: 1st story, office and repair shop, 15 persons; 2nd story, auto service, 10 persons; 3rd and 4th stories, auto body building, 15 persons on 3rd story; EQUIPPED with a sprinkler system fed from a standpipe in connection to the 56th street main, a 30,000-gallon water tank 30 ft. above the roof with two siamese connections (one on each street front), also a standpipe system consisting of two 4-inch standpipe risers (one in each stair case) with two siamese connections (one on each street front); the sprinkler and standpipe systems are both fed from the 30,000-gallon tank on the roof; and

WHEREAS, the appellant claims that the floor area of the building is divided on each story by fireproof partitions so that the largest open floor area on 1st and 2nd stories is 10,000 sq. ft.; on the 3rd story, 6,700 sq. ft.; on the 4th story, 9,500 sq. ft.; the appellant contends that the above divisions only slightly exceed those in a building where standpipes are not required by law.

Resolved, that the order of the fire commissioner be and the same be affirmed, and the appeal be and it hereby is affirmed.

## RESOLUTION:

(1212-25-A)

WHEREAS, Capitol Theater Company, Inc., lessee, filed, on March 21, 1925, an appeal from a decision of the fire commissioner, affecting premises 280 Broadway, Borough of Richmond (West New Brighton); and

WHEREAS, the decision of the fire commissioner, rendered on March 12, 1925 (Alteration Application No. 1969-1925),

Resolved, that the decision of the fire commissioner be and the same be modified and the appeal be and it hereby is affirmed for the operation of this plant for a period of 90 days on condition that the installation conform with the fuel oil rules in all other respects.

WHEREAS, the building is fireproof, one story and balcony, 50 ft. 8 in. by 124 ft. in area; OCCUPIED as a picture theatre; and

WHEREAS, there has been installed a fuel oil burning system consisting of a 500-gallon oil storage tank, buried outside the building, a 30 gallon auxiliary tank, a Homer oil burner and necessary valves and piping to make a complete installation; and

WHEREAS, this appeal was previously withdrawn and refiled on request of Homer Oil Burner Corp.; and

WHEREAS, appellant requests a temporary permit for operation of the oil burning installation, pending the approval of the board;

Resolved, that the decision of the fire commissioner be and the same be modified and the appeal be and it hereby is affirmed for the operation of this plant for a period of 90 days on condition that the installation conform with the fuel oil rules in all other respects.

## BUILDING ZONE CASES.

APPLICANT—John J. Dunnigan, for Pasquale Fiore, owner.

SUBJECT—Application (re decision of the supt. of bldgs.) under sections 7c and 21 of the building zone resolution, to permit in a business district extending from an unrestricted district the erection and maintenance of a factory building.

PREMISES AFFECTED—460-468 Southern Boulevard, The Bronx.

### APPEARANCES—

For Applicant: J. F. Dusenberry.

For Opposition: None.

ACTION OF BOARD—Laid over to October 5, 1926, at 10 a. m., on request of applicant's representative. (For final disposition.)

199-26-BZ.

APPLICANT—William F. Doyle, for Hyman Greenberg, owner.

SUBJECT—Application for reopening, reconsideration, (re decision of the tenement house commissioner) under sections 7c and 21 of the building zone resolution, to permit in an "F" area district extending from a "C" area district, the erection and maintenance of a tenement house with the area of lot occupied, yard and courts designed as required by the zone resolution for a "C" area district.

PREMISES AFFECTED—S. W. corner of Forest Parkway and Ruth place, Woodhaven, Borough of Queens.

### APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: Edward C. Morsch.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

### THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin ..... 5

Negative: ..... 0

Absent ..... 0

## THE RESOLUTION:

(199-26-BZ)

WHEREAS, William F. Doyle, for Hyman Greenberg, owner, filed, March 9, 1926, an application, under the building zone resolution, to permit in an "F" area district, extending from a "C" area district, the erection and maintenance of a tenement house with the area of lot occupied, yard and courts designed as required by the zone resolution for a "C" area district; premises southwest corner of Forest Parkway and Ruth place, Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting,

# MINUTES

September 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Forest Parkway "F" area district extending to a line 100 ft. east and west, 85th Drive (Ruth Place) "C" area district extending westerly from a line 100 ft. west of Forest Parkway, are in residence use districts; and

WHEREAS, the decision of the Tenement House Commissioner, rendered February 2, 1926, N. B. 93-1925, reads:

"4. As area of this district has been changed from a "C" to an "F" district and proposed building does not comply with all the requirements of the Zone Law.";

and

WHEREAS, the proposed building is of non-fireproof construction, 6 stories in height, with a frontage of 151.08 ft. and a depth of 100.06 ft. and 157.9' ft., irregular, to be occupied as a tenement house; and

WHEREAS, the original application was denied by the board June 16, 1926; reopened July 27, 1926, for reconsideration; the applicant now proposes to erect a six-story instead of a four-story building with the condition that the building will be set back from the street line 10 ft.; the applicant has filed block plans showing the new proposition, also ten additional consents of property owners within the area affected; and

WHEREAS, permits were issued by the tenement house commissioner for the erection of a 4 story building prior to the change in the area district; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7-c of the building zone resolution and that it would entail practical difficulties and unnecessary hardship to comply with the strict letter of the zoning regulations.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the area district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the proposed building shall be limited in height to a six-story apartment house structure, the front elevation on Forest Parkway to set back not less than ten feet from the established building line on Forest Parkway throughout the entire front; that the southerly and westerly gable walls shall be finished with light colored face brick, with natural stone or marble sills; that the front elevation shall be of attractive design, finished in face brick or natural stone; that elevators shall be installed sufficient to accommodate the tenancy of this proposed structure; that a return drawing of elevation of first story plans shall be made to this board for approval before submitting same to the superintendent of buildings; that the building shall be constructed in accordance with the tenement house law; that the requirements of the zoning resolution shall be complied with in all other respects; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

664-26-BZ.

APPLICANT—Rouse & Goldstone, for A. B.-28 East 52nd Street Corp., owner.

SUBJECT—Application (re decision of the supt. of bldgs.) under section 7 (c) of the building zone resolution, to permit the extension from a business district into a residence district of a proposed business building.

THE RESOLUTION:

(664-26-BZ)

WHEREAS, Rouse & Goldstone, for A. B.-28 East Street Corporation, owner, filed, July 30, 1926, an application under the building zone resolution, to permit the extension from a business district into a residence district of a proposed business building; premises 28-36 East 52nd street 481 Madison ave. (southeast corner), Manhattan; and

WHEREAS, a public hearing was held on this application the board of standards and appeals, at its regular meeting September 30, 1926, after due notice by publication in Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Madison ave. is in a business district, East 52nd street is in a residence district and East street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings rendered July 19, 1926, re: N. B. 341-1926, which reads:

"1. Building encroaches into residence district, contrary to the provisions of Section 3 of Building Resolution.";

and

WHEREAS, the proposed building is of fireproof construction, 28 stories in height, with a frontage of 100 ft. and a depth of 124 ft. 6 in., to be occupied as a business building; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7-c of the building zone resolution and that it would entail practical difficulties and unnecessary hardship to carry out the strict letter of the zoning regulations.

*Resolved*, that the board of standards and appeals hereby *make a variation* in the application of the area district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that there shall be no business exits or entrances within the residence use area of the premises; that there shall be no advertising display of any nature or description, signs or otherwise, within the residence use area; that the sills of windows within the residence area shall be not less than 6 in. above grade; that the rear walls where exposed adjoining and abutting premises shall be finished with light colored face brick; that the requirements of the building zone resolution shall be complied with in all other respects as to height, area, rear yard requirements and side setbacks; that all permits necessary for the prosecution of the work shall be obtained in nine months and the building completed within eighteen months from the date of this action.

675-26-BZ.

APPLICANT—Weinberger and Weishoff, Inc., for Broadway Corp., owner.

SUBJECT—Application (re decision of the supt. of bldgs.) under sections 7e and 7c of the building zone resolution, to permit partly in a residence district and partly in a business district the extension and extension in height of a garage for storage of more than five (5) motor vehicles.

## THE RESOLUTION:

(675-26-BZ)

WHEREAS, Weinberger & Weishoff, Inc., for 4172 Broadway Corporation, owner, filed, July 31, 1926, an application, under the building zone resolution, to permit partly in a residence district and partly in a business district, the alteration and extension in height of a garage for the storage of more than five motor vehicles; premises 4172 Broadway, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Broadway is in a business district, West 176th street is in a residence district and West 177th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 24, 1926, Alt. 1493-1926, reads:

"1. Proposed addition to garage is unlawful in a business or residence district unless use is changed to a use permitted in these districts; Art. 11, Building Zone Resolution.

"2. Proposed addition in height is contrary to conditions under which original approval was granted, viz.: that building be restricted in height to four stories.";

and

WHEREAS, the existing building is of fireproof construction, four stories in height, with a frontage of 103 ft. 11¼ in. and a depth of 156 ft. 4¾ in., and 127 ft. 9 in., irregular, to be occupied as a garage; and

WHEREAS, a variation of the building zone resolution was granted by the board under Cal. No. 858-24-BZ for the erection of a four story building on this site; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7-c and 7-e of the building zone resolution and that it would entail practical difficulties and unnecessary hardship to carry out the strict letter of the zoning resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted*, as to the erection of the two-story addition, *on condition* that the requirements of the zoning law otherwise shall be complied with; that all permits necessary for the prosecution of the work shall be obtained within six months and the building completed within eighteen months from the date of this action; that the conditions of the original resolution otherwise shall be complied with in all respects.

Adjourned 2:15 P. M.

WILLIAM J. O'GORMAN, *Secretary*.

365-26-S.

PETITIONER—Luke Flanagan, for Max Teitelbaum, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—21-23 Bleecker street, Manhattan.

APPEARANCES—

For Petitioner: Luke Flanagan.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative: .....	0
Absent .....	0

### THE RESOLUTION:

(365-26-S)

WHEREAS, Luke Flanagan, for Max Teitelbaum, owner, filed, April 26, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner affecting premises 21-23 Bleecker street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 20, 1926 (No. 93073-LD), reads:

# MINUTES

"1. Provide an additional means of egress from basement and from first story, same to be located at rear of building as per Section 271 of the Labor Law.

"2. Remove the substandard fire escape on the rear of building or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals, adopted May 9th, 1924.

"Among the defects noted are the following:

"Windows on course not fireproof, self-closing."

and

WHEREAS, the building is non-fireproof, 3 stories in height, 40 ft. by 54 ft. in area; separated into two sections by a fore and aft 6-inch hollow tile wall with openings therein on each story; OCCUPIED: basement, storage of furs and show room, 3 persons; 1st story, storage of furs and show room, 4 persons; 2nd story, manufacturing furrier, 8 persons; 3rd story, manufacturing furrier, 4 persons; EXITS: an interior wooden stairway, extending from the 1st story to top story; enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the front of the building, having openings along the course thereof, extending from the top story to the 2nd story balcony with counter-balanced ladder to street; a substandard fire escape on the rear of the building, extending from the 3rd story to the extension roof of building No. 23 Bleecker street with gooseneck ladder from extension roof to main roof of No. 21 Bleecker street; ROOFS of adjoining buildings to west, same height; to east, 3 stories higher; and

WHEREAS, petitioner contends that no manufacturing is done on the basement or on the 1st story; and that the substandard fire escape would be helpful to the fire department, and requests the acceptance of the existing means of egress.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* as to item 1 *on condition* that a gooseneck ladder shall be provided from the top story balcony of the existing rear fire escape to the roof; that a party wall fire escape balcony shall be provided at the first story level with egress thereto from each section of the building; and a drop ladder in guides shall be provided from such balcony to the yard; that the fire escape shall be maintained structurally safe; that one window in each section at rear shall be cut down to door opening, with egress direct to the yard; that an opening shall be provided and maintained from this yard to the adjoining premises to the west.

500-26-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for Wm. Wise & Son, Inc., lessee.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—440 Fulton street, Brooklyn.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative: .....	0
Absent .....	0

THE RESOLUTION:

(500-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Mrs. Rosa Abrahams, owner, filed, June 2, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the fire commissioner, affecting premises No. 440 Fulton street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated May 1, 1926, reads:

"Replying to your letter of the 29th ult. requesting information regarding the requirements of this Department in the event of the above premises being occupied for manufacturing purposes you are hereby advised as follows:

"Arrange the fire escape on the rear of building as per Section 271-3 of the Labor Law and the rules of the Board of Standards and Appeals.

"Note: Defects.

"No stairway to roof. No safe passageway from termination of fire escape to street."

and

WHEREAS, the building is non-fireproof, 4 stories in height, 25 ft. 8½ in. by 100 ft. in area; OCCUPIED: 1st story, salesroom, 12 persons; 2nd story, salesroom, 8 persons; 3rd story, offices, 10 persons; 4th story, jewelry repair shop, 2 persons; EXITS: an open interior wooden stairway, extending from the 1st story to roof; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from 3rd story to the 4th story a balcony on the 2nd story, a gooseneck ladder to the roof; no legal means of egress from the termination of the fire escape. ROOFS of adjoining buildings: one story lower to west, same level at east; and

WHEREAS, the petitioner proposes to install a sprinkler system and a fire alarm system, also to provide stairway from 2nd and 3rd story fire escape balconies to the adjoining extension roof at south from which egress may be had through the 3rd story rear windows of adjoining buildings facing Fulton street and Hoyt street.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* *on condition* that the building shall be not increased in height that it be equipped with a wet sprinkler system and fire alarm signal system; that a 60-degree connecting stairs shall be provided from the existing third story balcony to the roof of the adjoining extension to the south, egress from which may be had to the next adjoining building to the south and to the west; that a 60-degree stairway shall be provided from the lowest level at the rear to the roof of the adjoining extension to the south, separate from the existing fire escape and *granted* so long as conditions as to occupancy and use remain substantially unchanged.

501-26-S.

PETITIONER—Charles H. Gillespie, for Lulu Henning, owner.

SUBJECT—Variation of the labor law as cited in order of the superintendent of buildings.

PREMISES AFFECTED—130 West 45th street, Manhattan.

THE RESOLUTION:

(501-26-S)

WHEREAS, Charles H. Gillespie, for Lulu Henning, owner, filed, June 2, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises No. 130 West 45th street, Borough of Manhattan; and

# MINUTES

WHEREAS, the decision of the superintendent of buildings, dated April 12, 1926 (Alt. Applie. No. 630-26), reads:

"Provide safe passageway to the street in accordance with Section 273 of the Labor Law.";

and  
WHEREAS, the building is non-fireproof, 4 stories in height, 20 ft. by 65 ft. in area; OCCUPIED: Cellar, boiler and storage; 1st floor, show room, 10 persons; 2nd floor, dressmaking, 20 persons; 3rd floor, dressmaking, 20 persons; 4th floor, private apartment, 1 family; EQUIPPED with a fire alarm system, the means of egress consisting of an interior stairway extending from the 1st story to 4th story, with scuttle and iron ladder to the roof, enclosed in wood stud lath and plaster partition, with fireproof, self-closing doors at the opening and fire escape on the rear of the building, with stair and landing to roof; a stationary stair from lowest balcony to the yard, with egress from yard by gate in fence to adjoining yard on the west, with fireproof windows along the course of the fire escape; and

WHEREAS, petitioner contends that permission has been obtained from the owners on the west for use of their building as a means of egress.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as egress from the termination of the fire escape is concerned, on condition that an opening shall be provided from the rear yard to the adjoining premises to the west and that an affidavit of consent from owner of adjoining premises shall be filed with the superintendent of buildings; and that the fire escape shall comply with the labor law in all other respects.

26-S.

PETITIONER—George M. Wood, for estate of Peter D. Strauch, lessee.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner.

PREMISES AFFECTED—22-26 10th avenue, Manhattan.

APPEARANCES—

For Petitioner: George M. Wood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE RESOLUTION:

(281-26-S)

WHEREAS, George M. Wood, for Estate of Peter D. Strauch, lessee, filed, April 3, 1926, a petition for variation of the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises Nos. 22-26 Tenth avenue, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated July 5, 1926, read (Order No. 82126-LD):

"1. Remove the substandard fire escape on the front of the building or reconstruct same as per Section 274 of the Labor Law and Rule 3, Board of Standards and Appeals, adopted May 9th, 1924; NOTE:—Among the defects noted are the following:

"Windows on course not fireproof self-closing. No scuttle ladder in guides from lowest balcony to ground.

"2. Enclose both interior stairways serving as required means of exit and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending from 1st story and including the bulkhead on the roof, constructed as per Section 271 of the Labor Law and Rule 1, Board of Standards and Appeals, adopted July 29th, 1924.

"3. Extend the interior stairways at north and south sides of building to the roof, as per Section 271 of the Labor Law, said extension and the landings and passageways connecting therewith to be enclosed on all sides with partitions of fire resisting material extending at least 3 ft. above the roof, as per Sections 271 and 272 of the Labor Law and Rule 2 of the Industrial Code. SEE NOTE."

(Order No. 82129-LF)

"1. Install an adequate interior electric fire alarm system in accordance with the Rules of Board of Standards and Appeals and the enclosed approved layout.";

and  
WHEREAS, the building is non-fireproof, 4 stories, 75 ft. by 75 ft. in area. OCCUPIED: First floor, wholesale meat business, storage; 2nd floor, storage of meat and office, 4 persons; 3rd floor, business, wafer crackers, 20 person; 4th floor, polishing pianos, 2 persons. EXITS: An interior stairway extending from the 1st story to 4th story at the southerly corner of the building, enclosed in wood partitions with wood doors at the openings; a sub-standard fire escape on the front of the building, with landing on a galvanized shed over the 1st story with drop ladder from shed to street; a horizontal exit at the front of each story leading into a brick enclosed stairway of buildings Nos. 28 to 30, with fireproof self-closing doors at the openings; a horizontal exit at the rear in each story, leading to buildings Nos. 28 to 30, with fireproof self-closing doors at openings; ROOFS of adjoining buildings are 5 feet lower at the south and 15 feet lower at the east; and

WHEREAS, petitioner contends that the means of egress are adequate for the small number of persons employed.

Resolved, that the orders of the fire commissioner be and they hereby are affirmed, and the petition be and it hereby is denied.

511-26-S.

PETITIONER—Chester James Storm, for Eljack Realty Corp., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—440-448 Ninth avenue and 336-378 West 35th street, Manhattan.

THE RESOLUTION:

(511-26-S)

WHEREAS, Chester James Storm, for Eljack Realty Corporation, owner, filed, June 4, 1926, a petition for variation from the requirements of the labor law, as cited in decision of the superintendent of buildings, affecting premises 440-448 Ninth avenue and 336-378 West 35th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered March 27, 1926, re: N. B. Applic. 49-1926, reads:

"It is proposed to have the glass area in the show window of the 1st, 2nd and 3rd stories, facing streets, of a glass area in excess of that required by labor law.

"This amendment is disapproved with the following objection: (Dated, March 29, 1926.)

"Proposed amendment is unlawful, Section 264-7-e of labor law.";

and

WHEREAS, the building is fireproof, 18 stories in height, 198 ft. 10 1/2 in. by 98 ft. 9 in. in area; OCCUPIED, show rooms and factory; 1st and mezzanine floors, 125 persons;

# MINUTES

second to 18th floor, 240 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; means of EGRESS consisting of one interior fireproof stairway extending from first story, and one fire tower; and

WHEREAS, petitioner proposes to construct show windows on the 1st, 2nd and 3rd stories on the front of the building of metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, the maximum area of glass to be, on first story, 72 sq. ft., on second story, 52 sq. ft., and on third story, 52 sq. ft.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects the windows on the street fronts of the three lower stories on condition that all openings shall be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

523-26-S.

PETITIONER—Samuel Rosenblum, for Otto Volkening, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—347 East 102nd street and 1981-1985 First avenue, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum, Otto Volkening.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE RESOLUTION:

(523-26-S)

WHEREAS, Samuel Rosenblum, for Otto Volkening, owner, filed, June 8, 1926, a petition for a variation of the labor law as cited in order of the fire commissioner, affecting premises 347 East 102nd street and 1981-1985 First avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, No. 96062-LD, dated May 13, 1926, reads:

"1. Provide an additional required means of exit, remote from the existing stairway from the 1st and 2nd stories in accordance with the requirements of Rule 3 of the Board of Standards and Appeals, adopted July 29, 1924.";

and

WHEREAS, the building is non-fireproof, 2 stories in height, 60 ft. by 60 ft. in area. OCCUPIED: 1st story, stores; 2nd story, dressmaking and storage, 25 persons; means of EGRESS consisting of an interior wooden stairway extending from 1st to 2nd story with iron ladder to scuttle in the roof; and

WHEREAS, petitioner contends that there is available directly in front of the building at the level of the 2nd story a corrugated steel stationary awning resting on columns, which covers the entire frontage, both on 102nd street and on First avenue, continuing in front of three other buildings along First avenue to 103rd street; that there are nine windows on the First avenue front leading to this steel awning; and petitioner further contends that the means of egress are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted

on condition that a party wall fire escape balcony shall be provided on the First avenue front, northerly end, at 2nd story connecting with the next adjoining premises to the north, separated from these premises by an unpierced brick wall; and granted only so long as the building shall be not increased in height or area, and the occupancy remains unchanged.

252-26-S.

PETITIONER—Julius Eckmann, for Darby Realty Corp., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—511-513 West 51st street Manhattan.

APPEARANCES—

For Petitioner: Julius Eckmann, Mr. Pewtress.

THE RESOLUTION:

(252-26-S)

WHEREAS, Julius Eckmann, for Darby Realty Corporation, owner, filed, March 24, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 511-513 West 51st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 7, 1925, reads (Order No. 83581-LD):

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, 5 stories in height, 45 ft. by 90 ft. in area; OCCUPIED as laundry, 25 persons per story; EQUIPPED with a fire alarm signal system; EXITS: An interior wooden stairway, extending from the 1st story to top story; enclosed in wooden partitions with wooden doors at openings; also an interior wooden stairway at the easterly side of the building, extending from the 1st story to the roof, enclosed in fire resisting partitions with fire doors at openings; a 60 degree fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the rear yard; with EGRESS from the termination of the fire escape by means of a door, in the fence, leading to the yard to the west of ROOFS of adjoining buildings, to west 25 ft. lower; and

WHEREAS, petitioner contends that the fire escape complies with the labor law, excepting as to egress from the termination and requests that the existing means of egress be accepted as adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects the egress from the termination of the fire escape on the rear on condition that an opening shall be provided in the fence to the rear yard of the premises to the west, with egress through the adjoining tenement houses to the west, and that a portable drop-ladder, chain to the parapet, shall be provided, and maintained on the roof of the first story extension at the rear, and that the fire escape shall comply with the requirements of the labor law in all other respects.

**THE RESOLUTION:**

(998-25-S)  
**WHEREAS**, Croker National Fire Prevention Engineering Co., for Feld, Franken Co., lessee, filed, September 29, 1925, petition for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises 270-276 West 38th street and 554-558 Eighth avenue, Borough of Manhattan; and  
**WHEREAS**, the order of the fire commissioner, dated June 1925 (Order No. 80775-LD), reads:  
 "1. Remove all partitions not built of incombustible material, as per Sections 262 and 270 of the Labor Law.";

**WHEREAS**, the building is fireproof, 20 stories in height, 8 ft. 3 in. by 98 ft. 9 in. in area; OCCUPIED: 1st story, offices; upper stories, offices, show rooms and manufacturing, approximately 50 persons per story; petitioner occupies a part of the West 38th street front of the 8th story for offices, show rooms and manufacturing women's coats. EQUIPPED with a sprinkler system and a fire alarm system; EXITS: two interior fireproof stairways extending from the 1st story to roof, enclosed in fireproof partitions and fire doors at openings; and

**WHEREAS**, petitioner contends that the office, show rooms and sample rooms are enclosed in 7-ft. high ornamental partitions and are so arranged as not to interfere with the sprinkler system; and requests that these partitions be permitted to remain and proposes to remove all other combustible partitions; and

**WHEREAS**, this petition was denied by the board at its meeting, June 22, 1926, and lessee, through his attorney, J. Dwyer, requested a reopening of the case and a variation of the labor law as to certain partitions.

**Resolved**, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted only so far as it affects the interior decorative wood finish of the room, office and sample room, on the show room side, on condition that the wood trim be backed up solidly with partitions of approved fireproof construction from the floor to ceiling, and that all other wood partitions on this floor shall be removed and that the requirements of the labor law be complied with in all other respects; and denied the petition as to any other inside wood partitions.

(114-26-S)  
**WHEREAS**, Sugarman and Berger, for 63 Prince Street Corp., owner, filed, February 10, 1926, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises 63-65-67 Prince street, Borough of Manhattan; and  
**WHEREAS**, the decision of the superintendent of buildings, rendered January 22, 1926 (N. B. Applic. No. 415-1925), reads:

"1. All windows should conform to Section 264 of Labor Law. No pane in windows may exceed 720 sq. inches.";

and  
**WHEREAS**, the building is fireproof, 15 stories in height, 84 ft. 9 in. by 143 ft. 4 in. in area; OCCUPIED as a tenant factory, 120 persons on each story; and

**WHEREAS**, the petitioner proposes to install plate glass windows set in metal frames on the two street fronts, the maximum size: 1st story, 10 ft. by 9 ft. 5 in.; 2nd story, 4 ft. 6 in. by 6 ft. 2 in.; the petitioner contends that the windows under this petition will be used as shop windows; and
